AIM FOR THE MOON
NIMBUS

DESIGN
Light fins and cone-shaped nose to reduce drag and improve stability.

INNOVATION
Double parachute system to guarantee a secure deployment system.

SAFETY
No dangerous materials, metals or sharp edges have been included.

SUSTAINABILITY
Recycled material has been used for an environment friendly product.

TEAM WORK
5 nationalities worked together to come up with a storm of ideas and a unique water rocket in 3 days.

WHAT DID WE LEARN?
This project allowed us to apply our engineering skills and at the same time it taught us how to work within a multicultural team.
