Building Transformation Project

- Upcoming master students work in groups in transforming an old Zoetermeer building into a more sustainable one
- Areas of interest include energy efficiency, architectural design, sustainable materials, water and waste management as well as quality of life

Welkom in Zoetermeer!

- To welcome all international students to Zoetermeer University and encourage social networking many activities including food, sports, lectures and getting to know your new neighbourhood
- The project work is integrated with all the various welcome activities with roughly five hours of work per day
