Rescue Meal smartphone app is the ideal way to quickly enable people to share food and meals. When international students are new to their city and during their stay they often arrive late in the evening, have an empty fridge and don’t know anyone yet. With the help of Rescue Meal students can either offer or look for a meal to share in their area. This way new students don’t have to go to bed hungry and at the same time meet new people and make a lot of friends.
