Sustainability in Zwolle

New international students are coming to Zwolle to study about sustainability. But...how much do they know each other’s cultures? And how much do they know about what SUSTAINABILITY means?

To encourage the students to get to know each other and the city, we divide the new students in groups of mixed nationalities. Every student chooses a place in the city that is related to their own countries. They visit the places and tell the rest of the group about their cultures.

With “Sustainable Zwolle”, the new sustainable app, they can assess and discuss together the sustainability of each location. In the app, they can define their own criteria for sustainability, and establish a future network for zwollians to evaluate their buildings.
