This is not a Rocket

Introduction
Rockets are mainly built to explore space and make scientific discoveries.

Our NON-ROCKET was not developed for scientific reasons at all but to build friendship and explore different nationalities and cultures.

Method
A bit of trial and error

Results

Innovation
Simple and passive release mechanism

Creativity
7 magnificent minds managed to develop a beautifully shaped creature to show aliens the existence of humanity

Sustainability
Recycle Materials
- Old plastic bottles
- Cardboard
- Plastic bag (not so old)
- Water
- String

Energy
- Pure muscle energy

Discussion
Irrespective of the scientific results, the primary purpose of the assignment, to built friendship, was accomplished! (see the picture above)

SO this is not a Rocket but the beginning of an exciting multicultural experience at the TU Delft
