International Food Experience

• Mix all students in groups of four or five
• Every group should choose a nationality
• They also choose a dish they want to present
• They try to find all ingredients in Dutch shops according to a map
• They prepare the food in their respective multi-cultural team
• They present the food
This is what we learned

• Everybody is equally integrated
• We discovered a part of other countries
• Easy to implement next year
Thank you for your attention!
