

Digital Solutions for a Circular Façade Economy

A conceptual framework for a Façade's Product Passport to facilitate decision making at the End of Service (EoS) of a Building Façade.

Abhishek Holla | 5109906

Mentor Team

Dr. Michela Turrin

Next Steps

Research Framework

Facade Product passports

EoS Assessment

Demonstrations

Conclusions

NEXT STEPS

Façade Product Passports

- Prototype and test data structure for all materials and components in CiTG Façade
- Test other Building Facades which have lower quality information
- Create a conceptual information model

NEXT STEPS

Façade Product Passports

- Prototype and test data structure for all materials and components in CiTG Façade
- Test other Building Facades which have lower quality information
- Create a conceptual information model

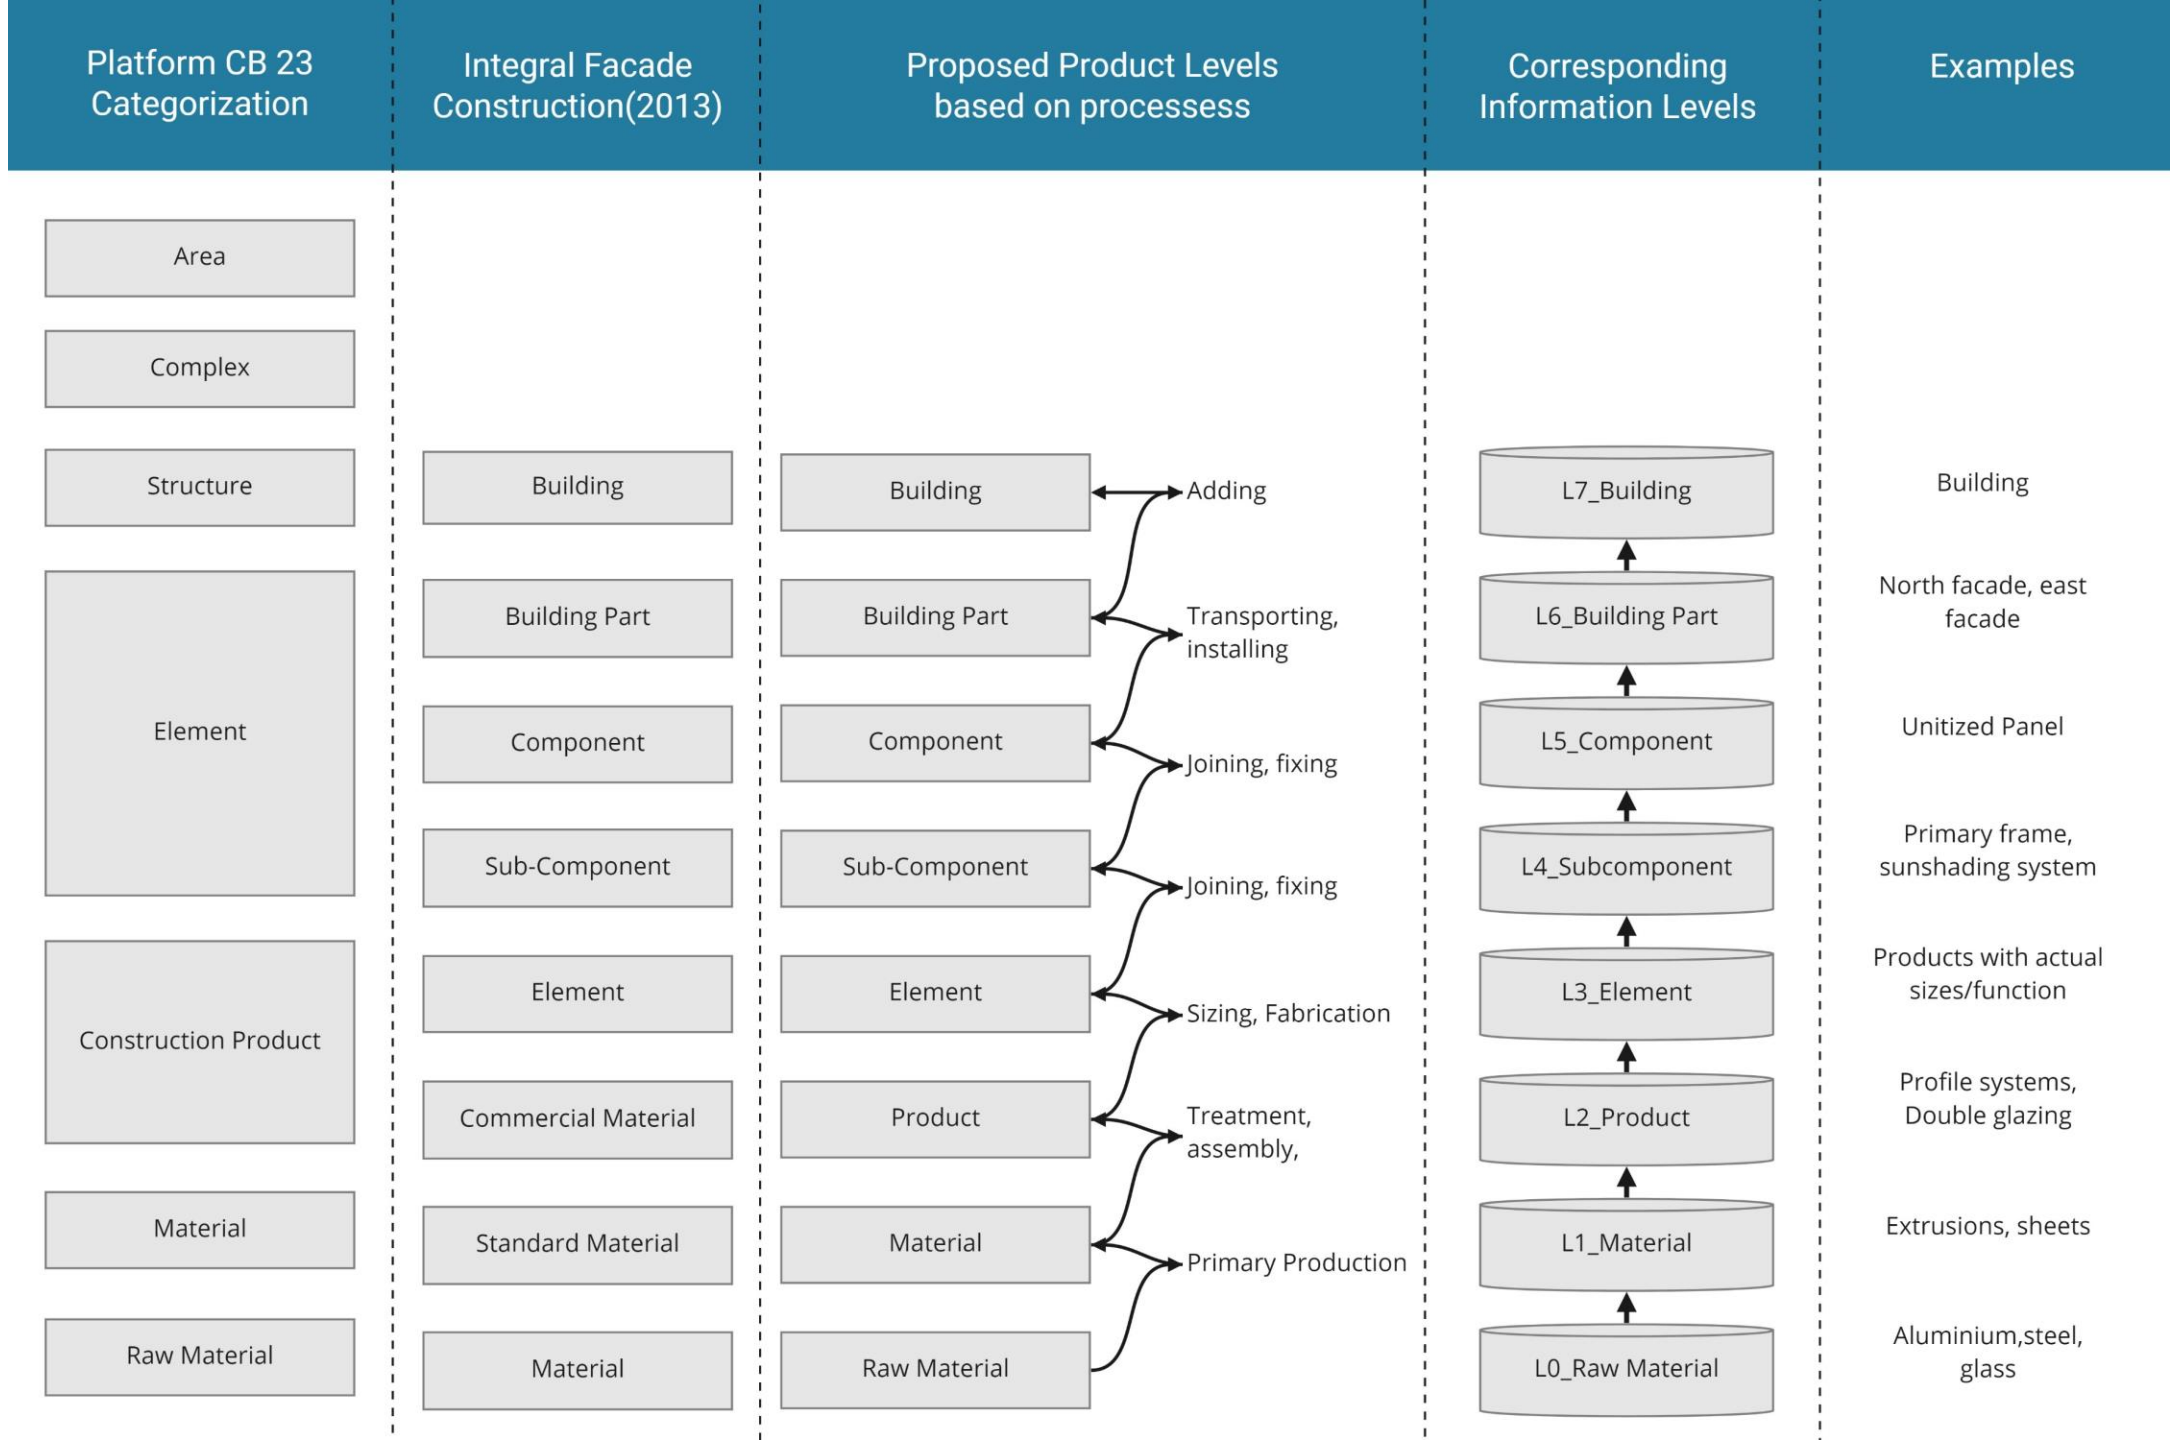

EoS Assessment platform

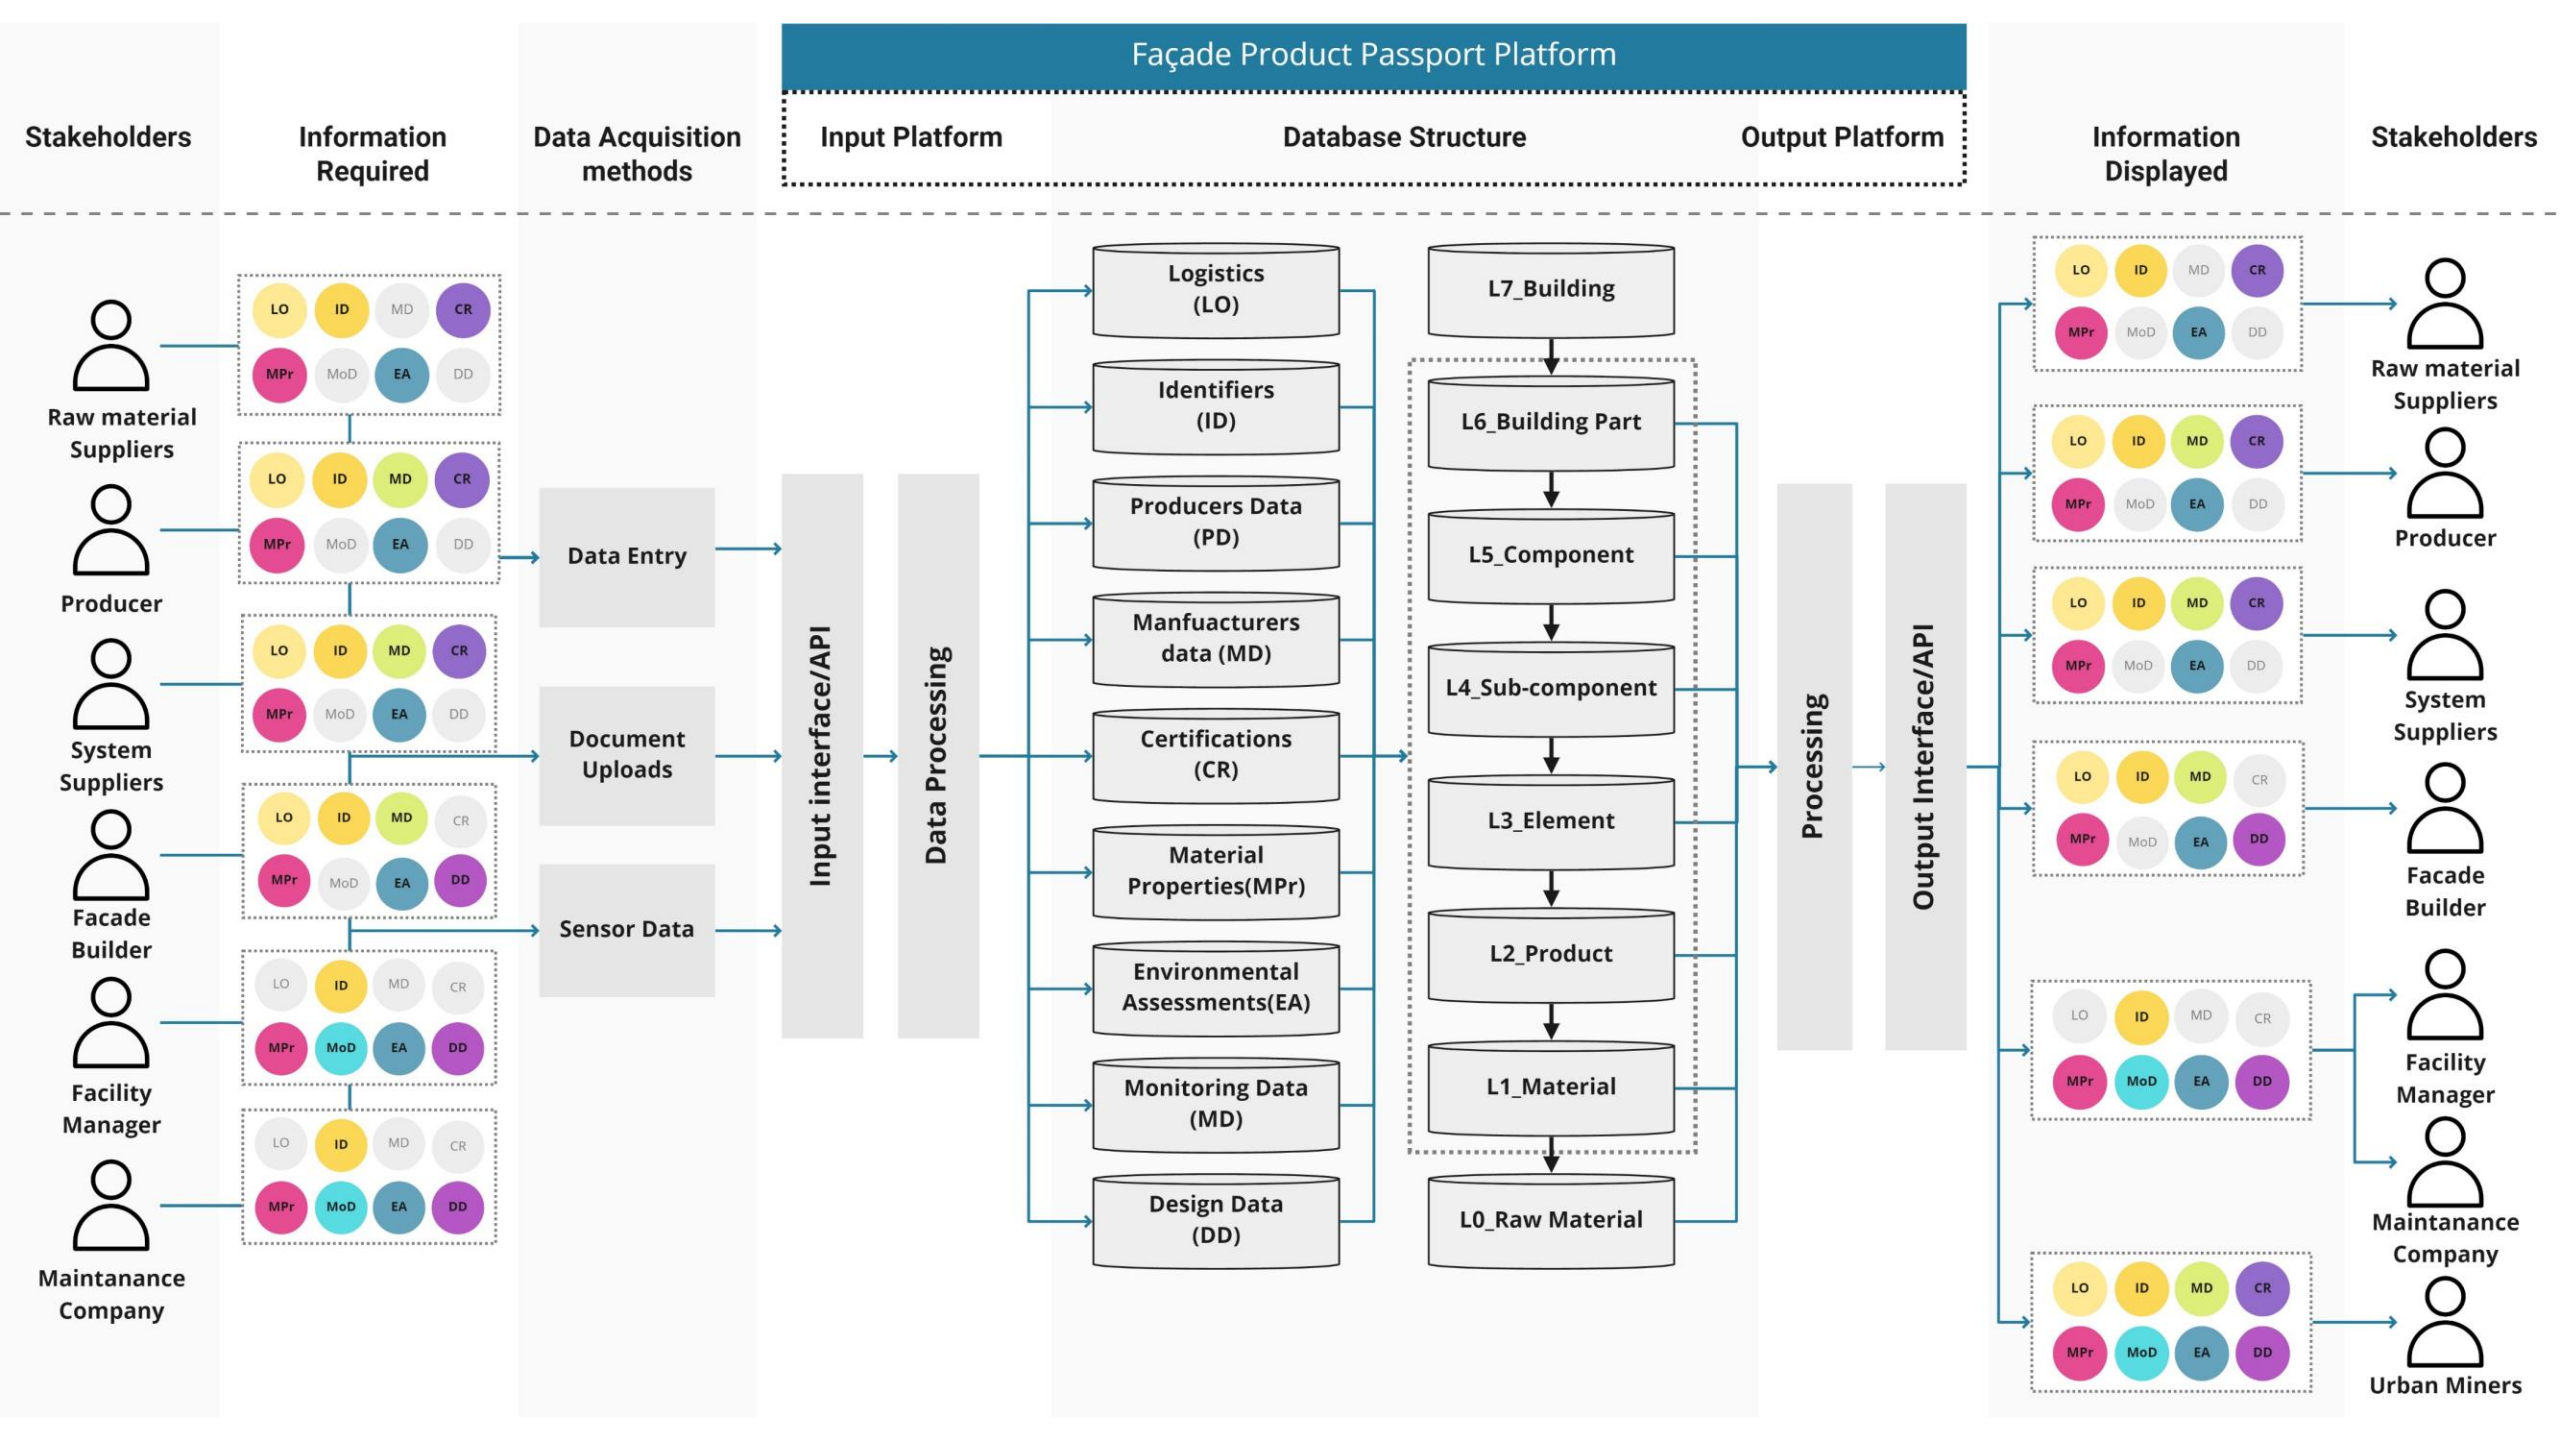

- Testing and validating with other unitized facades
- Frameworks for other typologies.
- Integrate into a Product passport and EoS Assessment tool

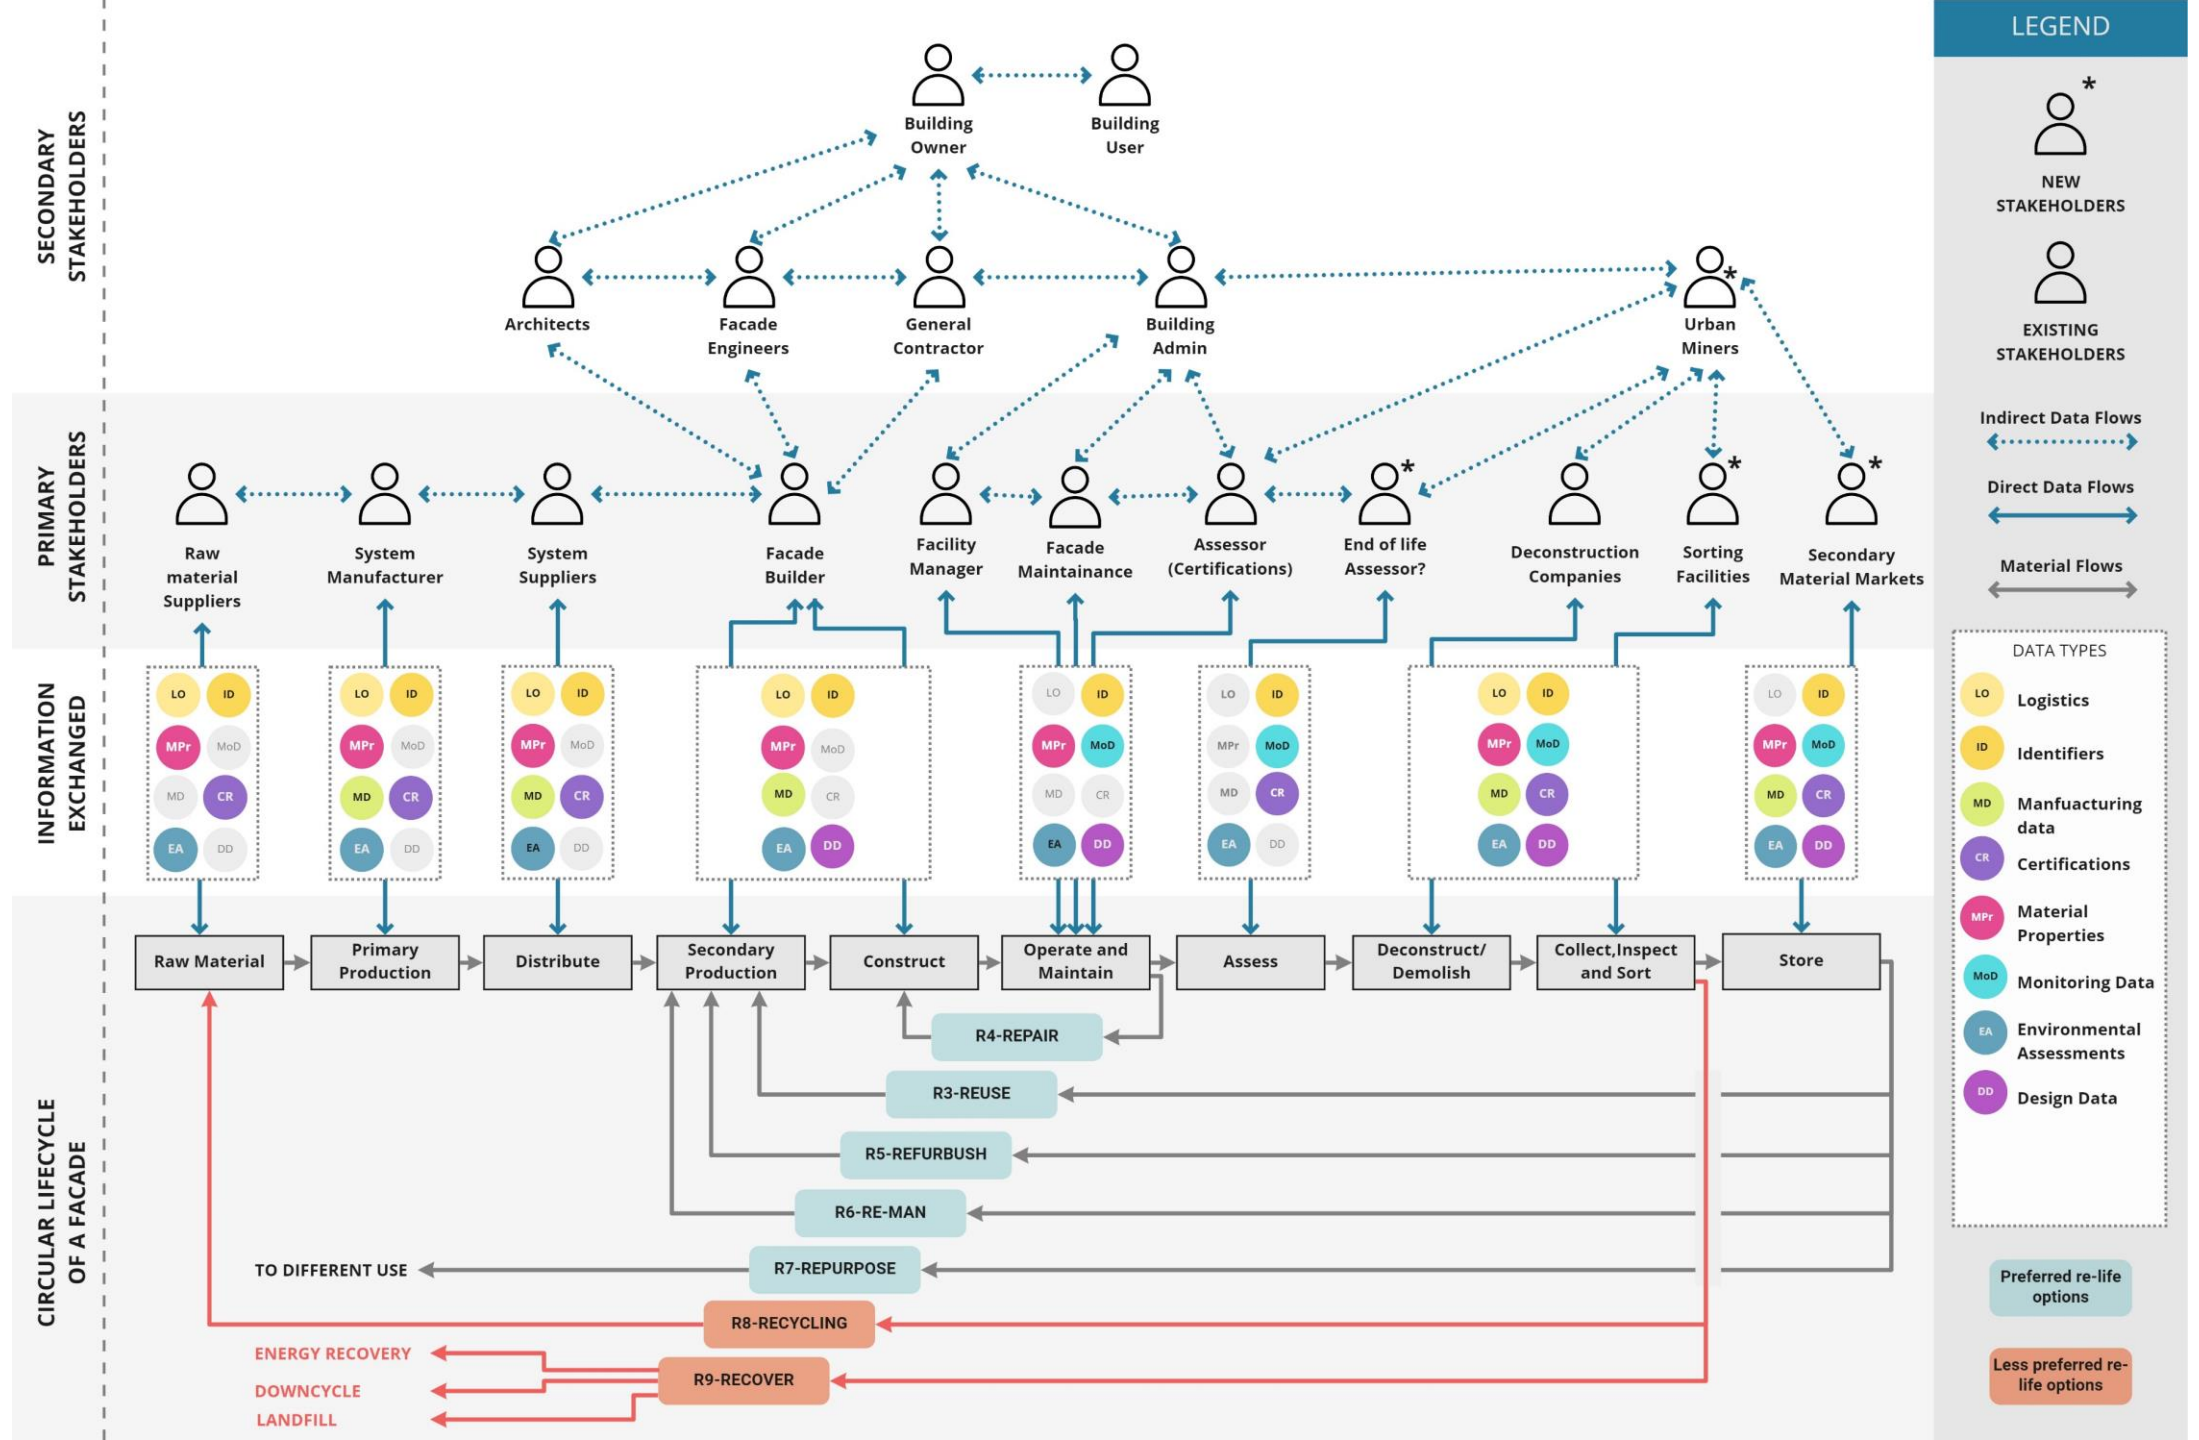

Thank you!
