

P5 Presentation | Methods & Analysis

Urban Amplifiers

Alexander Petrounine

4 july 2019

Francis Alys, London Fences (2006)

Transforming a musical activity into a means of urban exploration

Through **music** and **rhythm**, the musical-percussive activity transformed into a means of **urban exploration**. The fences, the walls, the streets, the dogs, turned into a **found musical instrument**.

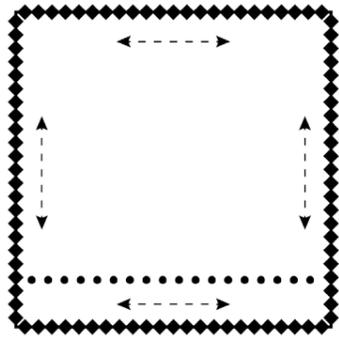

The Unapparent

/ʌnə'pɑr(ə)nt/

- Not readily perceptible; not apparent
- Not visible or in evidence
- Dormant, quiescent, inactive, untapped, unused

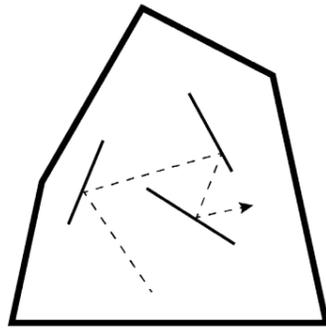

Soundscapes

How can surrounding sounds be made apparent?

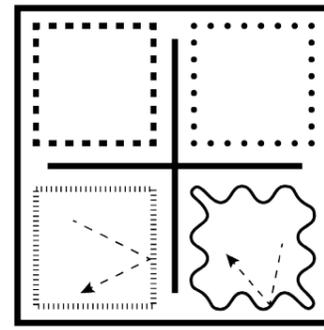

1. Anechoic

Acoustic class Reduction
Shape Square
Size Medium
Reflection Diffuse
Absorption Soft + Thick
Variable Wall Profile

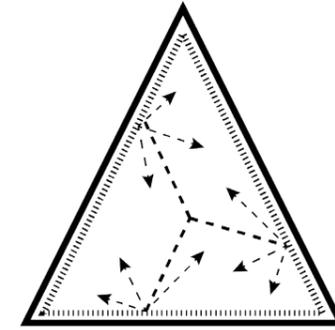

2. Reverberation

Acoustic class Continuation
Shape Various
Size Large
Reflection Specular
Absorption Hard + thick
Variable Materiality

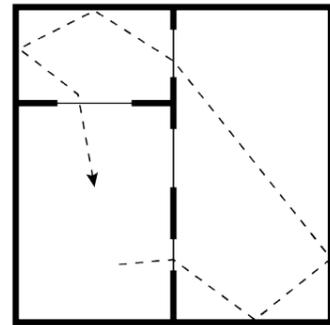

3. Absorption

Acoustic class Reduction
Shape Square
Size Various
Reflection Various
Absorption Various
Variable Room size

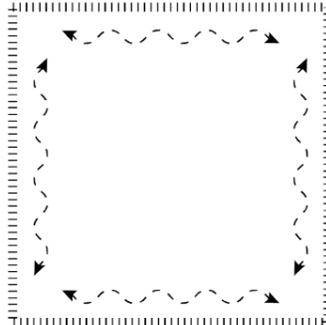

4. Diffusion

Acoustic class Equalising
Shape Large
Size Medium
Reflection Diffuse
Absorption Hard + Thin
Variable Position
 Diffusers

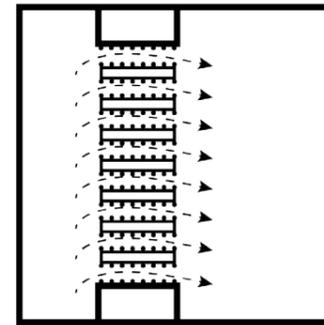

5. Transmission

Acoustic class Conduction
Shape Rectangle
Size Various
Reflection Specular
Absorption Hard + thin
Variable Infill Material

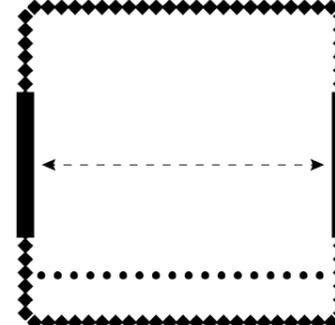

6. Resonance

Acoustic class Conduction
Shape Square
Size Small
Reflection Specular
Absorption Hard + thin
Variable Wall tension

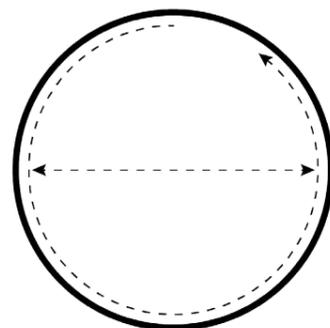

7. Frequency Filter

Acoustic class Compression
Shape Rectangle
Size Various
Reflection Specular
Absorption Hard + thick
Variable Position + Material

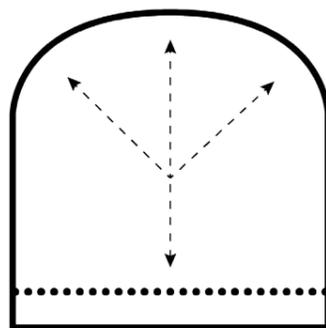

8. Flutter Echo

Acoustic class Conduction
Shape Square
Size Small w.
 Large
Reflection Specular
Absorption Hard + thin
Variable Size of opening

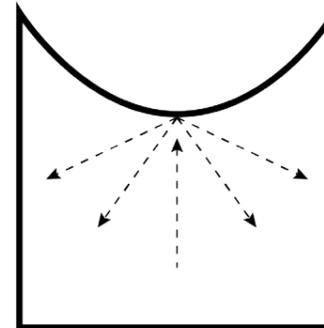

9. Echo

Acoustic class Conduction
Shape Rectangle
Size Various
Reflection Specular
Absorption Hard + thin
Variable Infill Material

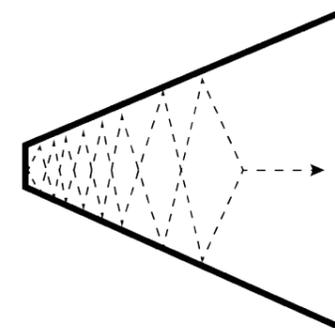

10. Focus

Acoustic class Conduction
Shape Square
Size Small
Reflection Specular
Absorption Hard + thin
Variable Wall tension

11. Anti-Focus

Acoustic class Compression
Shape Rectangle
Size Various
Reflection Specular
Absorption Hard + thick
Variable Position + Material

12. Amplify

Acoustic class Conduction
Shape Square
Size Small w.
 Large
Reflection Specular
Absorption Hard + thin
Variable Size of opening

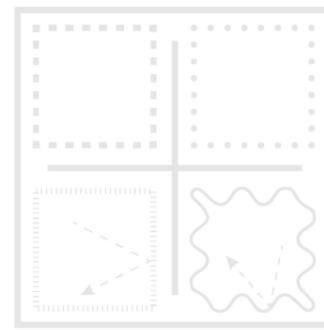

1. Anechoic

Acoustic class Reduction
 Shape Square
 Size Medium
 Reflection Diffuse
 Absorption Soft + Thick
 Variable Wall Profile

2. Reverberation

Acoustic class Continuation
 Shape Various
 Size Large
 Reflection Specular
 Absorption Hard + thick
 Variable Materiality

3. Absorption

Acoustic class Reduction
 Shape Square
 Size Various
 Reflection Various
 Absorption Various
 Variable Room size

4. Diffusion

Acoustic class Equalising
 Shape Large
 Size Medium
 Reflection Diffuse
 Absorption Hard + Thin
 Variable Position
 Diffusers

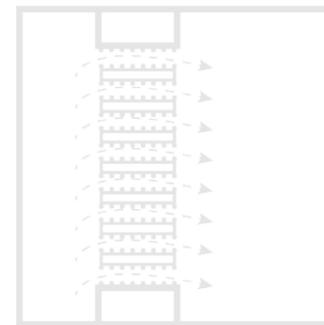

5. Transmission

Acoustic class Conduction
 Shape Rectangle
 Size Various
 Reflection Specular
 Absorption Hard + thin
 Variable Infill Material

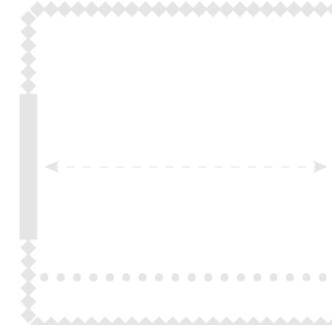

6. Resonance

Acoustic class Conduction
 Shape Square
 Size Small
 Reflection Specular
 Absorption Hard + thin
 Variable Wall tension

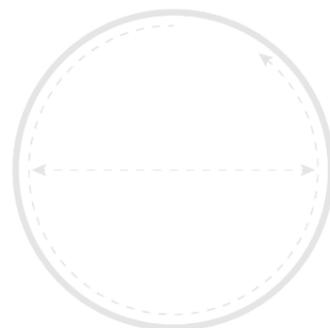

7. Frequency Filter

Acoustic class Compression
 Shape Rectangle
 Size Various
 Reflection Specular
 Absorption Hard + thick
 Variable Position + Material

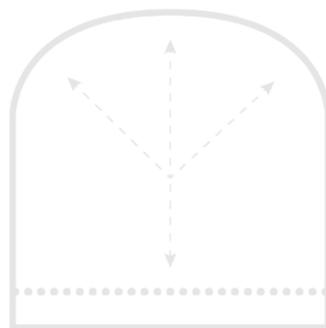

8. Flutter Echo

Acoustic class Conduction
 Shape Square
 Size Small w.
 Reflection Large
 Absorption Specular
 Variable Hard + thin
 Size of opening

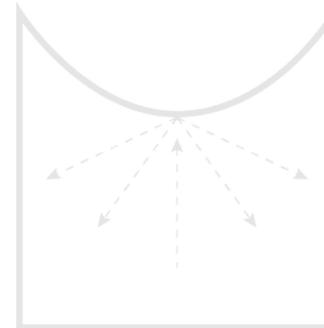

9. Echo

Acoustic class Conduction
 Shape Rectangle
 Size Various
 Reflection Specular
 Absorption Hard + thin
 Variable Infill Material

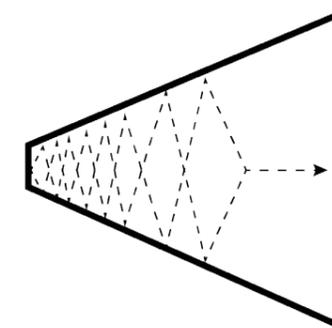

10. Focus

Acoustic class Conduction
 Shape Square
 Size Small
 Reflection Specular
 Absorption Hard + thin
 Variable Wall tension

11. Anti-Focus

Acoustic class Compression
 Shape Rectangle
 Size Various
 Reflection Specular
 Absorption Hard + thick
 Variable Position + Material

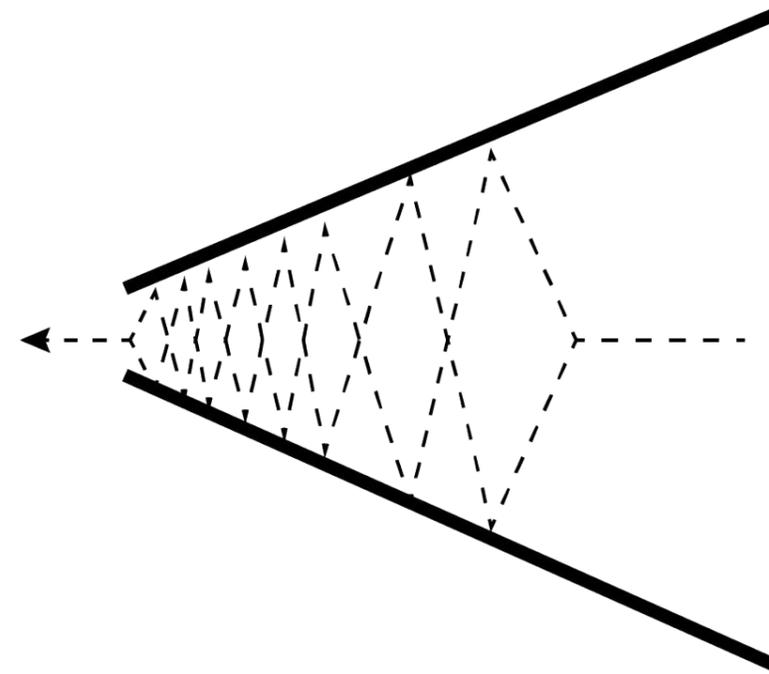

12. Amplify

Acoustic class Conduction
 Shape Square
 Size Small w.
 Reflection Large
 Absorption Specular
 Variable Hard + thin
 Size of opening

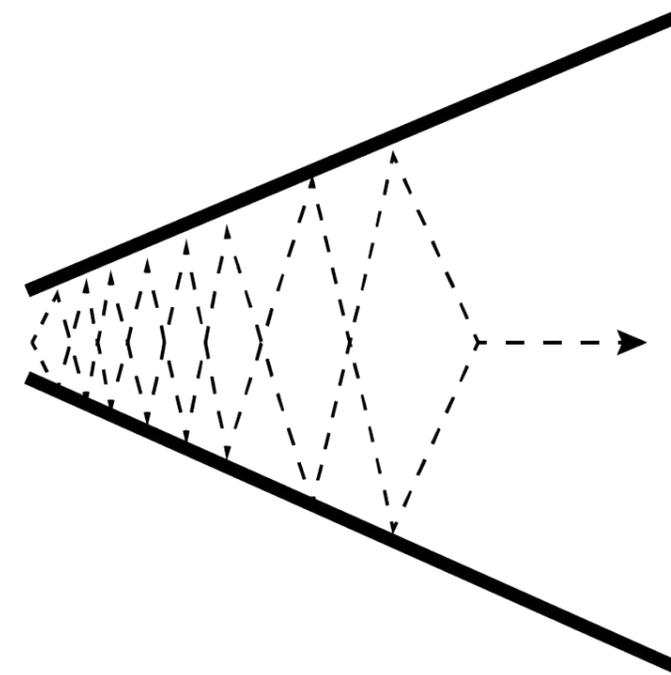

Amplify

/ˈamplɪfaɪ/

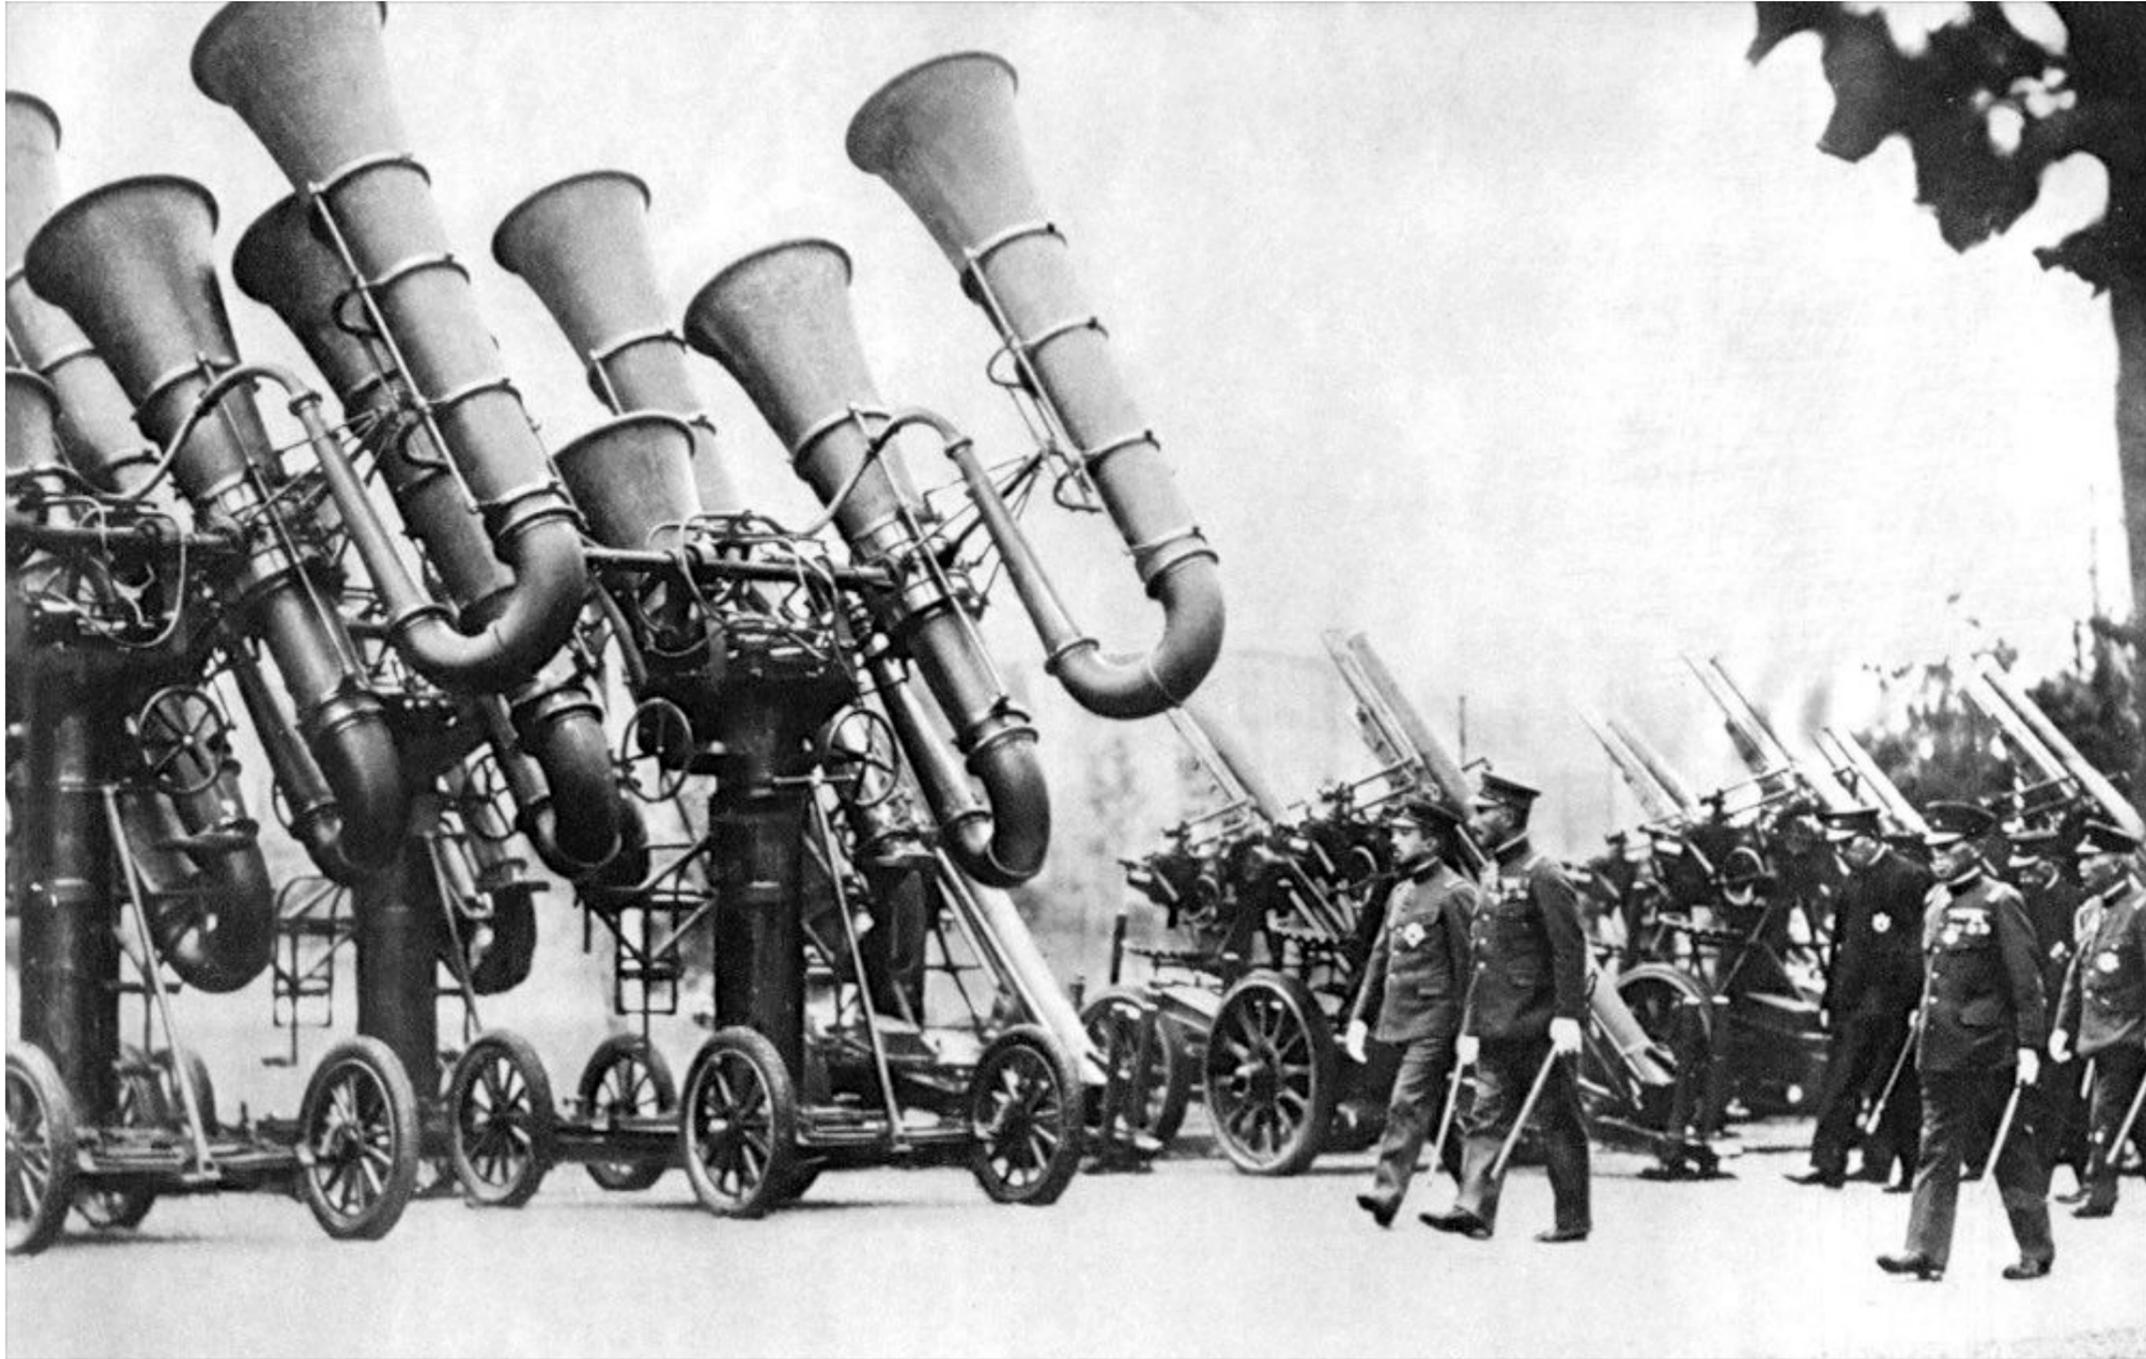

- Increase the volume of (sound), especially using an amplifier.
- Enlarge upon or add detail to (a story or statement).

Amplify surrounding sounds to the listener

Amplify sound to the surroundings

Military listening devices

Bogotá

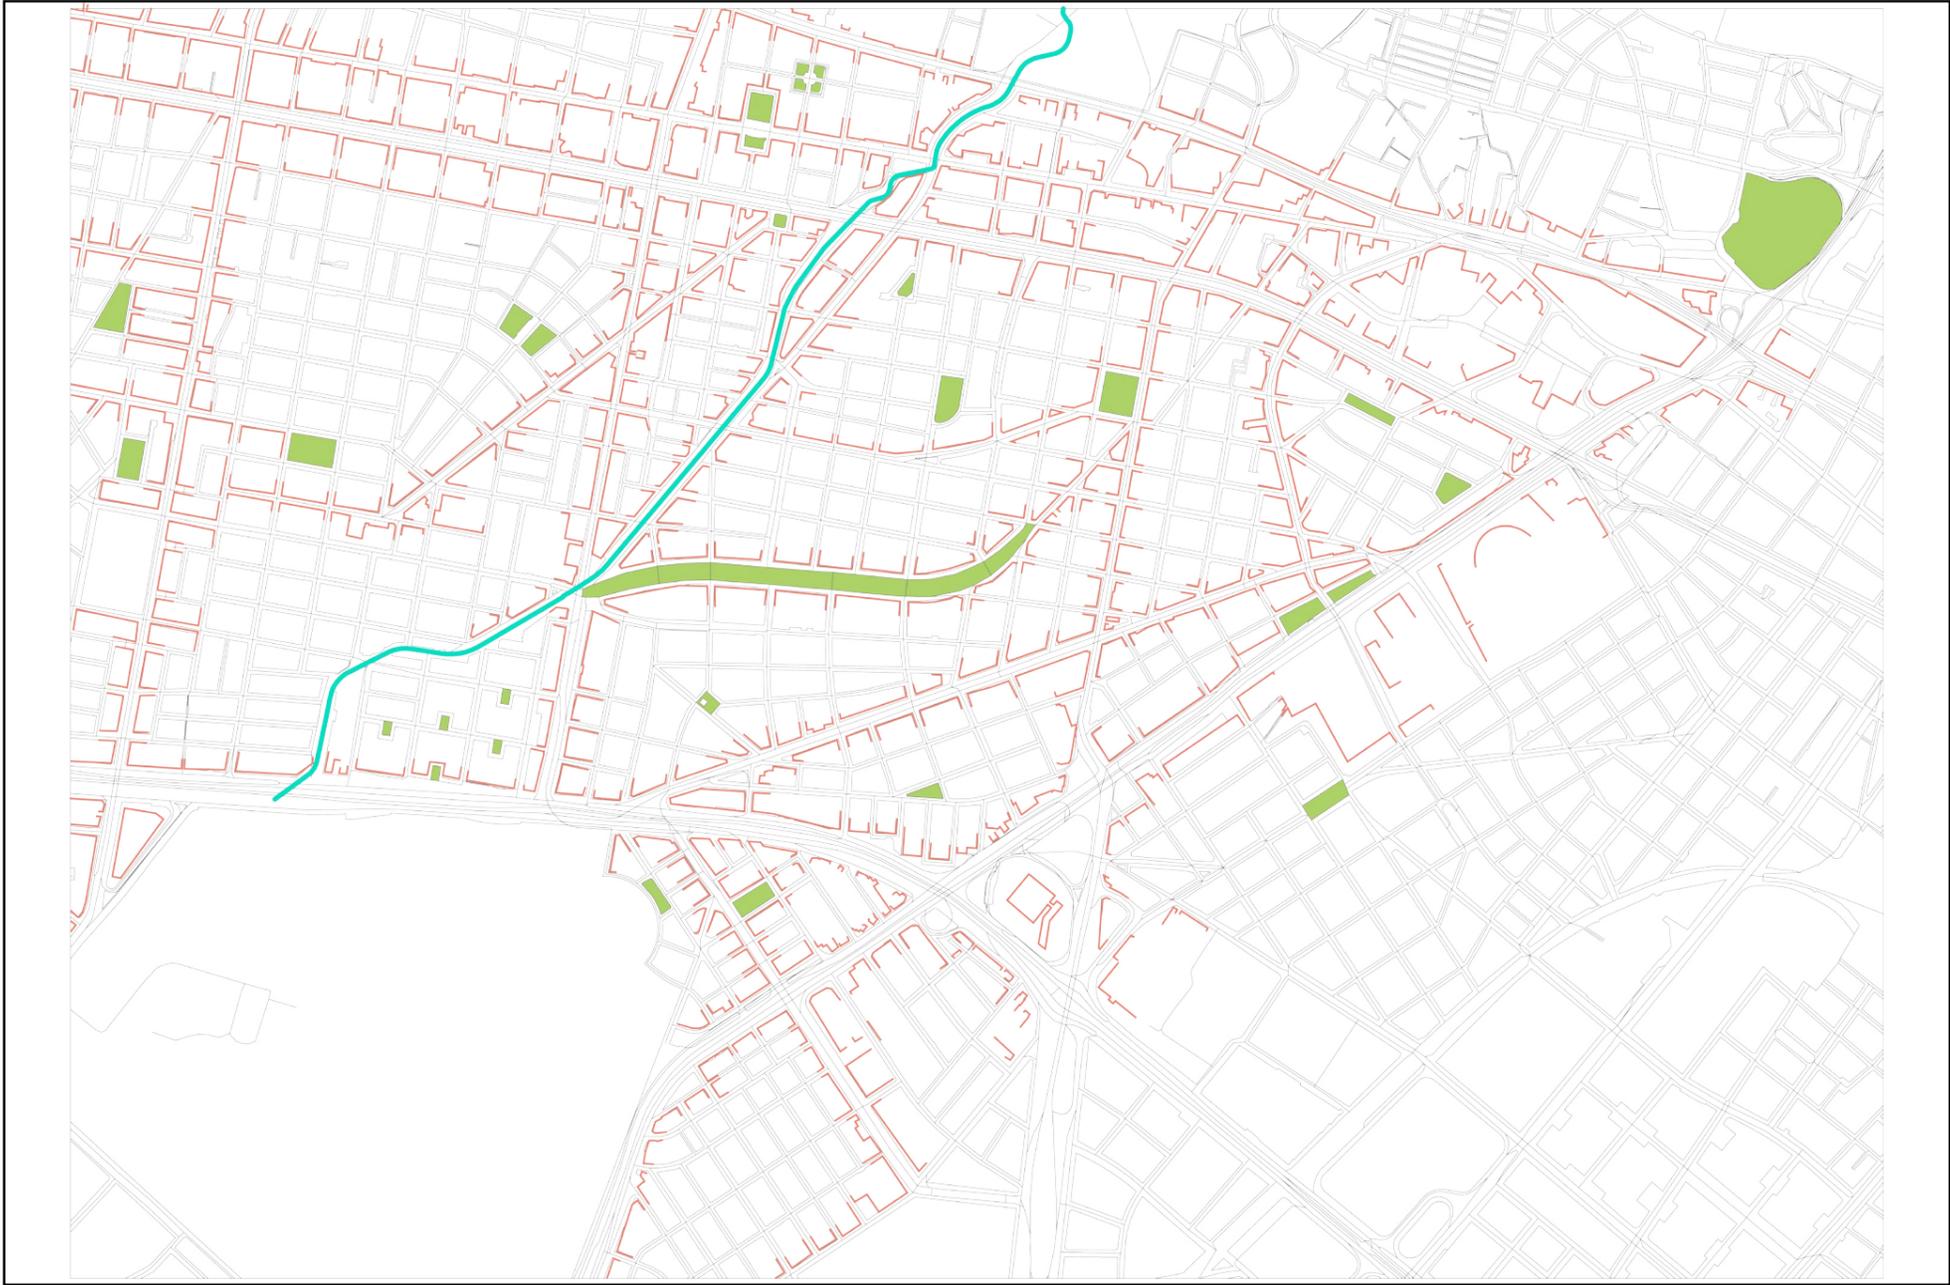

Expansion of the sonic urbanism

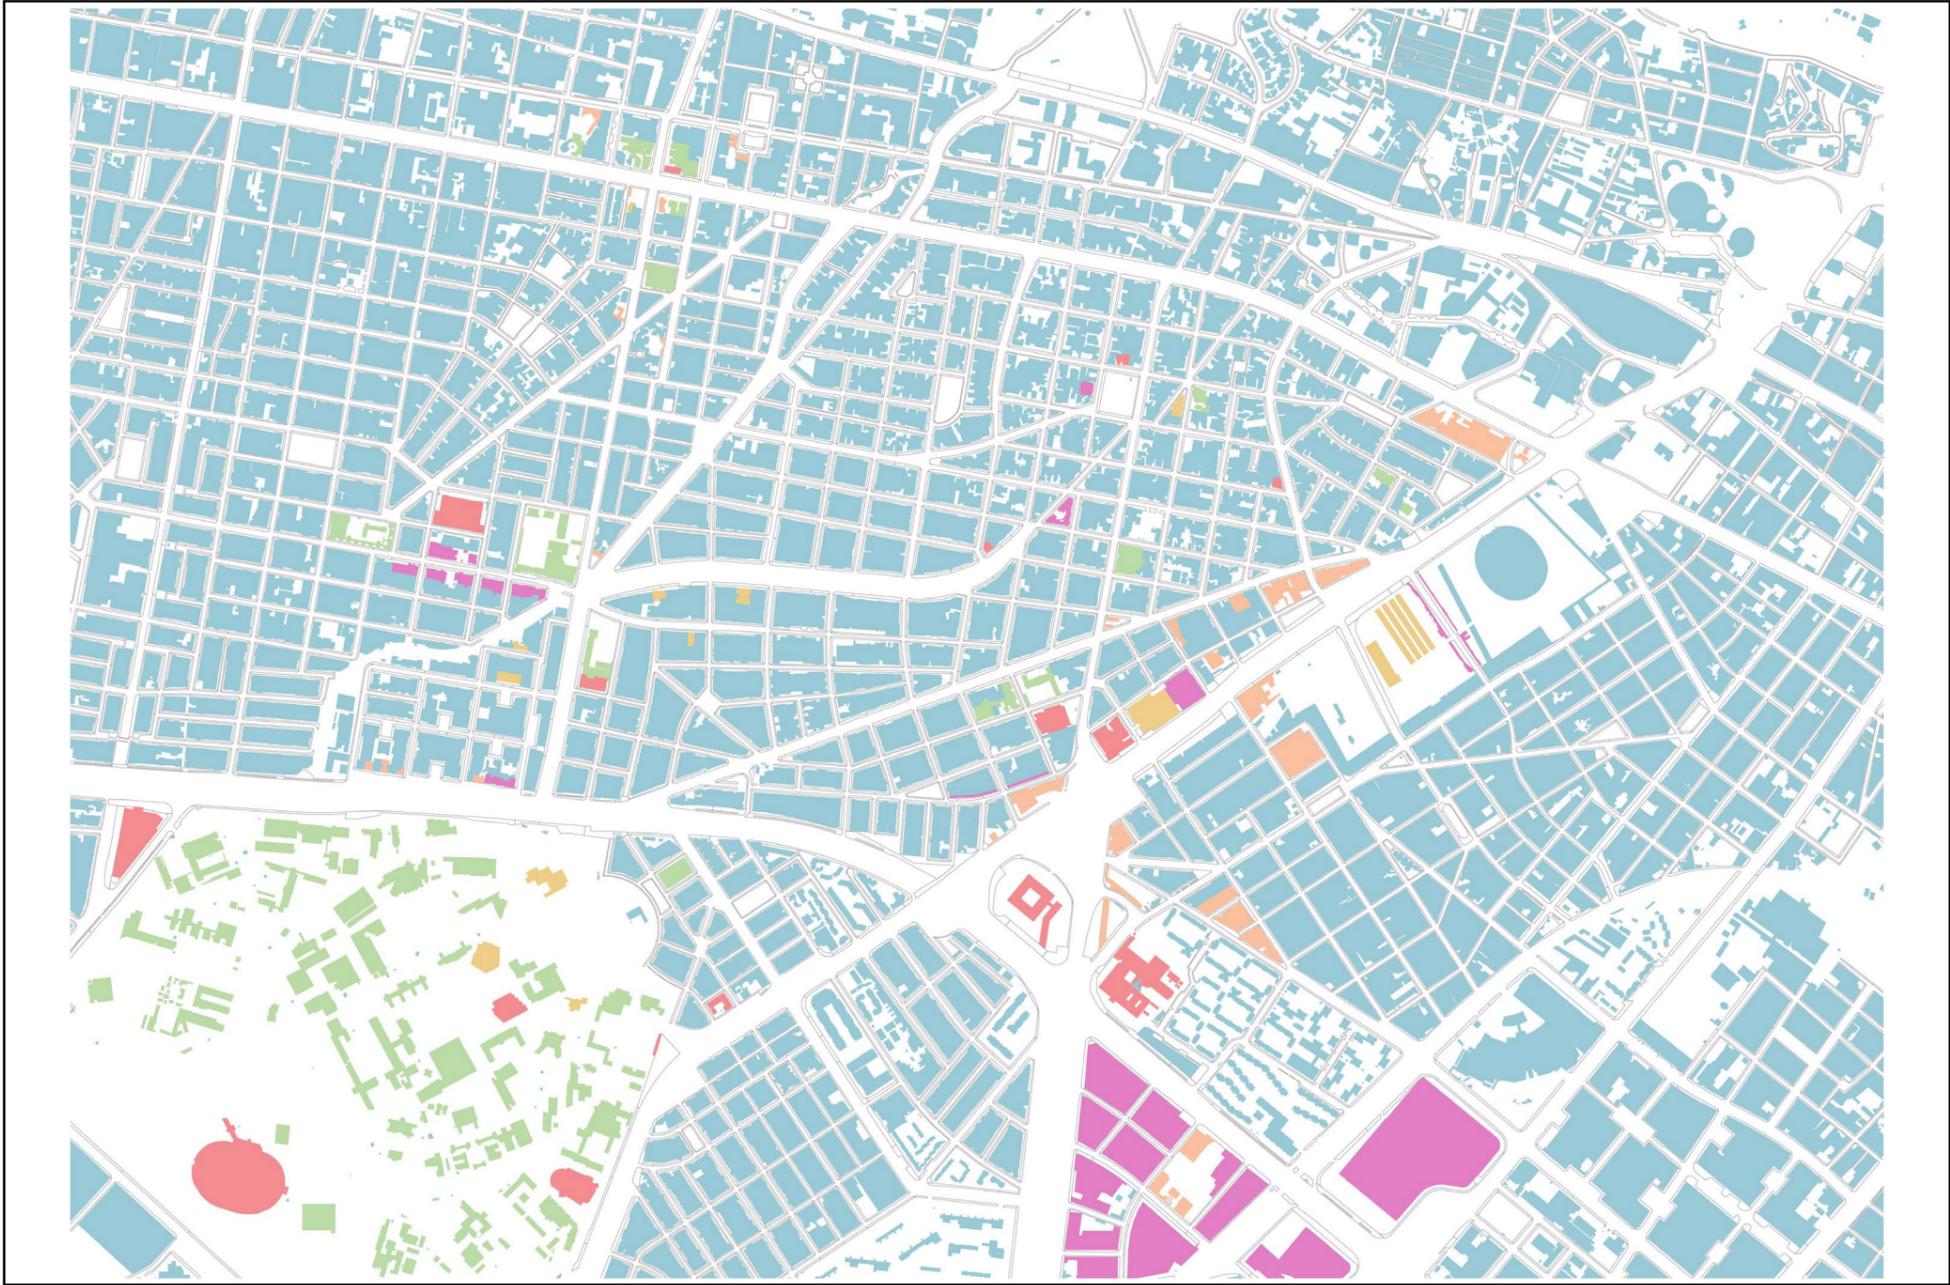

Urban densification

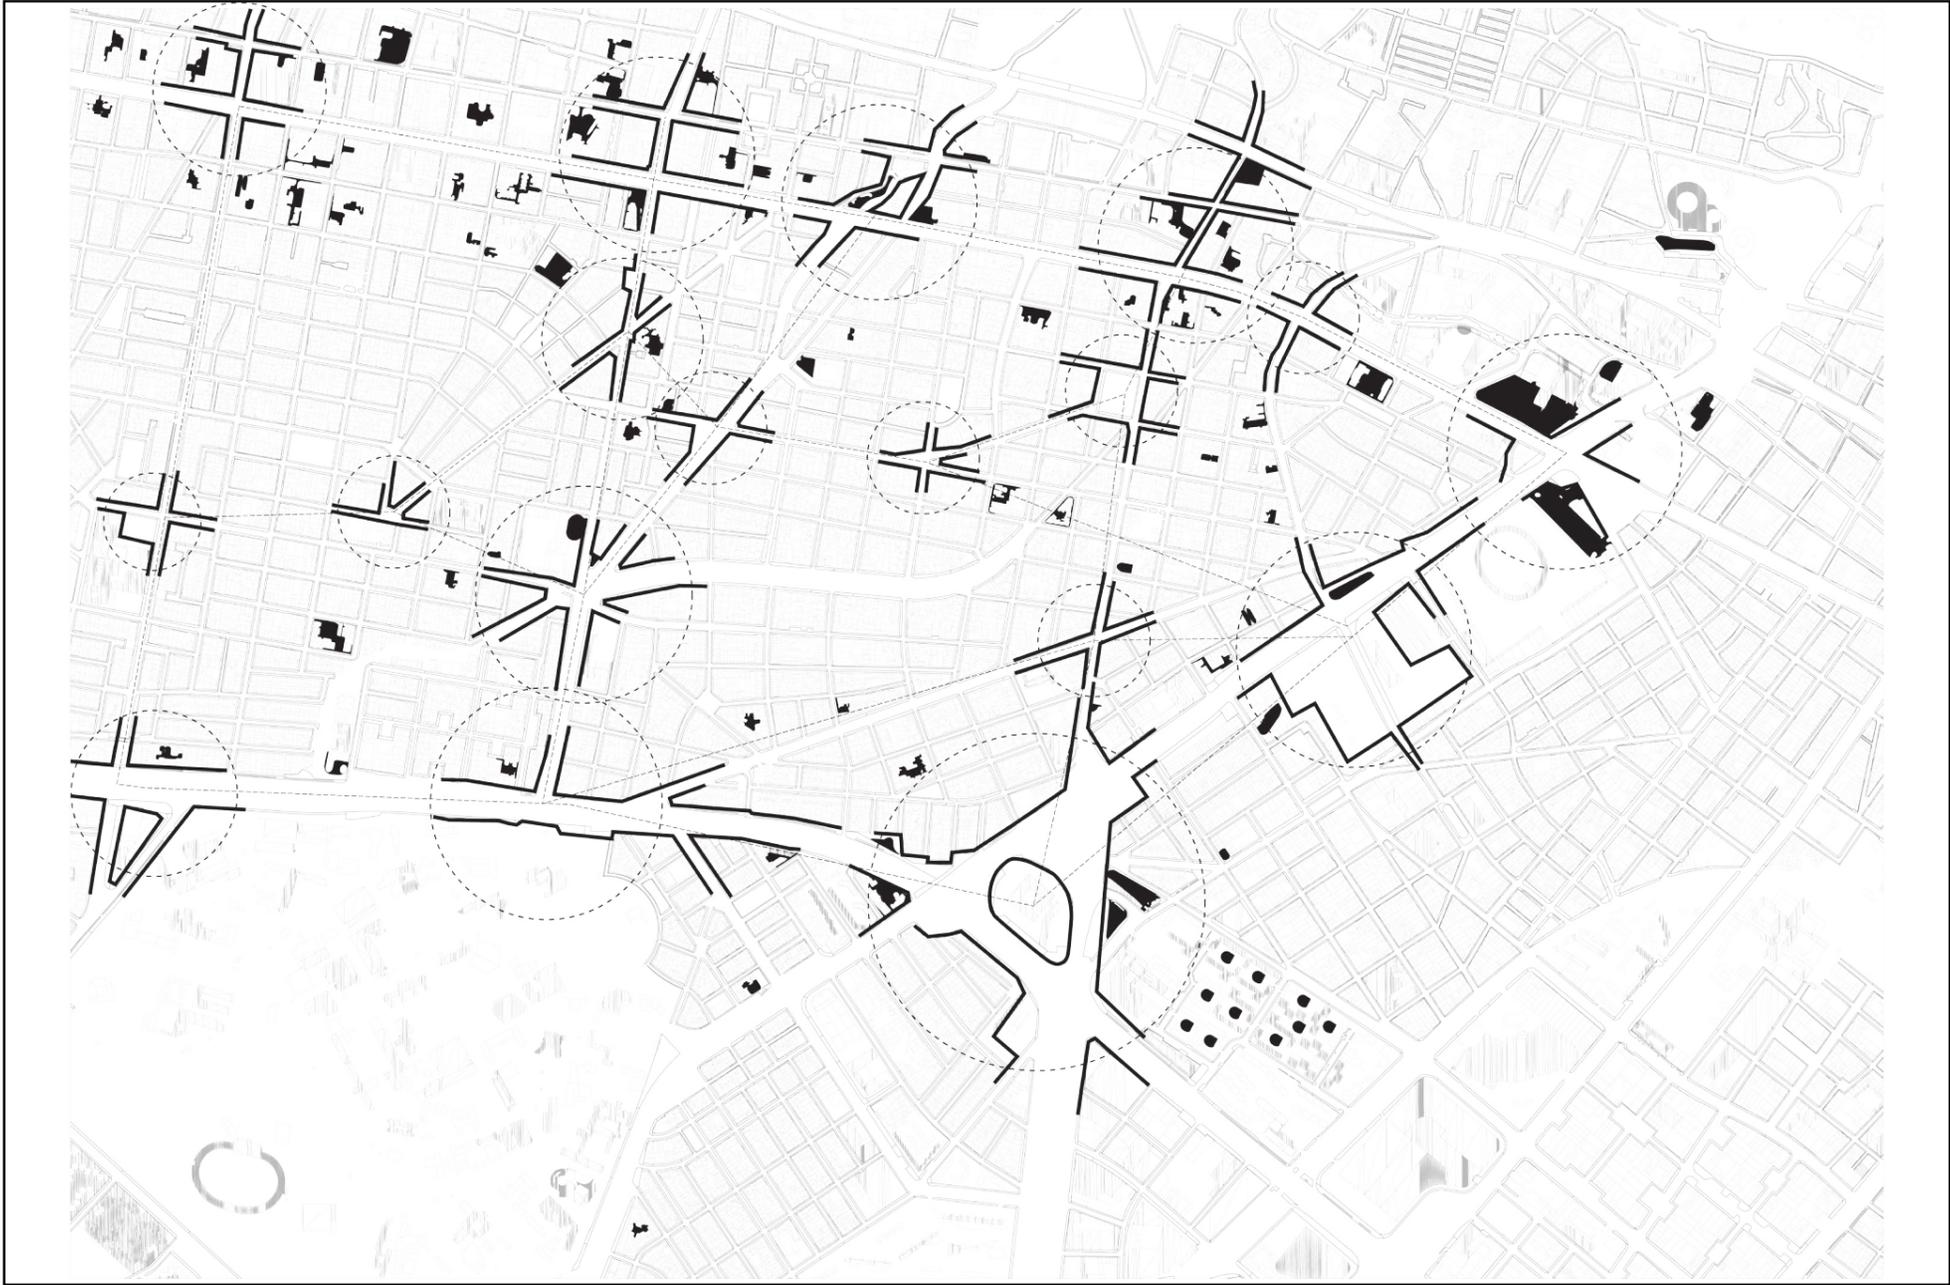

The Andes mountain range

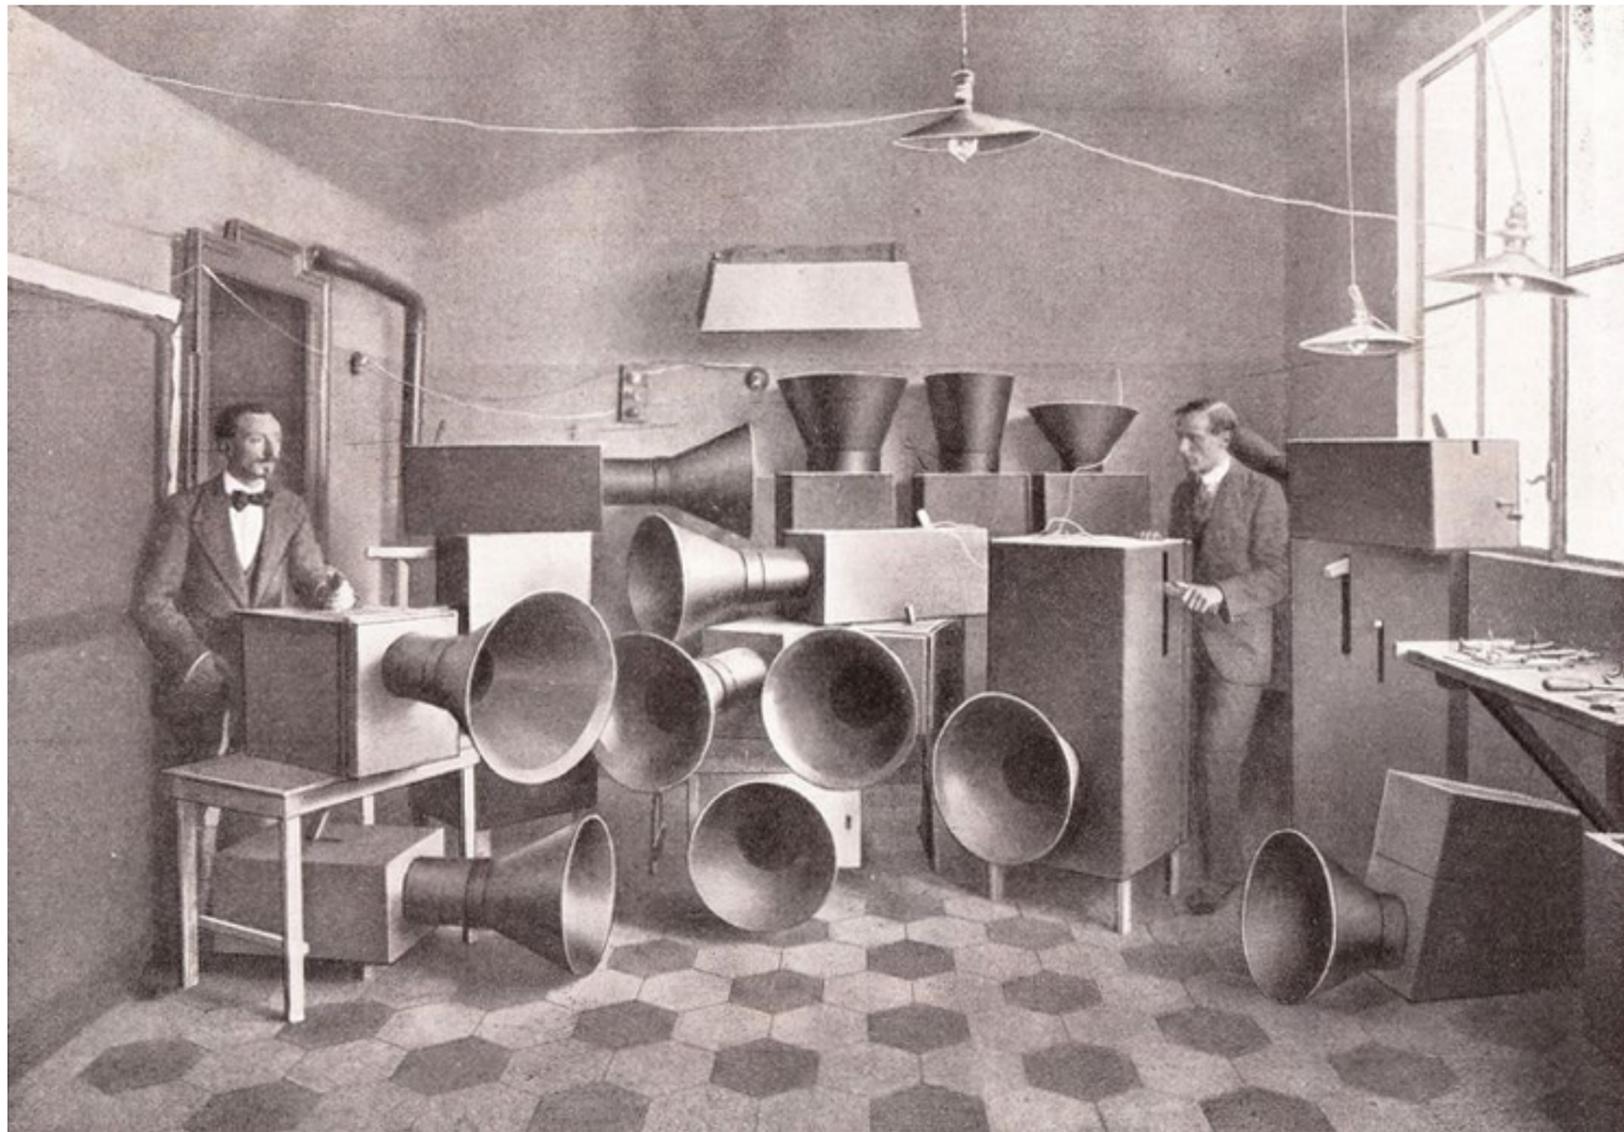

Materials

Program

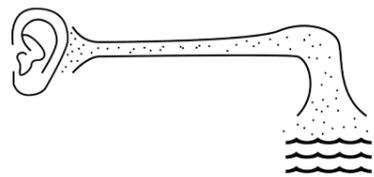

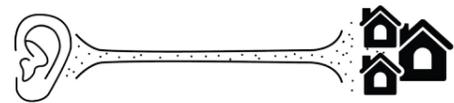

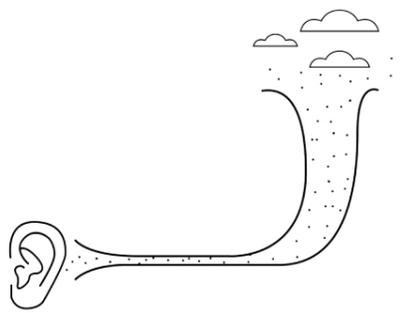

Urban sounding Boxes

“Noise accompanies every manifestation of life. Noise is familiar to us. Noise has the power to bring us back to life (...) Noise, gushing confusely and irregularly out of life, is never totally revealed to us and it keeps in store innumerable surprises for our benefit.”

Luigi Russolo, 1913

Excerpt from 'The Art of Noise'

Richness of Noise

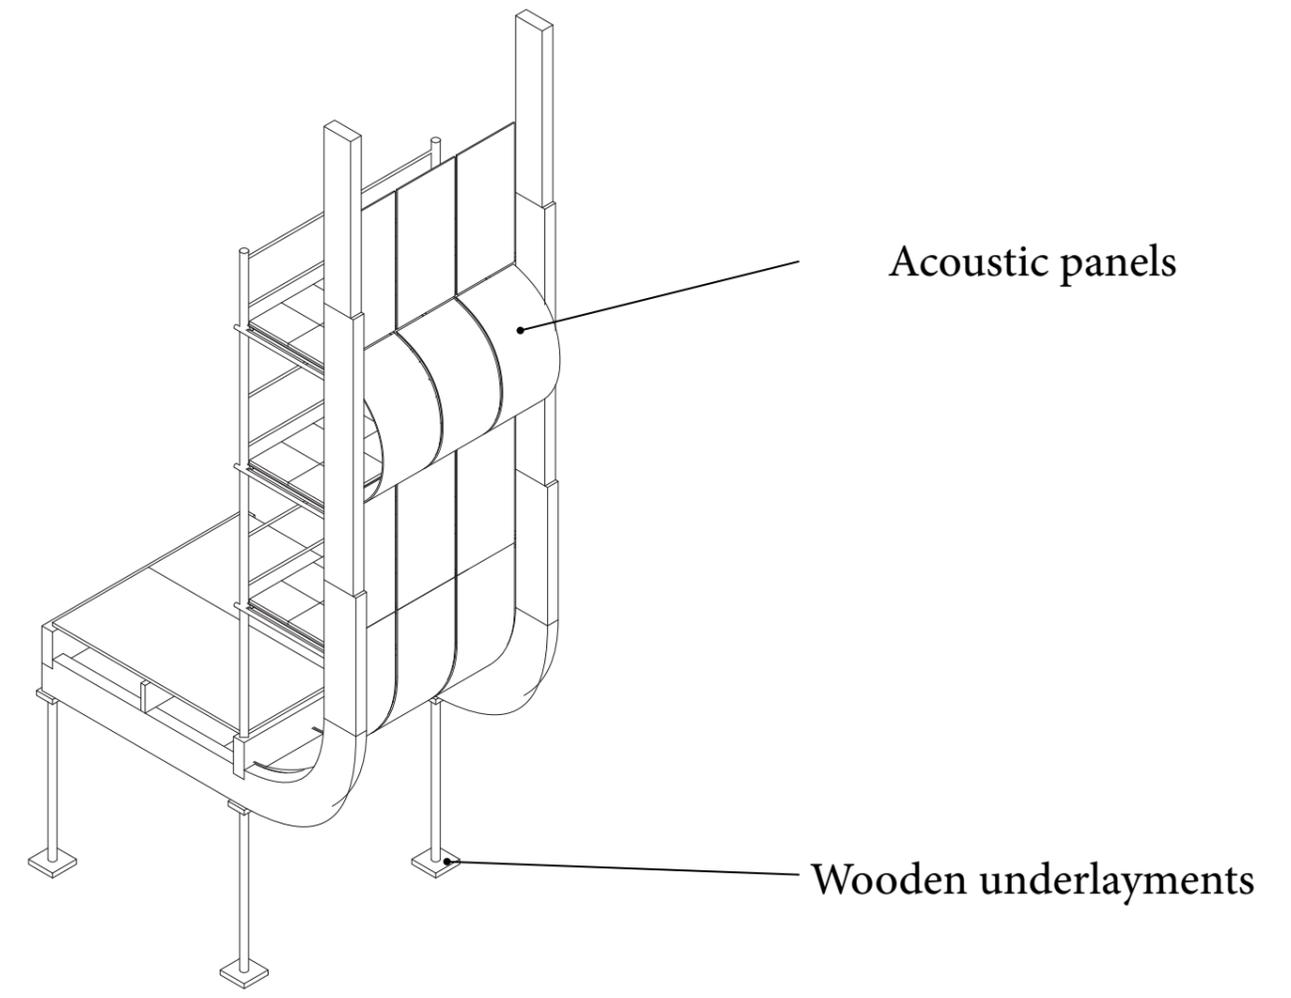

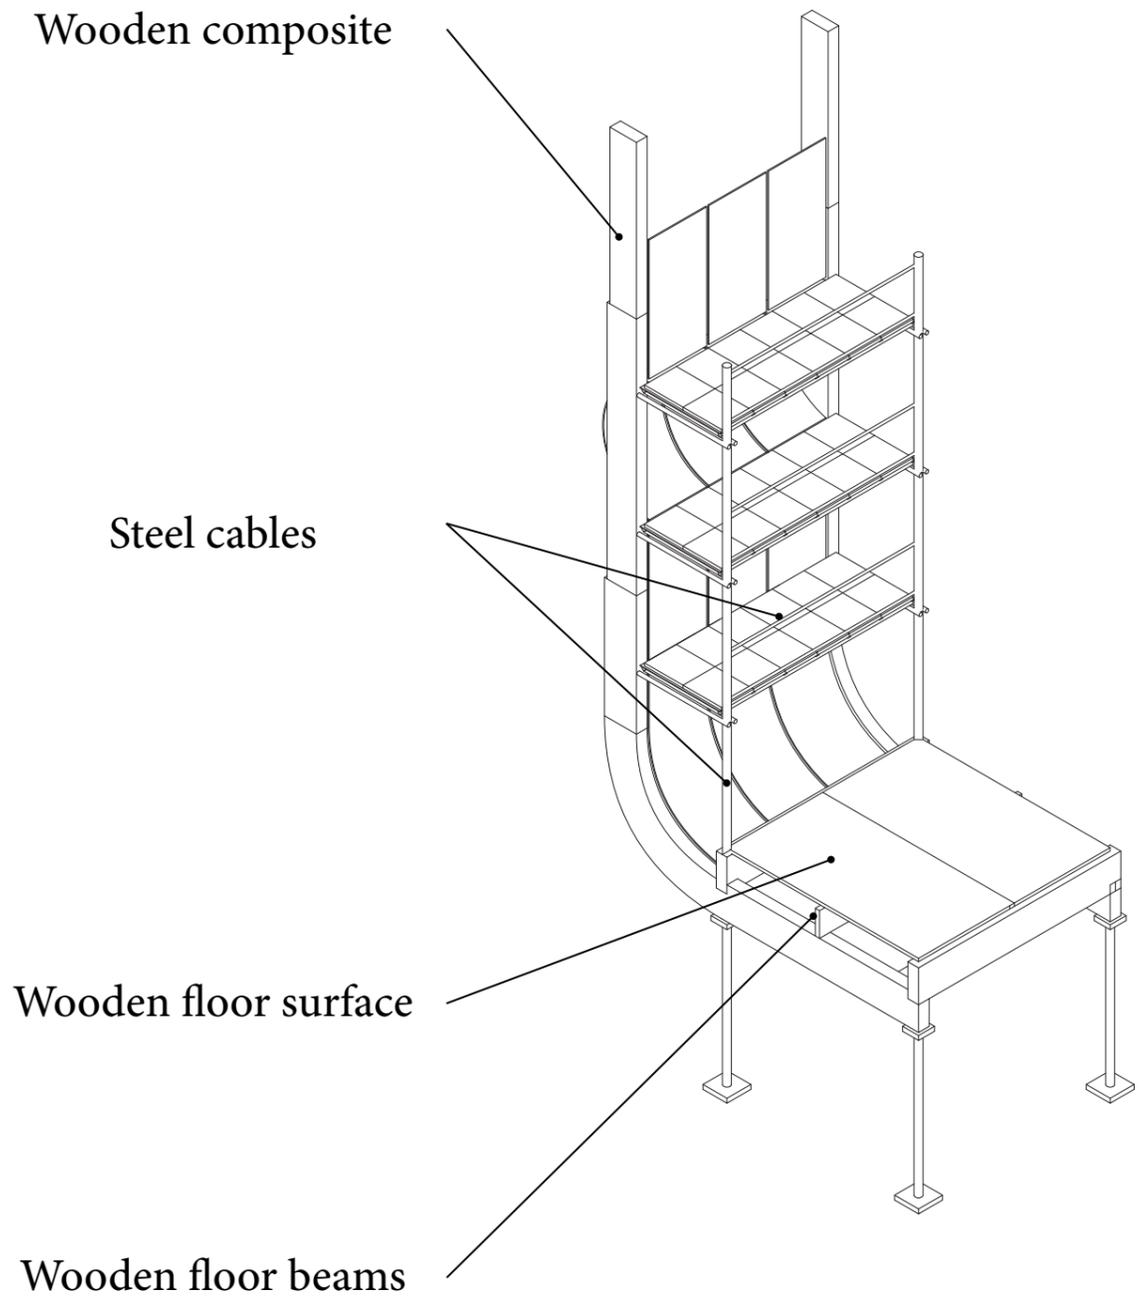

A performative device

Precedent

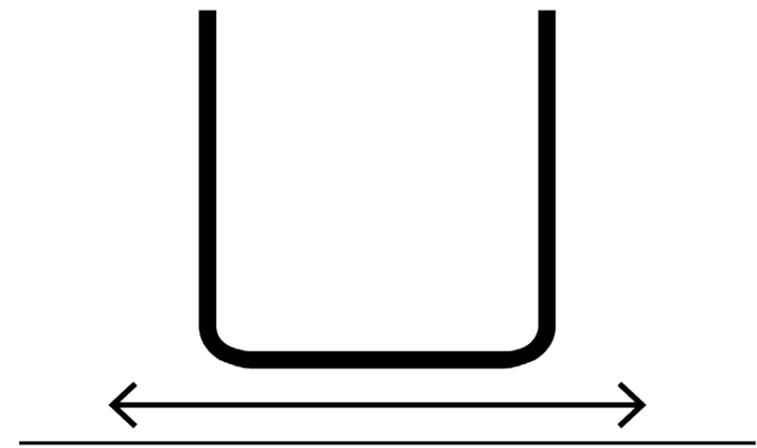

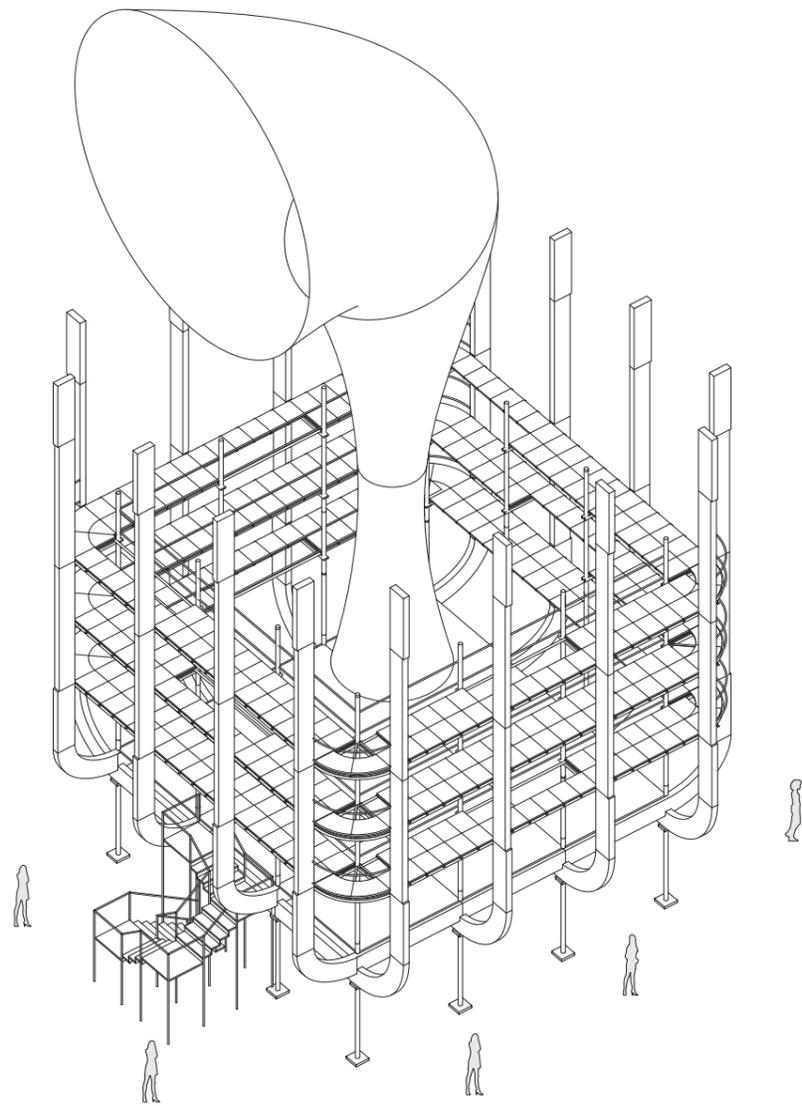

Which variables are needed to intervene within the public realm?

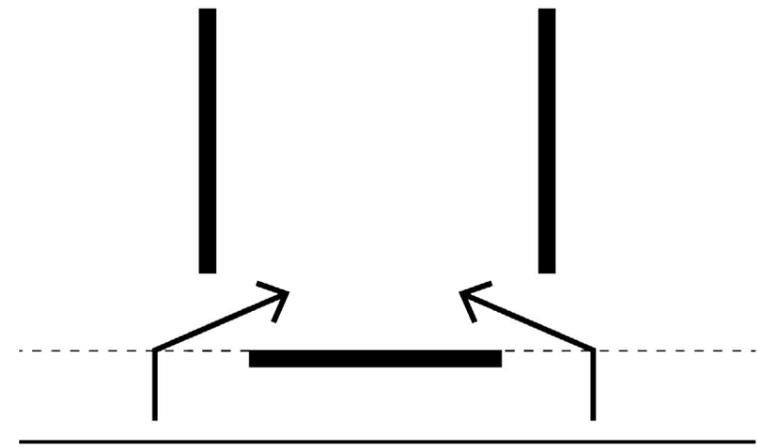

Prometeo, Renzo Piano, 1987

Two Contrasting Systems

Formal Oppositions

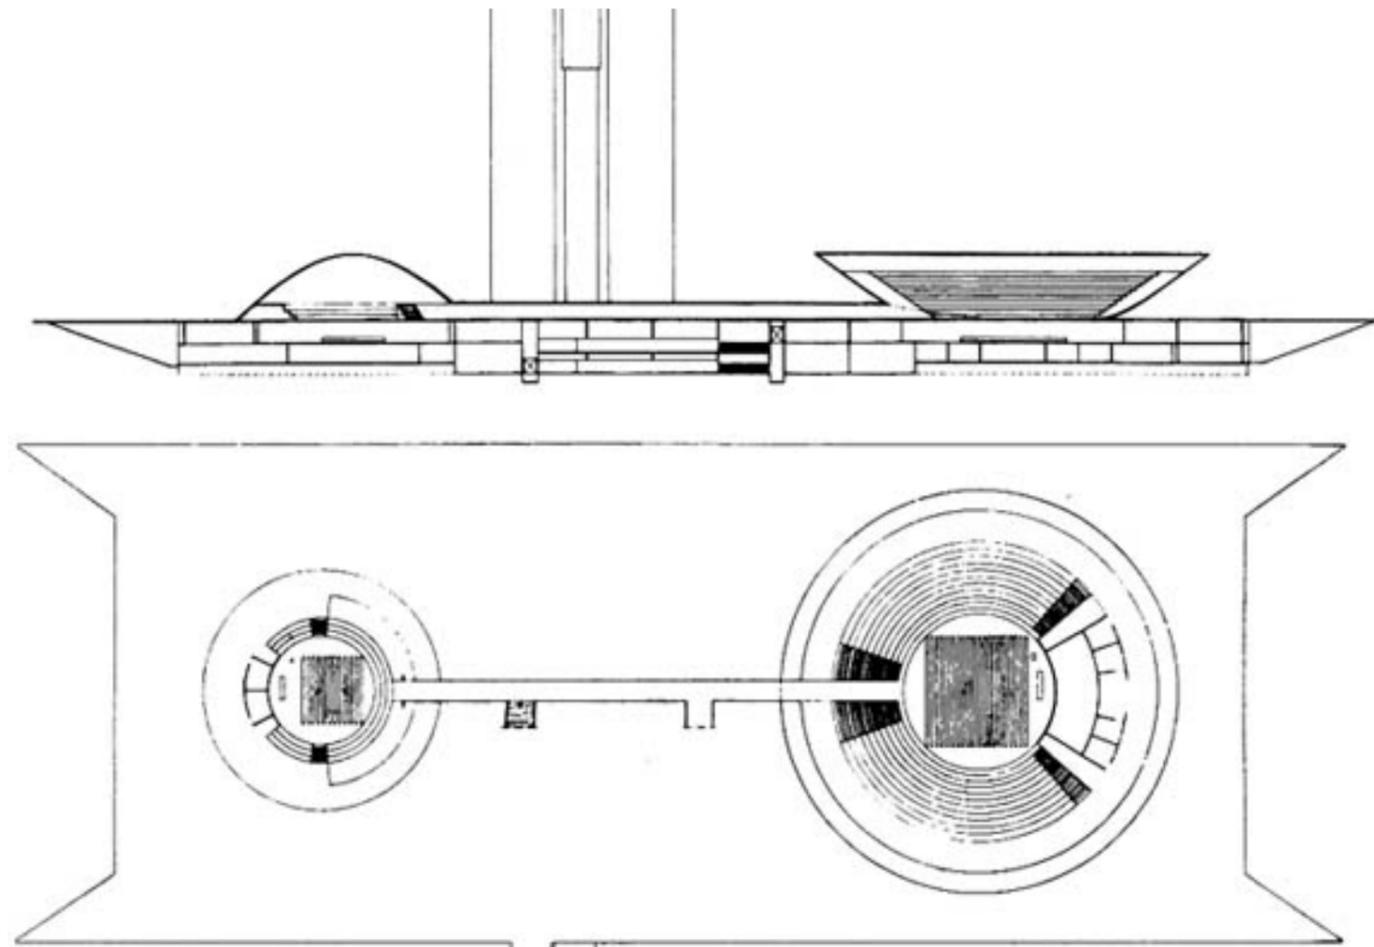

Mademoiselle Pogany, by Constantin Brancusi, 1920

The base is not undermined for its sole supporting function

National Congress Brasilia, by Oscar Niemeyer, 1960

A new Brazilian aesthetic identity in opposition to the hard straight (male) forms of the European architect

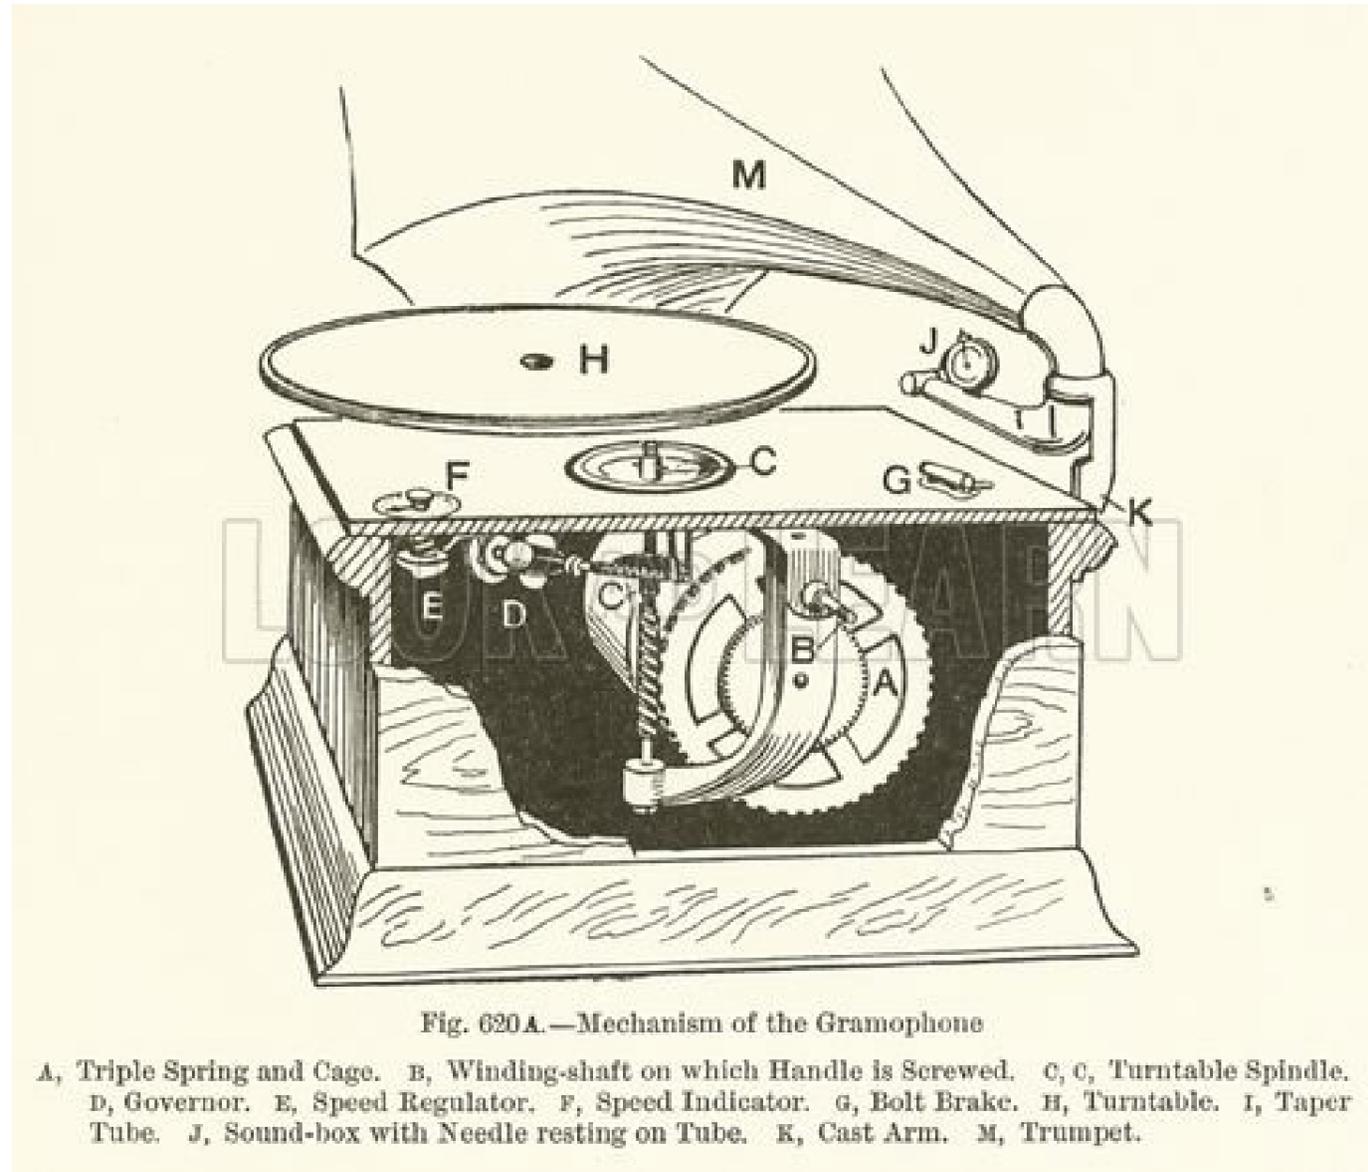

National Congress Brasilia, by Oscar Niemeyer, 1960

A new Brazilian aesthetic identity in opposition to the hard straight (male) forms of the European architect

Gramophone, -, 1900's

The wood grain texture contrasts with the smooth, reflective materiality of the horn

Gramophone Section

The finest point of contact between the needle and the record

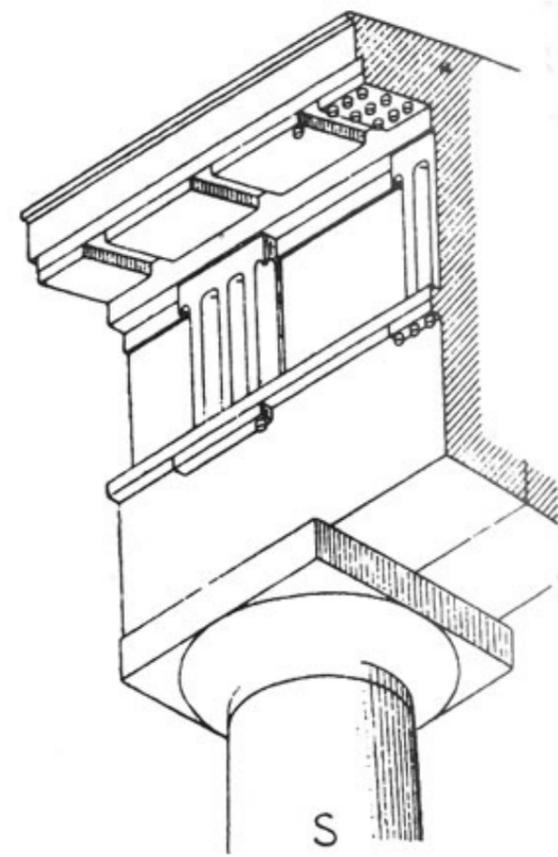

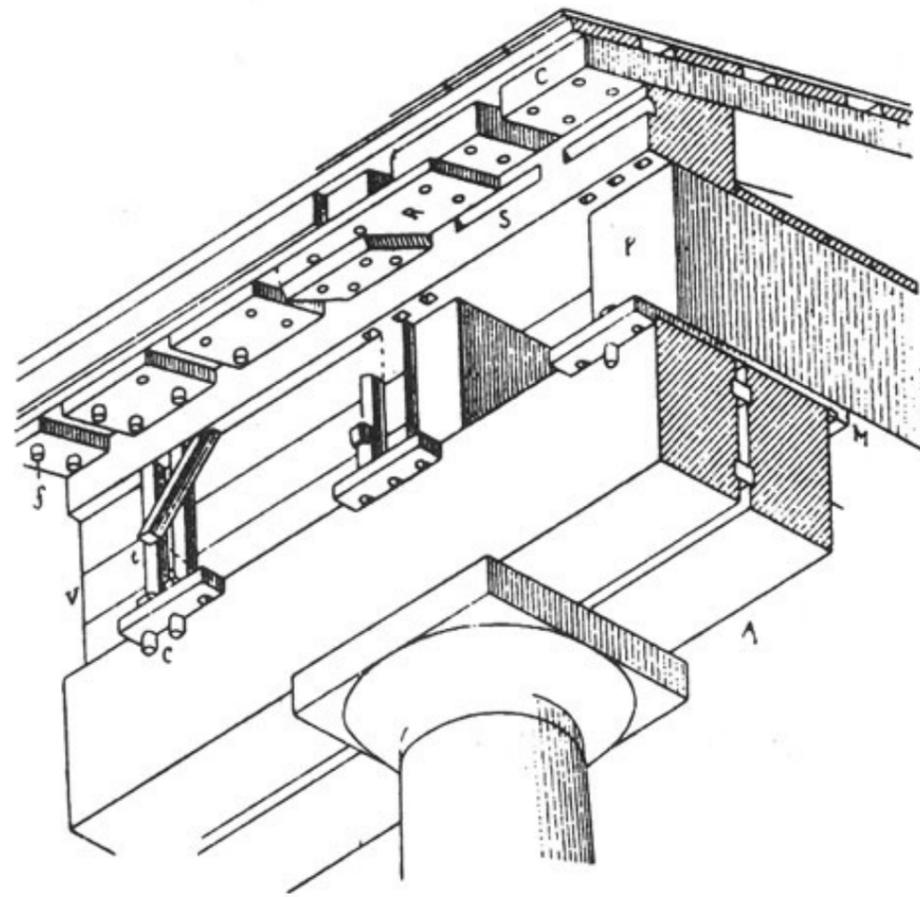

Intersection of a contemporary stair and Roman stone wall at Trajan's Market, Rome, Italy

Expression of the Joint

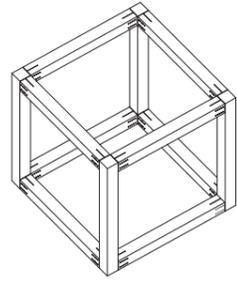

The Host

Tectonical

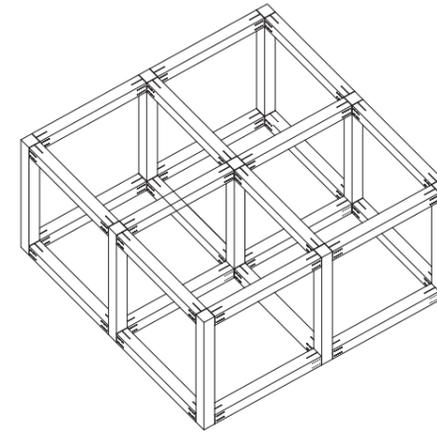

Sound is never **static**. It is dynamic, mobile, temporal. I would like my architecture to express the notion of time and sound through the **materiality** and the **technical** expression of the project.

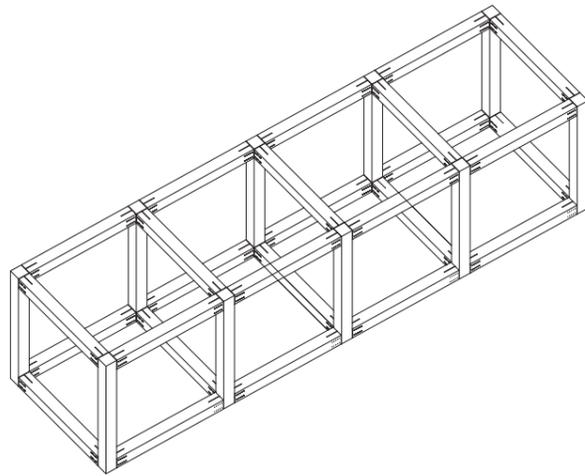

Tectonics - The art of assembly

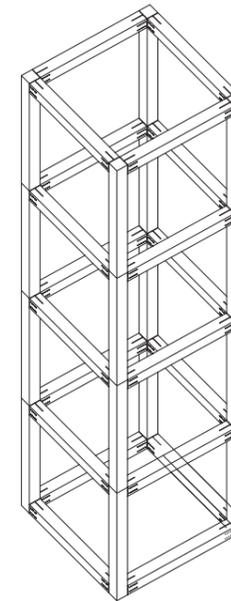

Single

Array

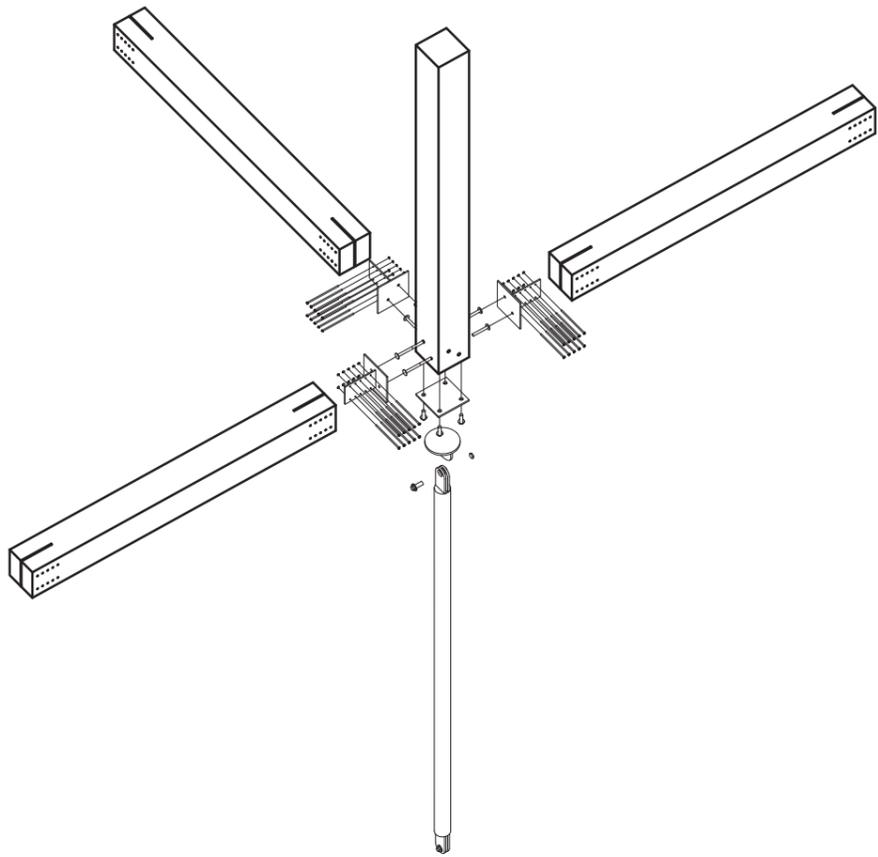

Stretch (horizontal)

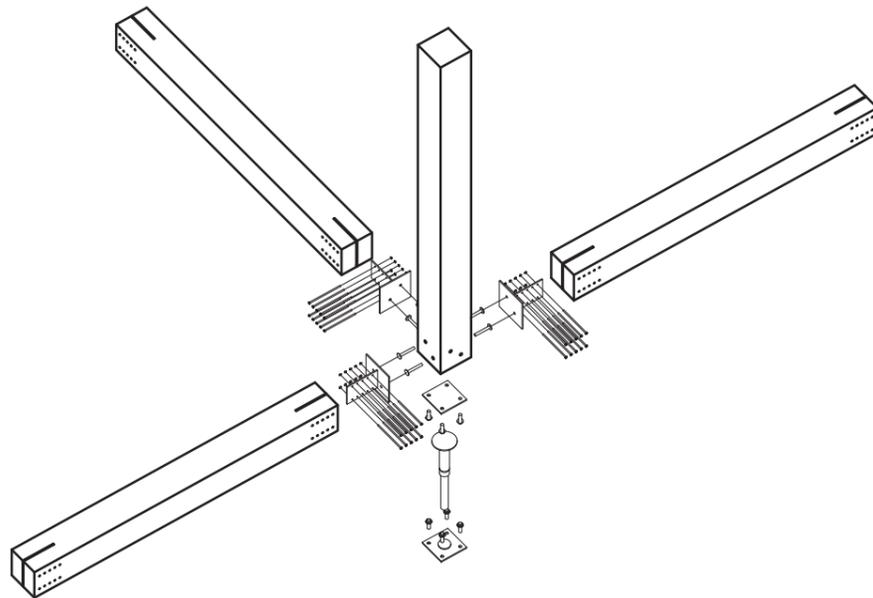

Stretch (vertical)

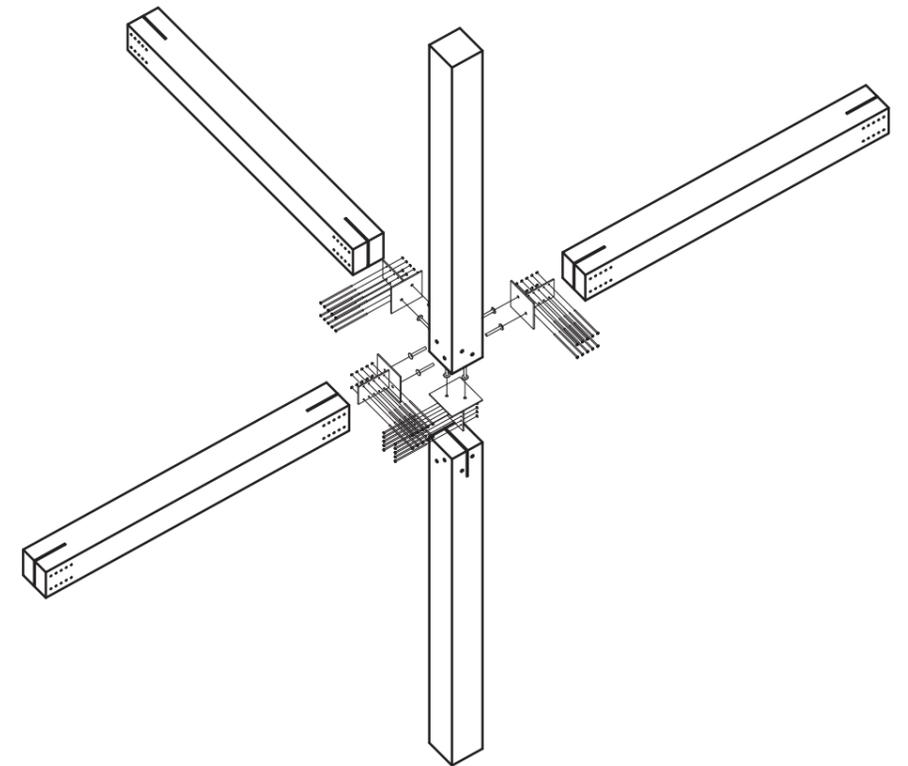

Expandable System

Contrasting Material Palette

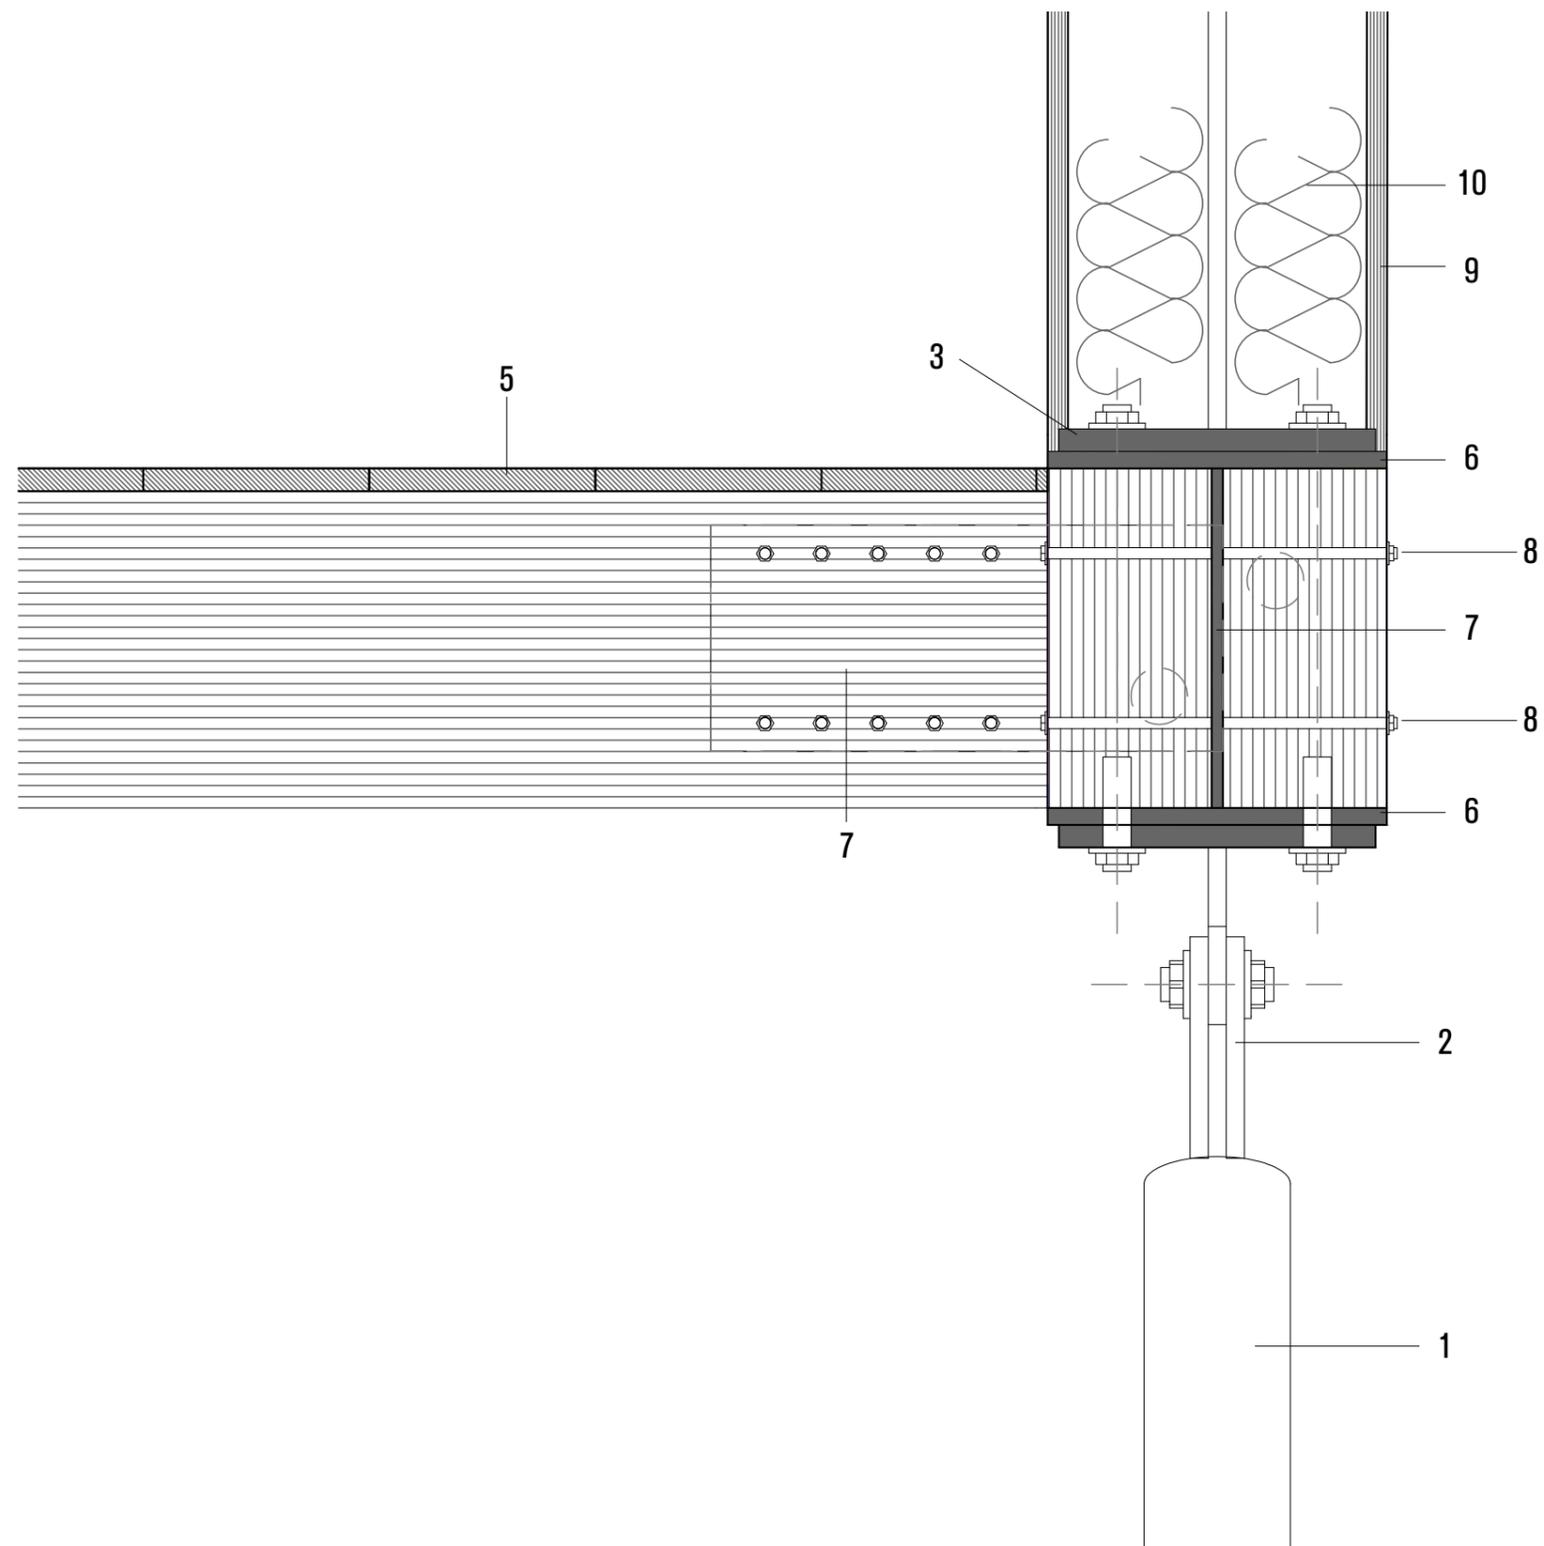

The Moment of Contact

How do the two formal oppositions
create meaning?

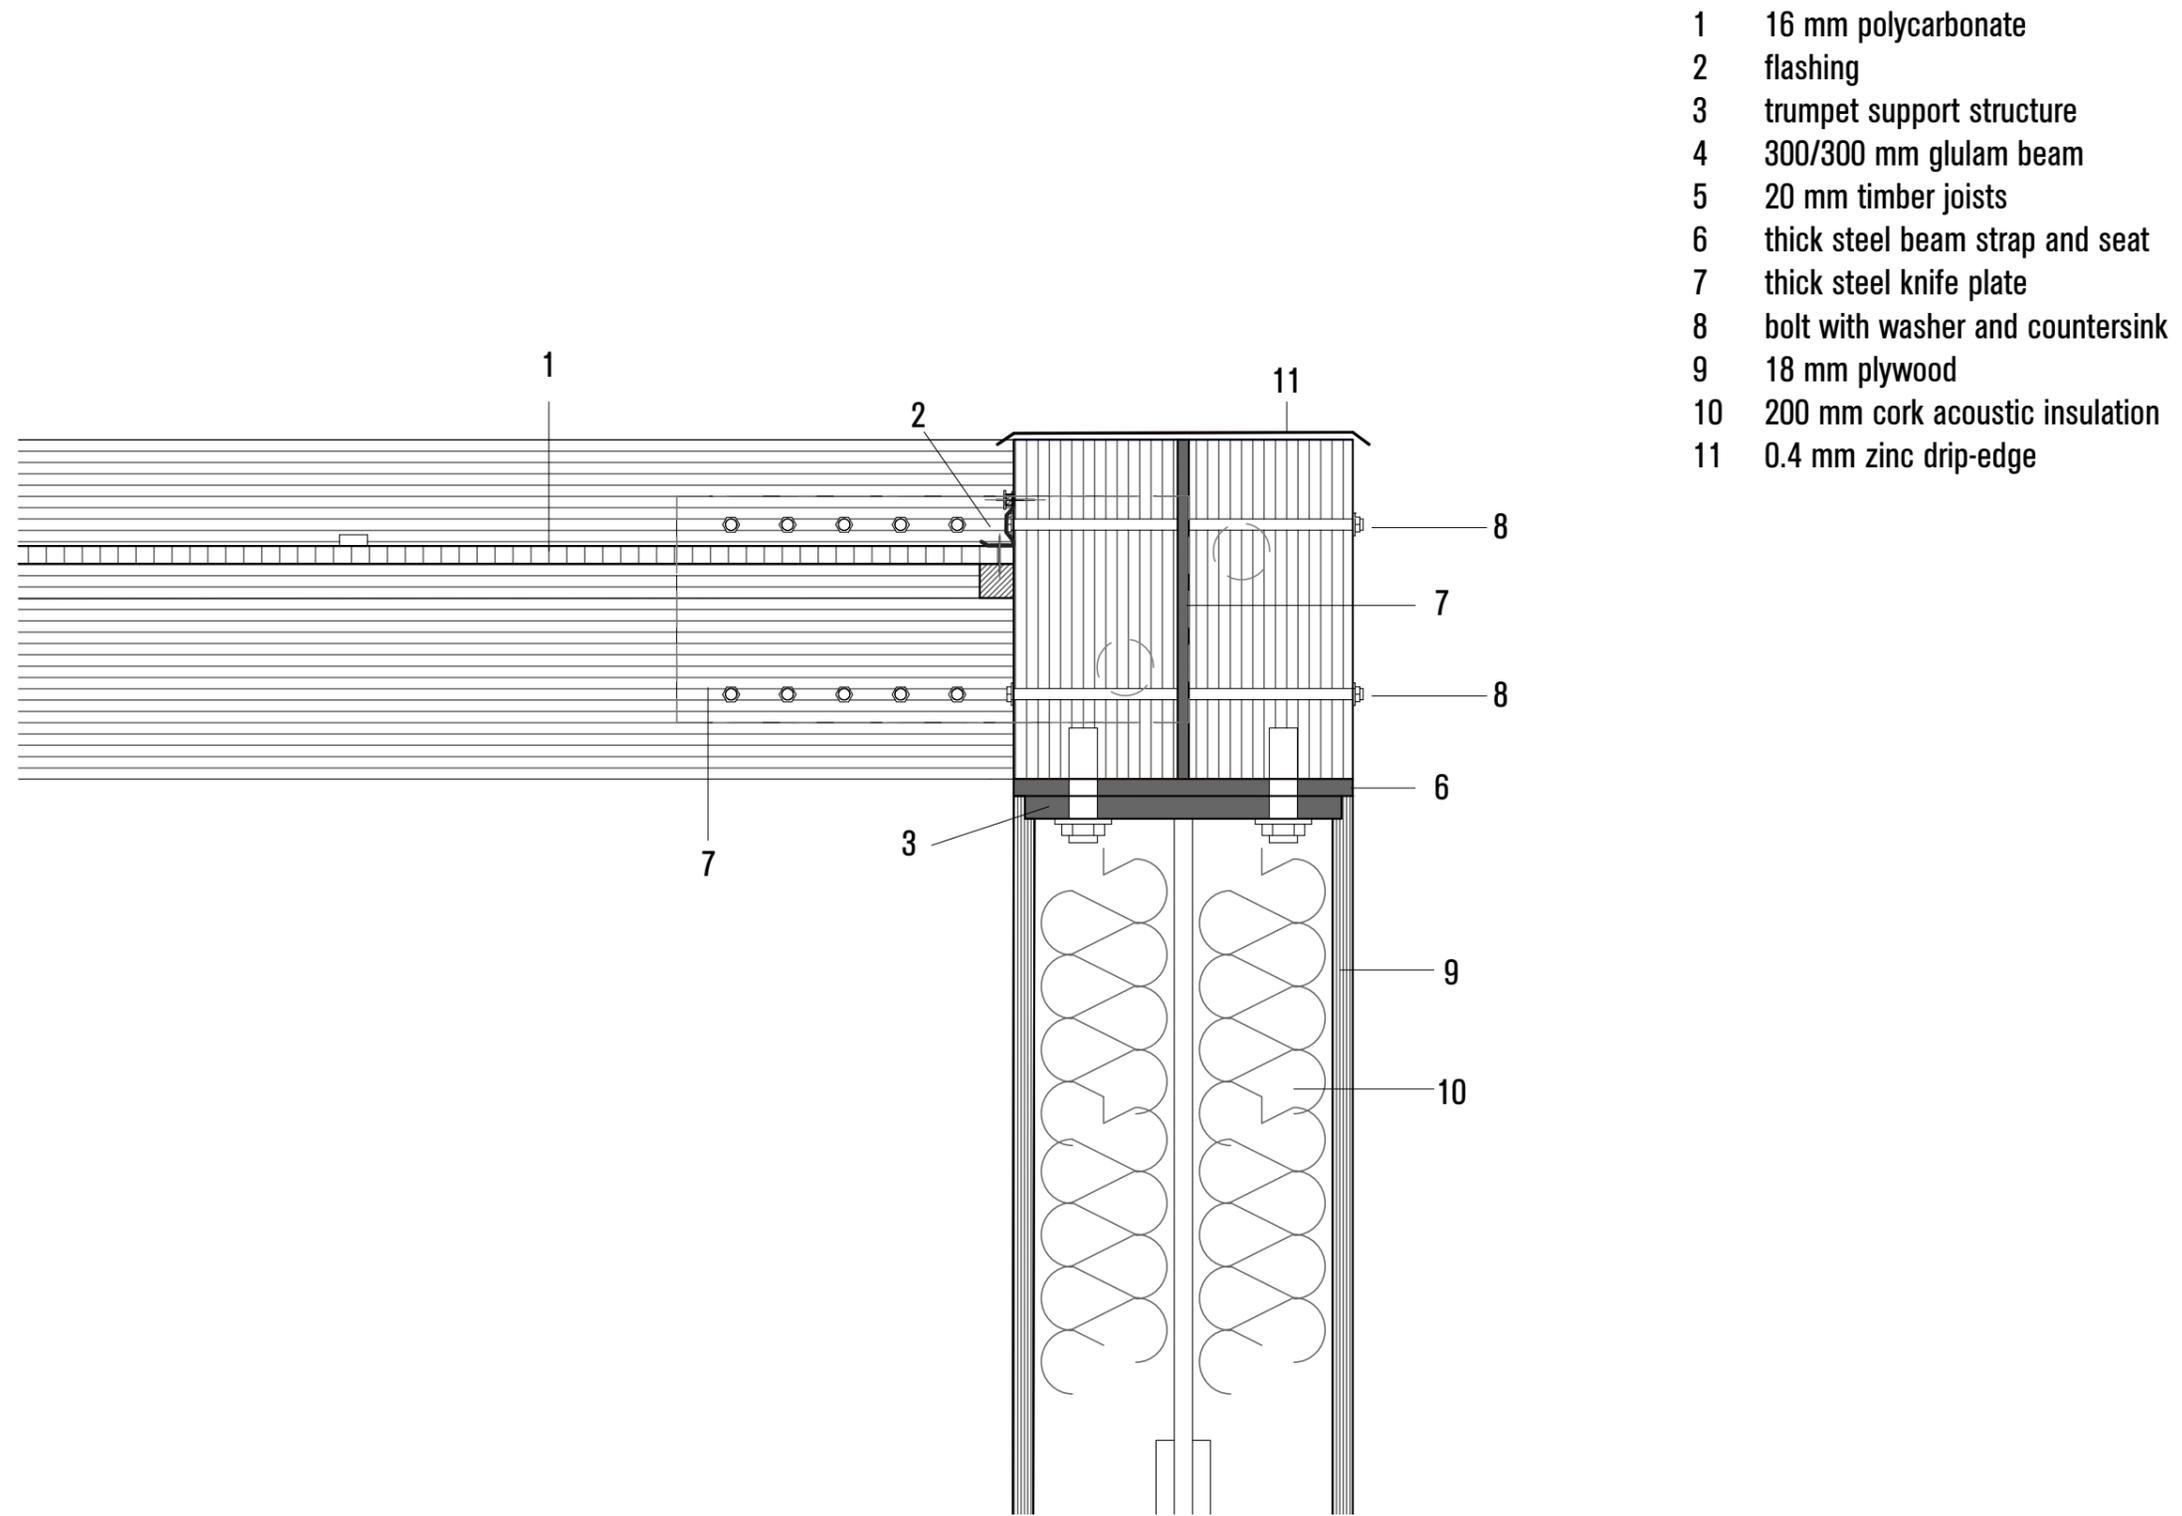

Contact with the floor

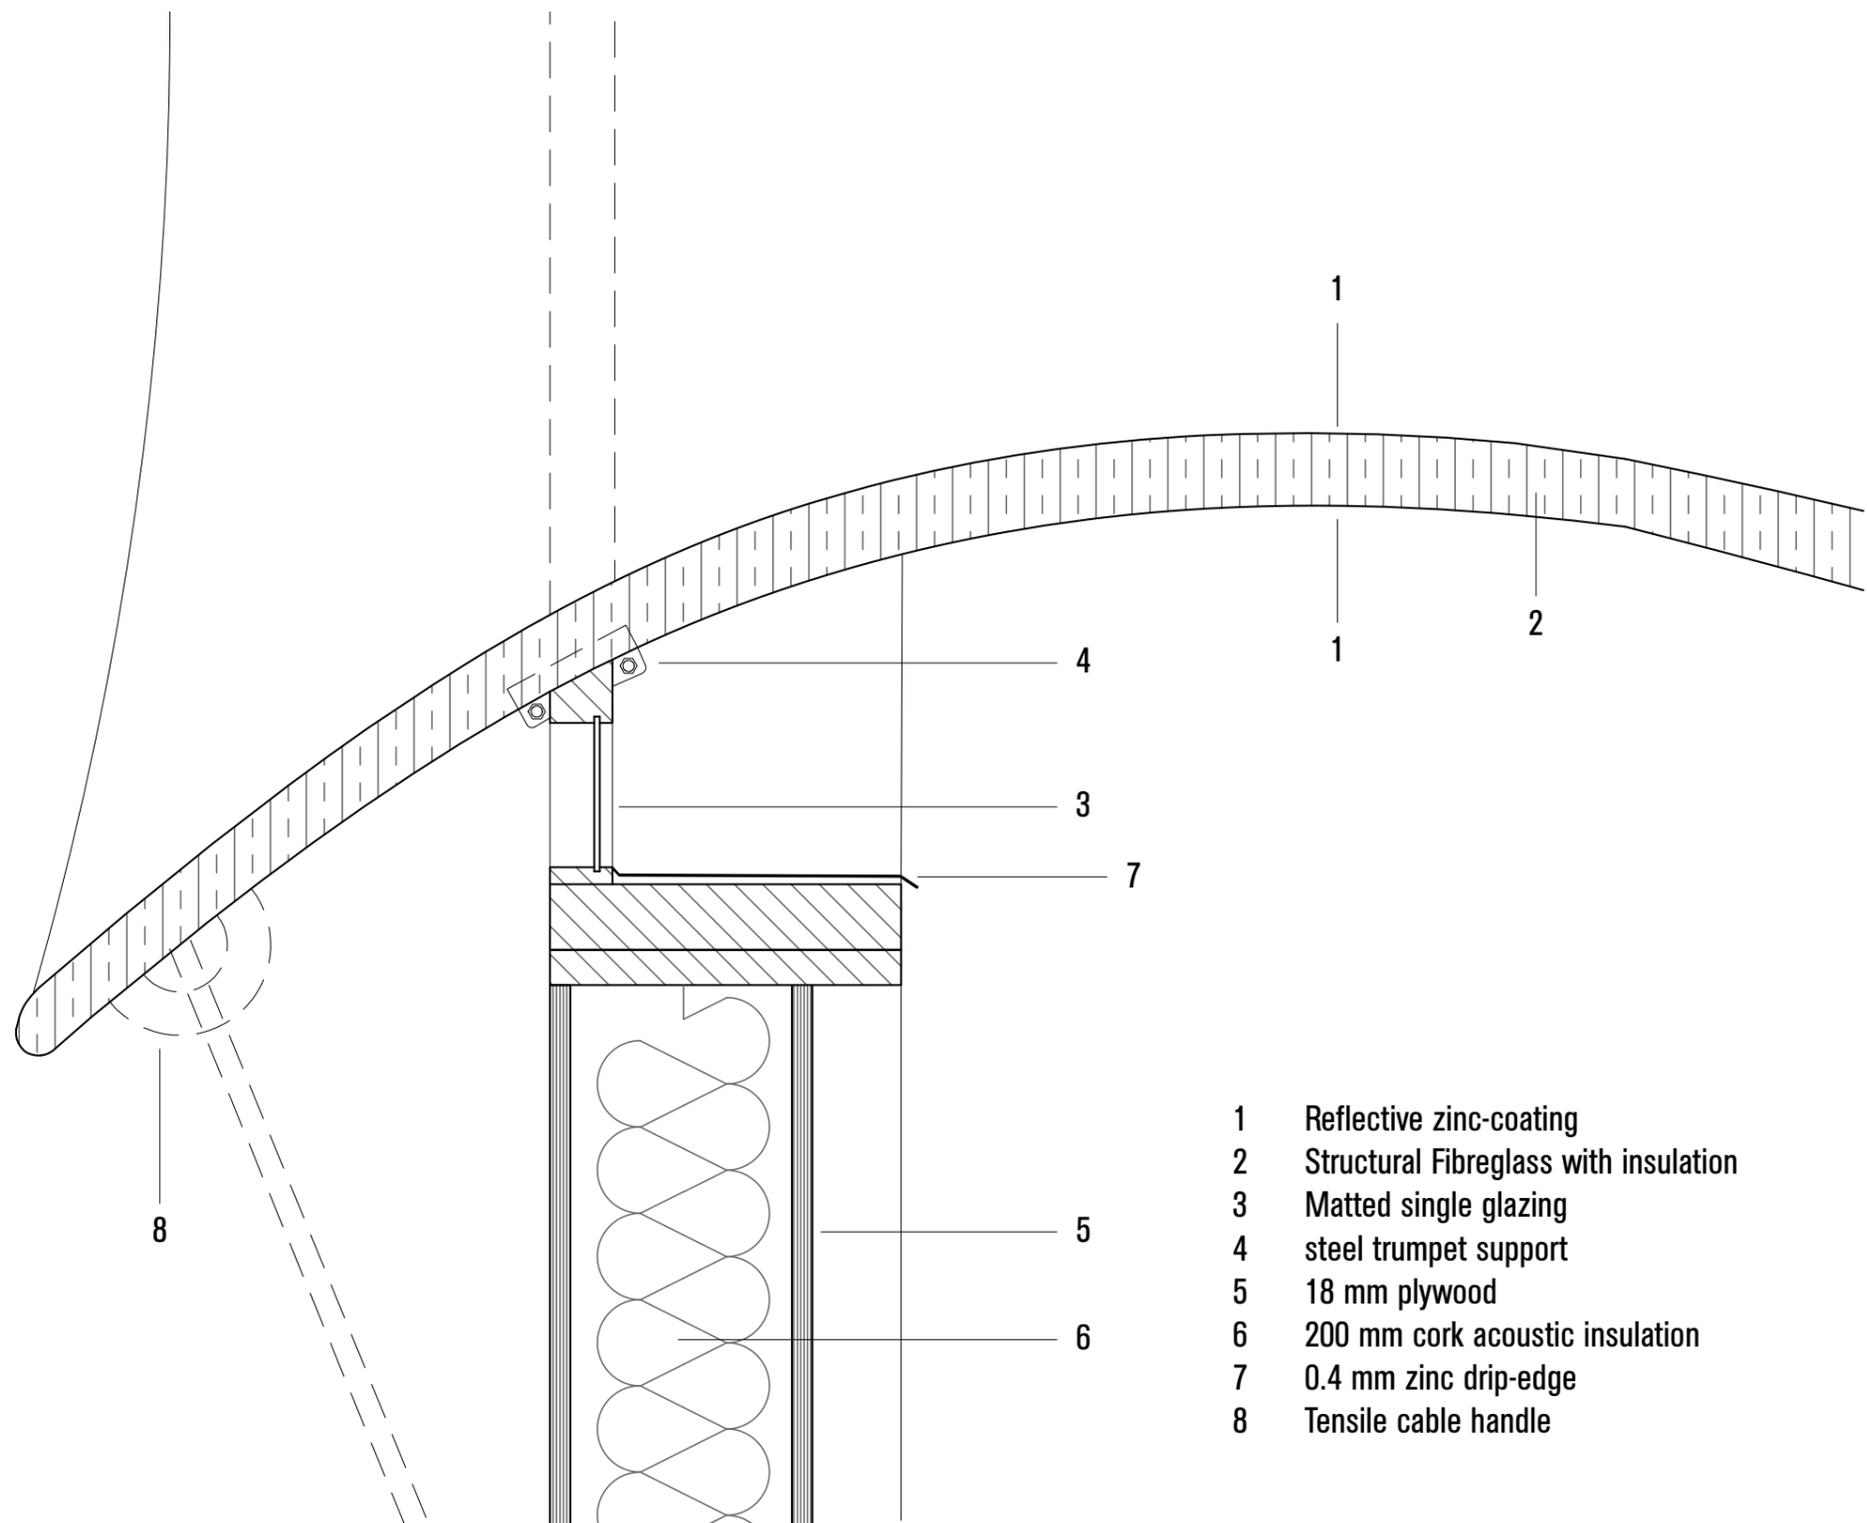

- 1 120 mm diameter steel tubular column
- 2 point hinge joint
- 3 trumpet support structure
- 4 300/300 mm glulam beam
- 5 20 mm timber joists
- 6 thick steel beam strap and seat
- 7 thick steel knife plate
- 8 bolt with washer and countersink
- 9 18 mm plywood
- 10 200 mm cork acoustic insulation

Contact with the box

- 1 16 mm polycarbonate
- 2 flashing
- 3 trumpet support structure
- 4 300/300 mm glulam beam
- 5 20 mm timber joists
- 6 thick steel beam strap and seat
- 7 thick steel knife plate
- 8 bolt with washer and countersink
- 9 18 mm plywood
- 10 200 mm cork acoustic insulation
- 11 0.4 mm zinc drip-edge

Contact with the roof

Contact with the trumpet

Three Interventions

Three modes of temporality

River Arzobispo

During Monsoon season

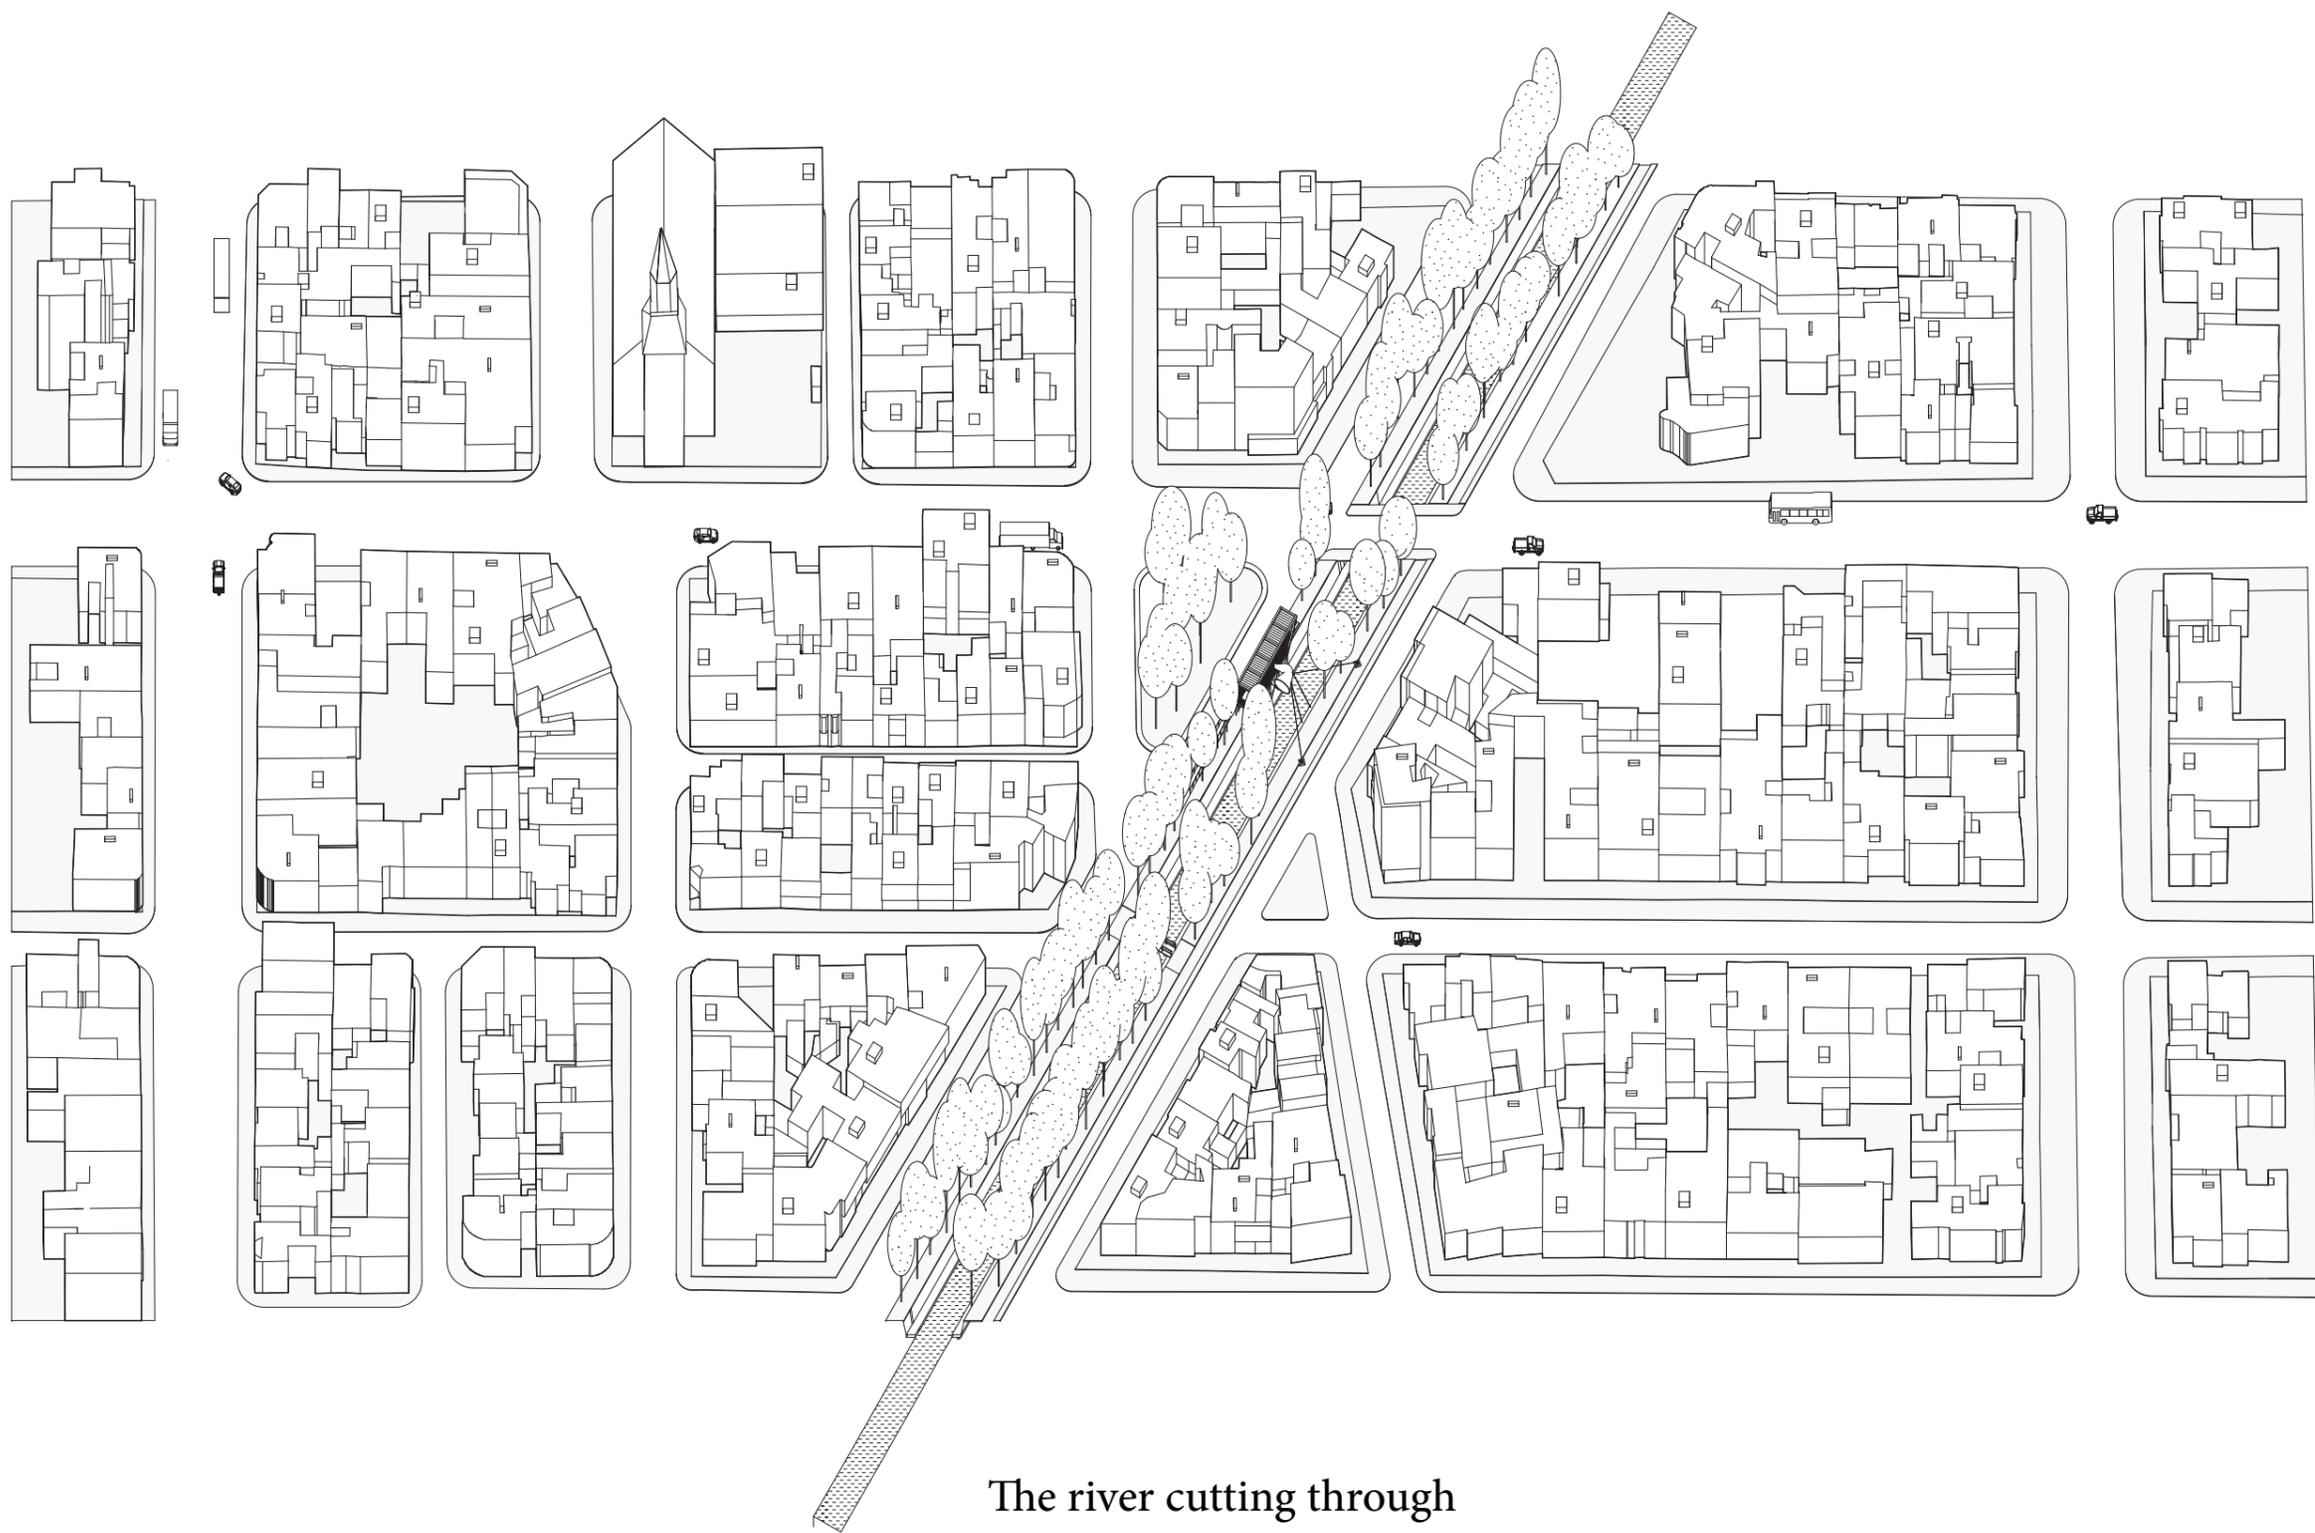

A waste disposal

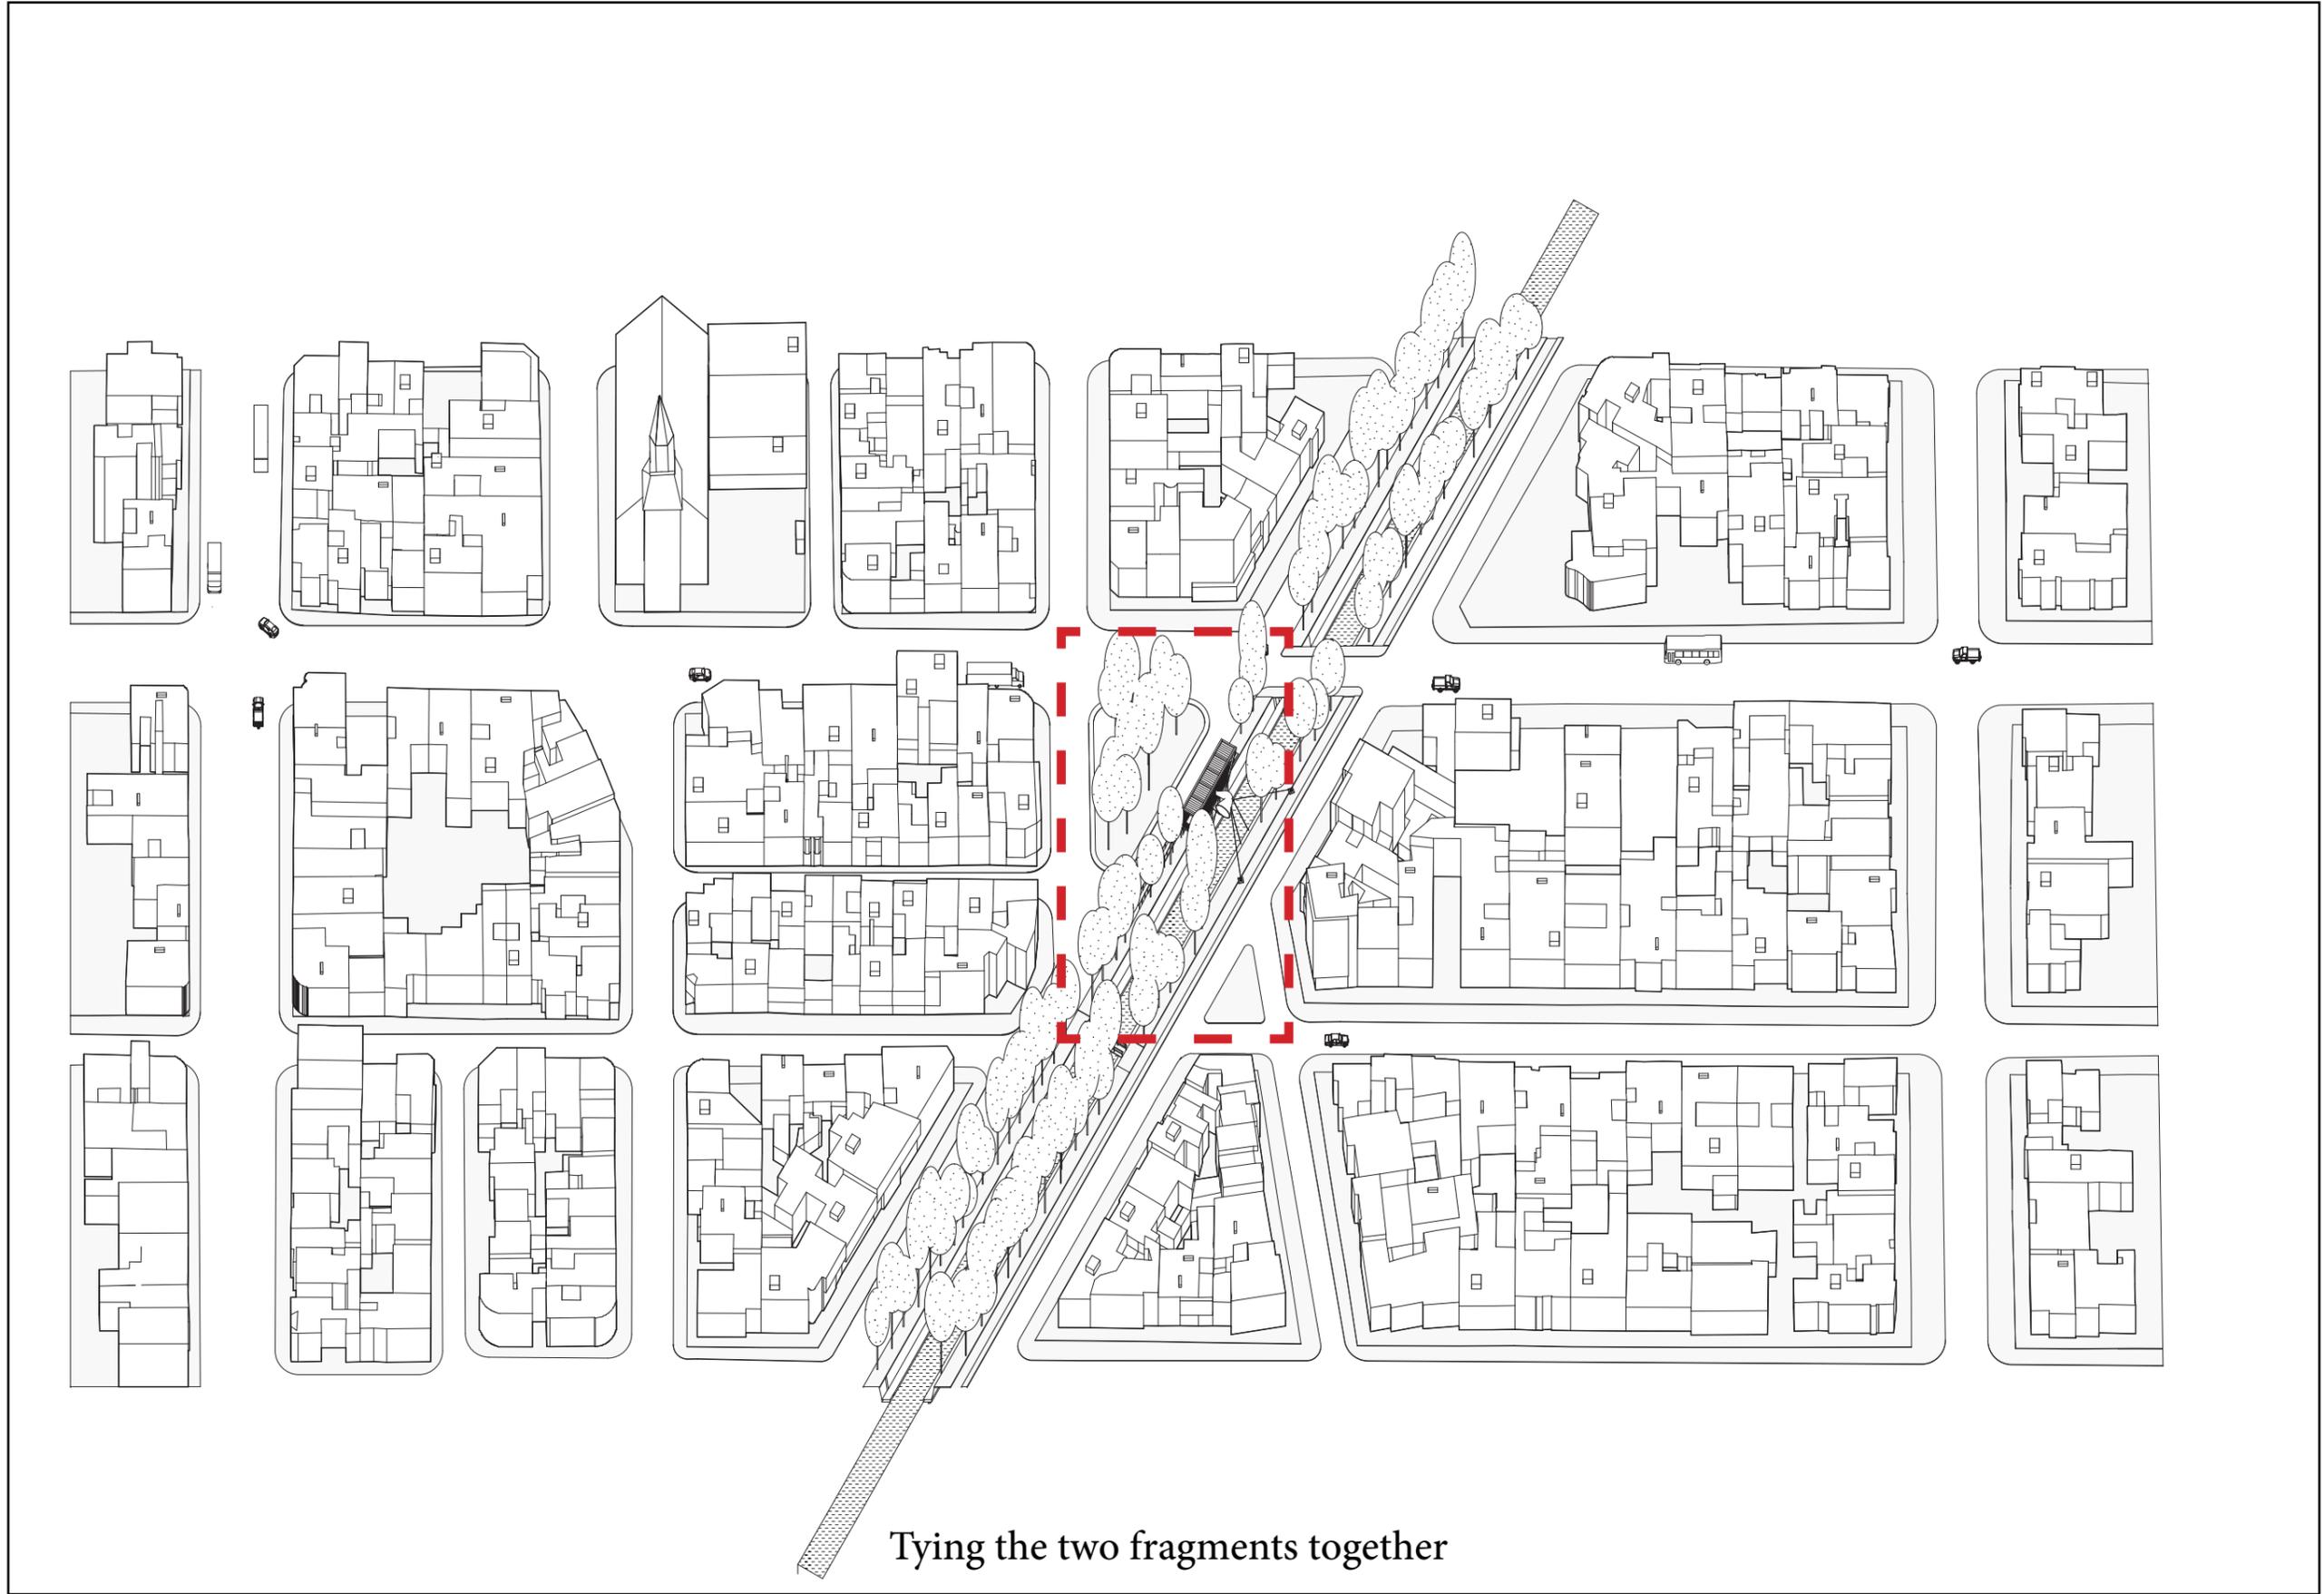

A place in people's hearts

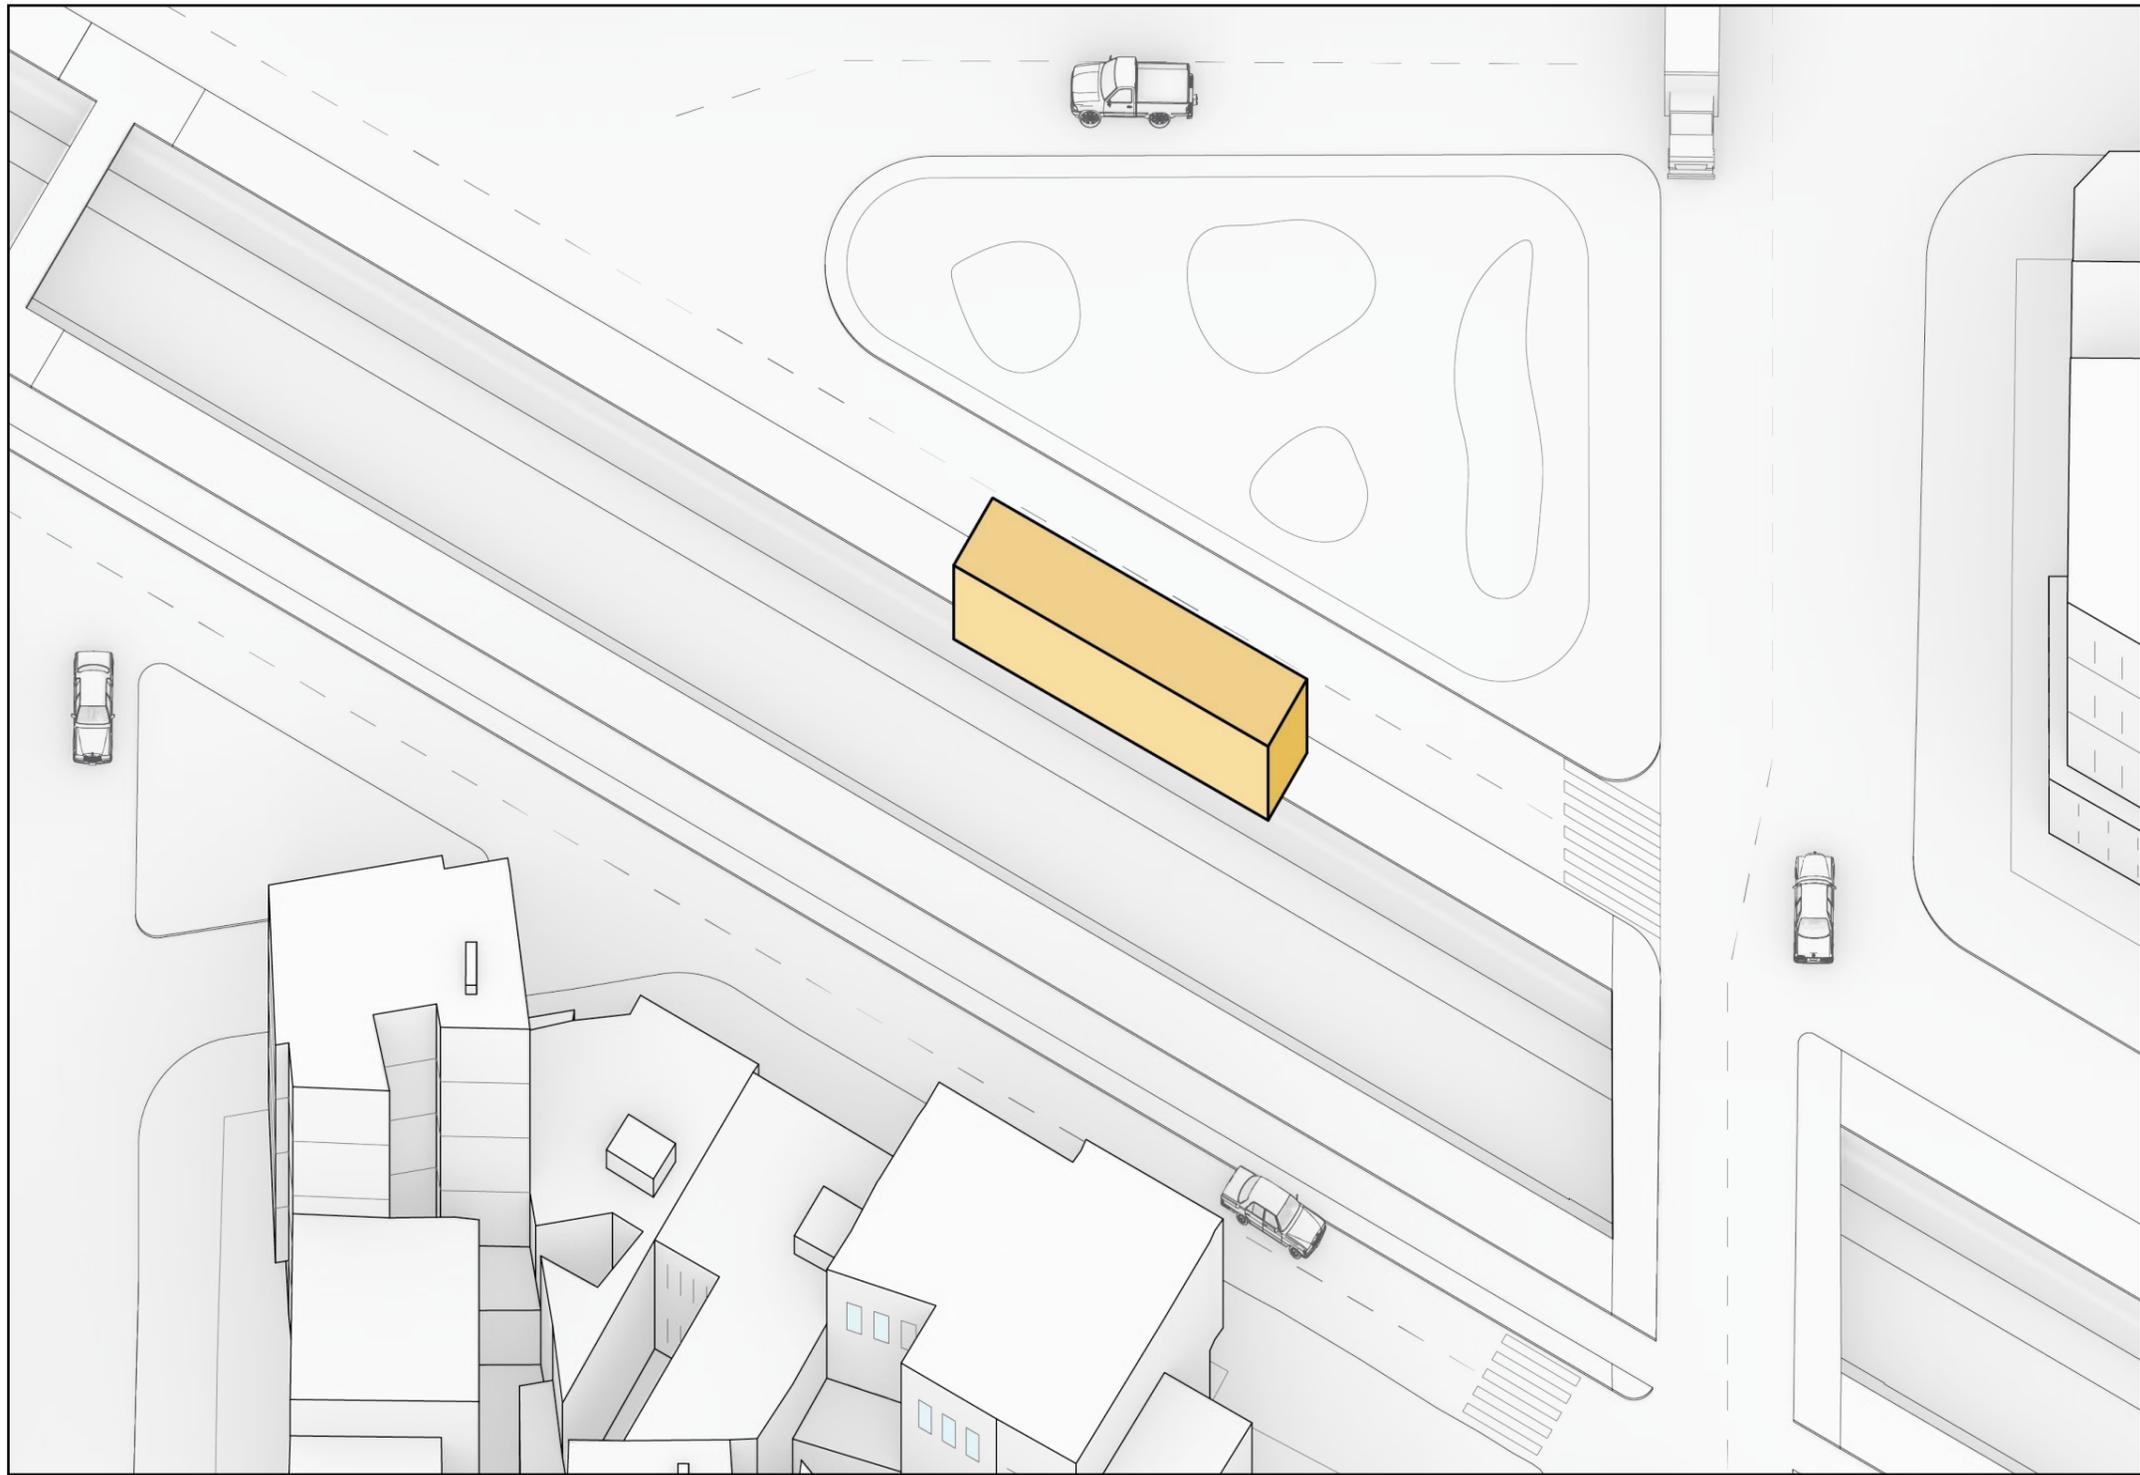

Mode: **Urban Regeneration**

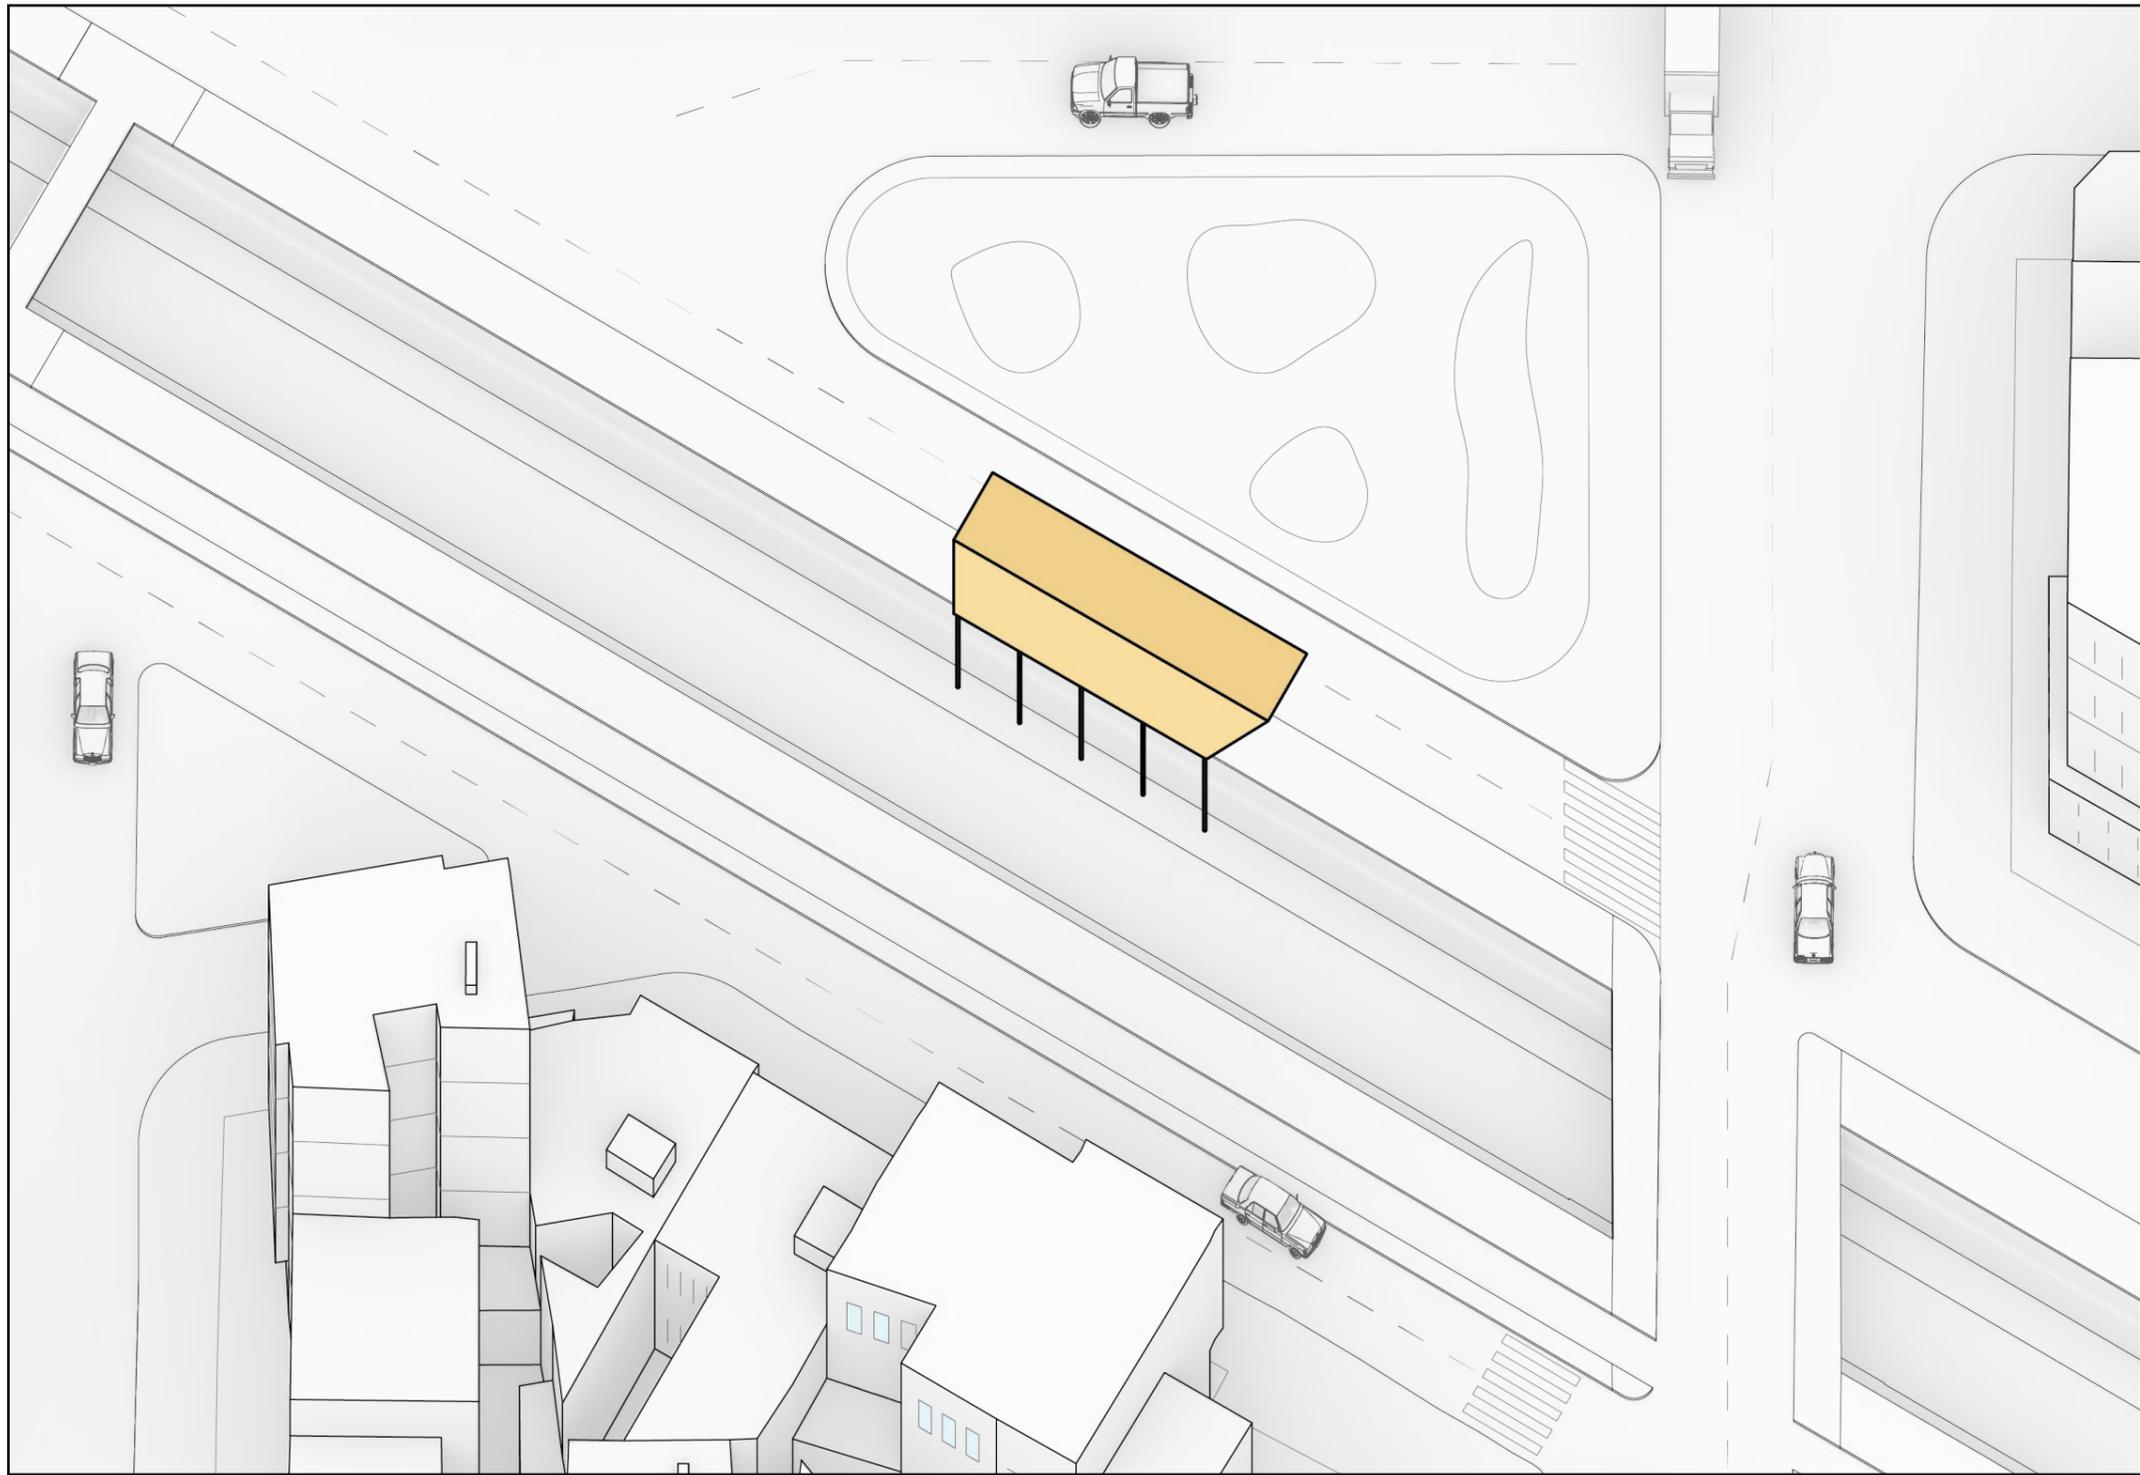

The river cutting through

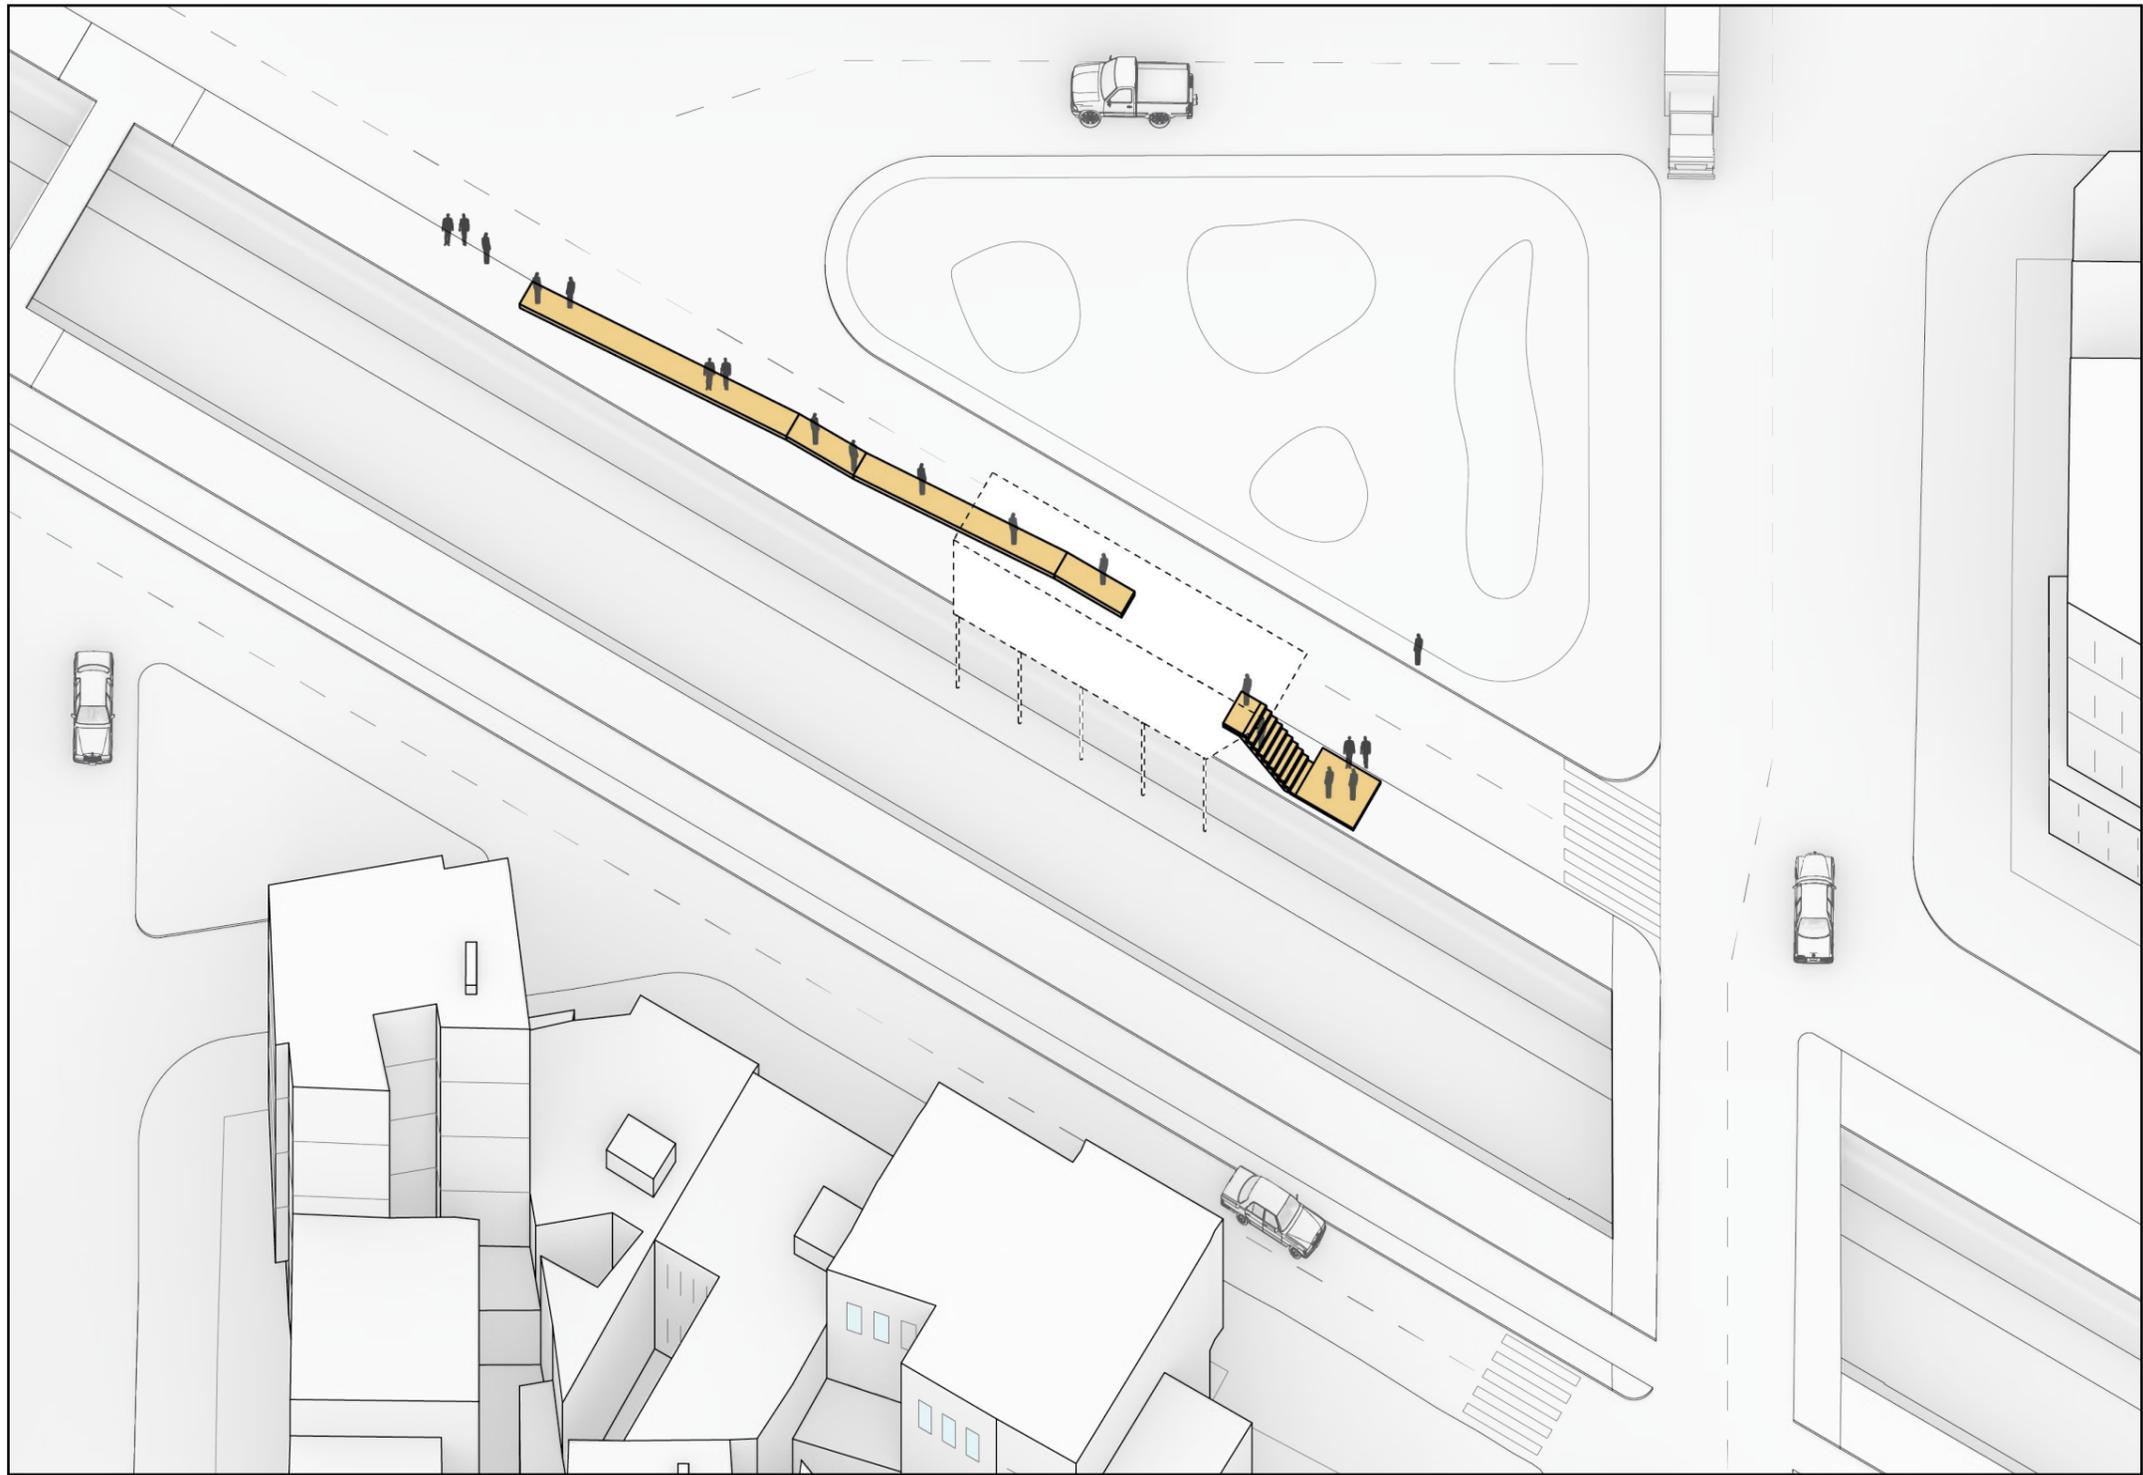

Tying the two fragments together

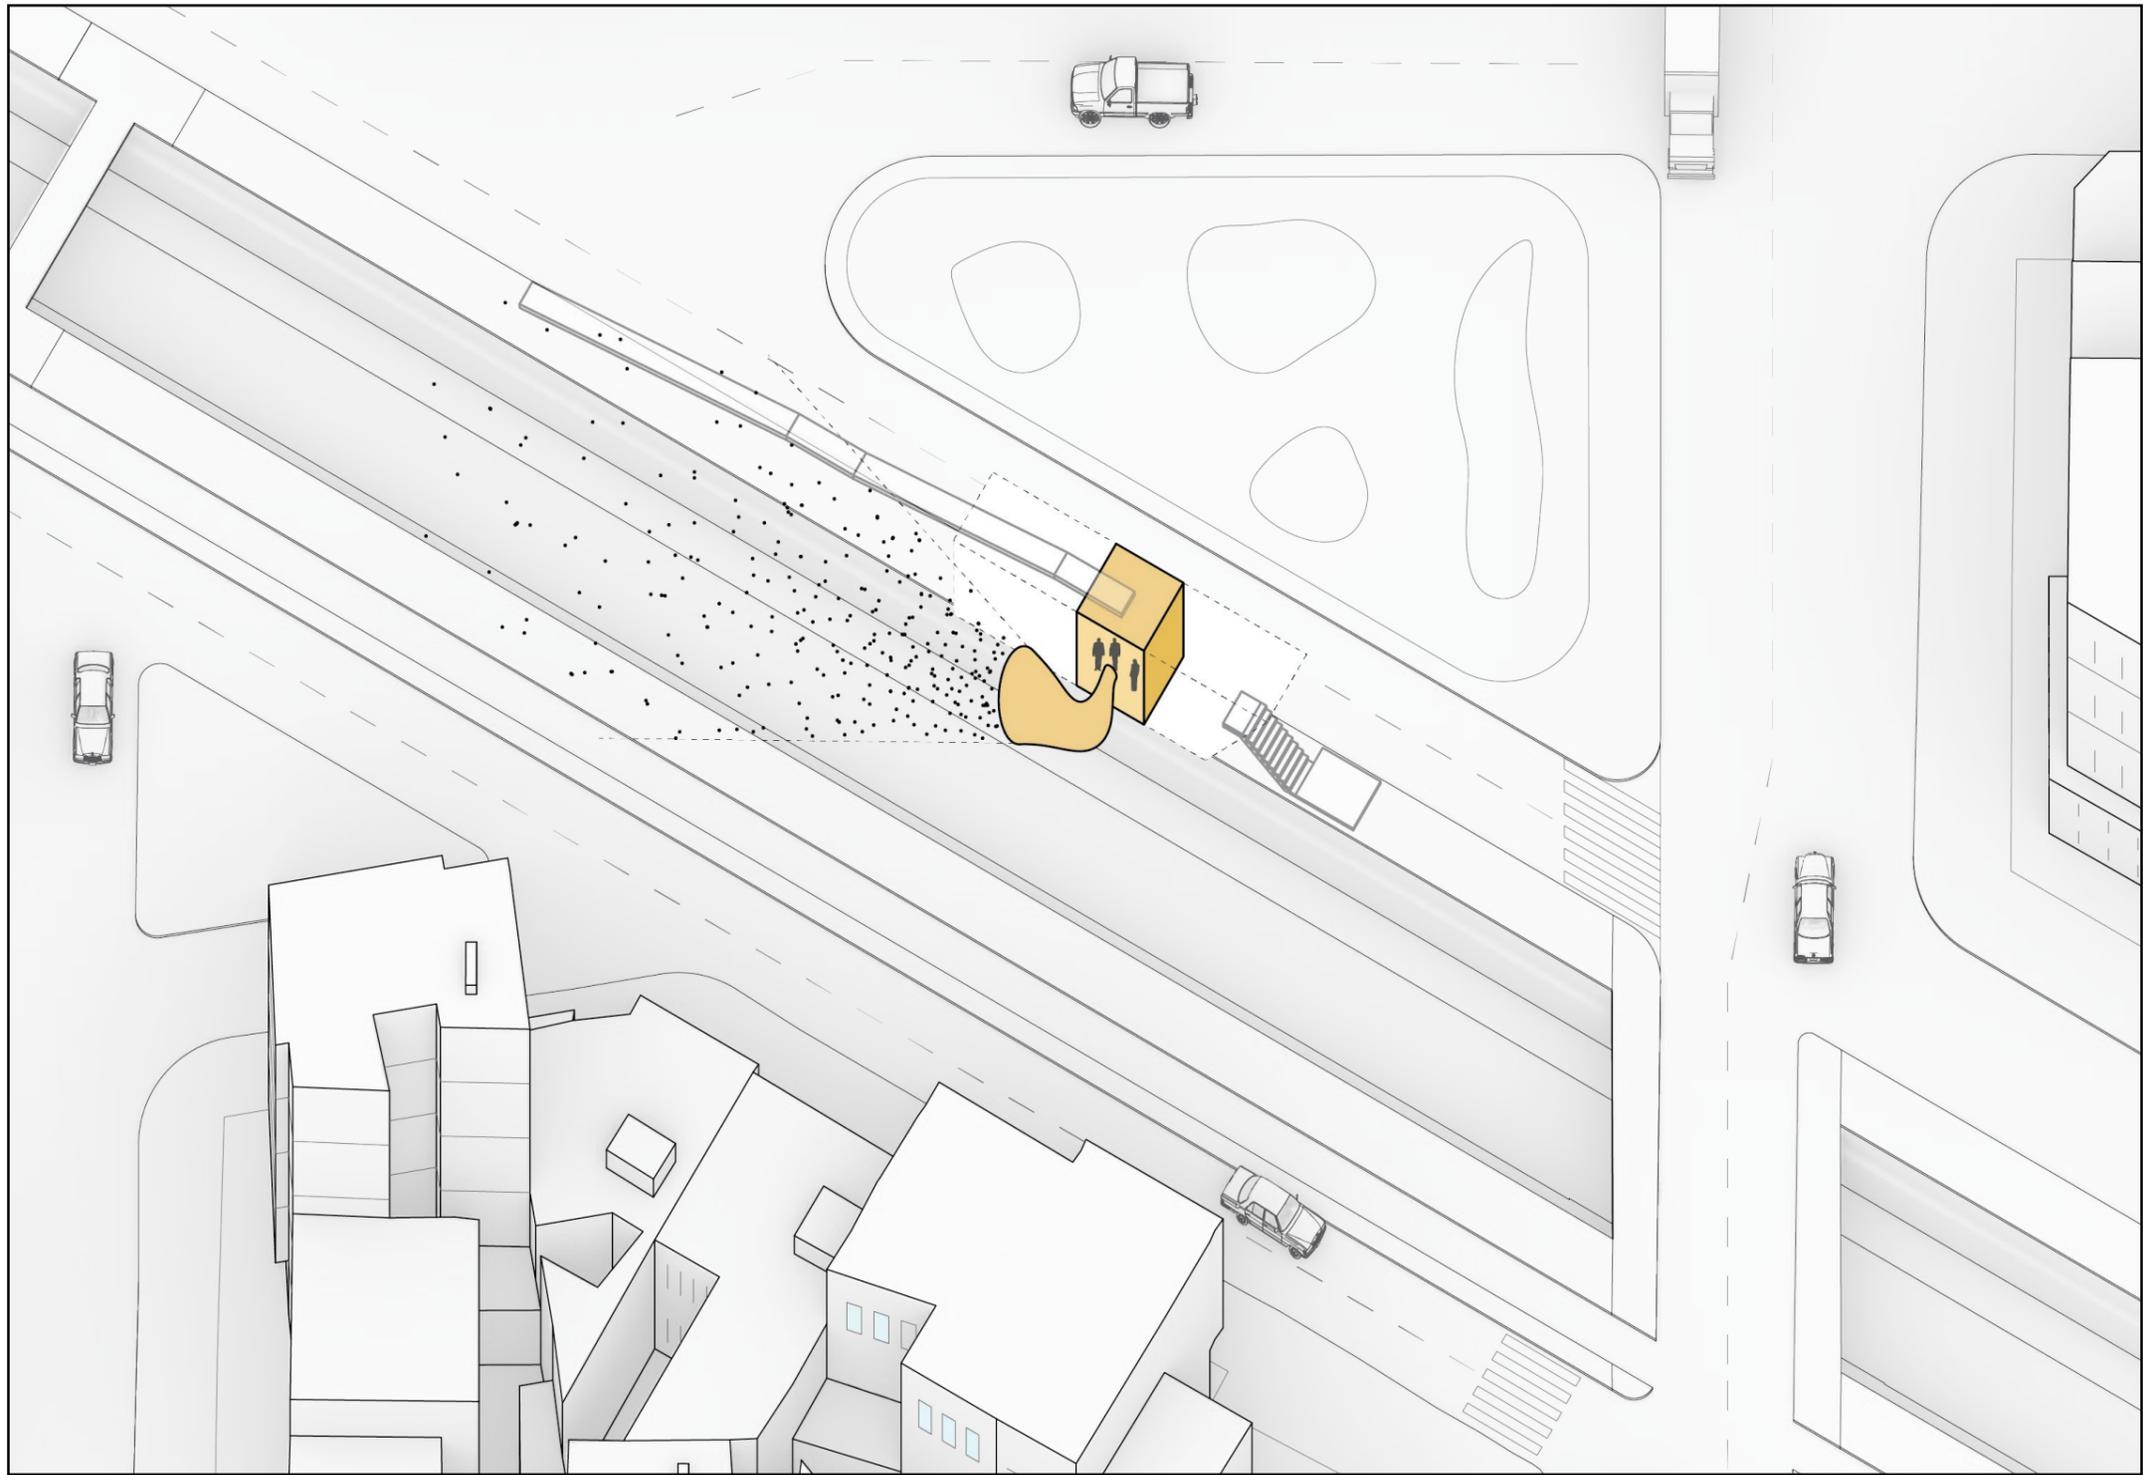

A rectilinear volume is placed along side the river

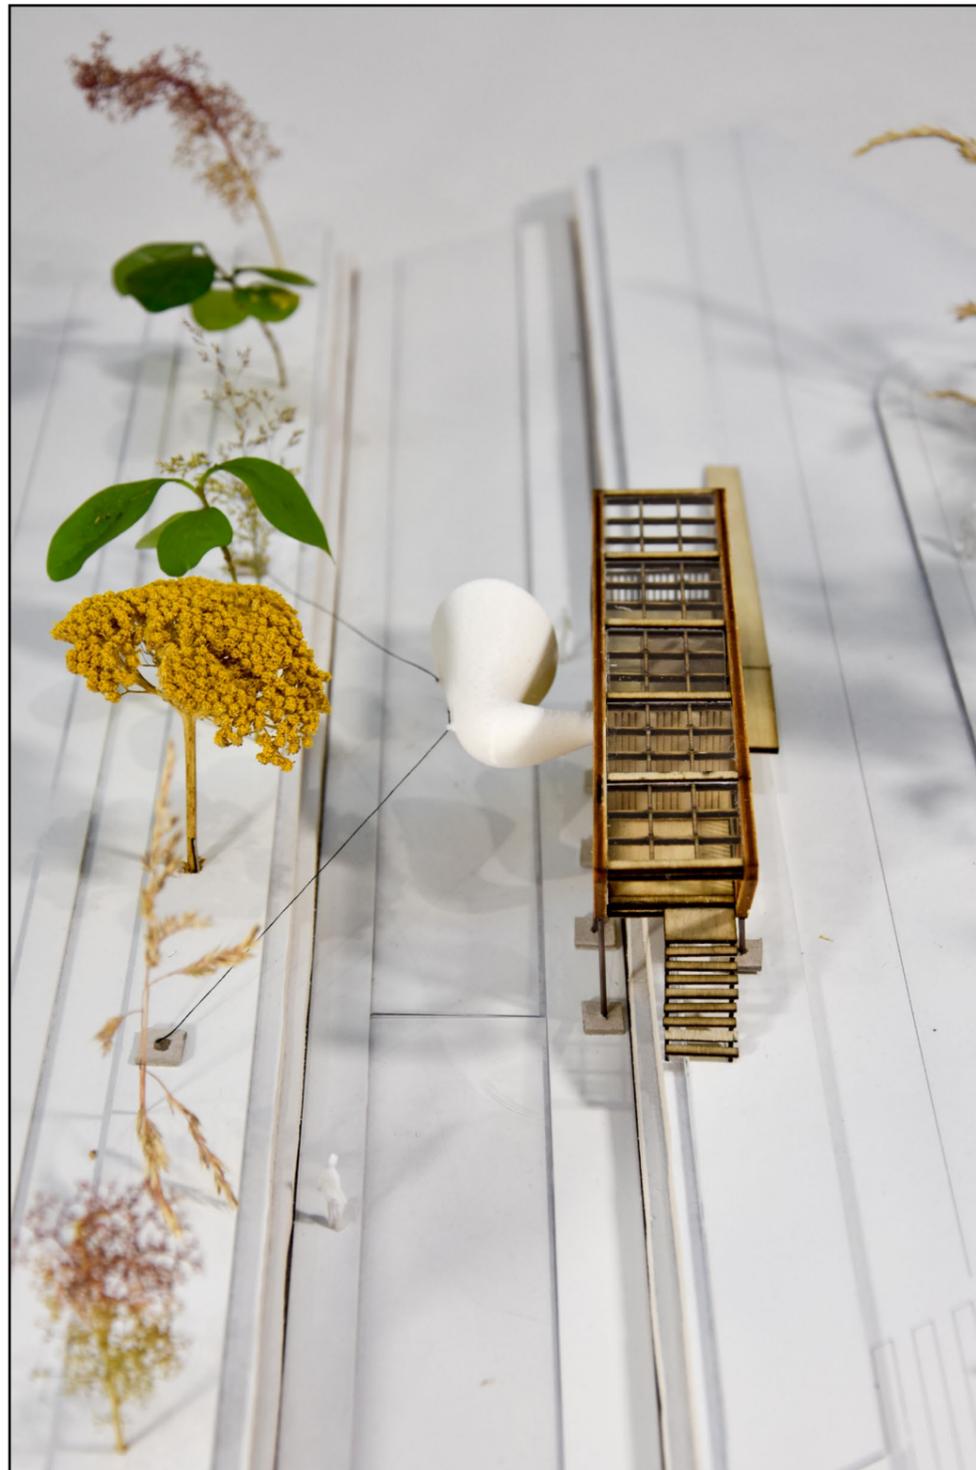

Light grounding

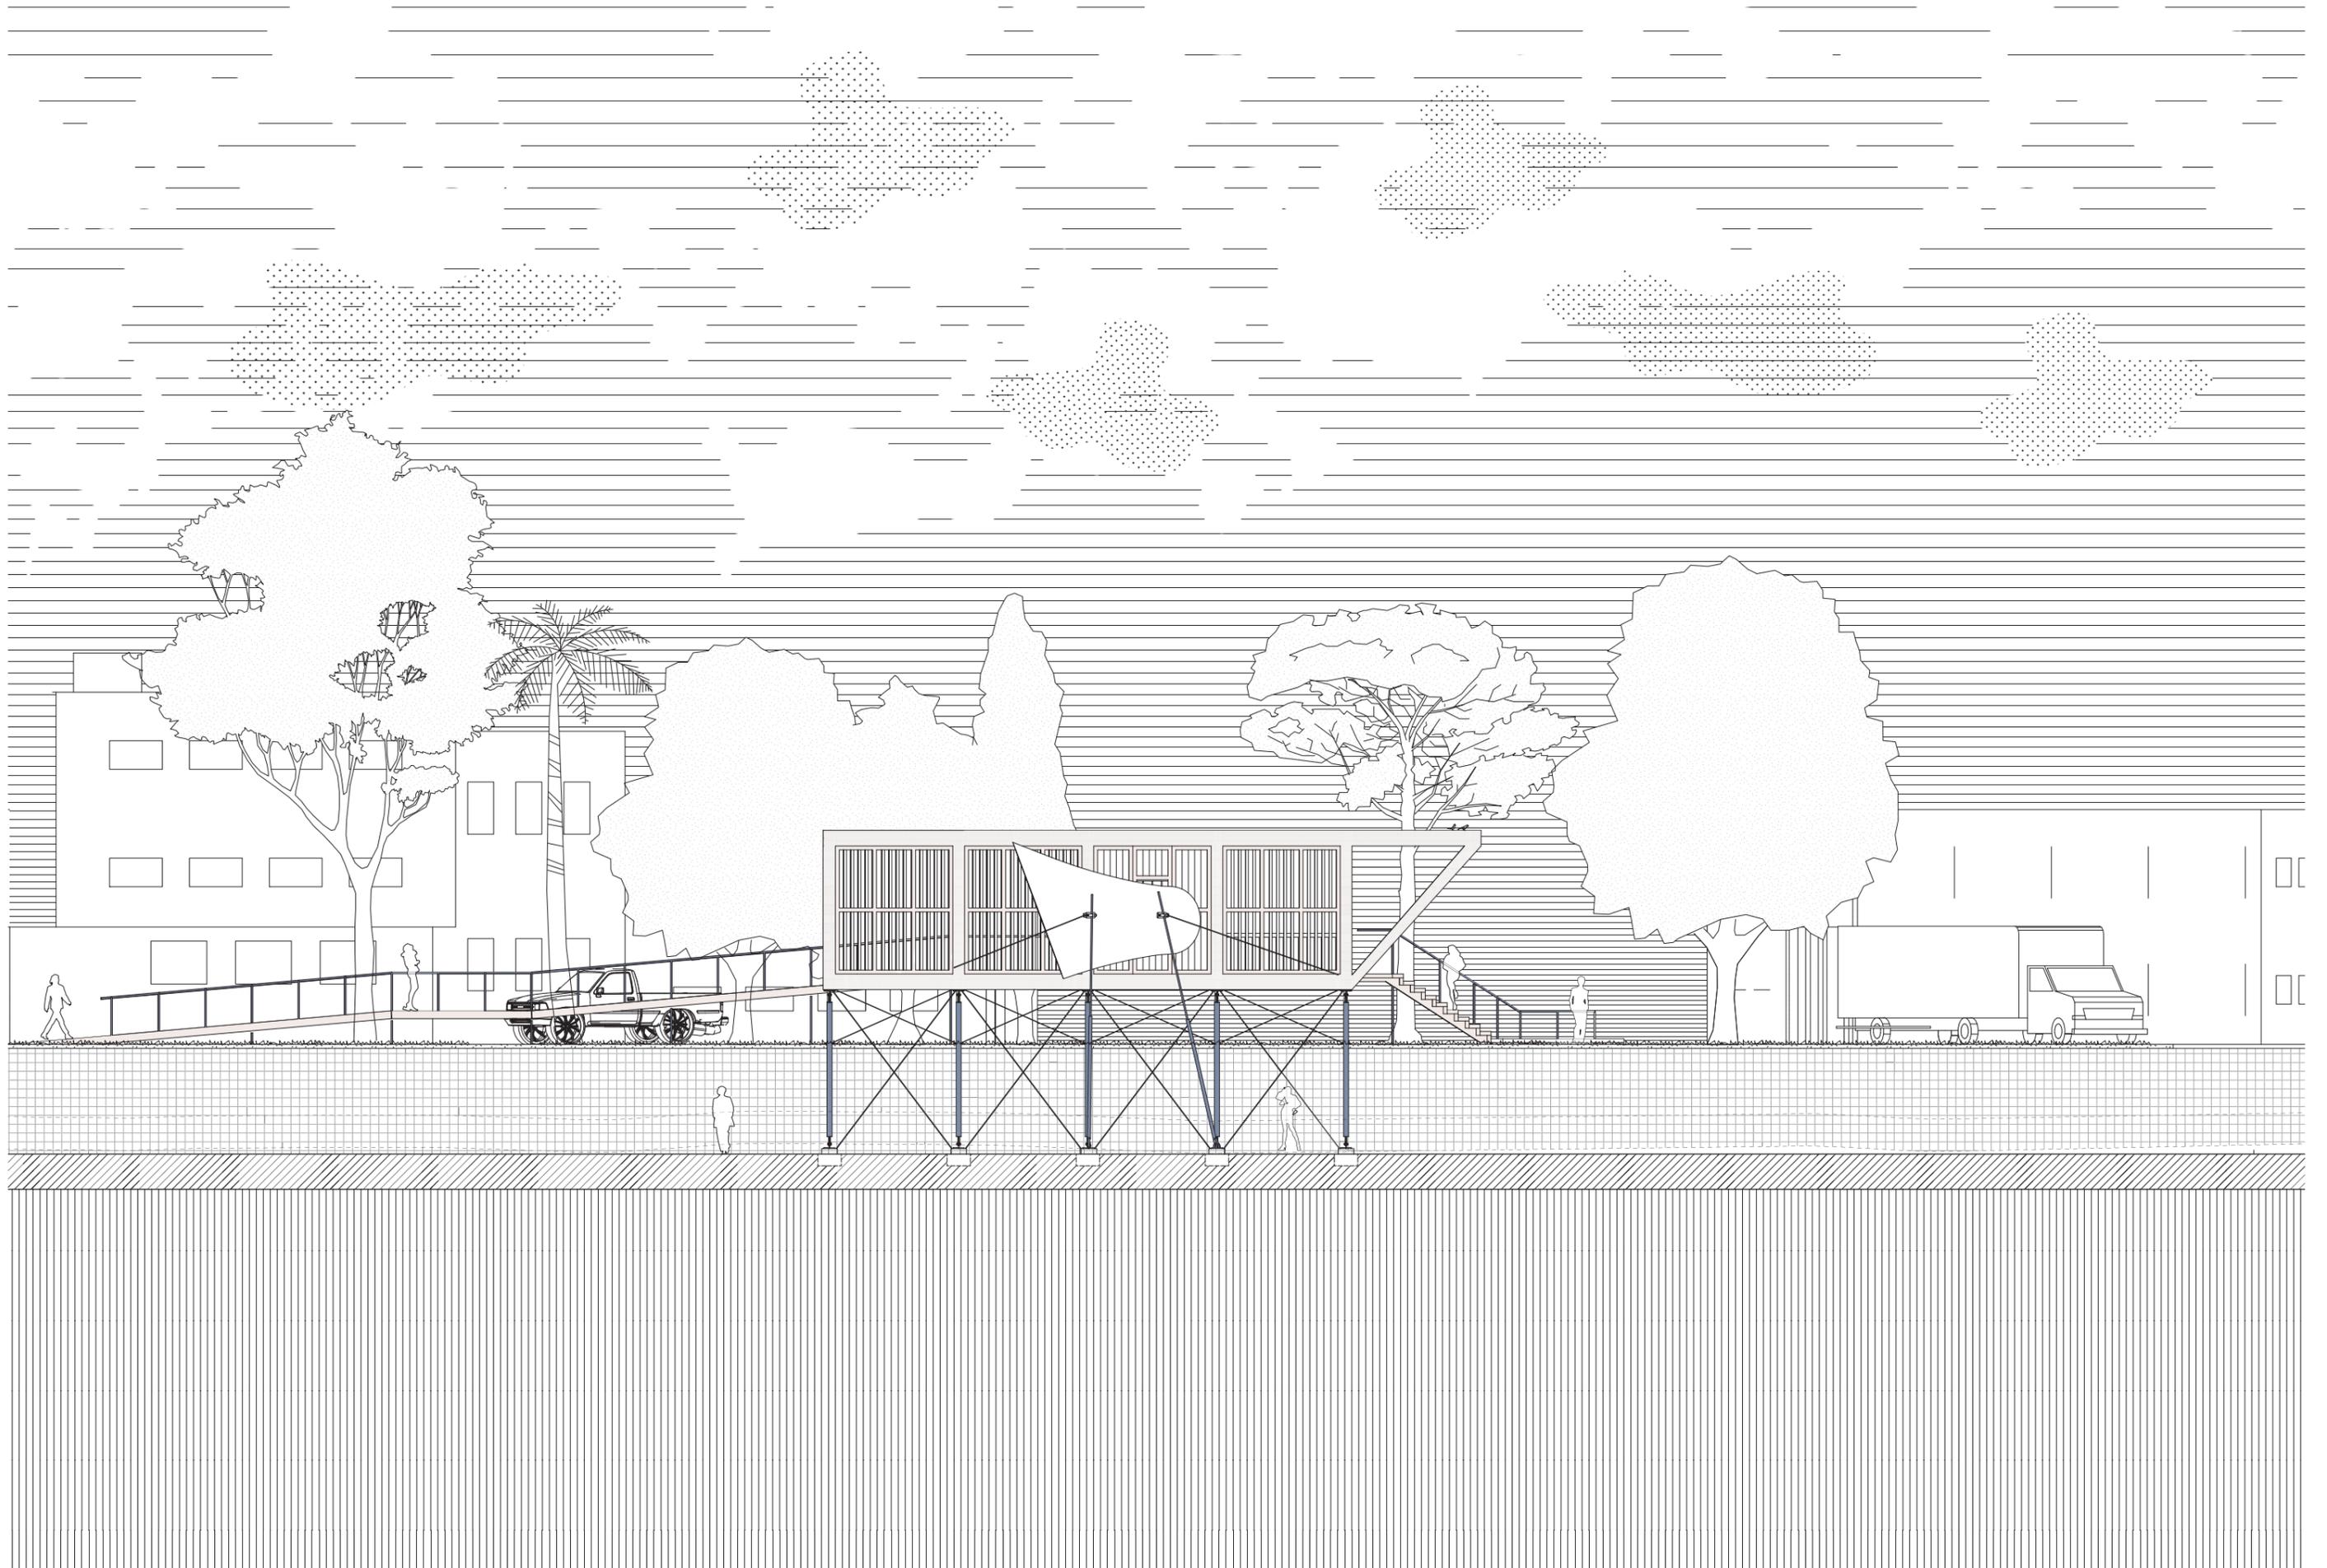

Connectivity - Accesibility

Amplify

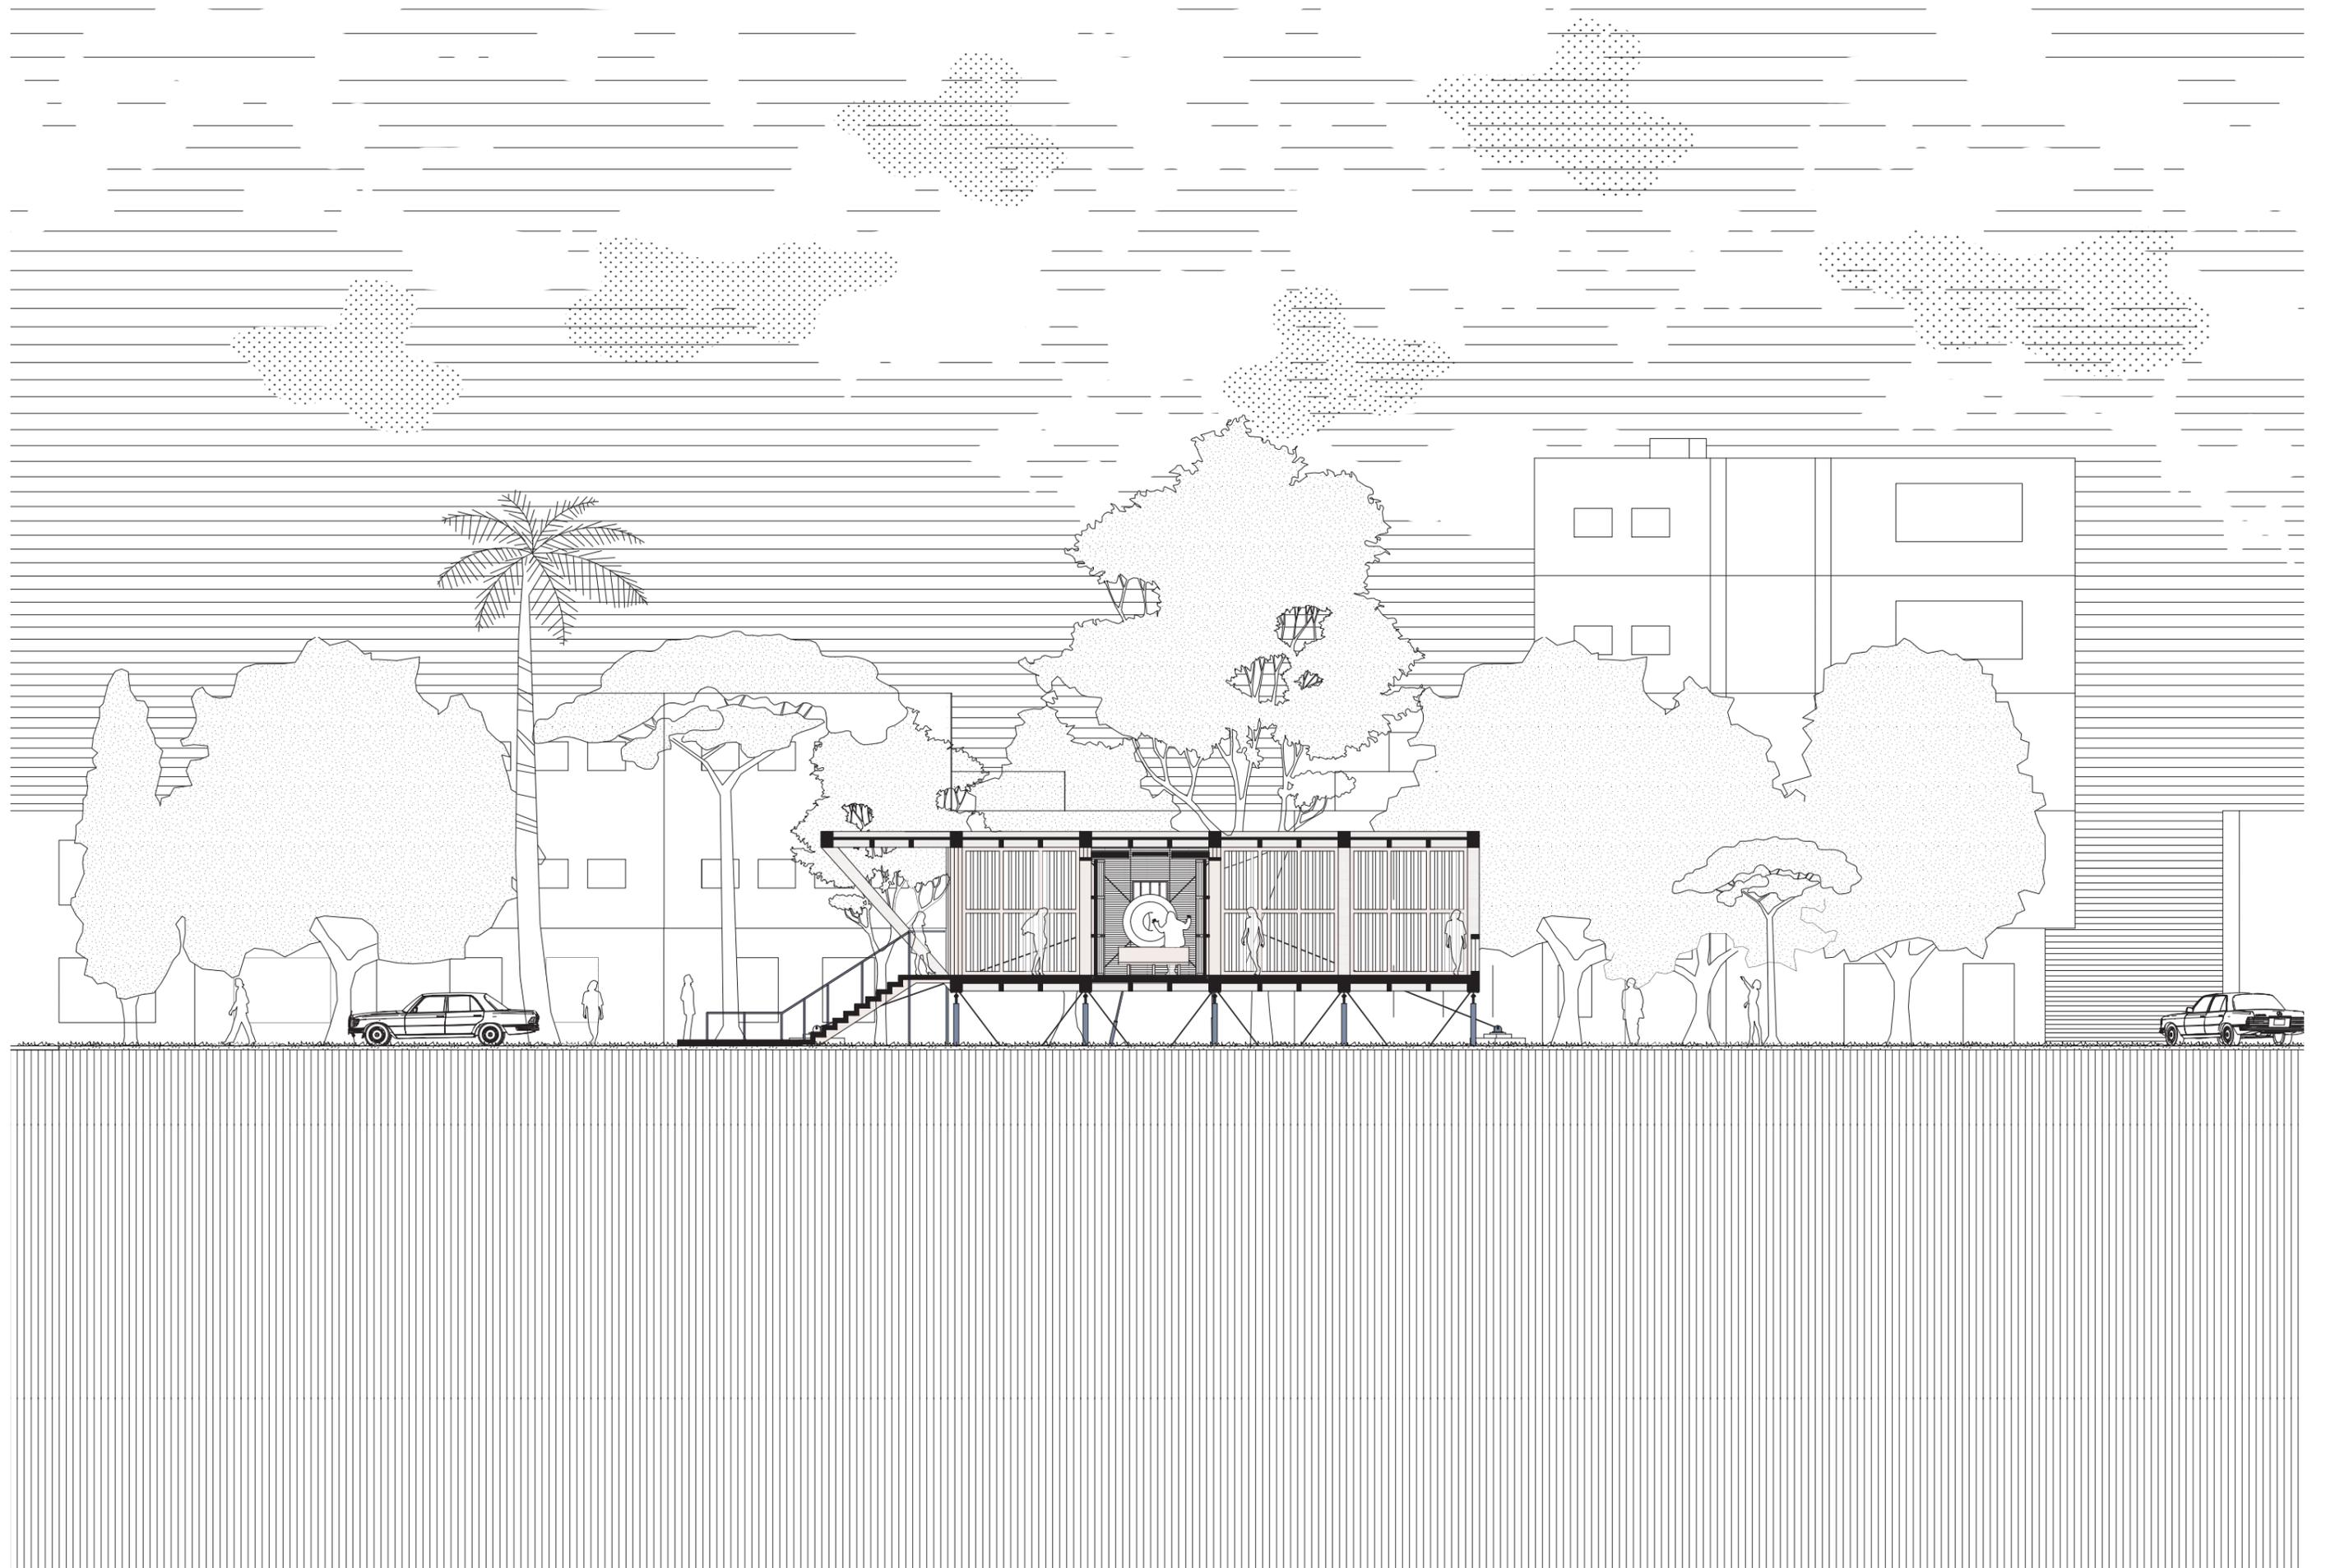

Urban gesture

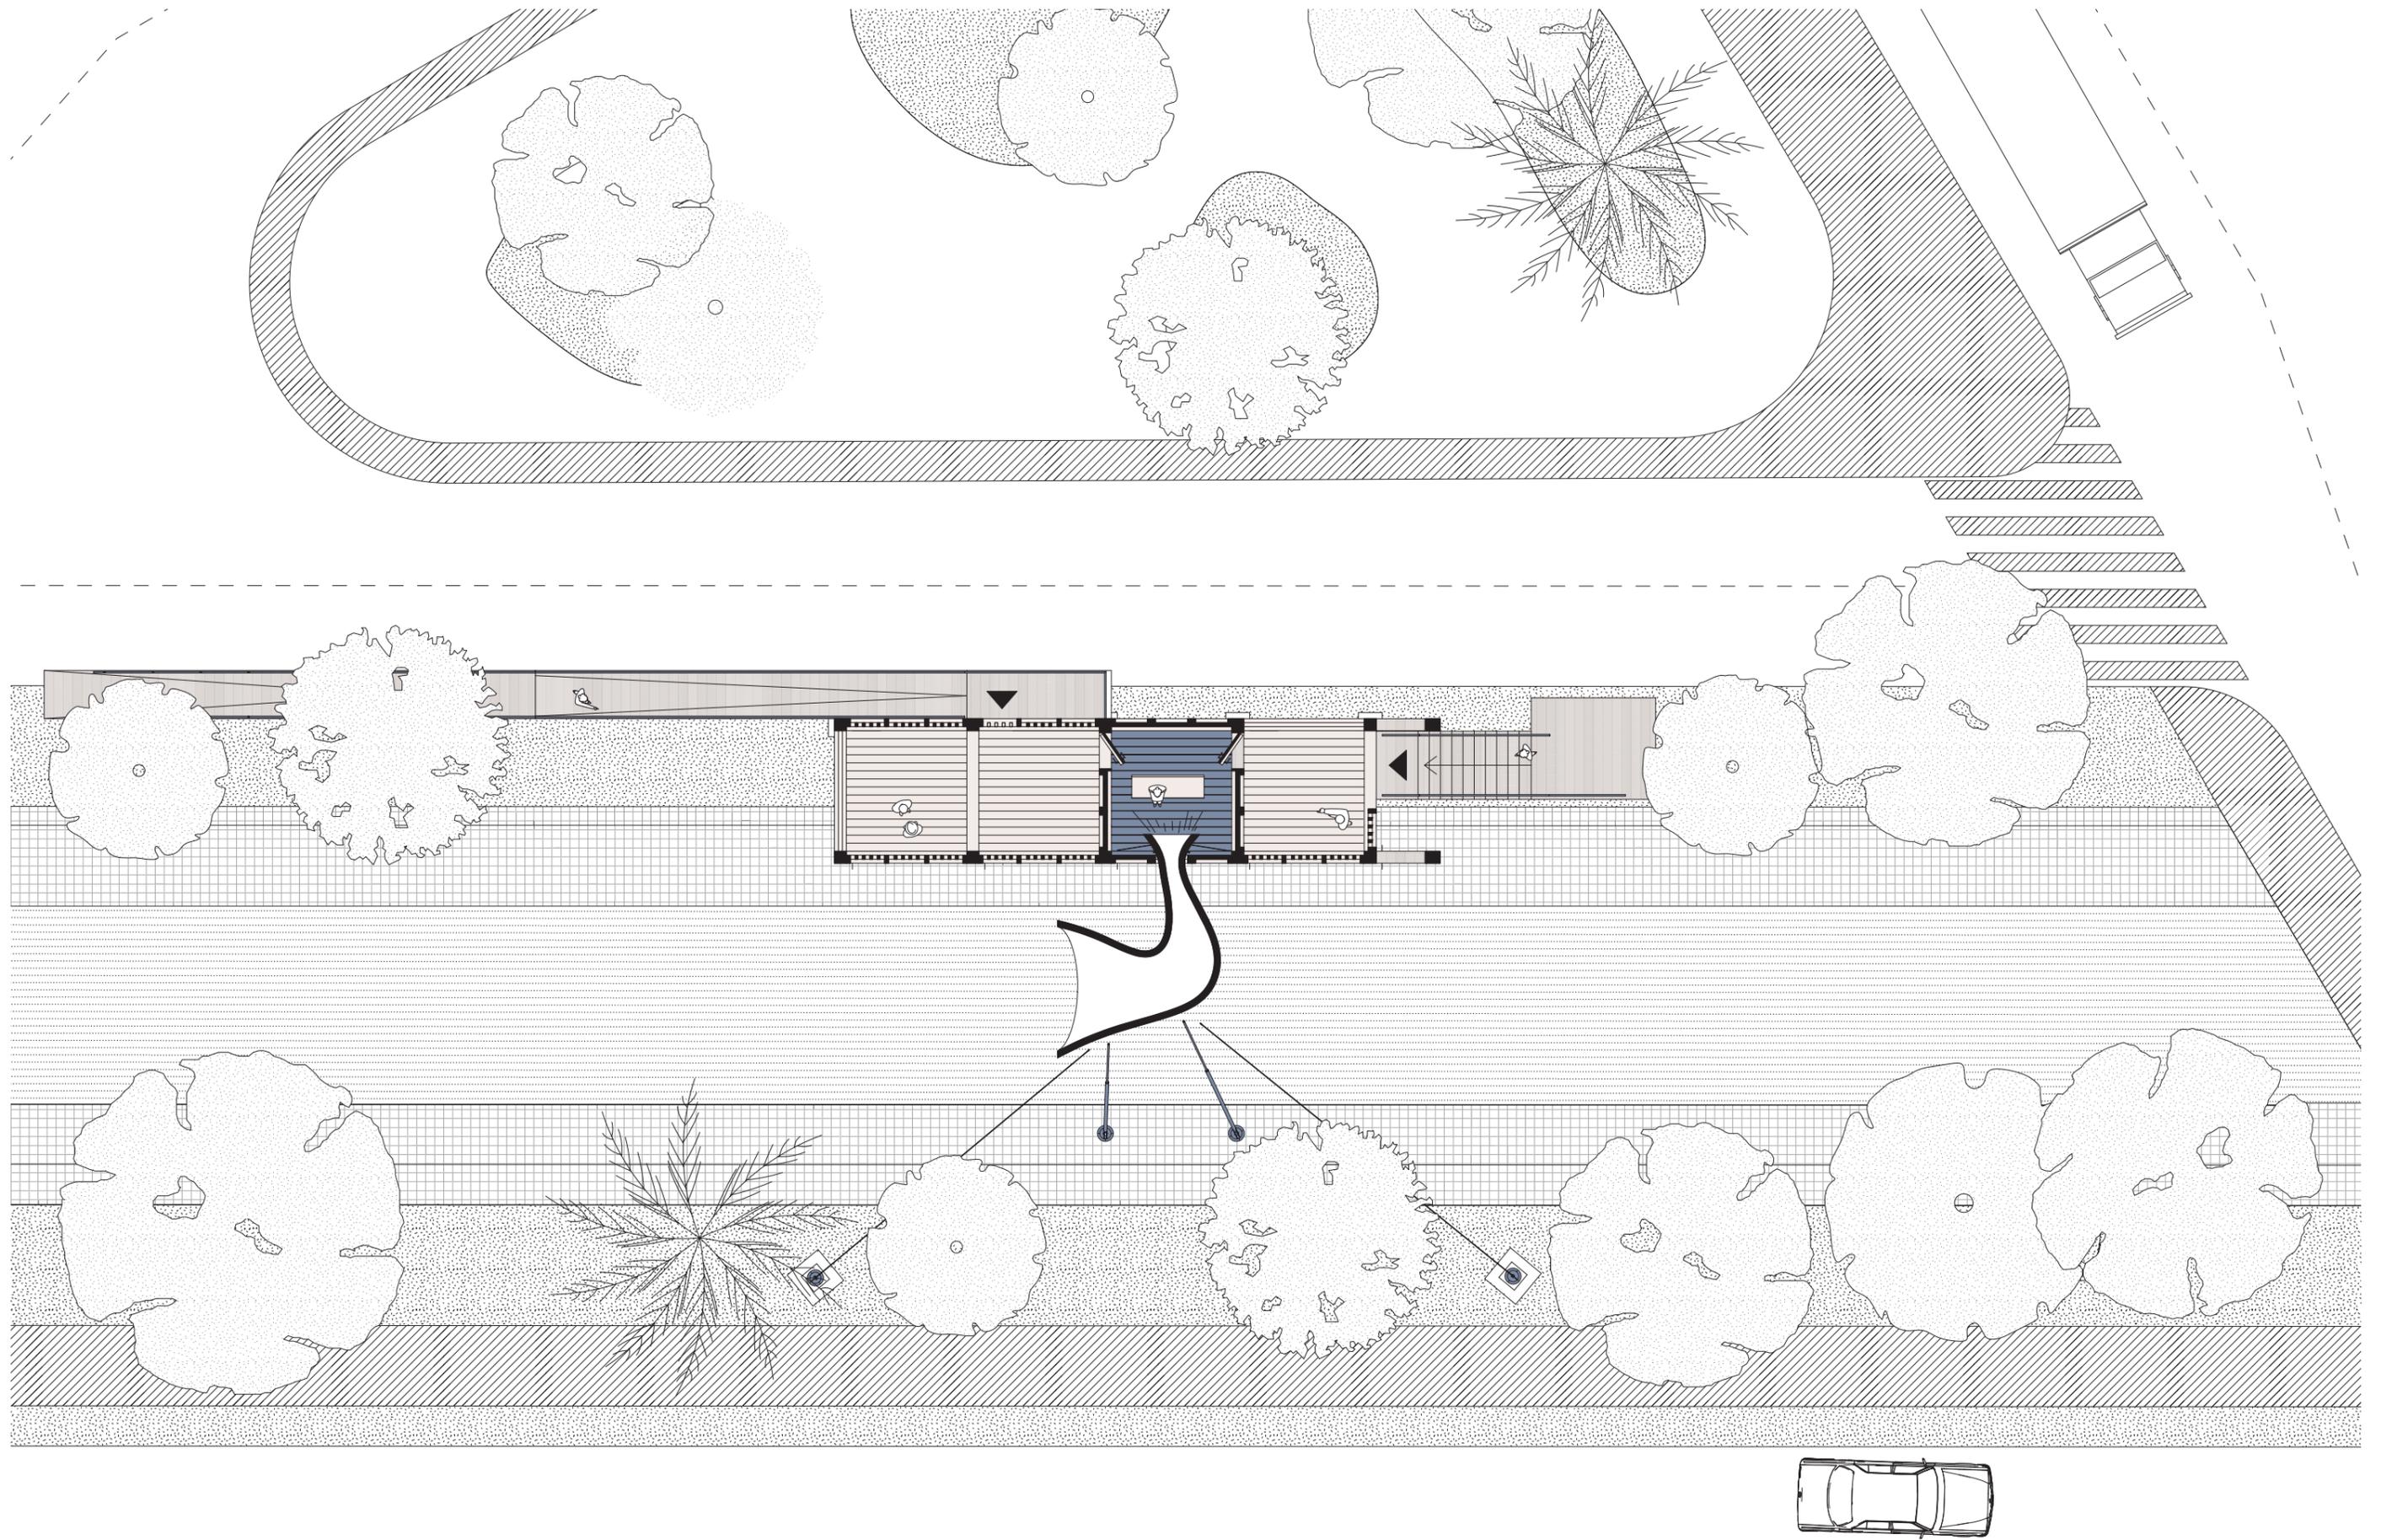

Sense of lightness

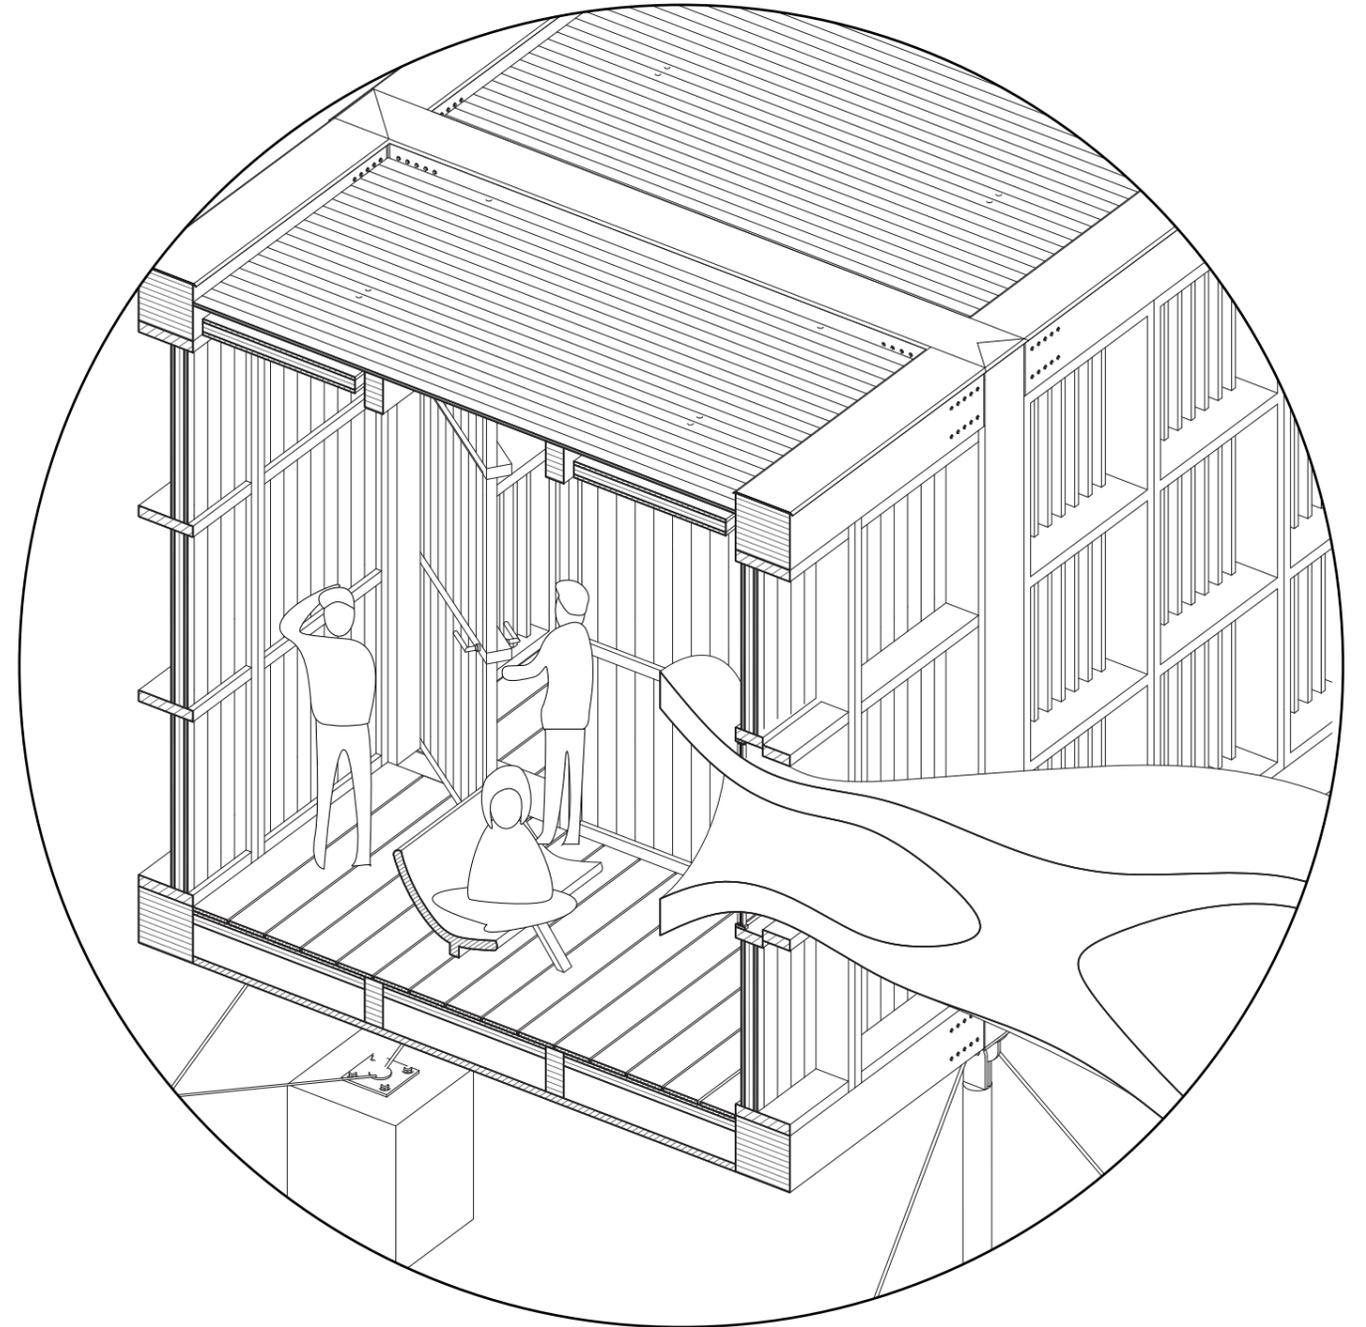

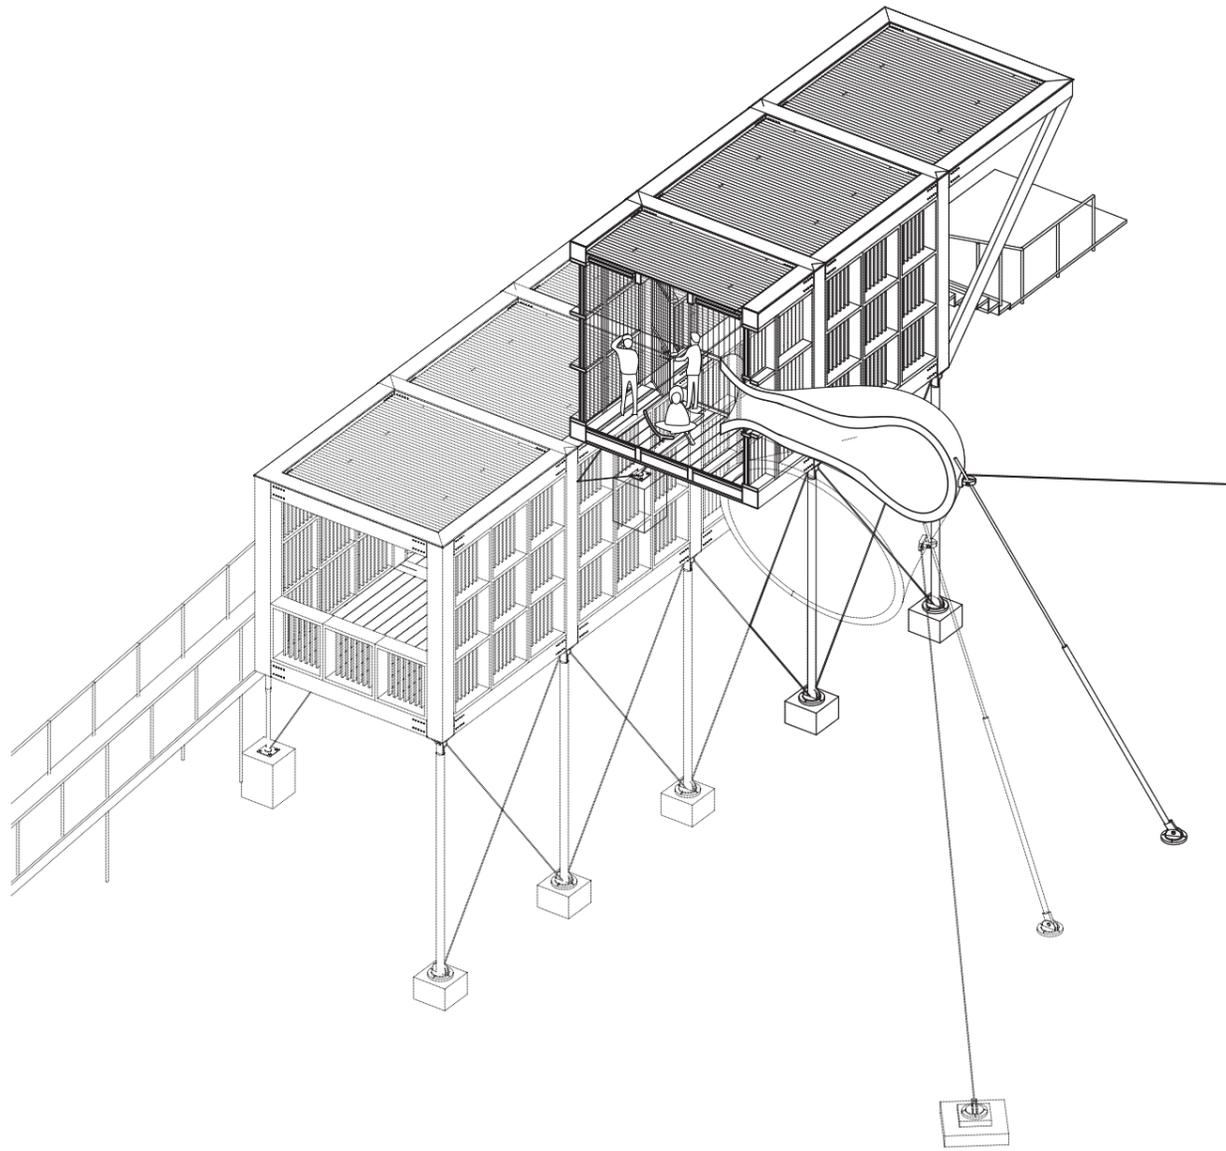

Intimacy

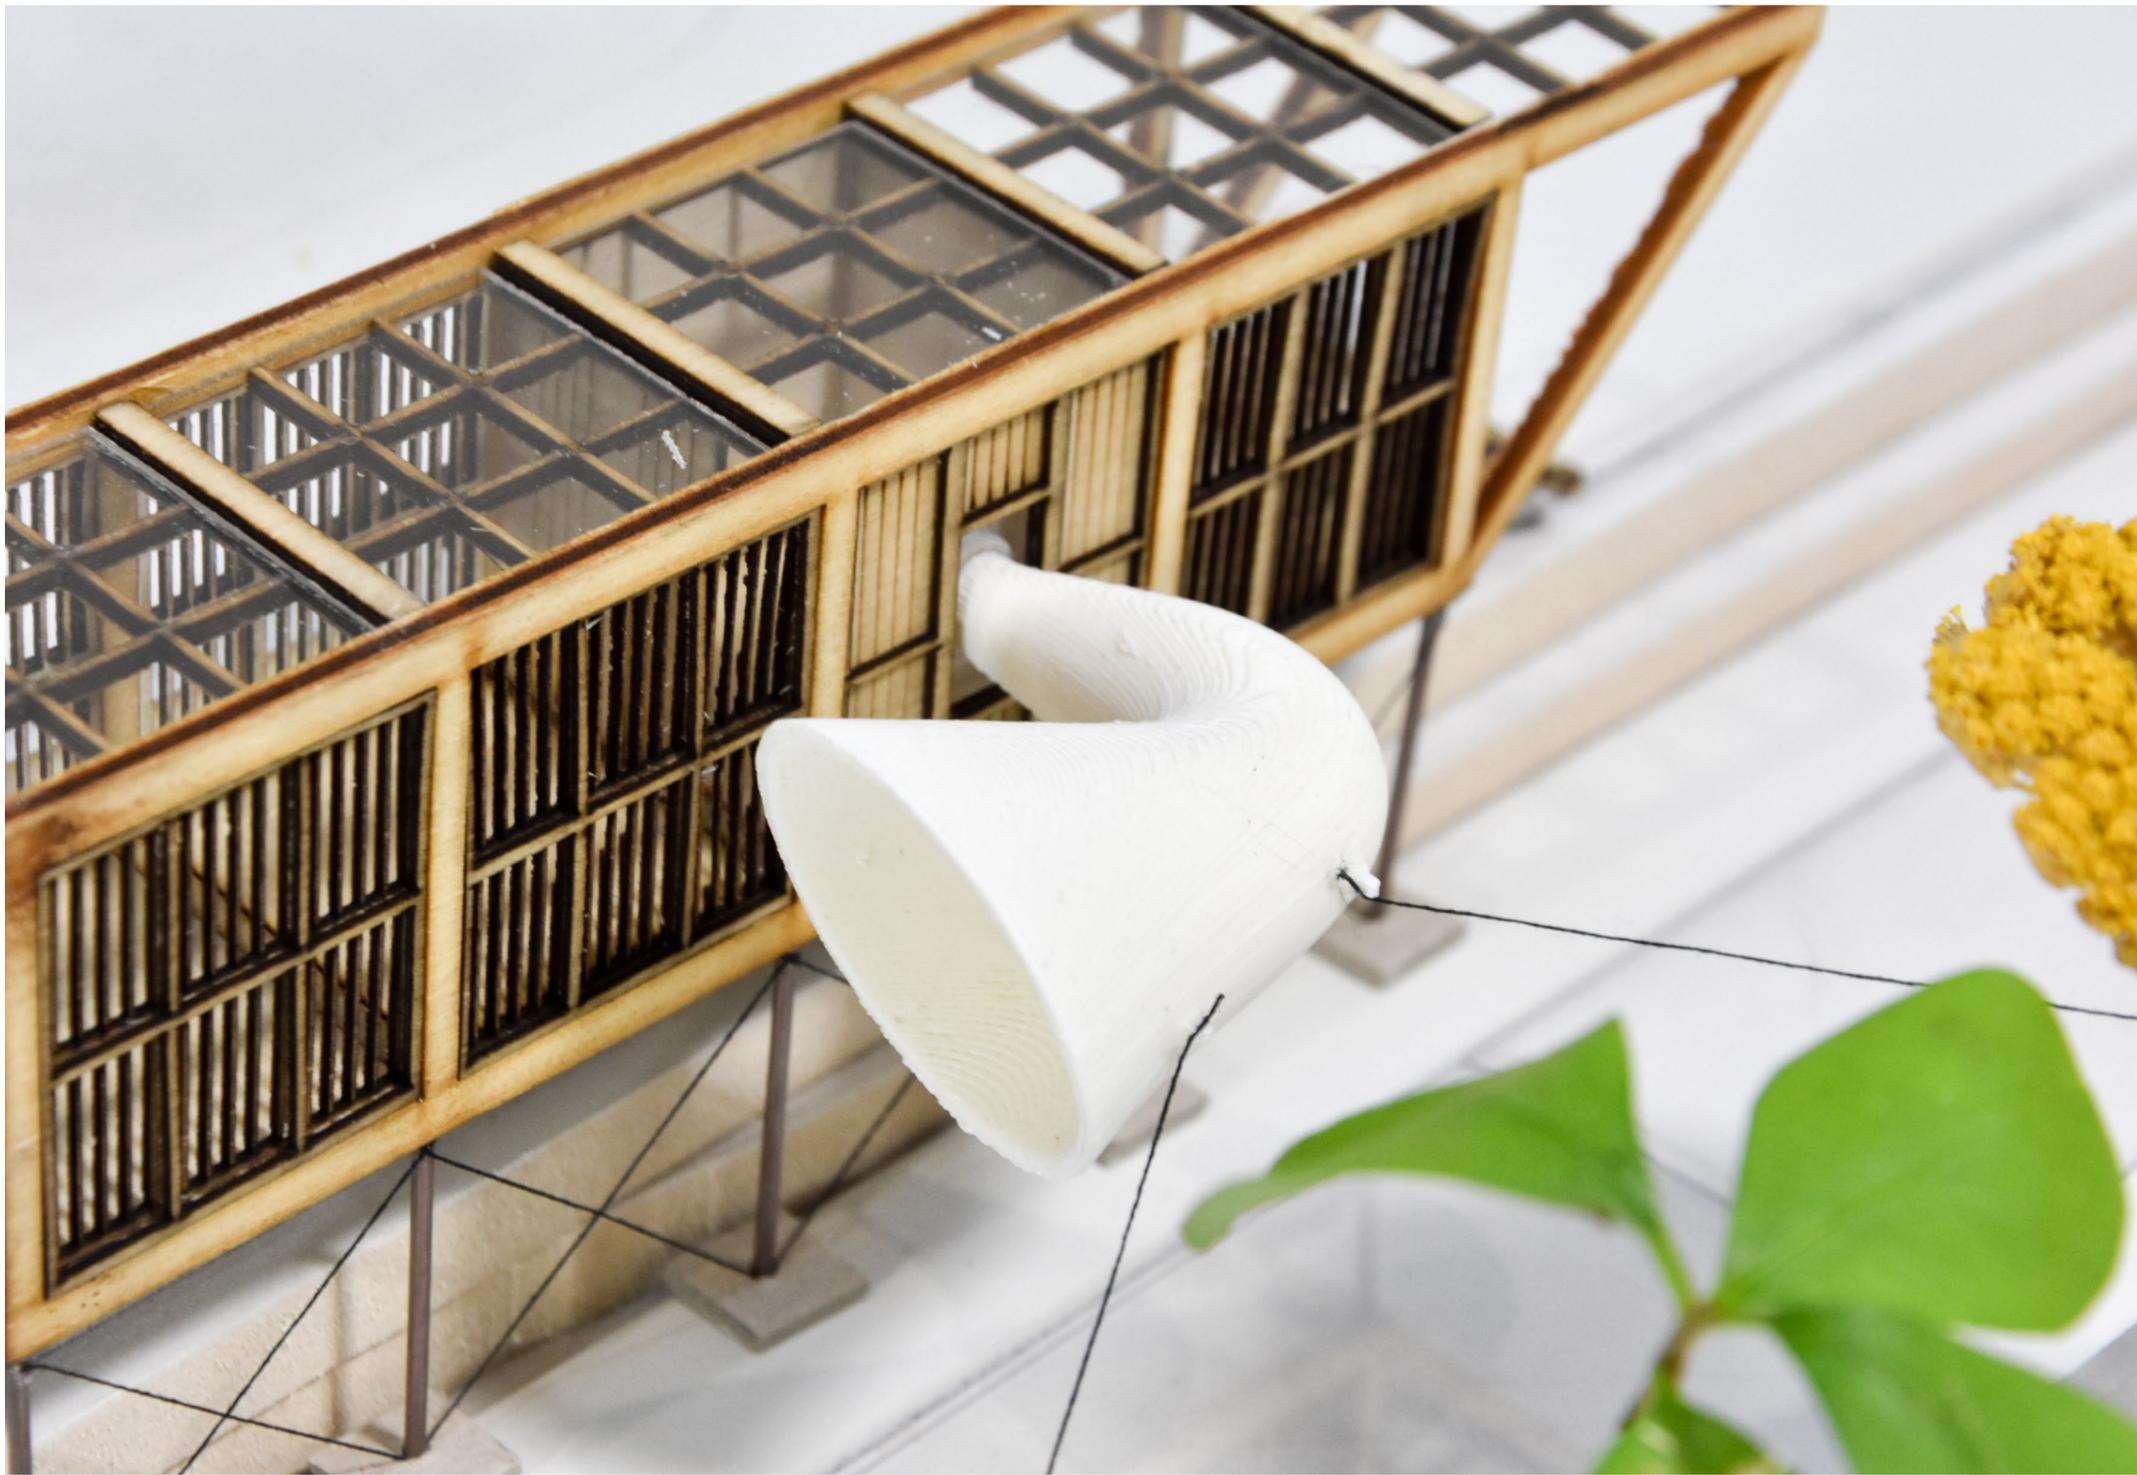

Views

Conclusion

“Wherever we are, what we hear is mostly **noise**. When we ignore it, it disturbs us.
When we listen to it, we find it **fascinating**”.

John Cage. The Future of Music: Credo (1937)
