TEMPORARY TAKEOVER
CENTRAL STATION, AMSTERDAM

Amsterdam Central Station has welcomed a new addition: the Flag Waterfront. This temporary installation serves as a waiting area for those traveling by bus to the Lente Kabinet festival, where the Cloud Pavilion is located.

The Flag Waterfront is designed to entertain and add a touch of art to the cityscape. This series of 13 flags move with the wind, creating a captivating sight in one of the city's breeziest spots. This installation not only offers a pleasant waiting experience but also brings a unique visual element to Amsterdam.

"The idea was to bring back energy, a silhouette that really expressed motion, because Bottega is a bag company, so you go somewhere, you don't stay home. This collection basically is a journey, there is many characters, they all have places to go, they feel quite free"

- Matthieu Blazy

CRAFT IN
MOTION

"A rhythmic exploration of the house's past and present, nature and humanity, and craft and creativity... An exchange of emotion and motion"
