

Frictional forces during pigging of multiphase pipelines

Hendrix, Maurice; den Heijer, A; Breugem, Wim-Paul; Henkes, Ruud

Publication date
2016

Published in
Proceedings of the 10th North American Conference on Multiphase Technology

Citation (APA)

10th North American Conference on
MULTIPHASE TECHNOLOGY
Banff, Canada: 8–10 June 2016

CONTENTS

APPLICATION

- Investigation of high-viscosity liquid two-phase flow pattern in horizontal and slightly inclined pipes 3
E Al-Safran, Kuwait University; K Al-Qenae, Kuwait University and Kuwait Gulf Oil Co., Kuwait
- Transient solid-liquid two-phase flow modelling and its application in real-time drilling simulations 17
F Zhang, A Filippov, X Jia, J Lu, V Khorjakov, Halliburton, USA
- Liquid accumulation and removal in transient three-phase flow with low liquid loading 33
G Staff, Schlumberger; H Holm, Statoil, Norway
- Well trajectory effect on slug flow development 53
R Brito, The University of Tulsa and Colorado School of Mines; E Pereyra, C Sarica, The University of Tulsa, USA

CHEMICAL TREATMENT

- An analysis of the coupled effects of mass transfer, slug flow hydrodynamics and heat transfer during hydrate formation using a quasi-stationary mechanistic model 71
C L Bassani, F A A Barbuto, R E M Morales, Federal University of Technology – Paraná, Brasil; A K Sum, Colorado School of Mines, USA
- Churn-annular foam flow – experiments and modelling 87
J M C van 't Westende, P Shoeibi-Omrani, F Vercauteren, E Nennie, TNO, The Netherlands
- Frictional forces during pigging of multiphase pipelines 103
M H W Hendrix, A den Heijer, W-P Breugem, Delft University of Technology; R A W M Henkes, Delft University of Technology and Shell Projects & Technology, The Netherlands

ENVIRONMENT

- Novel instrumentation for online monitoring of stationary beds and their height for settling slurries 117
H J Ilgner, CSIR – Council for Scientific and Industrial Research, Republic of South Africa

EQUIPMENT

Design and development of a novel, non-invasive instrument for measuring the density of multiphase mixtures 135
O Obie, G P Lucas, University of Huddersfield, UK

Is it possible to reduce the cost (and increase the accuracy) of multiphase flow meters? 149
P Andreussi, University of Pisa; M Bonizzi, P Ciandri, TEA Sistemi, Italy

FLOWS

Investigation of produced oil-water emulsions and sensitivities to shear rate, water chemistry and oil field chemicals 165
B L Keinath, J W Lachance, A Kumar, B Whitt, ExxonMobil URC, USA

An investigation of buried pipe outer heat transfer coefficient correlations 179
C J Arthur, L Russell, P Adames, Virtual Materials Group Inc., Canada

Modeling vertical flows in churn and annular flow regimes in small- and large-diameter pipes 191
E Pagan, W C Williams, S Kam, P J Waltrich, Louisiana State University, USA

Observations of sub-regimes in vertical annular flow 207
J R Nichol, E Kuru, University of Alberta, Canada

Assessment of pipeline internal corrosion of challenging pipelines through the integration of flow modelling and corrosion risk assessments 217
L Barton, D Sandana, P Birkinshaw, J Soltis, MACAW Engineering Ltd, UK; R Ladwa, ROSEN GROUP, Switzerland

Large hydrate plug characterization and closed volume dissociation in a full scale electrically trace heating pipe in pipe 231
M Gainville, A Sinquin, C Cassar, IFP Energies nouvelles; Ch Tzotzi, T Parenteau, Technip, France; D Turner, ExxonMobil Development Company, USA; Th Palermo, Total E&P, France; J E P Morgan, E Zakarian, Woodside Energy Ltd, Australia

Condition based assessment of subsea rigid jumpers using advanced analytical model 245
M Parsi, A Nair, M Kara, DNV GL; M Agrawal, BP; S A Hosseini, ANSYS Inc., USA; A O Pedersen, ClampOn, Norway

Effect of high oil viscosity on oil-gas flow behavior in vertical downward pipes 259
S Chung, J Kang, Seoul National University, South Korea; E Pereyra, C Sarica, F Alruhaimani, The University of Tulsa, USA; G Soto, Autonomous Metropolitan University Campus Lerma, México

Multiphase forces on bend structures- influence of upstream disturbance 271
S P C Belfroid, E Nennie, TNO, The Netherlands; M Lewis, Xodus Group, UK

A comparison of 35 gas-liquid point models in a low-liquid loading subsea gas line: A technology classification effort 285
P Adames, Virtual Materials Group Inc., Canada

Evolution of unstable liquid-liquid dispersions in horizontal pipes 305
V Voulgaropoulos, P Angeli, University College London, UK; L Zhai, Tianjin University, China; K Ioannou, Chevron Energy Technology Company, USA

FLOW SIMULATION

Experimental investigation of gas lift performance in a large diameter pipe 321
A Ibrahim, B Hewakandamby, B Azzopardi, University of Nottingham, UK

Evaluation of blind-t mixing effectiveness within two-phase gas-viscous oil flow using electrical capacitance tomography 339
D Millington, NEL and Coventry University, UK

Probabilistic proposal of an oil-water flow pattern map for horizontal pipelines 351
D Urbano Caguasango, R Amaya-Gómez, J López, N Ratkovich, F Muñoz, Universidad de los Andes, Colombia

Liquid entrainment in gas at high pressure – Part 1: Experimental approach and initial testing 367
F Viana, Southwest Research Institute®; R Mohan, O Shoham, The University of Tulsa, USA

Improvement of LedaFlow for low liquid loading conditions 385
J Kjølås, SINTEF; H Holm, Statoil, Norway

Liquid loading and multiple solutions in vertical flows – experiments and modelling with LedaFlow 403
J Kjølås, A Shmueli, A Morin, SINTEF, Norway

A statistical evaluation of slug frequency models for air-water flow in 6-in. ID near horizontal pipes 421
J Nair, E Pereyra, C Sarica, The University of Tulsa, USA

CFD simulation and 2-D modeling of solid particle erosion in annular flow 433
J Zhang, B S McLaury, S A Shirazi, The University of Tulsa, USA

One-dimensional model of wet gas flow in near-horizontal pipes 447
M Bonizzi, TEA Sistemi; P Andreussi, University of Pisa, Italy

Improved unified flow regime transition criteria 459
O Oloruntoba, F Kara, Cranfield University, UK

Uncertainty analysis of multiphase flow – Case studies from erosion, sand transport, liquid entrainment models 473
W Dai, S Cremaschi, Auburn University; M Azhural Islam, R T Nukala, The University of Tulsa; H J Subramani, G E Kouba, H Gao, Chevron Energy Technology Company, USA
