The authors regret that due to errors in typing, Eq. (2) and the corresponding texts should be replaced by:

$$\Delta\sigma_{\text{nom}} = \frac{\Delta M \times 0.5t_d}{I} \quad (2)$$

where ΔM is the bending moment range and the second moment of area $I = t_d^3/12$, both in unit width.

The results in the paper are not affected by the typing error. The authors would like to apologise for any inconvenience caused.
