 Emperical research

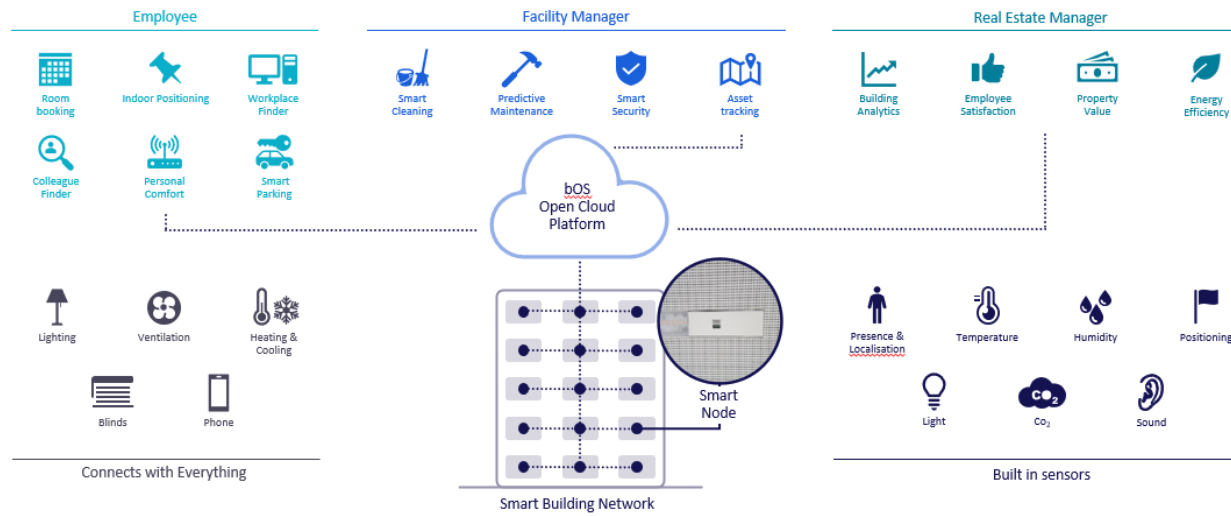

Emperical research

- 1  The open workstations within the silent zones of the ABW environment have higher noise levels than the semi-closed workstations.

Acoustic privacy
- 2  Based on the management and organization style, the conference rooms are relatively well utilized.

Space usage – organization
- 3  The higher the floor level, the lower the occupancy rate of the conference rooms.

Space usage – location

Emperical research

- 1**  The open workstations within the silent zones of the ABW environment have higher noise levels than the semi-closed workstations.

Acoustic privacy
- 2**  Based on the management and organization, the conference rooms are relatively well utilized.

Space usage – organization
- 3**  The higher the floor level, the lower the occupancy of the conference rooms.

Space usage – location

Emperical research

- **ABW environment**
 - Two workstations within the silent zone.
- **Performance**
 - IEQ (acoustic comfort)
- **Parameter**
 - Noise, presence
- **Variables**
 - Floor: 3rd
 - Function: open and semi-closed workstation
 - Size: m2
 - Performance: acoustic comfort
 - Parameter: noise, presence
 - Month: January
 - Day: 13-01-2020 – 17-01-2020
 - Hours: 8:00 AM – 6:00 PM

Emperical research

Noise level

Emperical research

Occupancy rate

Emperical research

Noise level

Average noise levels day  7.2 mV

Average noise levels week  0.4 mV

Occupancy rate

Average occupancy rate day  3 %

Average occupancy rate week  7.1 %

Emperical research

- 1**  The open workstations within the silent zones of the ABW environment have higher noise levels than the semi-closed workstations.

Acoustic privacy
- 2**  Based on the management and organization style of Microsoft, the conference rooms are relatively well utilized.

Space usage – organization
- 3**  The higher the floor level, the lower the occupancy of the conference rooms.

Space usage – location

Empirical research

- 1  Acoustic privacy

The open workstations within the silent zones of the ABW environment have higher noise levels than the semi-closed workstations.
- 2  Space usage – organization

Based on the management and organization style of Microsoft, the conference rooms are relatively well utilized.
- 3  Space usage – location

The higher the floor level, the lower the occupancy of the conference rooms.

Emperical research

- **ABW environment**
 - There is a total of 43 conference rooms identified.
- **Performance**
 - Occupancy (space utilization)
- **Parameter**
 - Presence and CO2
- **Variables**
 - **Floor:** 1st, 2nd, 3rd, and 4th
 - **Function:** conference room
 - **Size:** m2
 - **Performance:** occupancy
 - **Parameter:** presence, CO2
 - **Month:** November
 - **Day:** 11-11-2019 – 15-11-2019
 - **Hours:** 8:00 AM – 6:00 PM
