Landscapes of Care

Weaving nature and culture through environmental care practices

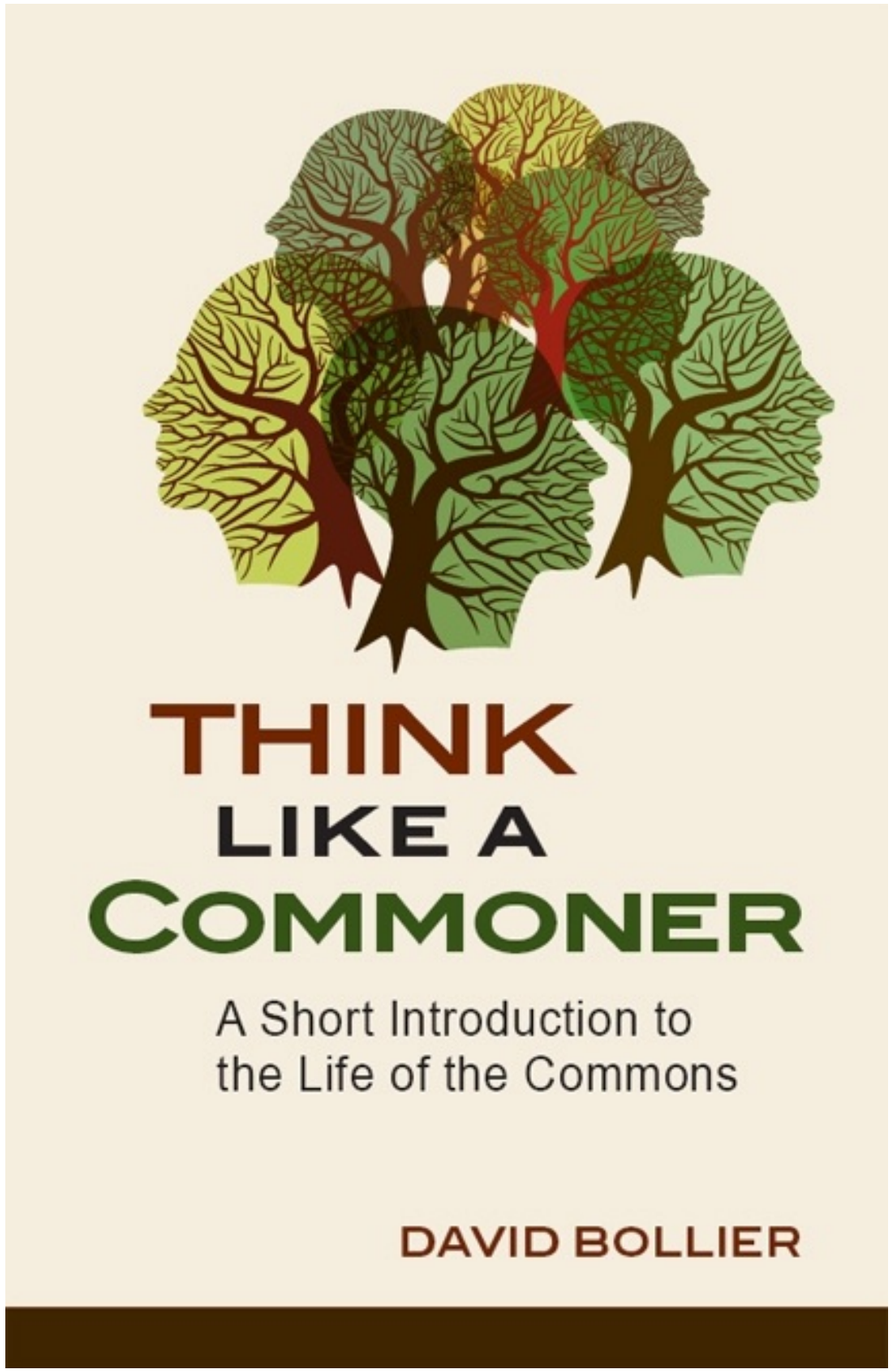

my sole barely touches upon
the silence of the woods
leaves whisper in my footsteps
I reside in their secrecy
searching for a door

Environmental resources & socio-spatial practices

Theory of environmental care practices

The edible forest valley

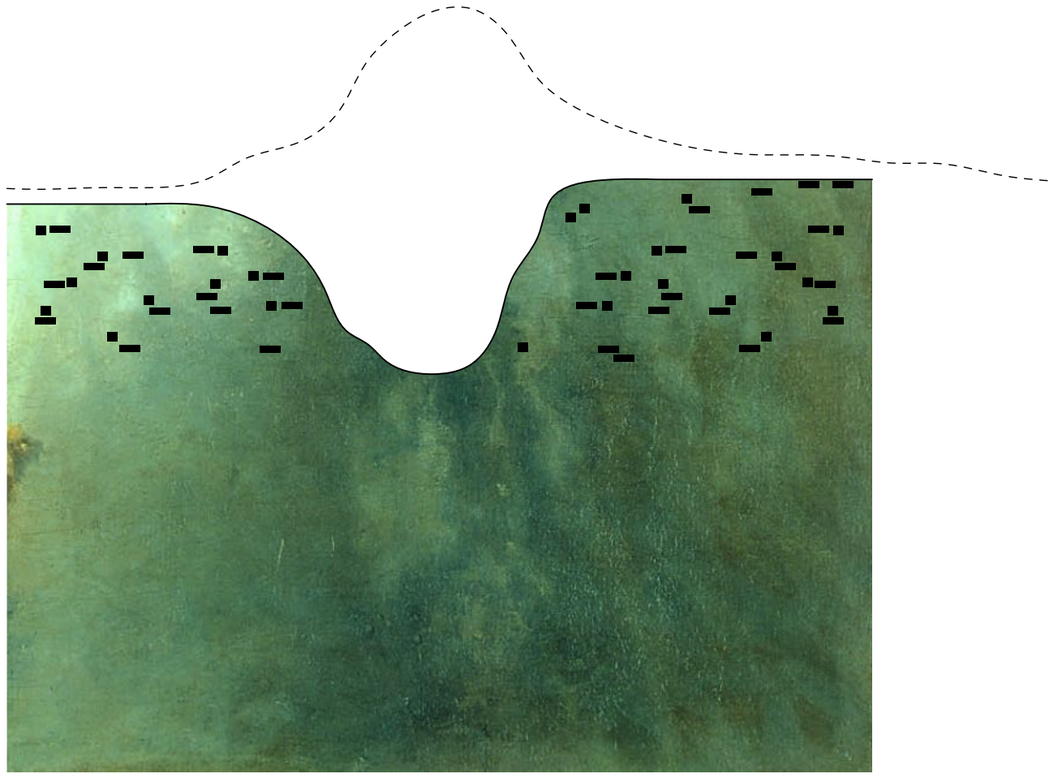

Environmental care centre

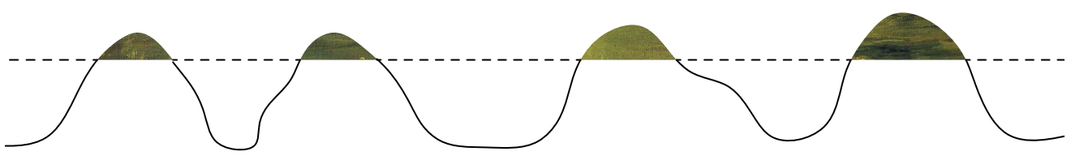

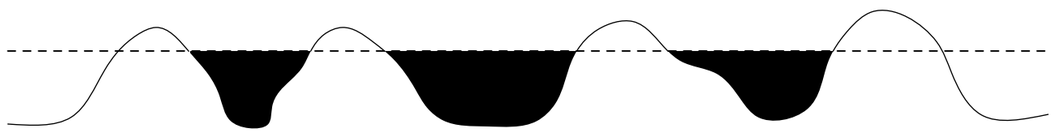

"In Latin America, transnational corporations are working with neoliberal governments to impose aggressive "neo-extractivist" policies" which lead to the rapid privatization of common resources"

Water channeled underground - an urban identity

Free flowing stream - urban and rural identity

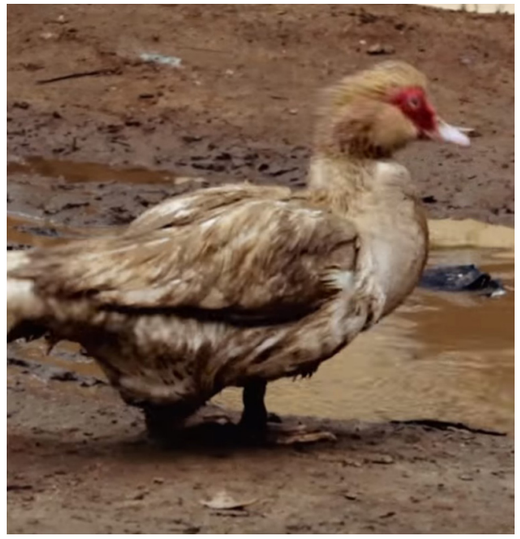

Small scale vegetable farming

Small scale livestock raising

1 Hawthorn tree/ Crataegus

2 Chilca/ Baccharis racemosa

3 Chagual/ Puya chilensis

4 Quisco/ Echinopsis chiloensis

5 White sage/ Salvia apiana

6 Tevo/ Trevoa trinervis

7 Litre/ Lithraea caustica

8 Eucalyptus globulus

9 Informal dump site

10 Evergreen tree/ Crinodendron patagua

11 Borbones

12 Belloto/ Beilschmiedia berteroana

13 Boldo/ Peumus boldus

14 Parilla Blanca/ Proustia pyrifolia

15 Pine tree/ Pinus radiata

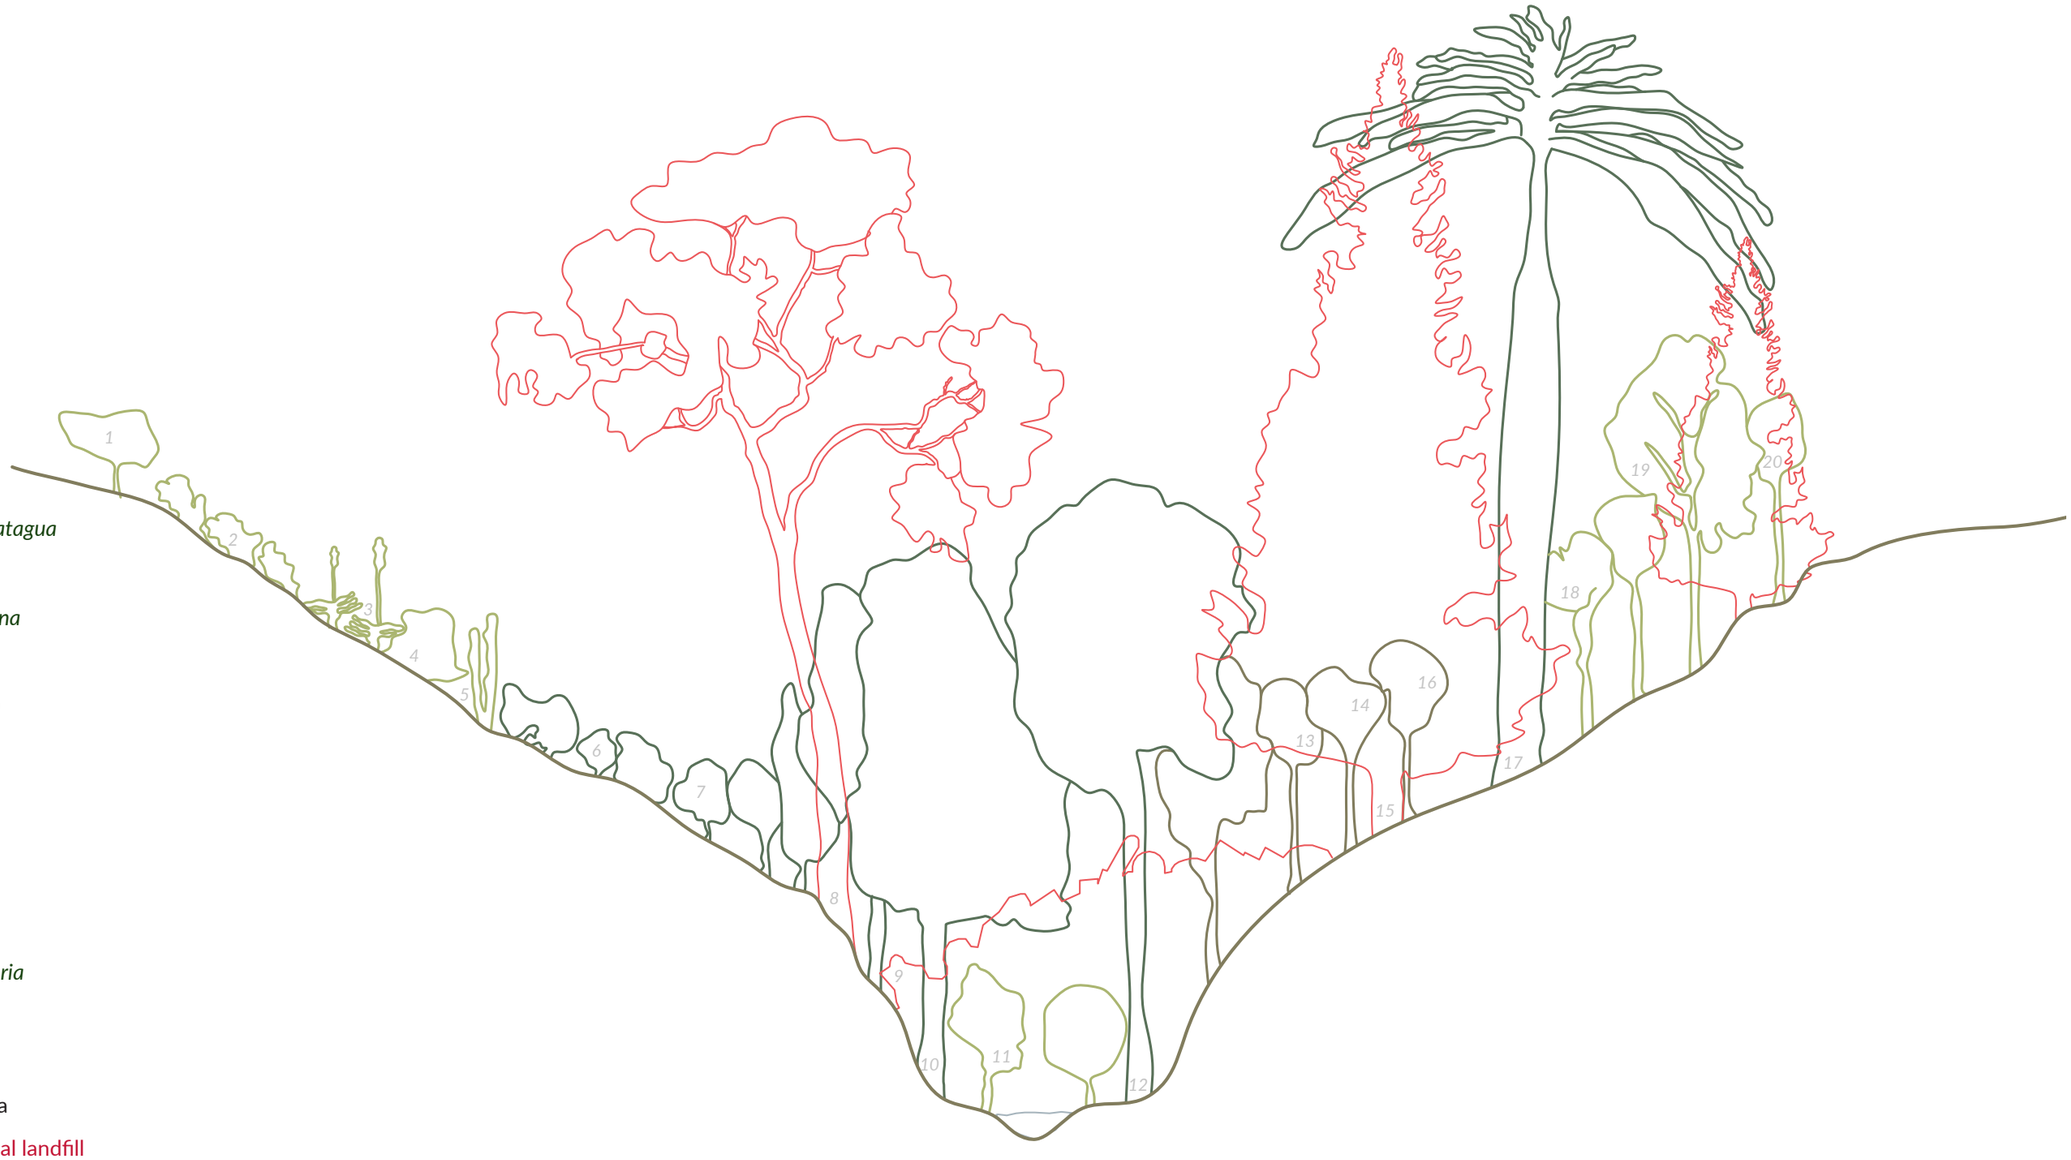

16 Peppercorn tree/ Schinus molle

17 Chilen palm

18 Litre/ Lithraea caustica

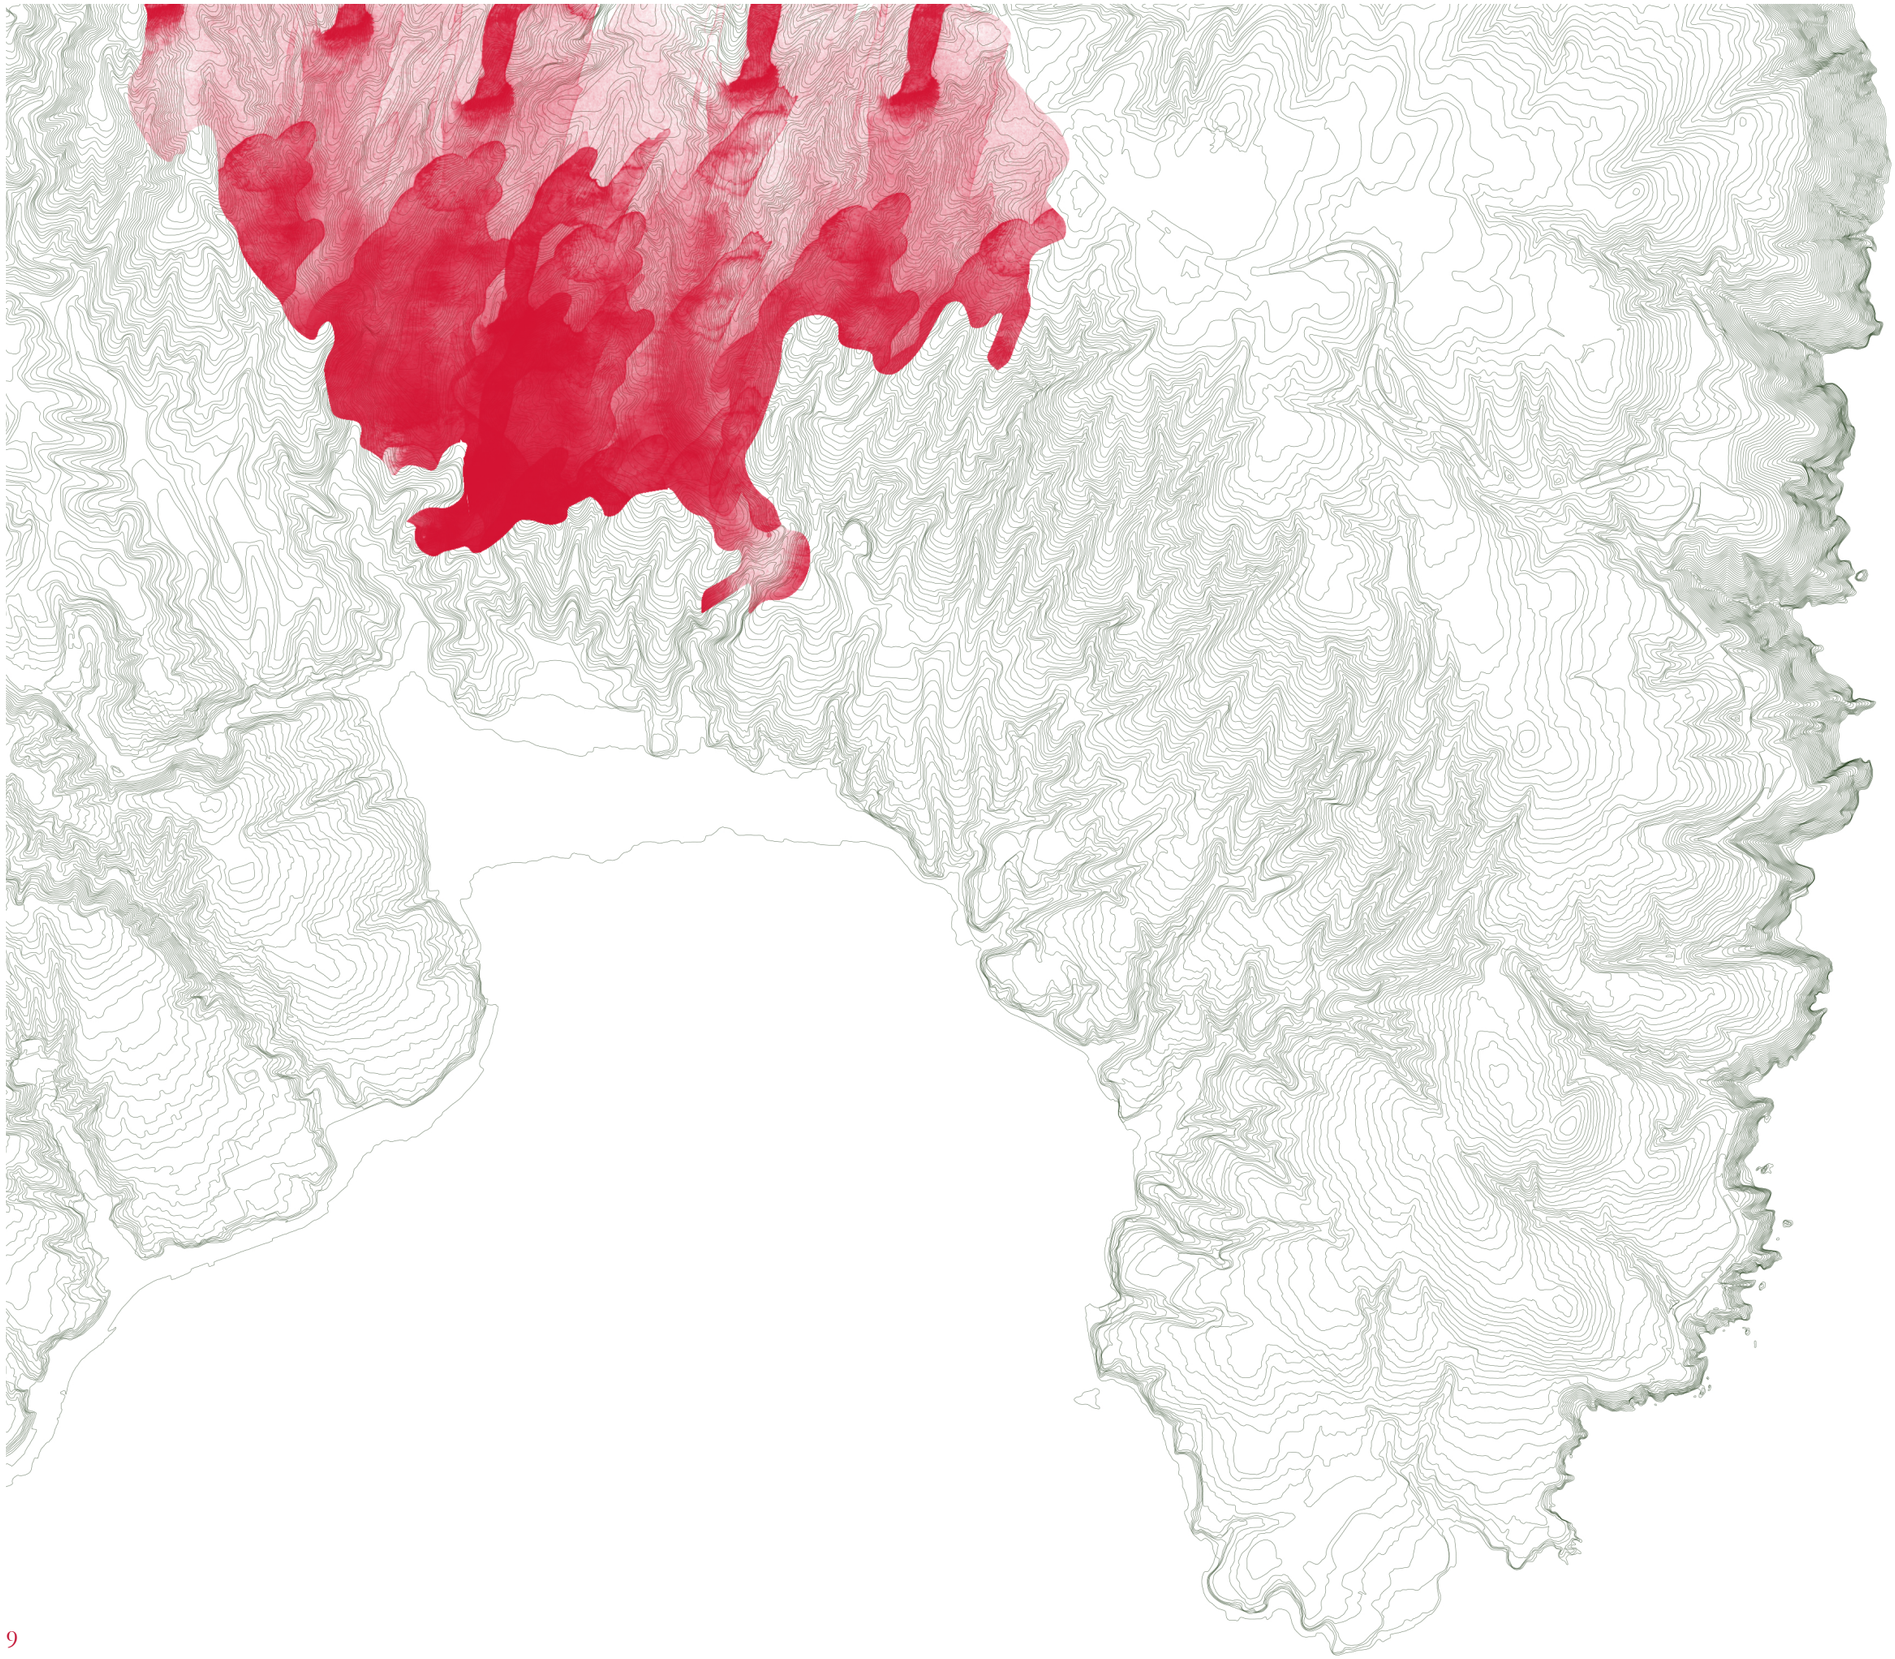

19 Peumo/ Cryptocarya alba

20 Soap bark tree/ Quillaja saponaria

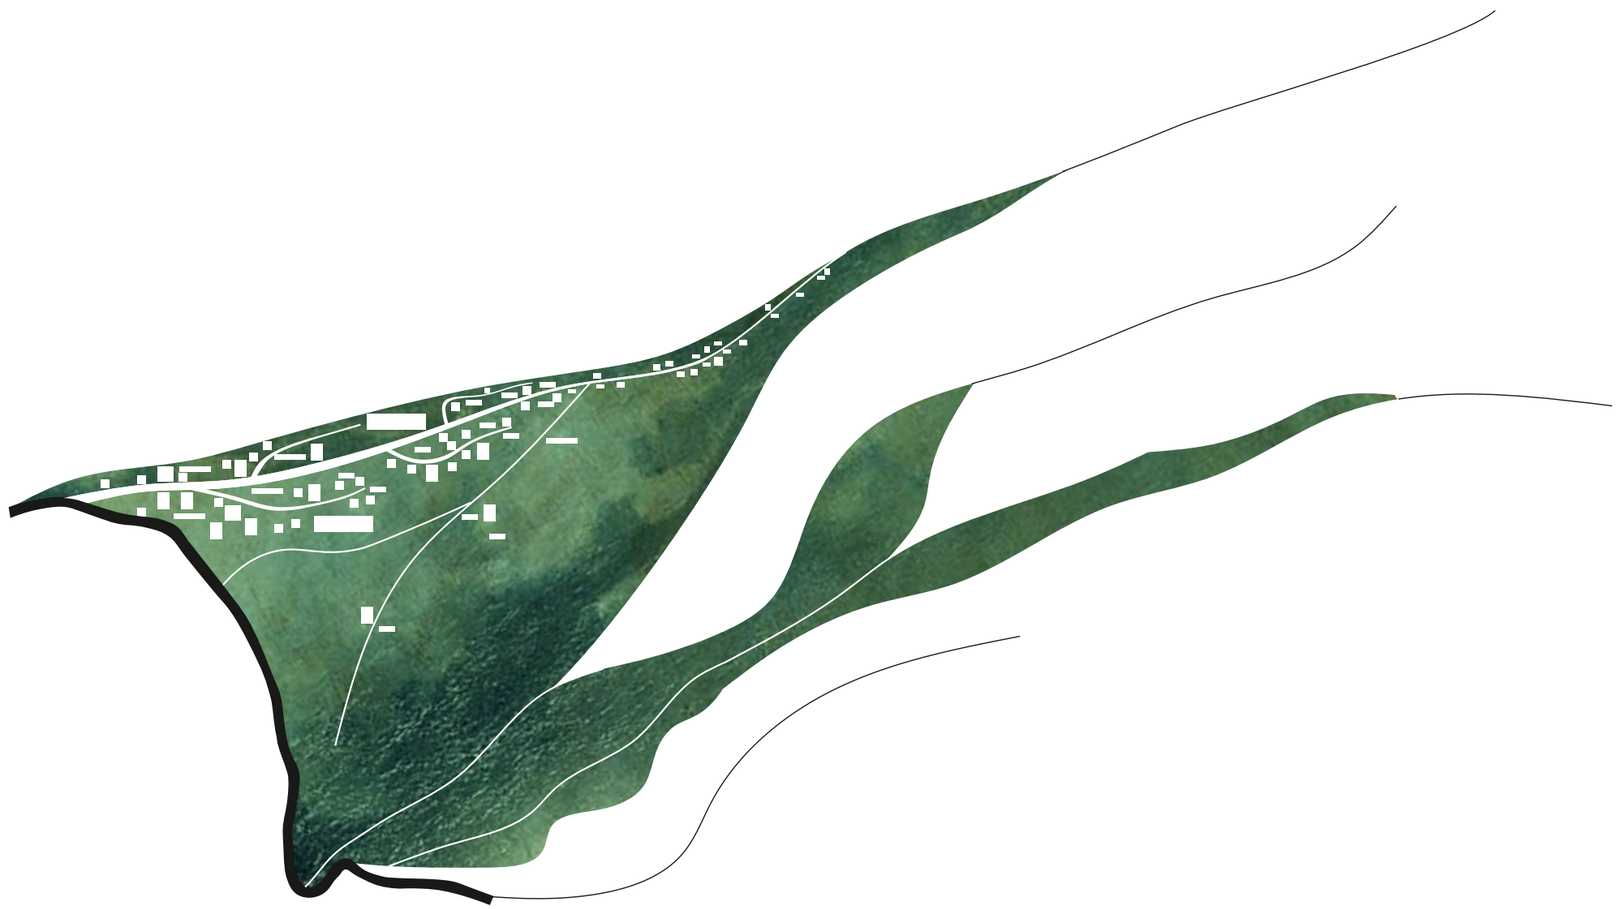

Native sclerophyllous flora

Non-native flora & informal landfill

Extent of the 2014 fire

The periphery of Valparaiso

”
a struggle by humanism to overcome the limits of Enlightenment rationality questions the separation of the world into a sphere of humans and a sphere of things

Reality as Commons by Andreas Weber

Chapter 7th: Rights for Nature

Art. 71 Nature or Pachamama, where life is reproduced and exists, has the right to exist, persist, maintain and regenerate its vital cycles, structure, functions and its processes in evolution.

The rights of nature by Paulo Tavares

”
in the “collective action” to conserve forests, not only do villagers “come together”; there is also a “coming together” of forests, plants, animals, and trees due to the affective capacity of a body to form relations with other bodies, that transformslandscape and local subjectivities

The affective labour of growing forests and the becoming of environmental subjects by Neera Singh

”affective labor in which mind and body, reason and passion, intellect and feeling are all employed together

The affective labour of growing forests and the becoming of environmental subjects by Neera Singh

”growing plants and raising animals are not so different, in principle, from bringing up children (...) children, animals, plants and even – in a sense – artefacts as well, are ‘grown’

The perception of the environment by Tim Ingold

An act of affective labour

NAME OF PROGRAMME	INSTITUTIONAL BODY	BASE OF FUNDING
Quiero mi barrio	Quiero mi barrio Programa de Recuperación de Barrios	infrastructure projects such as sports and community equipment; In addition to green areas, pavements, lighting and housing, among other improvements
Fondo de Protección Ambiental	fpa fondo de protección ambiental	projects or activities oriented to the protection or repair of the environment, the sustainable development, the preservation of nature or the conservation of the environmental patrimony, such as decontamination and repair of wetland, quebrada
Capacidades Energías Renovables No Convencionales	UNDP	the formulation, administration, operation and maintenance of small-scale non-conventional renewable energy projects, forest management, sustainable growth, National Program Onuredd Chile - Support for Chile's National Climate Change and Vegetation Resources Strategy
Bonificación para proyectos de riego y drenaje	Ministerio de Obras Públicas Gobierno de Chile	Promotion of Private Investment in Irrigation and Drainage Works grants subsidies to irrigation projects whose cost does not exceed UF.12,000, in the case of individual projects; nor exceed the UF.24.000 in the case of projects presented by organizations of irrigators
Sustainable Agriculture Program	INDAP Ministerio de Agricultura	INDAP's Sustainable Agriculture Program is designed to promote the incorporation of environmentally sustainable practices and management into the productive systems of family farming
Water resources and Unconventional Renewable Energies	INDAP Ministerio de Agricultura	This program allows small producers to finance their investments in irrigation and drainage to increase their productivity in a sustainable manner, improving the use of their water resources and taking advantage of available non-conventional renewable energies

N

my sole barely touches upon
the silence of the woods
leaves whisper in my footsteps
I reside in their secrecy
searching for a door

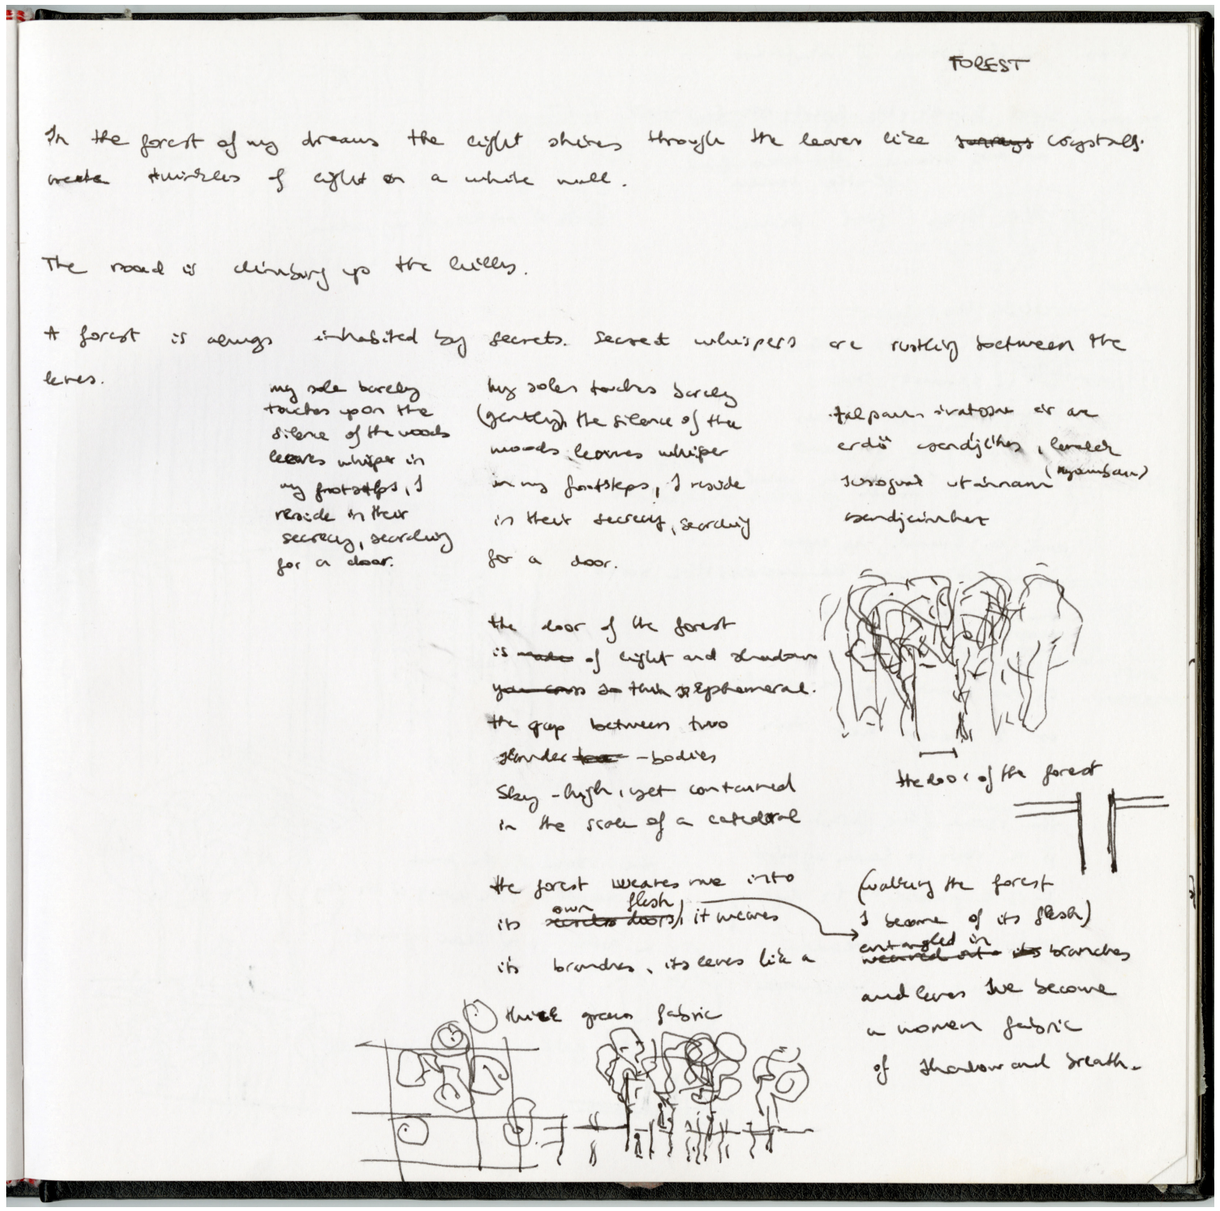

the door of the forest
is of light and shadow
so thin, so ephemeral
the gap between two slender bodies
sky-high, yet contained
in the scale of a cathedral

the forest weaves me
into its own flesh
entangled in branches and leaves
we become a woven fabric
of shadow and breath

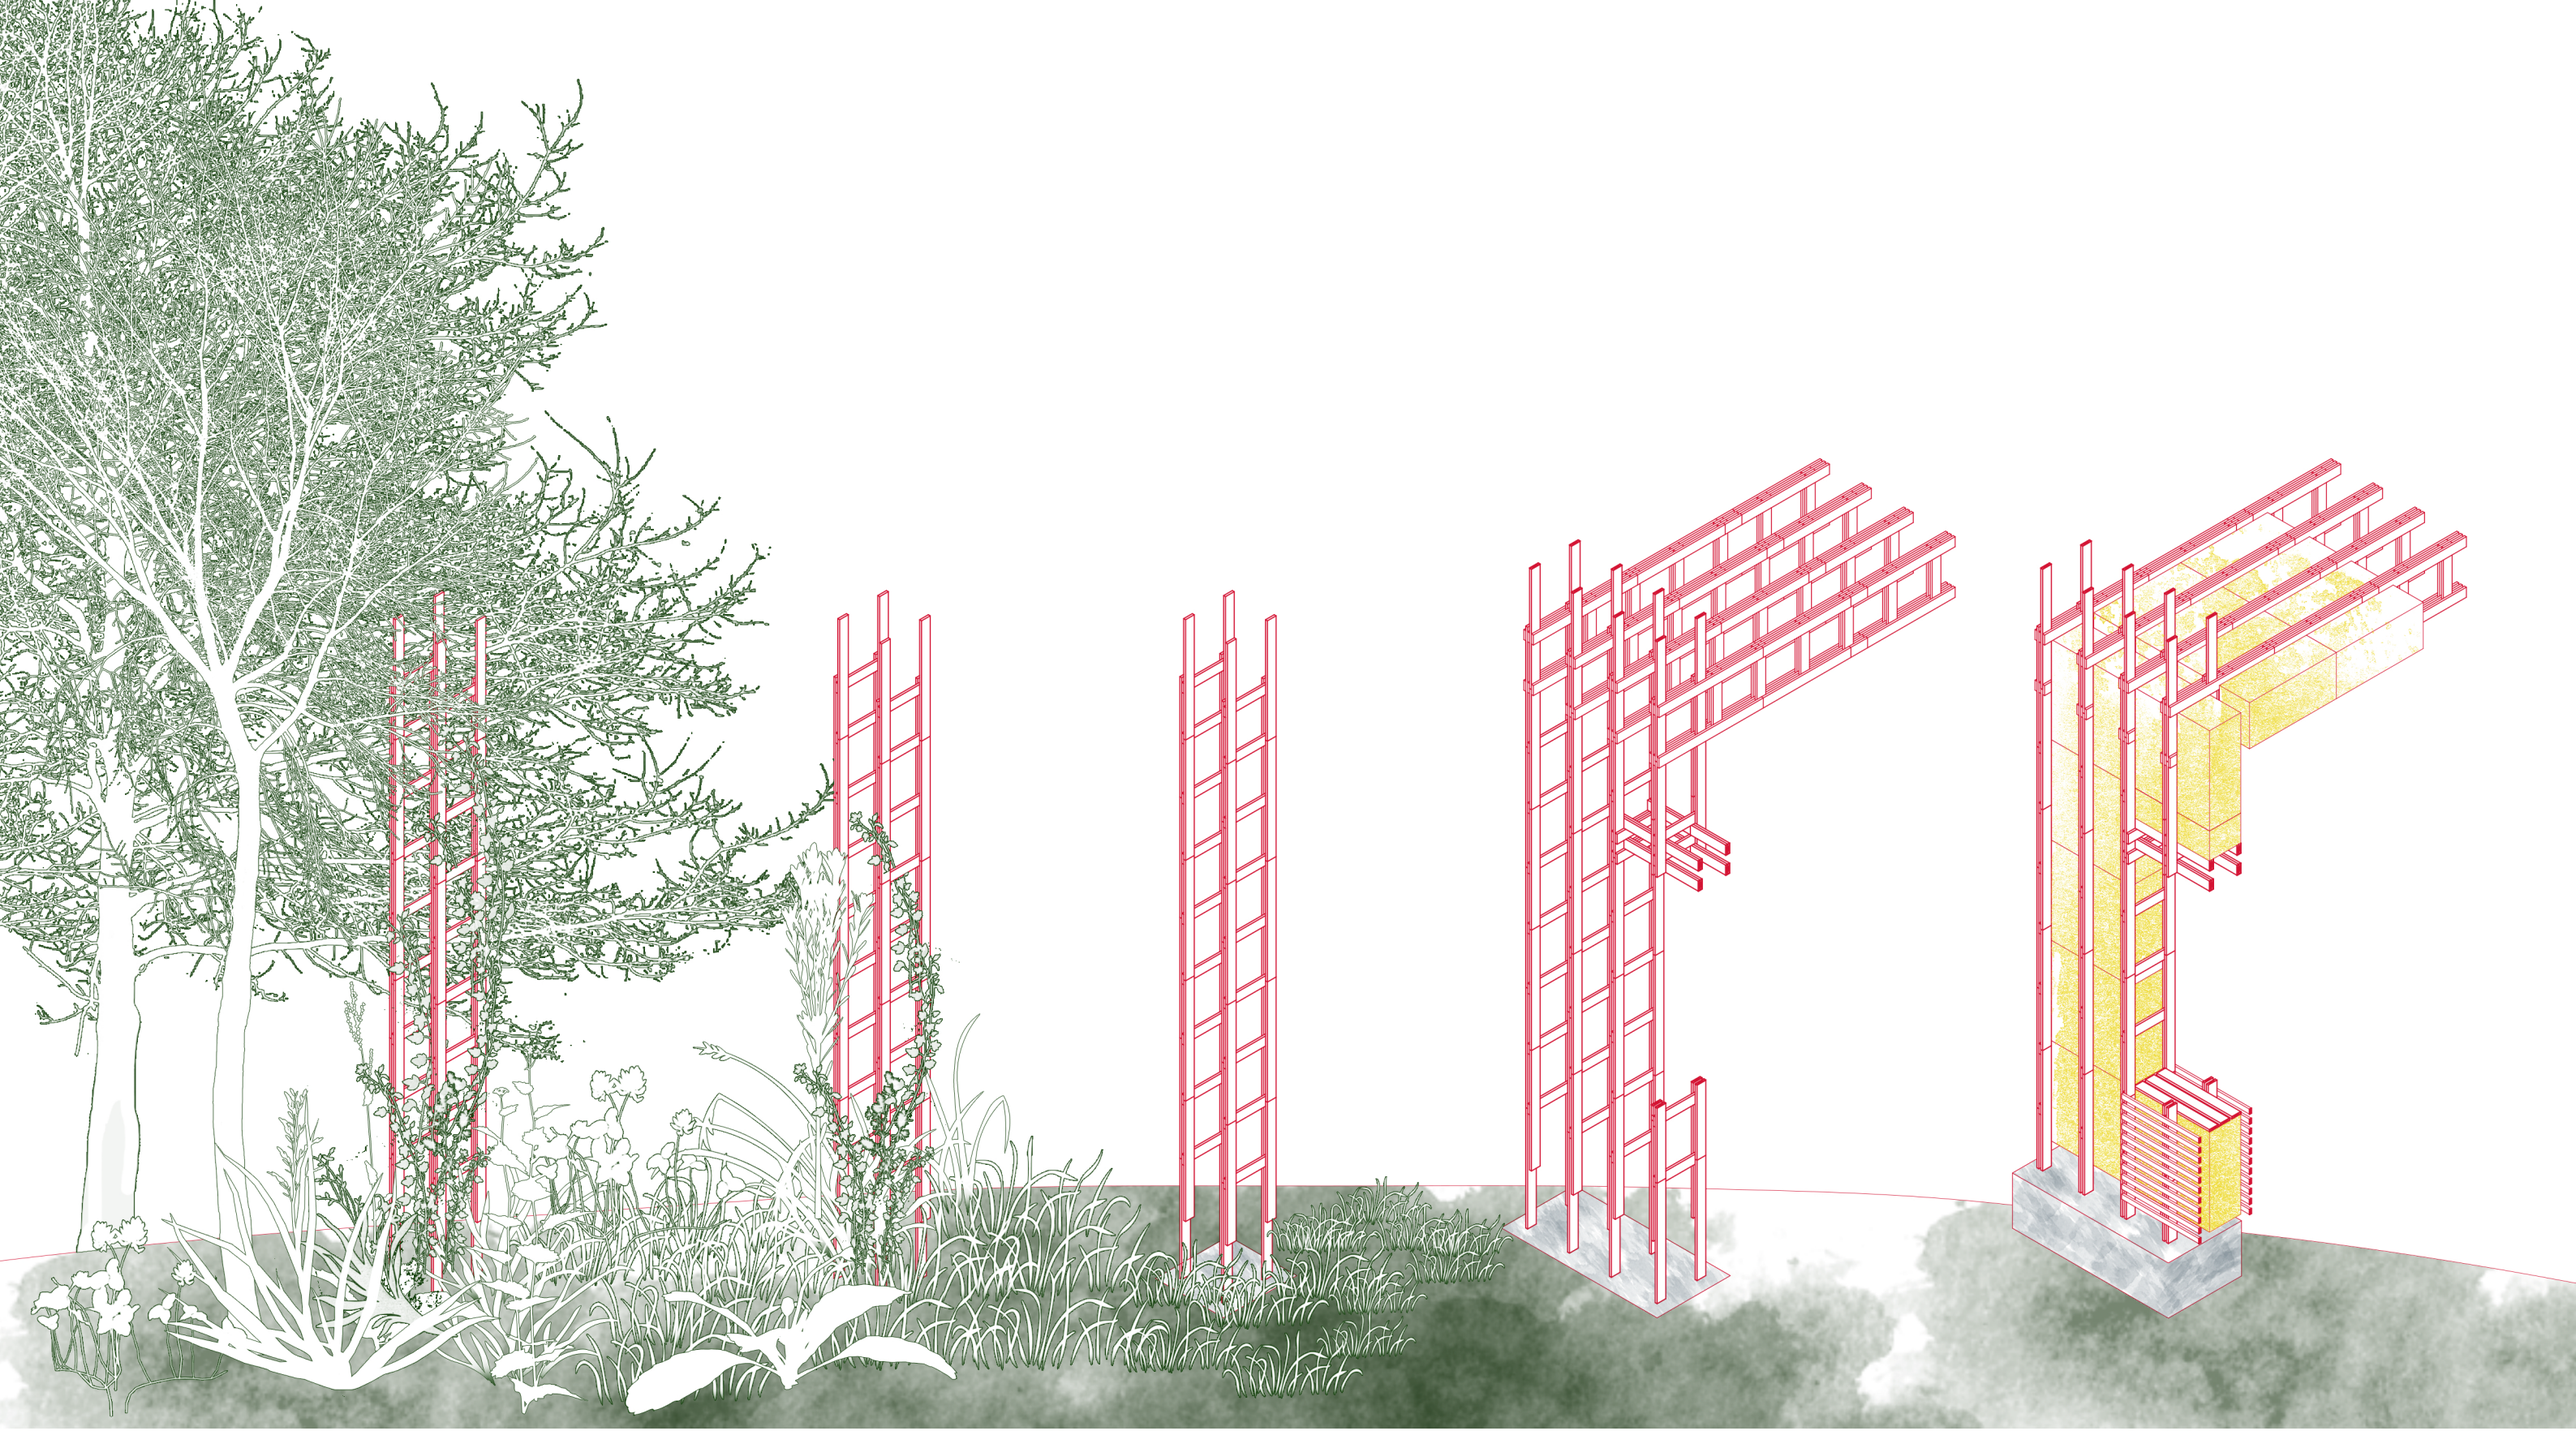

the room of the forest
is a rock to lean against
it is a pause in the rhythm of trees
and it is a meadow
a space in-between

walking the forest
I'm aware of its endlessness
even though I cannot see
beyond a few trees
I'm walking the fragment
and so, I touch the whole

and as I walk, my eyes
unconsciously caress the barks
the lines of my palms
recognize their kin
in the wrinkles of the woods
as I touch their skin

the forest weaves me
into its own flesh
entangled in branches and leaves
we become a woven fabric
of shadow and breath”

Composition No. 10 Pier and ocean by Piet Mondrian

Pier and ocean

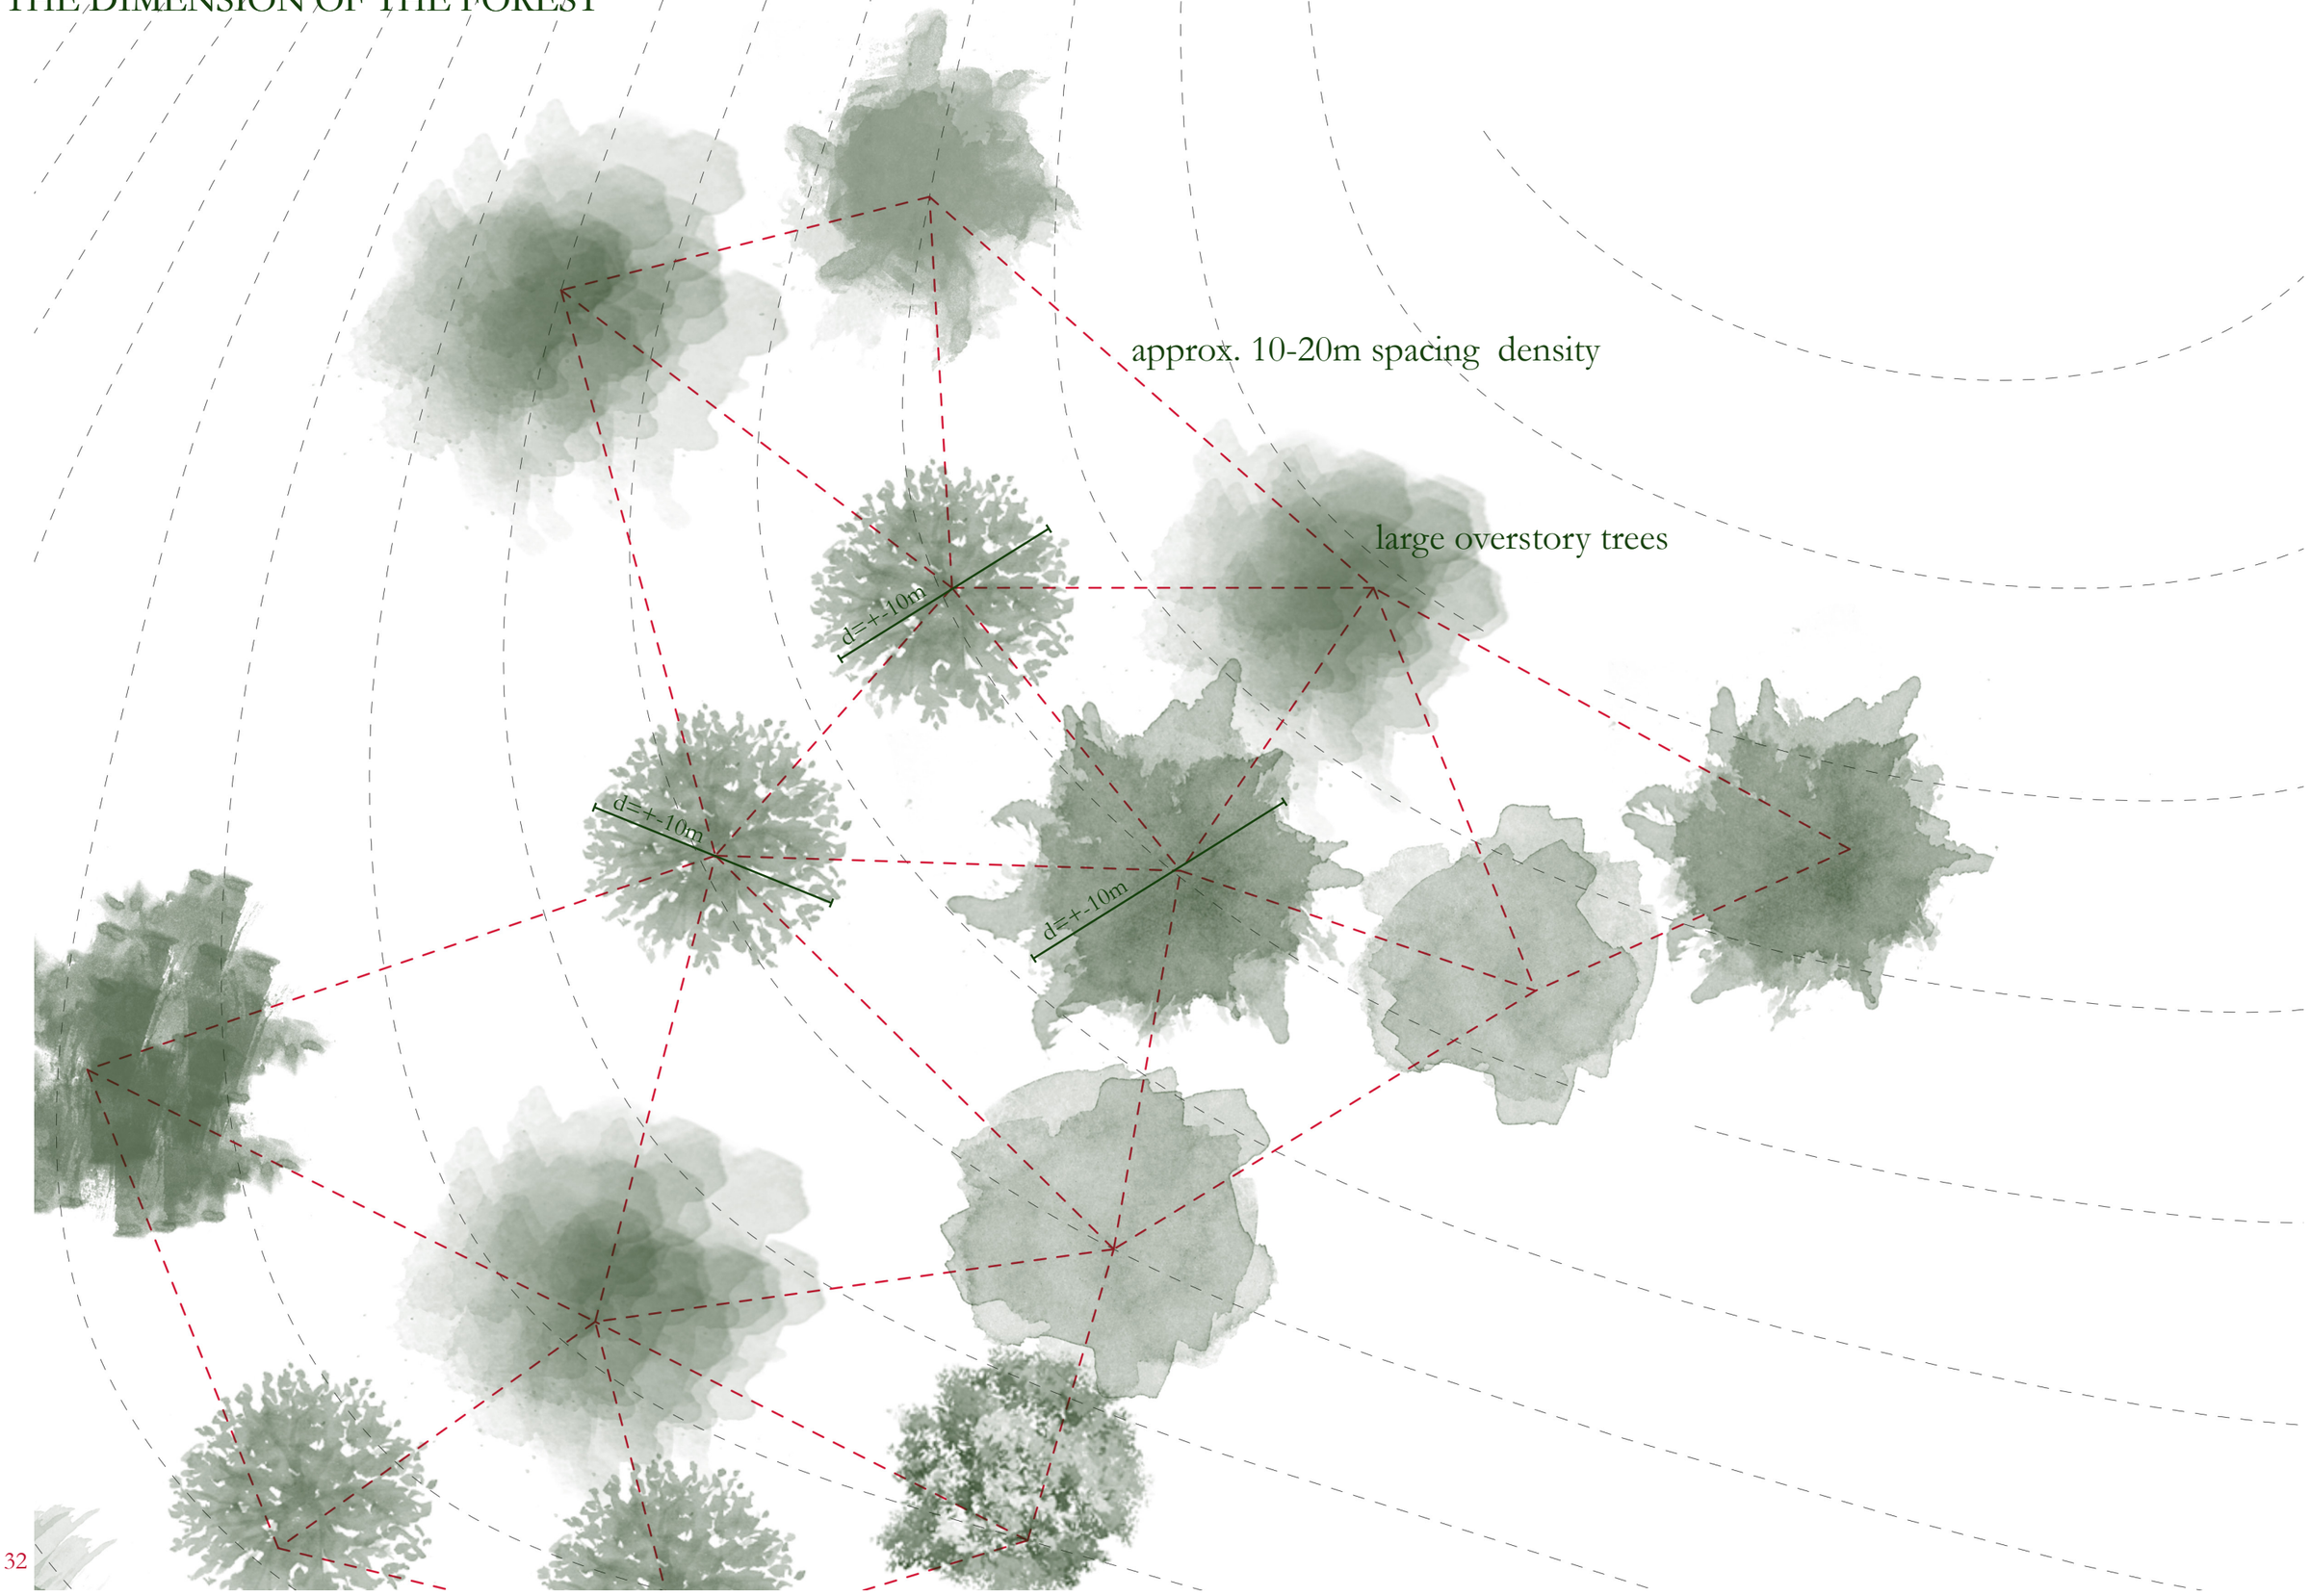

the waves break on the surface
the pier pierces the water
the water remains whole
fluidity is unbreakable

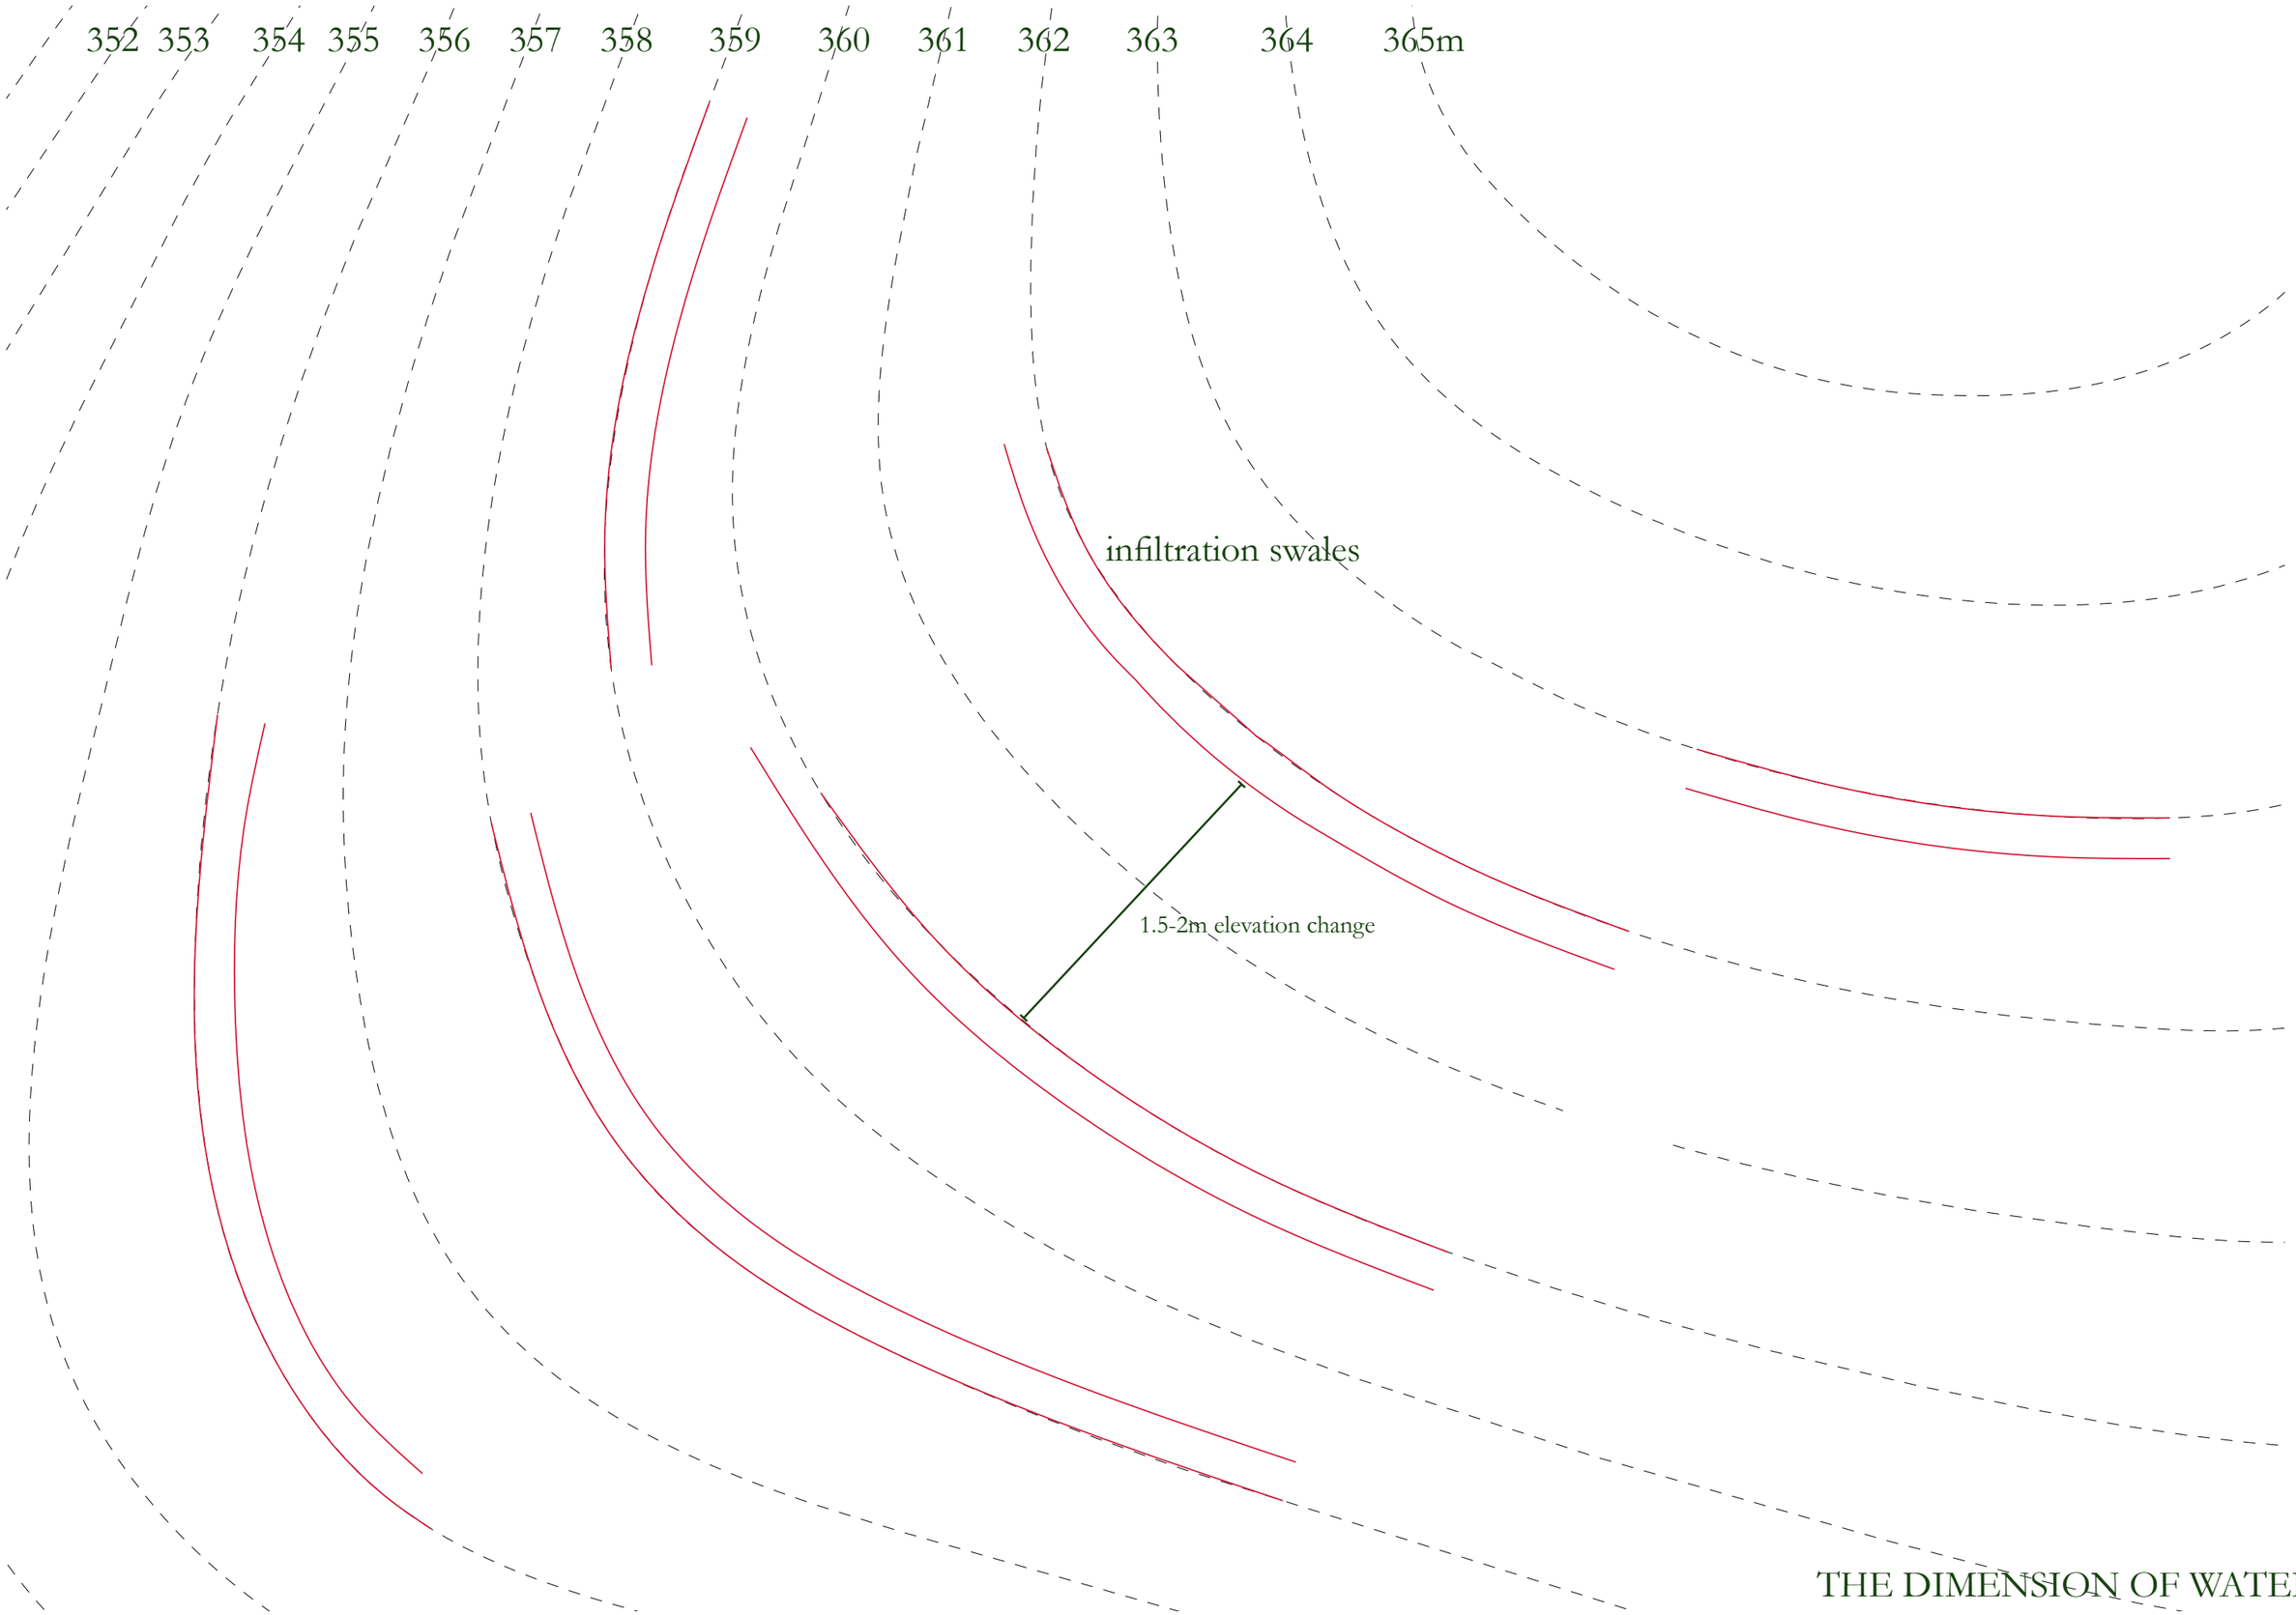

the lines pulsate, expand-contract
it is a tension of two
it is a dance between the web and the forest
the forest is unpierceable

as the waves swept the pier
the foliage spread the web
the rhythm of nature and built
merged into a single landscape

Section AA

my steps sank echoless
as if my trace was made and simultaneously erased
by the softness of the grass
I was wondering when I arrive?
Of when do I enter (begin)
a when does my arrival start?
somewhere
certainly it is between listing and
carefully placing again my foot
on the ground
it is in that moment of movement
of moving through a threshold
space
but causing a subtle change
stepping on a slightly harder surface
and leaving a trace
the room of the forest forms upon my trace
the edge of the wood
the woods seem to thicken
at the edge
as my steps echo gardedly
the clearing exposes my presence
I step guardedly
I listen to my steps as I
become conscious of my presence
the clearing transforms me the audience
in the flood of light I
who walks across the small square
for a
the room of the forest
materializes at my every step
the
pier and ocean
the waves beat on the surface
the pier pierces the water
the water remains whole
fluidity is unbreakable
the lines pulsate
expand, contract
it is a tension of two
it is a dance between
the wood and the forest
the forest is unpierceable
and as the oceans sweep
the pier
the forces
spread the web
rhythm of rotate and
merged it to a single
landscape
the ground slightly flattens out
as the grass gives over to hard ceramic
the rhythm of trees by the edge of
the clearing
is accentuated by the skin
freed by
the dense foliage
is emerging from the woods, it invites you
to follow its solidifying form
gradual hardening of the surface

The door of the forest

Entrance to main space
