Propositions

accompanying the dissertation

TITLE

MINIATURIZED GENERATOR - COLLECTOR ELECTROCHEMICAL SENSORS

by

Hamid Reza ZAFARANI

1. It is a pity that not many chemical engineers benefit from cleanroom facilities.
2. Personal developments during Ph.D. are not reflected by the number of publications and citations.
3. It is stubborn to keep repeating experiments once the results are not as expected or are confusing.
4. Keeping friendships warm is much more difficult than making a new one.
5. Criticisms become only useful if they are combined with constructive hints and suggestions.
6. Learning Dutch can be highly speed up if Dutch people would be more patient toward the new learners.
7. Friendly environment among the research group members and all staffs (including professors) can positively influence on the group successes and achievements.
8. Studying abroad is a great experience and broadens your horizon.

These propositions are regarded as opposable and defensible, and have been approved as such by the promotor Prof. dr. E.J.R. Sudhölter.
