ISSN 0029-8018

Contents

V. A. Subramanian and R. Vijayakumar	119	An inverse design approach for minimising wake at propeller plane using CFD
Q. Y. Zhang	137	Comparison of two three-dimensional hydrodynamic modeling systems for coastal tidal motion
J. Hua	152	Biodegradation of dispersed marine fuel oil in sediment under engineered pre-spill application strategy
M. A. K. Elsayed	168	A novel technique in analyzing non-linear wave-wave interaction
B. A. Younis and V. P. Przulj	181	Prediction of hydrodynamic loading on a mini TLP with free surface effects
E. Korkut	205	A case study for the effect of a flow improvement device (a partial wake equalizing duct) on ship powering characteristics
S. Y. Boo	219	Measurements of higher harmonic wave forces on a vertical truncated circular cylinder
A. Mancuso	234	Parametric design of sailing hull shapes
K.-Y. Park, A. G. L. Borthwick and Y.-S. Cho	247	Two-dimensional wave-current interaction with a locally enriched quadtree grid system
K.-D. Suh, J. K. Park and W. S. Park	264	Wave reflection from partially perforated-wall caisson breakwater
		<i>Technical note</i>
U. Türker and M. S. Kabdaşlı	281	The effects of sediment characteristics and wave height on shape-parameter for representing equilibrium beach profiles
