### What would you change about the assembly? *

Klik lijntjes op de bouwtekening, anders angst dat je het breekt terwijl het de bedoeling is. Nadenken over de sleeve omdat die misschien uit gaat lubberen na verloop van tijd.

## What did you like about the assembly? *

Alles voelt wel redelijk firm - het klikt wanneer je het in elkaar zet. er zit een kabel bij in de doos (!) en de gehele speaker heeft een leuke vorm.

## What would you change about the assembly? *

The manual should have lighter colours, more contrast, and perhaps better identifaction of different parts (like numbers).
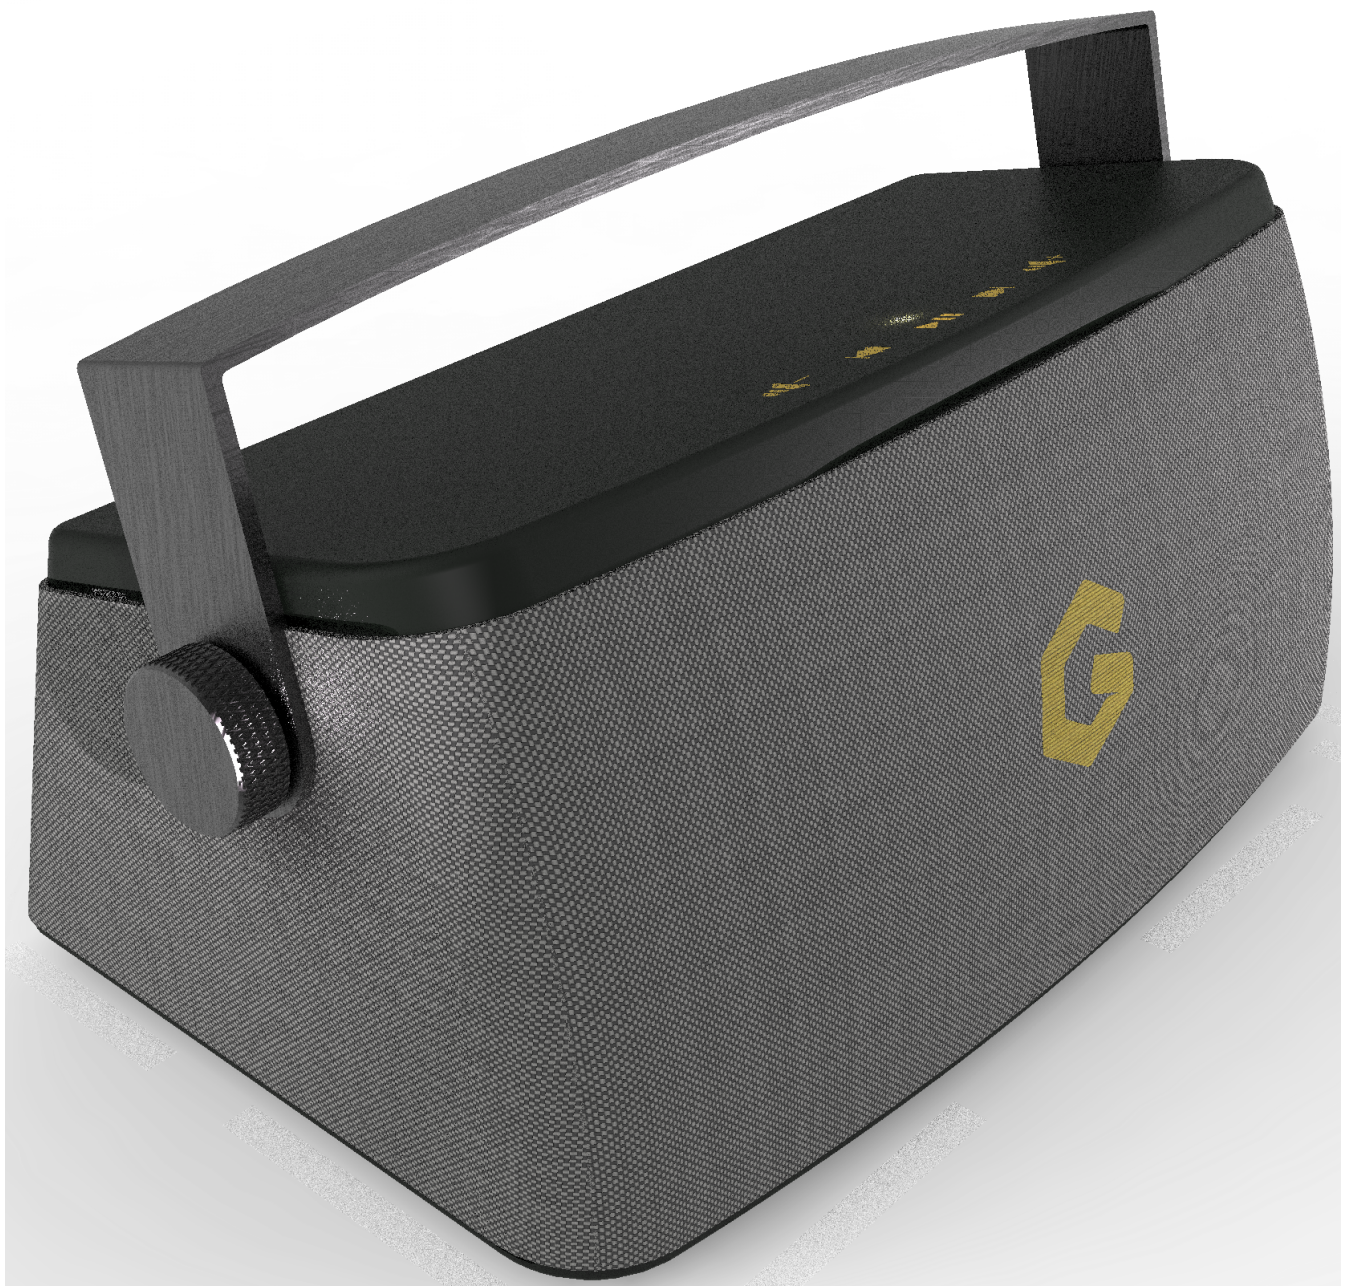

## What did you like about the assembly? *

The back en front sliding in place is very nice. Good quality because of screwing.

## Design

The next part is about the design and it's characteristics, two renders on the design are found on this page, please take a good look at them.

### What would you change about the design? *

Try to make the handle feeling more premium instead of simple metal band with paint coating. For instance a (soft) plastic coating.

### What do you like about the design? *

The overall shape looks very nice, very durable and looks like a speaker with premium sound quality.

### What would you change about the assembly? *

meer stroefheid, iets meer klik, hoger contrast (het was te donker). duidelijkere indicaties, veren voelen wat overbodig in de assembly je kan het ook zelf omhoog klappen zolang er maar wat wrijving in het scharnier zit.

## What did you like about the assembly? *

het is snel, algemeen snel duidelijk wat er gedaan moest worden. geen kracht nodig, voelt alsof je dingen moet forceren.
