Author Correction: Transition from simple to complex contagion in collective decision-making

Nikolaj Horsevad , David Mateo , Robert E. Kooij, Alain Barrat  & Roland Bouffanais 

Correction to: *Nature Communications* <https://doi.org/10.1038/s41467-022-28958-6>, published online 17 March 2022.

The original version of this Article contained an error in the Abstract, which incorrectly read: ‘Here, we show theoretically, and experimentally with a multi-robot system, that such a transition from simple to complex contagion can also be observed in an archetypal model of distributed decision-making devoid of any thresholds or nonlinearities.’

The correct form of the fourth sentence in the Abstract is:

‘Here, we show theoretically, and experimentally with a multi-robot system, that such a transition from simple to complex contagion can also be observed in an archetypal model of distributed decision-making devoid of any thresholds or nonlinearities.’
