Nieuwsgierigheid

Oase No. 7
Haus Rucker & Co

Designed as part of the Documenta 5 exhibition in Kassel, 1972. A transparent pneumatic sphere with a diameter of 8 meters, is a space for relaxation and play. It is a performance where the viewers become participants and could influence their own environments becoming more than on lookers. (like in Carsten Holler test site)

Verbeelding

Loud Shadows - Liquid Events Plastique Fantastique

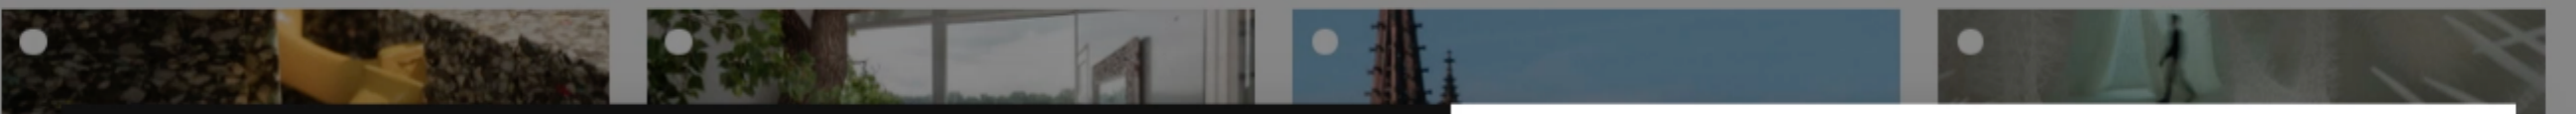

"Plastique fantastique has presented a monumental design, yet mobile, soft, and transparent. Its skin influences the environment as much as its inner space offers a clear view outwards. Its purpose is to create an intimate place where dance and music is merged, and the perception of time is challenged." Installation at Oerol 'Loud Shadows' 2017.

Provocative

Tilted Arc Richard Serra

Richard Serra placed a giant tilted arc on the Federal Plaza in New York. It was 12 feet high and 120 feet long, and leaned slightly to one side. "It was immediately seen as ugly, oppressive and a 'graffiti catcher'. Two petitions seeking the removal of the piece quickly gathered 1,300 signatures." The sculpture was removed after 8 years.
