

# **Stitching Barcelona Together**

Urban Design for Social and Spatial  
Integration in Sant Martí and Beyond

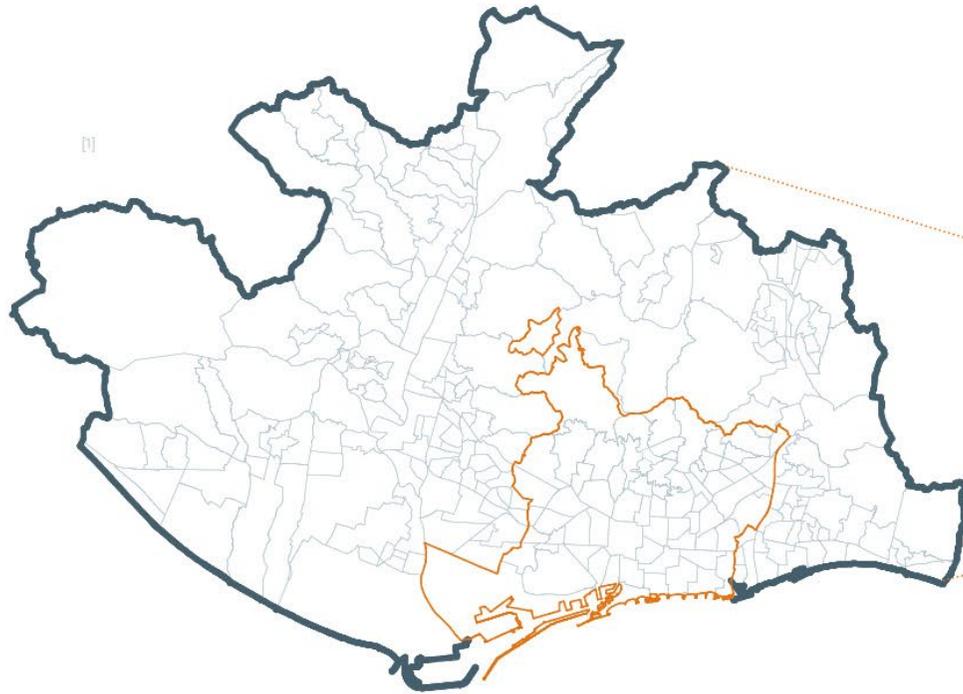

Graduation Presentation  
P5 17/05/2025

Student: Mariia Deinega 5911672  
First mentor: Rients Dijkstra  
Second mentor: Machiel van Dorst

Msc. Architecture, Urbanism and  
Building Sciences (Urbanism Track)  
Delft University of Technology

### Metropolitan Area of Barcelona (AMB)

## two sides of one coin

**“Superstar cities and knowledge hubs are not just the places where inequality is most on display; their success is inextricably tied to the very clustering of talent and firms that shapes the widening gap between rich and poor”**

Richard Florida, “The New Urban Crisis” (2017)

Fig. 11.

La Catalana

La Mina

XL L M S

**socially  
fragmented  
urban  
landscape**

Legend

- Predominantly young professionals, tech workers, and middle-to-high income groups attracted by innovation-driven industries.
- Area with low-density of population. Mainly old local residents.
- High concentration of low-income residents and immigrant communities and gypsy with high unemployment rates and significant socio-economic challenges.
- Densed area with middle or low-to-middle income.
- Predominantly young couples of middle income.

# urban structure

Fig. 20.  
Existing urban structure of the project area.  
Created by author.

**How can urban design foster spatial, social and economic connectivity between the 22@, La Mina, and La Catalana, ensuring a cohesive and inclusive urban fabric from Sant Martí to the Besòs River?**

**Subquestions:**

- Effect of gentrification and segregation
- Social interaction and accessibility through spacial configurations
- Urban design interventions to reduce physical, economic and social barriers
- Urban corridor 'the 22@, La Mina, La Catalana' as a unifying element
- Urban planning measures to mitigate displacement and enhance community resilience

**edge of the city**

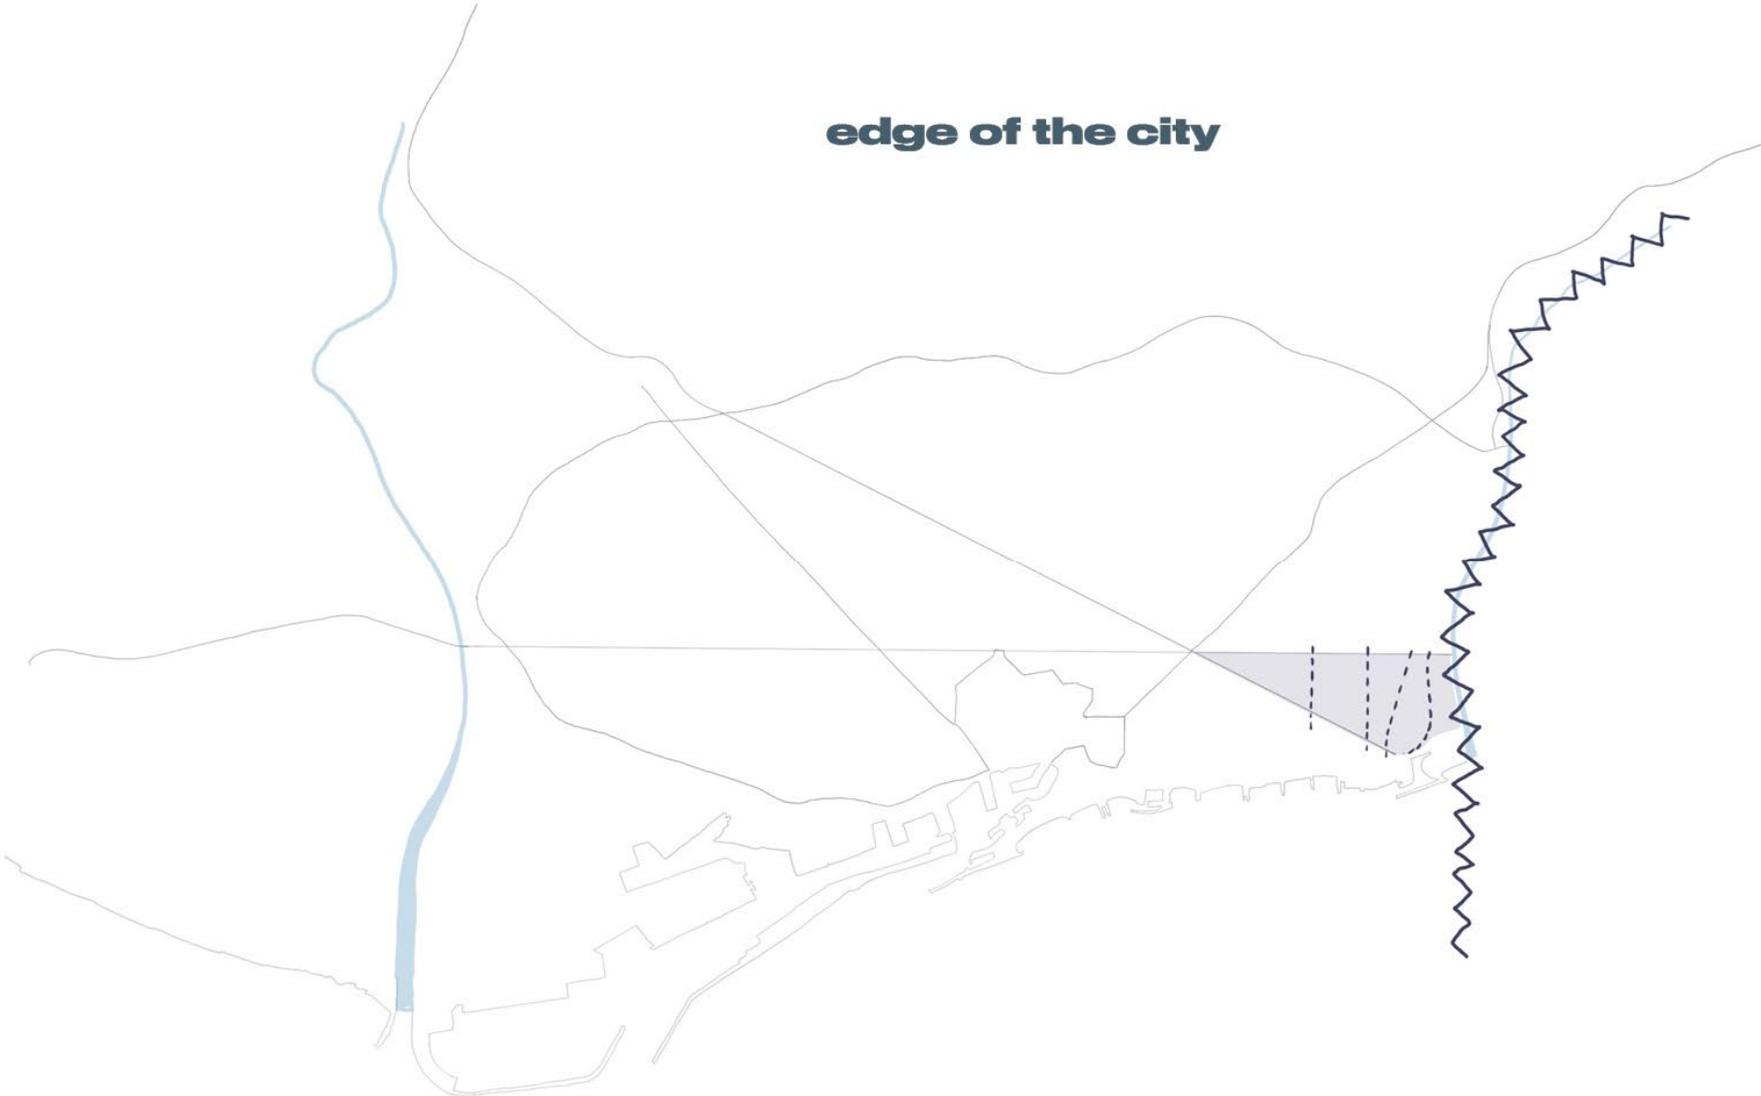

Fig.21  
Area as an edge of Barcelona.

### new intercity centrality

Fig. 22  
Area as new intercity centrality.  
Created by author.

# recreational connection

Establish recreational spaces near the Besòs River that can act as a bridge between neighborhoods, promoting interaction and integration.

**Core idea:** Accessible, well-designed recreational spaces enhance community well-being and attract visitors, fostering social cohesion and urban vitality (Lynch, 1960).

Fig. 23.  
Recreation concept.

- public infrastructure

Fig. 26  
Possibility for green spaces in project area.  
Created by author.

## cultural & social attraction

Develop a cultural center to celebrate local histories and bridge social divides between diverse communities.

**Core Idea:** Cultural hub can revitalize neighborhoods by fostering creative economies, preserving heritage, and enhancing urban identity (Zukin, 1995).

Fig. 27.  
Culture concept.  
Created by author.

Fig. 28.  
Visual rendering of the future Catalunya Media City in the  
Tres Chimeas turbine hall.  
Render from Garcés de Seta Bonet & Marver Architects, 2025.

# density rise

Develop a denser, more mixed-use urban fabric that can accommodate population growth while improving spatial quality, public services, and accessibility.

→ **Core Idea:** Strategic densification enhances the efficiency of land use and infrastructure, creates the conditions for social mixing, and supports long-term urban resilience (Dovey & Pafka, 2014).
