

International **SHIPBUILDING** *Progress*
SHIPBUILDING AND MARINE ENGINEERING MONTHLY

194, Heemraadssingel, Rotterdam, Holland

INDEX 1959

Volume 6 — Numbers 53-64

	Number	Page		Number	Page
A comparison of various theoretical wave spectra, by Gerhard Neumann and Willard J. Pierson, Jr.	53	14	Clough, R. W., Dilley, R.A., Williams, J. E., Wiegel, R. L., Model study of floating drydock mooring forces ..	56	147
Aertssen, prof. G., Sea trials on a passenger-cargo liner with block coefficient 0.672 and on a large tanker with block coefficient 0.770	54	76	Criterion for neglecting of free oscillations of a ship in a seaway, by Lj. B. Radosavljević	56	141
American river towboats, by L. A. Baier, NA	63	482	Crowley, J. D. and Manen, dr. ir. J. D. van, Some aspects of circulation theory design of screw propellers ..	62	429
Amidship bending moments for ships in waves, by ir. W. A. Swaan	61	398	Dilley, R. A., Williams, J. E., Wiegel, R. L., Clough, R. W., Model study of floating drydock mooring forces	56	147
Anneveld, A. S., Ship propulsion by means of free piston gasturbines ..	58	265	Dynamic measurements on propeller models, by dr. ir. J. D. van Manen and ir. R. Wereldsma	63	473
A note on camber effects of a partially cavitated hydrofoil, by J. A. Geurst and P. J. Verbrugh	61	409	Experimental investigation of the inertia and damping coefficients of a spheroid and surface ship in free heave, by G. Weinblum, S. Brooks and P. Golovato	54	45
Arnoldus, W. and Keyser, ir. R., Strength calculation of marine propellers	53	20	Experiments on two-stroke engine exhaust ports under steady and unsteady flow conditions, by R. S. Benson, M.Sc. (Eng.)	62	444
A study of materials for marine propellers, by Donald M. Harris	57	196	Extreme pressure lubricants for marine gears, by A. D. Newman, B.Sc.	63	486
Baier, NA, L. A., American river towboats	63	482	Fundamentals of the behaviour of ships in waves, by ir. G. Vossers	63	493
Basic factors for designing most advantageous merchant ships, by Prof. Dr. Ing. H. Völker	60	355	Continued	64	538
Benson, MSC. (Eng.), R. S., Experiments on two-stroke engine exhaust ports under steady and unsteady flow conditions	62	444	Geometrically similar models, an investigation of some problems resulting from their resistance values, by Cedric Ridgely-Nevitt	59	311
Berghuis, dr. J. and Rösingh, ir. W. H. C., Mathematical shipform	53	37	Gerritsma, ir. J., The effect of a keel in the rolling characteristics of a ship ..	59	295
Boericke, Jr., S.B., S.M., Harold, Unusual displacement hull forms for higher speeds	58	249	Geurst, J. A., Linearized theory for partially cavitated hydrofoils	60	369
Bowden, B.Sc. (Eng.), Ph.D., A. T., Some engineering developments in the nuclear power field	55	114	Geurst, J. A. and Verbrugh, P. J., A note on camber effects of a partially cavitated hydrofoil	61	409
Brooks, S., Weinblum, G., and Golovato, P., Experimental investigation of the inertia and damping coefficients of a spheroid and surface ship in free heave	54	45			

	Number	Page		Number	Page
Golovato, P., Weinblum, G. and Brooks, S., Experimental investigation of the inertia and damping coefficients of a spheroid and surface ship in free heave	54	45	Mathematical shipform, by ir. W. H. C. Rösingh and dr. J. Berghuis	53	37
Halley, M.B.E., B.Sc., G. B., Machinery for large tankers	64	519	Mellanby, W. R., Optical marking and automatic plate production	56	160
Harris, Donald M., A study of materials for marine propellers	57	196	Meyer, ir. M. C., Some experiments on partly cavitating hydrofoils	60	361
High-powered diesel engines for marine propulsion, by Dr. Ing. Fritz Schmidt	61	415	Model experiments of a super-tanker in still and rough water, by Shiro Kan, Kiyoshi Tsuchida, Koichi Yokoo and Tatsuro Ito	55	127
Investigation of the characteristics of single screw propellers with twin rudders placed symmetrically in the propeller race, by K. Kafali	59	305	Model study of floating drydock mooring forces, by R. L. Wiegell, R. W. Clough, R. A. Dilley, J. E. Williams	56	147
Kafali, K., The powering of round bottom motorboats	54	72	Model tests for determining critical vibrations of the rudderpost of a "Mariner" rudder, by ir. R. Wereldsma	57	187
Kafali, K., Investigation of the characteristics of single screw propellers with twin rudders placed symmetrically in the propeller race	59	305	Neumann, Gerhard and Pierson Jr., Willard J., A comparison of various theoretical wave spectra	53	14
Kafali, K., Propeller and rudder characteristics for a single screw with twin rudders placed symmetrically in the screw race with different angles	64	515	Newman, B.Sc., A. D., Extreme pressure lubricants for marine gears	63	486
Kerwin, J. E., Machine computation of marine propeller characteristics	60	343	Optical marking and automatic plate production, by W. R. Mellanby	56	160
Keyser, ir. R. and Arnoldus, W., Strength calculation of marine propellers	53	20	Pierson, Jr., Willard J. and Neumann, Gerhard, A comparison of various theoretical wave spectra	53	14
Kuiper, ir. J. H., The new Brons engines	61	387	Propeller and rudder characteristics for a single screw with twin rudders placed symmetrically in the screw race with different angles, by K. Kafali	64	515
Lammeren, prof. dr. ir. W. P. A. van and Lap, ir. A. J. W., The shallow water laboratory of the Netherlands Ship Model Basin at Wageningen	53	3	Radosavljević, Lj. B., The comparison of the frequencies of free oscillations of a ship in a seaway based on the coupled and uncoupled differential equations of motion	54	63
Linearized theory for partially cavitating hydrofoils, by J. A. Geurst	60	369	Radosavljević, Lj. B., Criterion for neglecting of free oscillations of a ship in a seaway	56	141
Machine computation of marine propeller characteristics, by J. E. Kerwin	60	343	Research program of the Netherlands Ship Model Basin, by dr. ir. J. D. van Manen	58	233
Machinery for large tankers, by G. B. Halley, M.B.E., B.Sc.	64	519	Ridgely-Nevitt, Cedric, Geometrically similar models, an investigation of some problems resulting from their resistance values	59	311
Manen, dr. ir. J. D. van and Superina, Dipl. Ing. A., The design of screw-propellers in nozzles	55	95	Rösingh, ir. W. H. C. and Berghuis, dr. J., Mathematical shipform	53	37
Manen, dr. ir. J. D. van, Research program of the Netherlands Ship Model Basin	58	233	Schmidt, Dr.-Ing. Fritz, High-powered diesel engines for marine propulsion	61	415
Manen, dr. ir. J. D. van and Crowley, J. D., Some aspects of circulation theory design of screw propellers	62	429			
Manen, dr. ir. J. D. van and Wereldsma, ir. R., Dynamic measurements on propeller models	63	473			

	Number	Page		Number	Page
Sea trials on a passenger-cargo liner with block coefficient 0.672 and on a large tanker with block coefficient 0.770, by prof. G. Aertssen	54	76	The powering of round bottom motor-boats, by K. Kafali	54	72
Ship propulsion by means of free piston gasturbines, by A. S. Anneveld	58	265	The shallow water laboratory of the Netherlands Ship Model Basin at Wageningen, by prof. dr. ir. W. P. A. van Lammeren and ir. A. J. W. Lap	53	3
Shiro Kan, Kiyoshi Tsuchida, Koichi Yokoo and Tatsuro Ito, Model experiments of a super-tanker in still and rough water	55	127	Unusual displacement hull forms for higher speeds, by Harold Boericke, Jr., S.B., S.M.	58	249
Smith, J. E., The manufacture of marine oil engines	57	213	Verbrugh, P. J. and Geurst, J. A., A note on camber effects of a partially cavitated hydrofoil	61	409
Some aspects of circulation theory design of screw propellers, by dr. ir. J. D. van Manen and J. D. Crowley	62	429	Völker, Prof. Dr. Ing. H., Basic factors for designing most advantageous merchant ships	60	355
Some engineering developments in the nuclear power field, by A. T. Bowden, B.Sc. (Eng.), Ph.D.	55	114	Vossers, ir. G., Fundamentals of the behaviour of ships in waves	63	493
Some experiments on partly cavitating hydrofoils, by ir. M. C. Meyer	60	361	Continued	64	538
Strength calculation of marine propellers, by ir. R. Keyser and W. Arnoldus	53	20	Weinblum, G., Brooks, S. and Golovato, P., Experimental investigation of the inertia and damping coefficients of a spheroid and surface ship in free heave	54	45
Swaan, ir. W. A., Amidship bending moments for ships in waves	61	398	Wereldsma, ir. R. Model tests for determining critical vibrations of the rudderpost of a "Mariner" rudder	57	187
The comparison of the frequencies of free oscillations of a ship in a seaway based on the coupled and uncoupled differential equations of motion, by Lj. B. Radosavljević	54	63	Wereldsma, ir. R. and Manen, dr. ir. J. D. van, Dynamic measurements on propeller models	63	473
The design of screw-propellers in nozzles, by dr. ir. J. D. van Manen and Dipl. Ing. A. Superina	55	95	Wiegel, R. L., Clough, R. W., Dilley, R. A., Williams, J. R., Model study of floating drydock mooring forces	56	147
The effect of a keel on the rolling characteristics of a ship, by ir. J. Gerritsma	59	295	Williams, J. E., Wiegel, R. L., Clough, R. W., Dilley, R. A., Model study of floating drydock mooring forces	56	147
The manufacture of marine oil engines, by J. E. Smith	57	213			
The new Brons engines, by ir. J. H. Kuiper	61	387
