Concepts

1. Post-Growth

2. Governance

3. Heritage

Concepts

1. Post-Growth

2. Governance

3. Heritage

What is Post-Growth?

Post-growth is a theory that argues that **unrestricted growth** in consumption and production is **not feasible** within planetary boundaries.

The spatial dimension of post-growth theory

Savini (2021) and the **degrowth** principles

Polycentric autonomism

Communities can provide themselves of certain resources

The spatial dimension of post-growth theory

3. Heritage

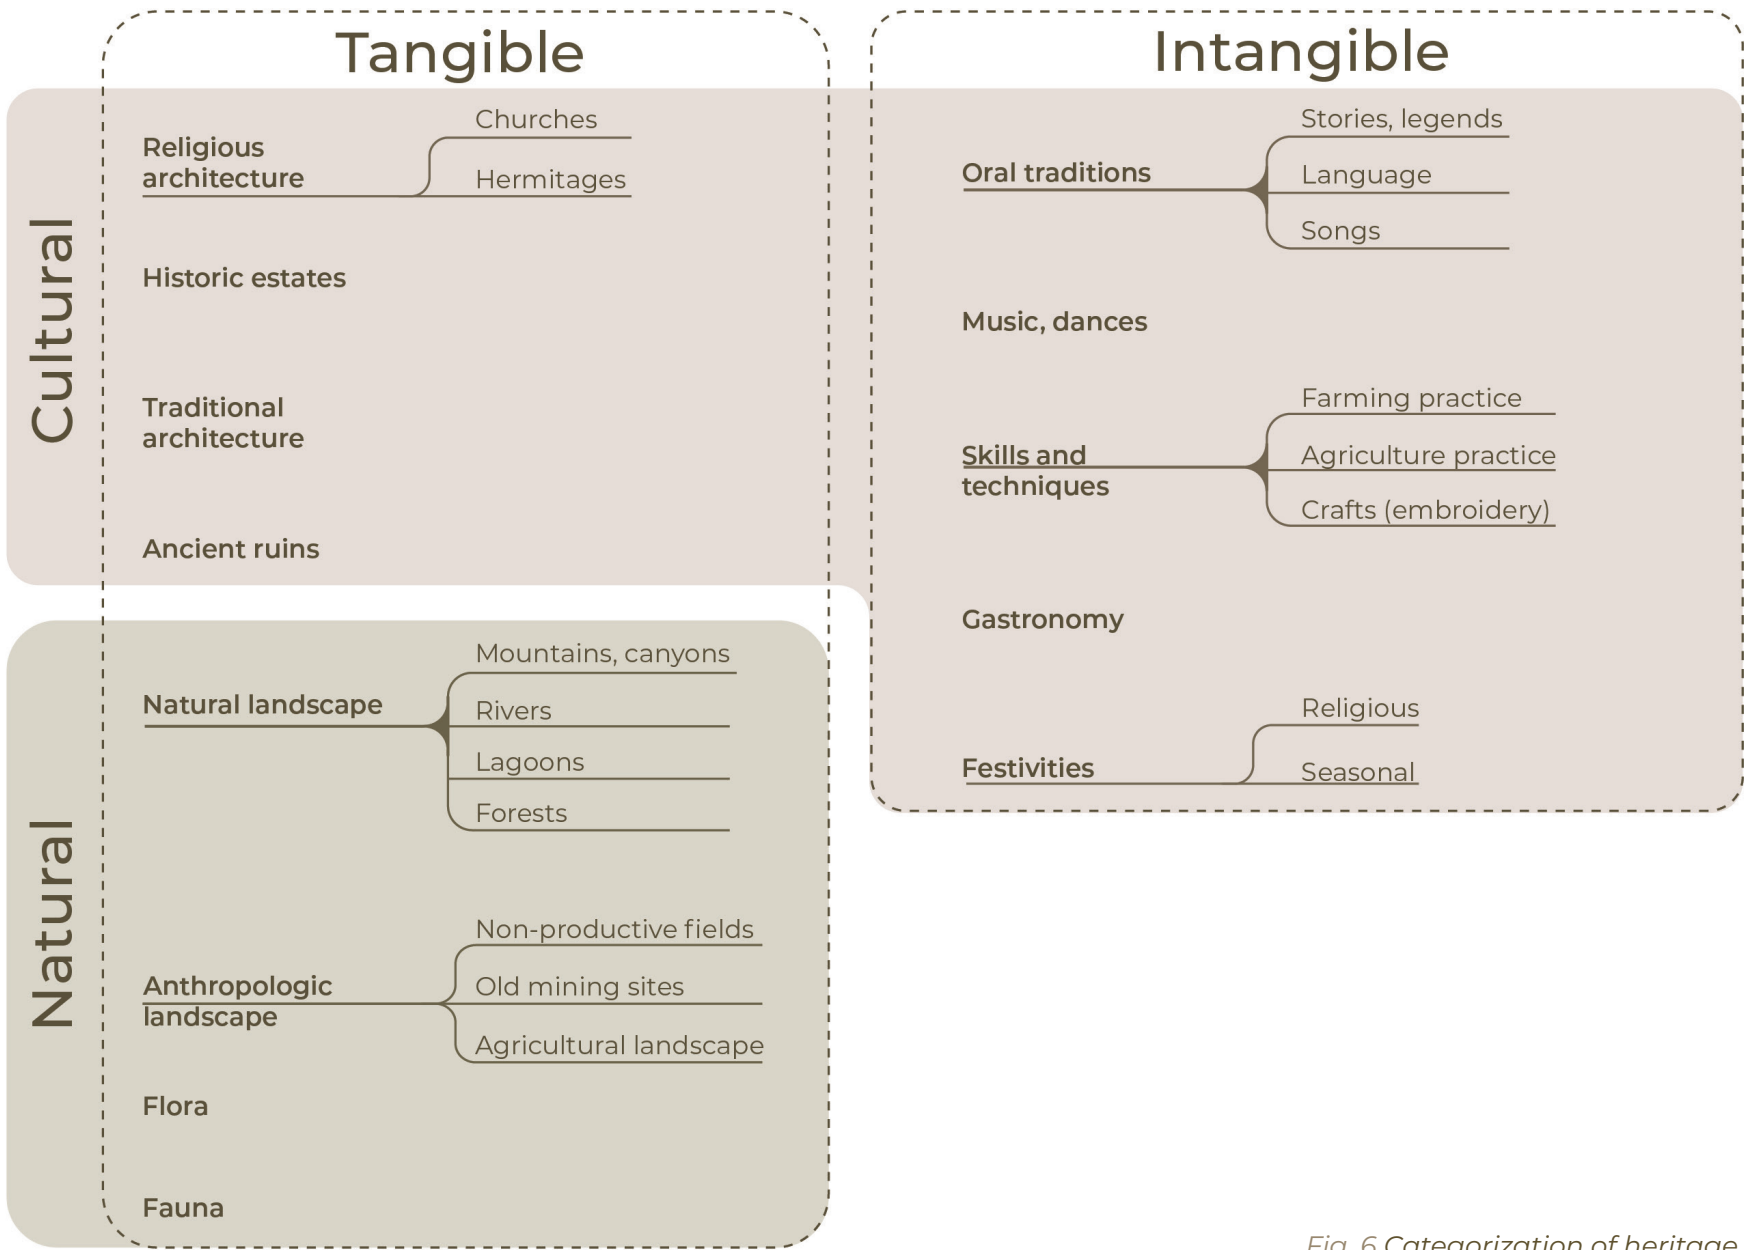

Fig. 6 Categorization of heritage

Tangible, cultural heritage

Tangible, natural heritage

Intangible, cultural heritage

3. Aims and goals

Conceptual framework

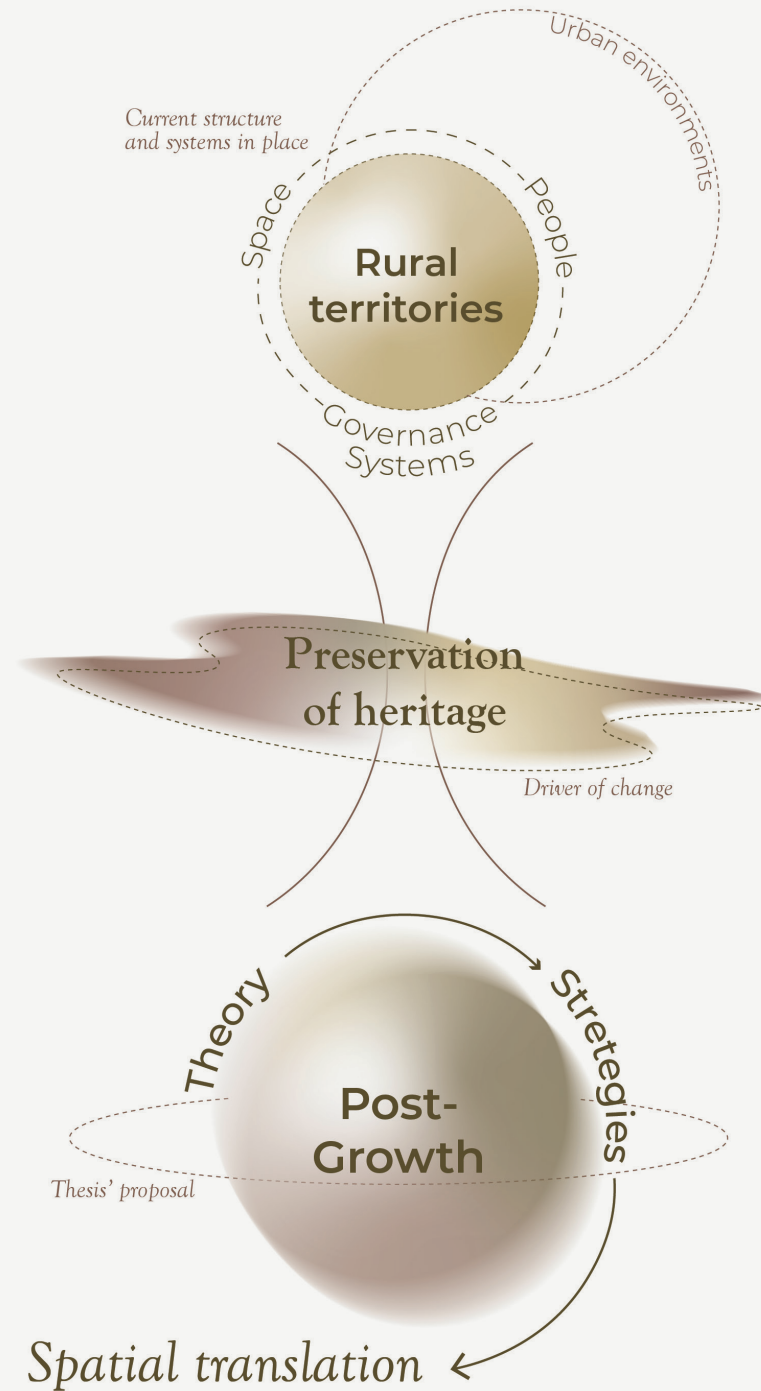

Fig. 7 Conceptual framework diagram

Main research question:

How can a **spatial perspective** on **post-growth planning strategies** contribute to reorganizing **rural territories** through the **preservation** of cultural and ecological **heritage** of shrinking rural communities in the Spanish countryside?

3. Aims and goals

1.

Create **knowledge** that will lead to better decision-making and create a **new spatial dimension** to decision-making.

2.

Relate **sustainable post-growth spatial strategies to spatial design** in a concrete context.

3.

Change the **narrative** of popular imagery regarding the 'stagnant' rural world.

4.

Rethink **values** and highlight the **importance of rural areas and rural life and culture**.

5.

Use **heritage** as a bridge between decision-making practices, people's needs and (post-growth related) planning practices.

4. Site

A photograph of a narrow, winding street in a village. The street is paved and leads uphill. On the left, there are buildings with light-colored plaster and some with yellow-painted upper floors. A satellite dish is mounted on one of the buildings. On the right, there is a stone building with a large, reddish-brown rectangular window frame. A street lamp is visible in the distance. The sky is blue with some clouds.

Site selection

Criteria

1. **Shrinking** rural area

2. Area contains a **cluster** of 4 to 5 villages/municipalities

3. Area **relates to a bigger urban core** (+- 1 hour away)

4. The villages in the area present **different stages of shrinkage** (diverse populations)

5. The area presents a singular identity and **care for its culture**

6. The area presents **active population** cores that want to see change

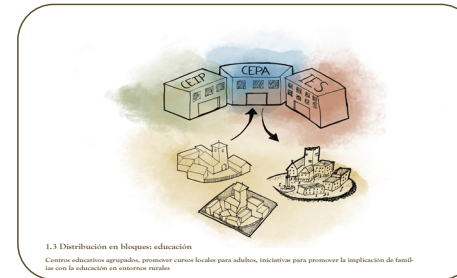

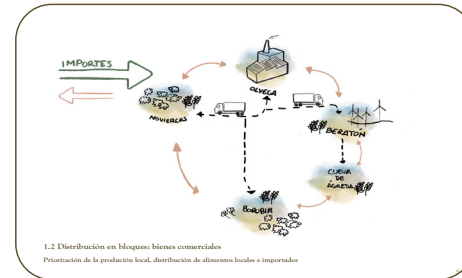

7. **Is accessible** for fieldwork

5. Research sub-question 1

What is the **spatial perspective of post-growth theories?** and how does this translate to strategies in **planning rural territories?**

Preliminary post-growth toolkit

1. Related to the principle of **Polycentric Autonomism**

2. Related to the principle of **Finity**

3. Related to the principle of **Habitability**

Example: Polycentric management of cultural heritage

Related to the theory of: Polycentric Authonomism

1.4 Polycentric management of cultural heritage

Strategy description:

This strategy answers to the need for revitalization of a sense of place and identity of shrinking rural environments. It is important to emphasize the cultural and environmental importance of rural settlements among the inhabitants of these localities.

This strategy presents the following proposals:

- Collective efforts to obtain the means to maintain heritage sites. The protection and maintenance of this site has to be a political priority nationally, regionally but also locally, to ensure the proper completion of projects.
- Facilitate resources to existing local (cultural) associations, municipalities to promote cultural initiatives such as: hikes in the direct natural environment, themed festivities related to historical events, other events related to the acknowledgement of history and historical monuments, seasonal fairs related to traditional economic activities.
- Events with a collective approach, about common history/heritage of all villages. Public transport between villages is provided.

Aims:

- Make knowledge of the historical importance of rural environments accessible.
- Emphasize the sense of place, identity and community of inhabitants.
- Improve the state of historical sites

Keywords:

Maintenance, initiatives, events, accessibility

Main stakeholders:

- Local municipalities
- Provincial government
- Cultural associations
- Inhabitants

Protection of cultural heritage and historical memory with a collective approach

5. Testing the toolkit

Fieldwork: Interviews

4 Officials

- 2 Mayors
- 1 Council member
- 1 Secretary of 5 villages in the area

9 Residents

- 2 people under 30
- 3 seniors
- 3 business owners
- 1 worker

Research sub-question 2

How can **policies** contribute to the implementation of **post-growth principles in space** management in Spanish rural territories?

Interview analysis: on problems

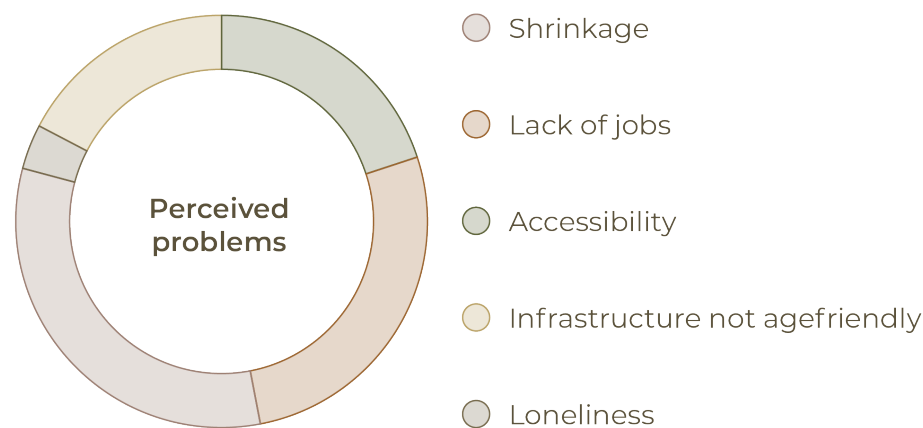

Table 1 Perceived problems by residents, based on the coded information from interviews.

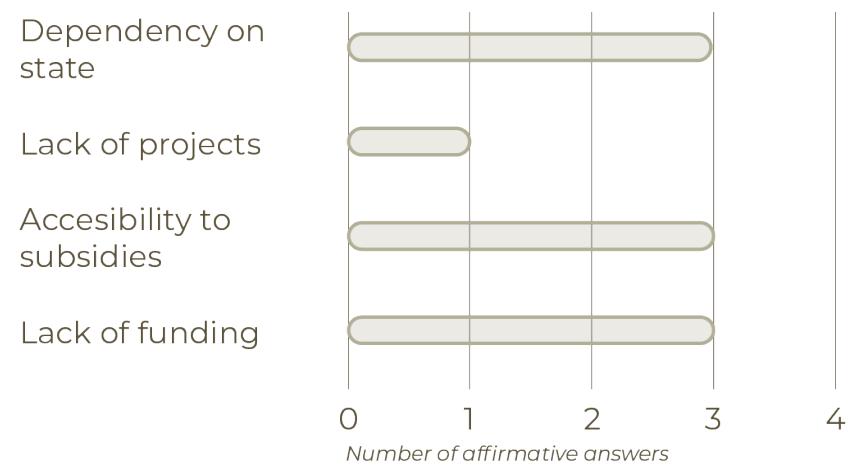

Table 1. Perceived problems within the villages' governance by officials.

Interview analysis: on heritage sites

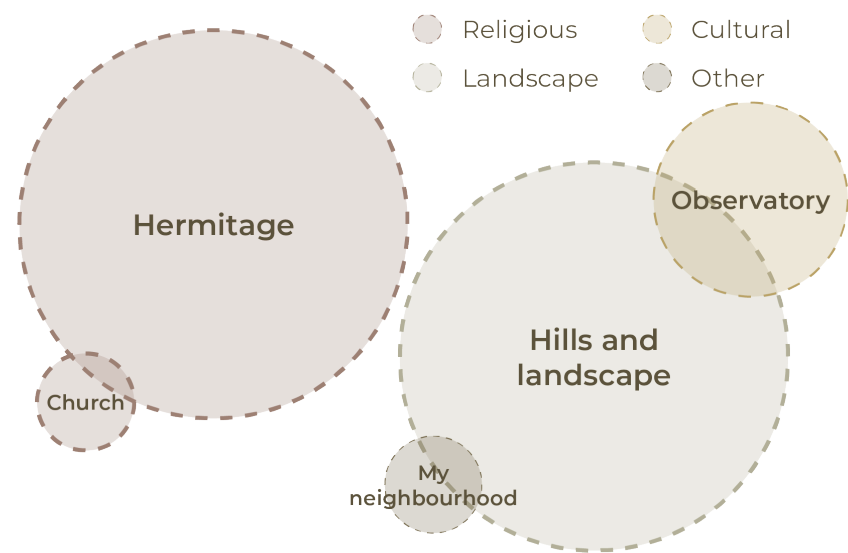

Table 3. Important heritage sites, based on the coded information from interviews.

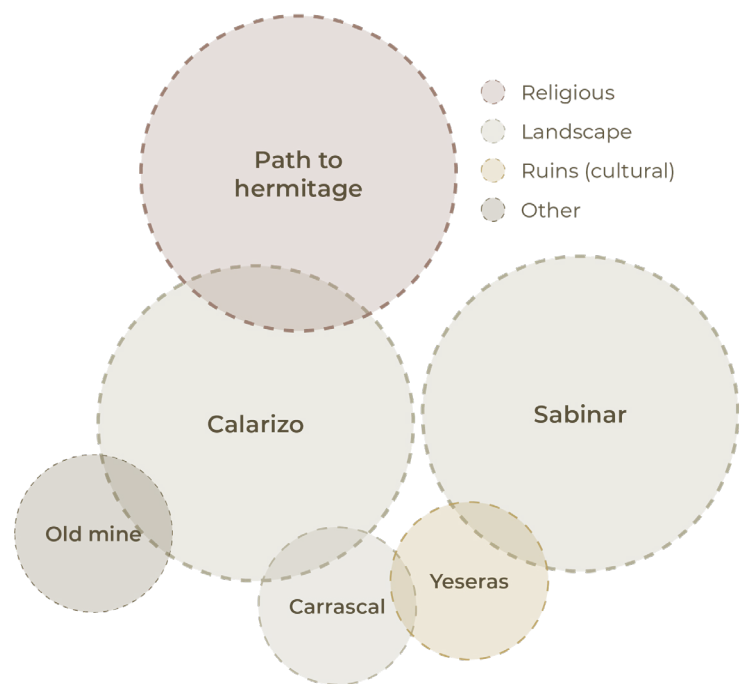

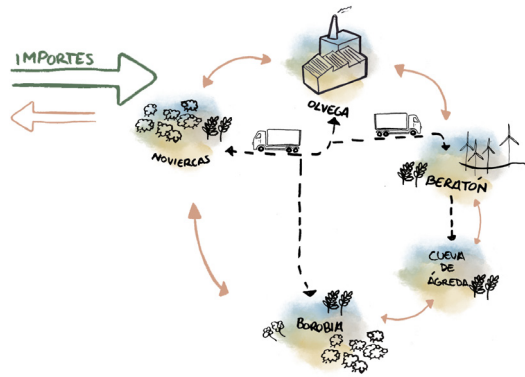

Table 4. Important natural heritage sites, based on the coded information from interviews.

Toolkit for the explored location

Polycentric distribution
of commercial goods

Improving housing and
infrastructure conditions

Bringing the natural
heritage closer to
the residents

Ecotourism as
revalorisation of resources

Polycentric management
of cultural heritage

Fieldwork conclusion: Actions per strategy, applied in Borobia.

POLYCENTRIC MANAGEMENT OF **CULTURAL HERITAGE** (1.4)

Concrete (design) actions:

△●□ Local municipality association for preservation and management of local heritage sites

(common efforts, local heritage is not only part of 1 municipality)

▲○■ 'Initiatives that stay' (for non tangible heritage): bring old traditions back, focus on:

- Traditional music (festivities, contests, exhibitions)
- Traditional practices (fairs, planned activities and exhibitions)
- Language (writing in murals, journals)
- History (fairs, festivals, photography exhibitions)
- Customs (festivities, fairs)

Type of intervention:

- Spatial intervention
- Strategic planning/logistics
- ▲ Community action

6. Strategy and design

Toolkit for the explored location

Ecotourism

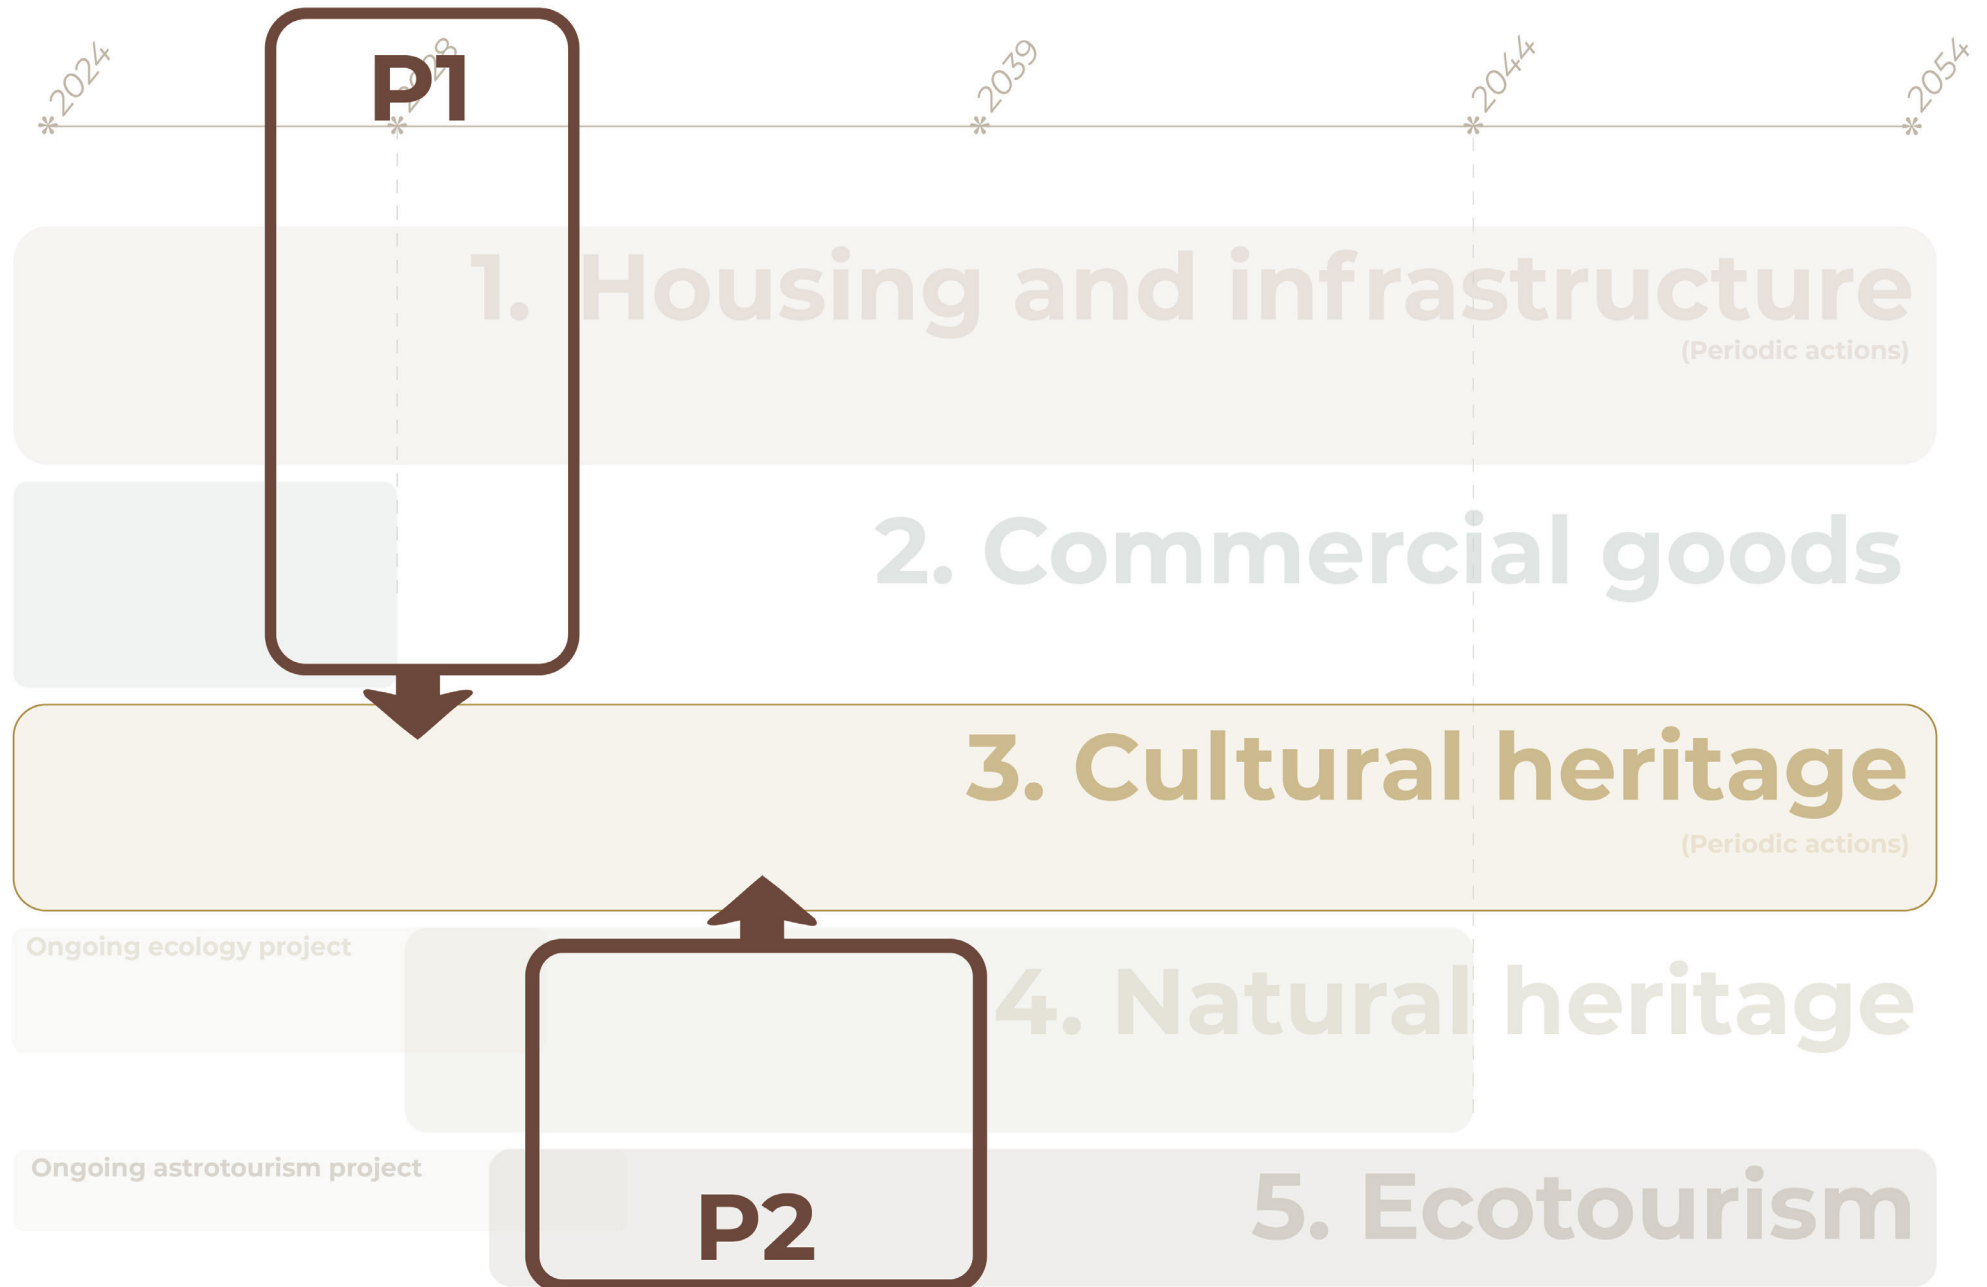

Research sub-question 3

How can the preservation of **cultural and ecological heritage** work as a **driver** for a post-growth economy in the Spanish rural context?

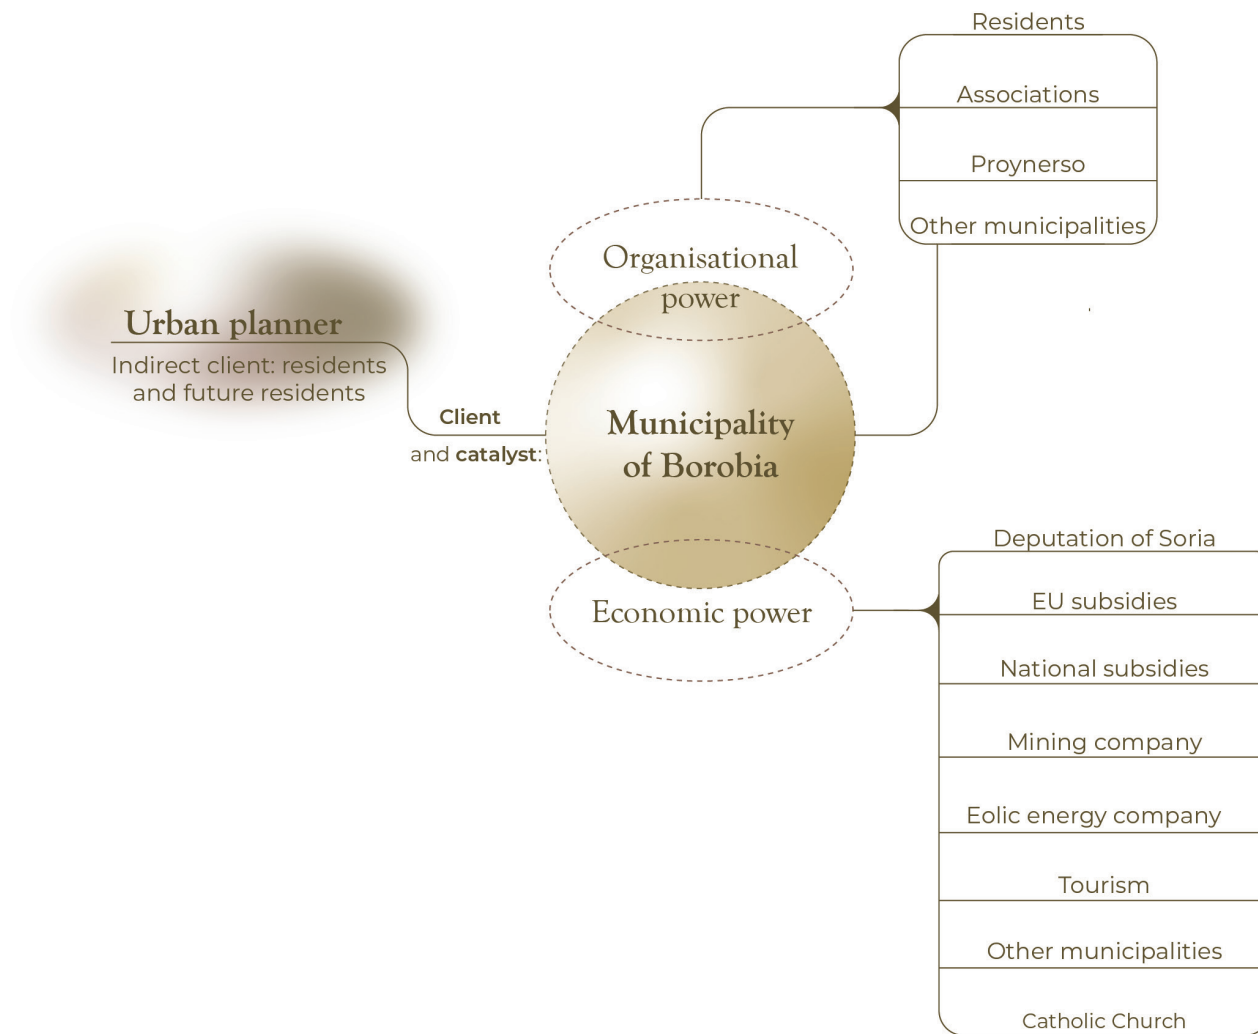

Timeline of strategies

Projects

Stakeholders

Project 1: Housing, infrastructure and commercial goods

Fig. 9 Plan view of the village of Borobia with interventions

Fig. 10 Socializing in the village.

Project 1: Guidelines

Fig. 11 Plan view of the repurposed site.

Fig. 12 Existing unused ruin site in the village of Borobia.

Project 1: Guidelines

Fig. 13 Space to place plants or introduce orchards for the neighbours..

Project 1: Guidelines

Fig. 14 Reuse materials from ruins to make furniture, remodel façades or rebuild structures.

Project 1: Illustration

Fig. 15 Existing ruin site, on sale.

Project 1: Illustration

1. Remaining wall from ruin: reusing existing structures.
2. Space for the residents to spontaneously organize the space with plants, seats etc.
3. Existing boulders: keep original elevations and elements of the landscape.
4. Remodelled building for community: when possible, reuse the debris from the ruins for other constructions/elements.
5. Community garden: space managed by the residents to place plants, orchards...
6. Green façade.
7. Remodelled façade, entrances of the building facing the community space when possible.
8. Furniture made out of reused materials for residents to gather and socialize

Project 1: Guidelines

Fig. 16 Existing old façade in the village of Borobia

Fig. 17 Illustration of renovated façade

Project 1: Guidelines

Fig. 18 Traditional balconies and details around the windows.

Fig. 19 Materiality of window casing, 62 / 77 roof and edges.

Project 1: Guidelines

Fig. 20 Materiality of plinth

WFig. 21 Avoid stairs, window size.

Project 2: Nature and Ecotourism

1. Orchards by the water
2. Recreation area by the water: rapids
3. Forrest area
4. Route to hermitage and mine lagoon
5. Route to river canyon and lagoons
6. Ruins and old cemetery
7. Route to Roman roads
8. Route to the 'Yeseras' and mountain Carrascal

-  Orchards by the water
-  Forrest area
-  River
-  Walking/hiking route
-  River basin
-  Existing community green space
-  New community green space

Project 2: Illustration

Both projects relate to the heritage of Borobia through strengthening its identity (rebellishing and refurbishing public space through traditional architecture) and increasing the value and accessibility of its nature and ecology.

7. Conclusion

Conclusions

1. Sustainable development, community action and ecology management.

2. Involve provincial and national institutions.

3. Collaborative approach in planning and a bottom-up approach in governance.

4. Balance heritage protection with broader community needs.

5. Applicability and inspiration

Thank you!

Transferability

1. Research methods: theory into practice

2. Systematic approach

literature review

testing with on-site
interviews

concluding

apply through
design

3. Applications elsewhere

4. Inspiration for planners

Next steps

1. BK Exhibition

2. Present to the municipality and residents of Borobia
