## LARGE

In this phase, which indicates the first connections with nearby places around the water, the design of a small space next to the water invites the users to be more involved with the watersystem. Some creative areas or vacant industrial areas are directly connected to the water. The placement of small scaffolds make a visual and transport connection with these places. The bridge control house is still the central point.

- Elements
- Scaffolds
  - Small stairs
  - Sitting space

EVENTS @ WATERWAY

The implemented acupunctural elements and the surrounding valuable places have been created the opportunity to grow as a certain area, wearing a specific identity and thematic, and with this the awareness of the citizens close to the water is created. Also other places that do not contain a S or M, can be made accessible with L. The communities handle in aggrerate.

- Elements
- Events
  - Small ferries going between two destinations

XL

### EXTRA LARGE

The next step brings the water system into an higher level. It does emphasize on the fact that the little places have grown their own communities and identities, but with the shared properties as the bridge houses and the water system, these places find a connection to each other. The small networks that grew around these places, connect with each other now. Its system is emphasized. Different stake holders get same interests.

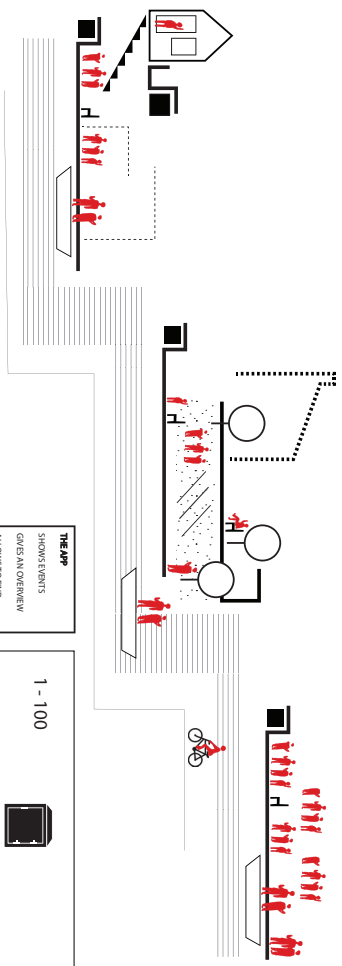

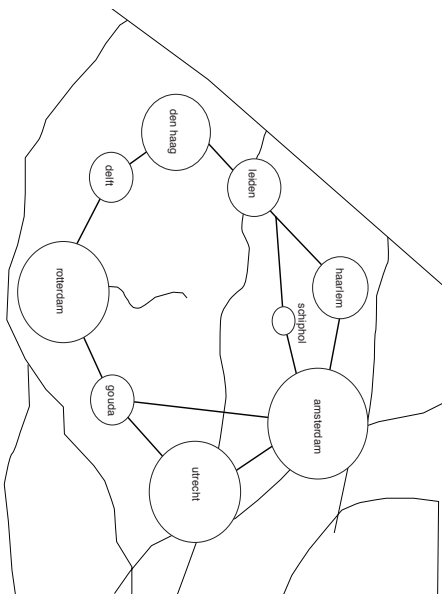

- Elements
- Bicycle paths
  - Ferries
  - Better roads
  - Water front renewal
  - Publicness of the waterfront
  - Intercity relations

The system is brought back on the map and even works as an social soft network within the metropolitan city. The city found, with the help of its people, it roots back. Though in another form, the awareness for the importance and potential of the water system has brought to light.

- Elements
- Bicycle paths
  - Ferries
  - Better roads
  - Water front renewal
  - Publicness of the waterfront
  - Intercity relations
  - Agriculture
  - Water cleaning
  - Water management awareness
  - Recreation in the city
