

INTERFACE EXPLANATION MEAL MATCHERS

This poster explains the interface design of the user application. The aim of the poster is to explain what to expect when using the application and clarifies some design choices.

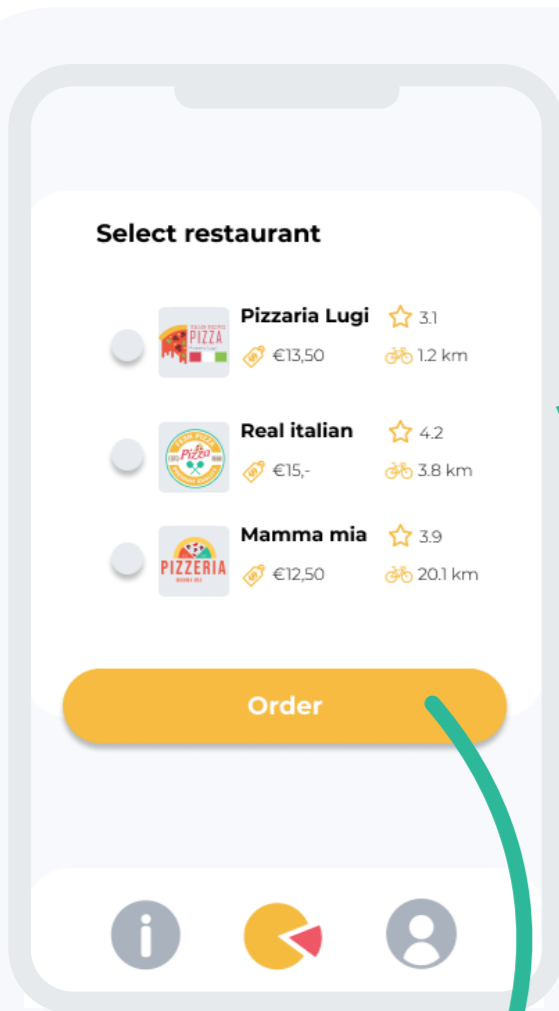

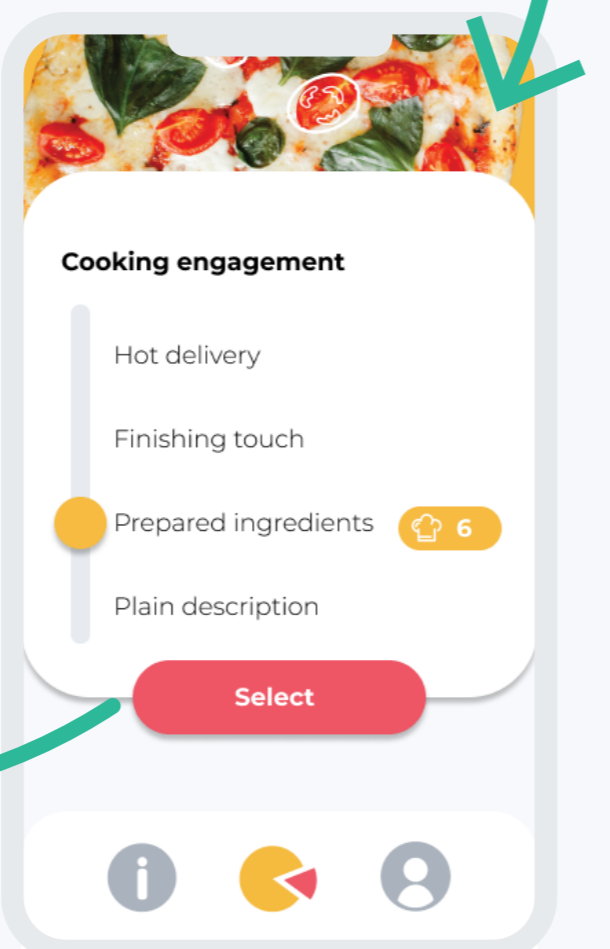

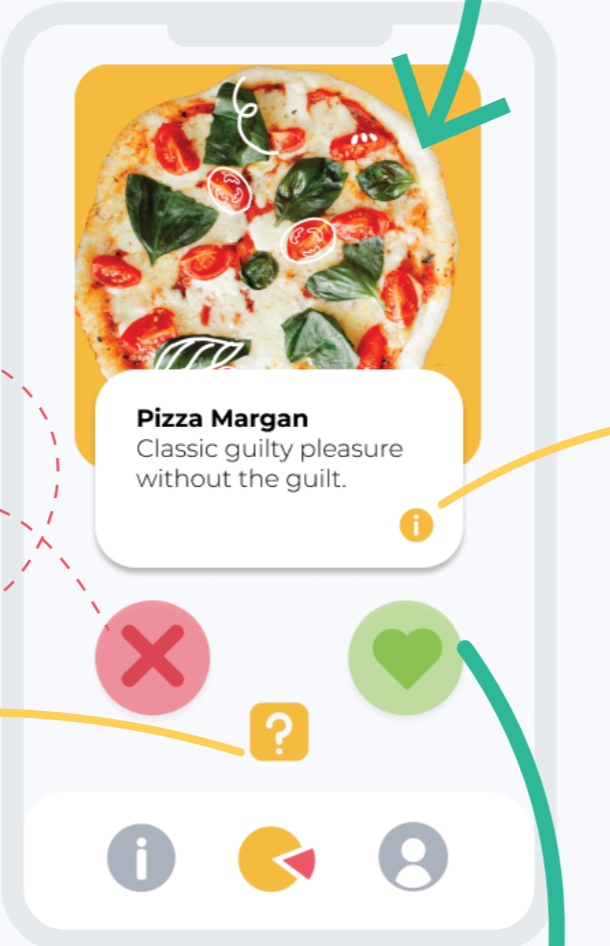

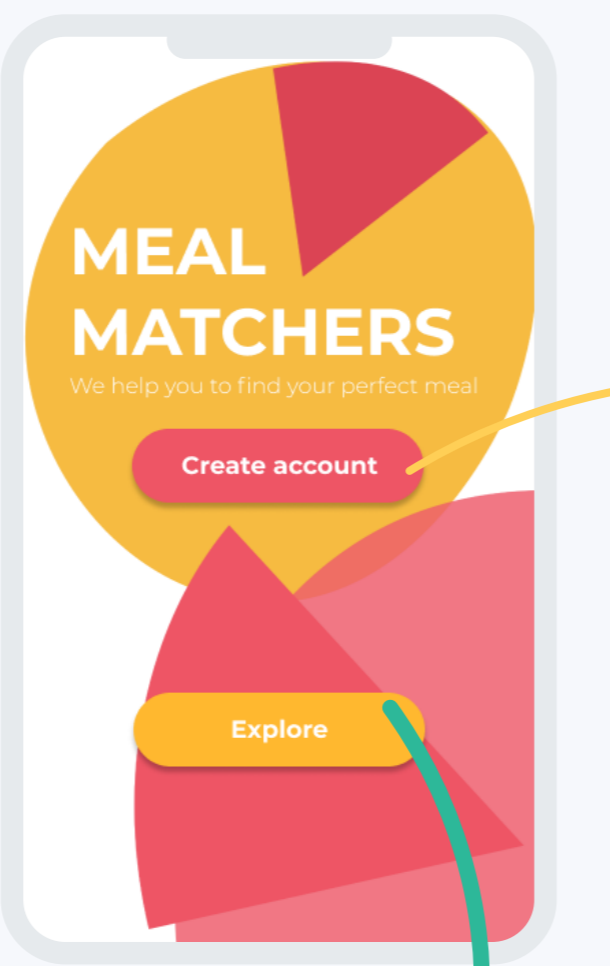

Try this app!

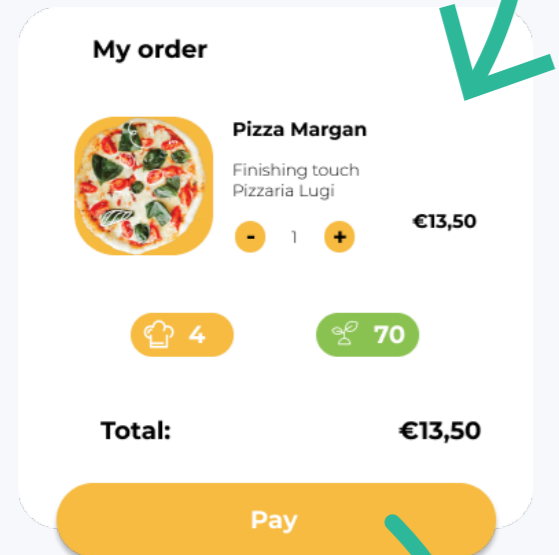

Swipe right or left to make a match with the suggested meals.

BLIND DATE
Trust Meal Matchers and let them pick a meal based on your profile. Take the risk and be surprised.

Select the level of the cooking and collect cooking points. Users can simplify the cooking process and choose the amount of time put in the cooking process.

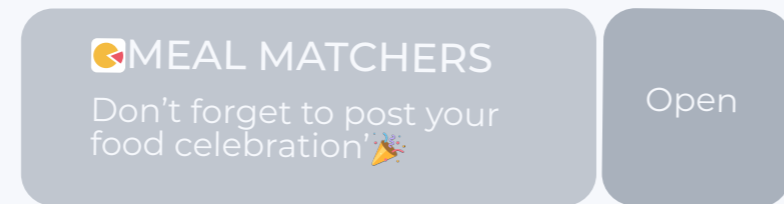

Finalise the order and choose a restaurant to deliver your meal. Pay for the order and wait for the food to arrive.

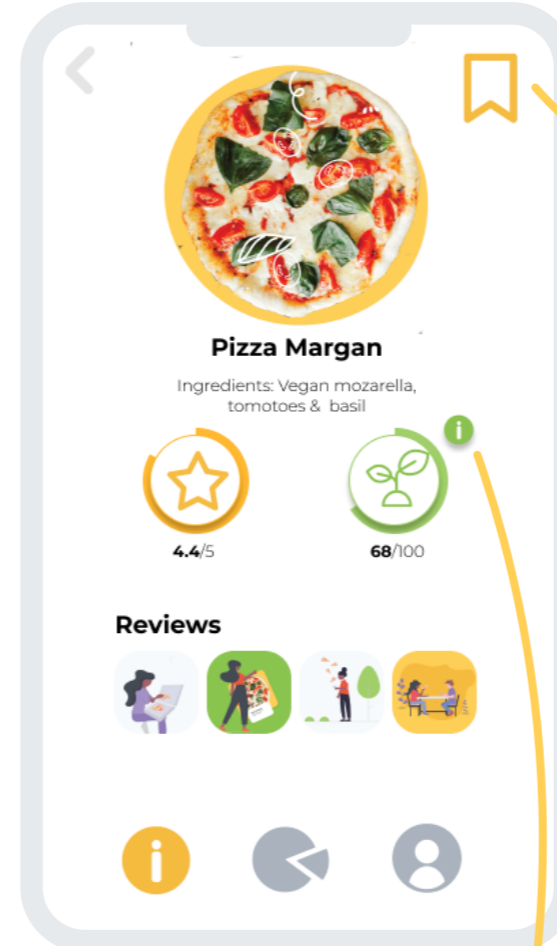

The personal page captures your saved meals, performance badges and your gallery.

Open the notification and capture your food celebration. Choose whether you want to save it on your private or public account.

NOTIFICATION

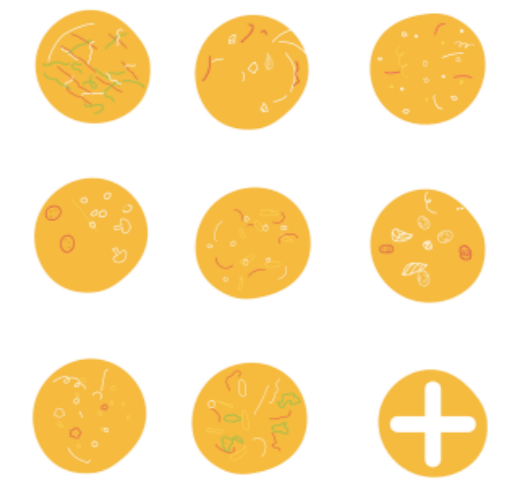

Create your tasting profile by filling in the questionnaire. Your taste profile will be used to suggest the right matches.

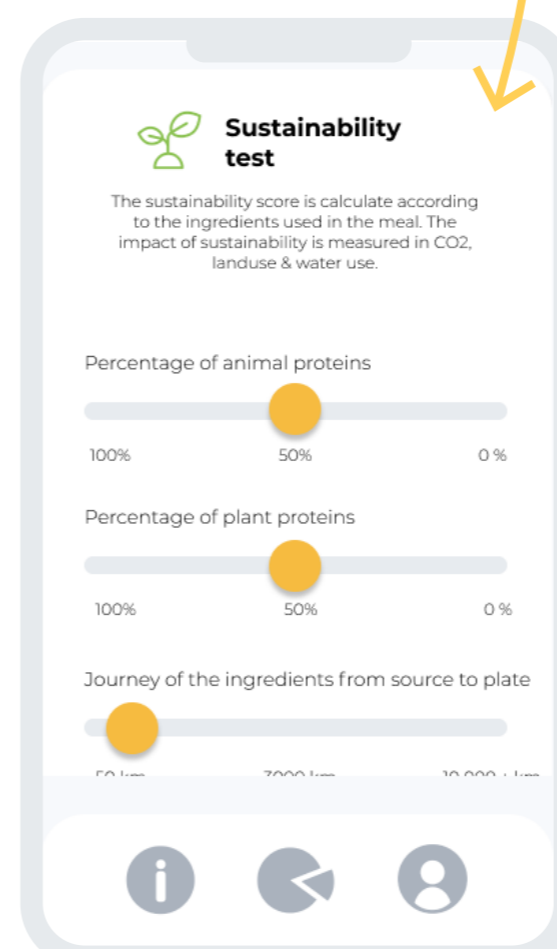

Check the details about your meal. See reviews of other users and check the sustainability score.

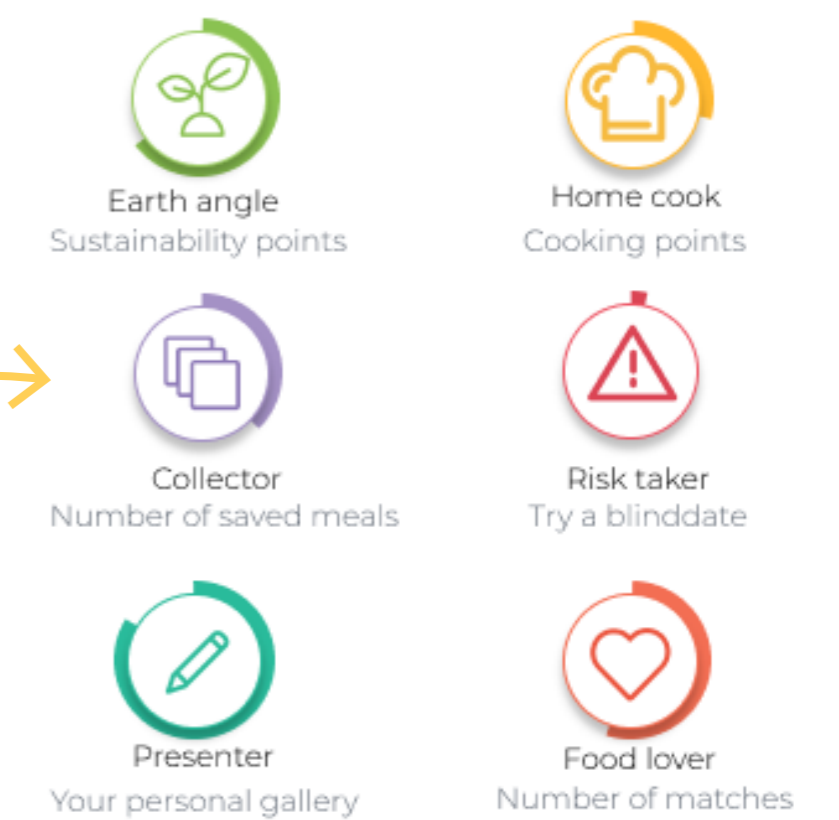

SAVED MEALS
Save your meals for later and collect the previous matches.

Find out how Meal Matchers classify the sustainability scores for a meal.

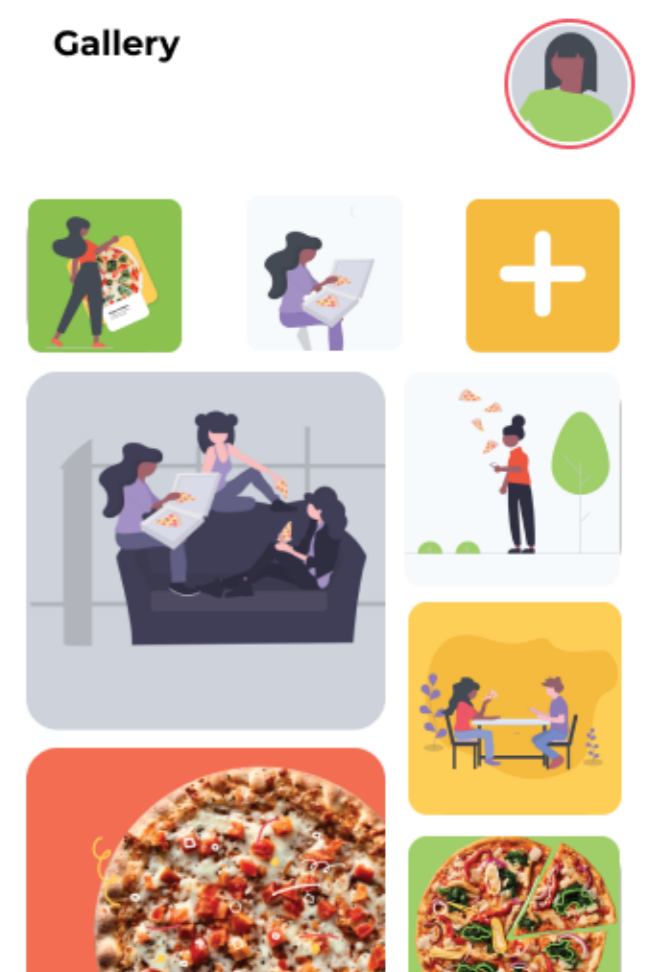

BADGES
The badges illustrate how you are doing. With every match you improve your performance.

Meal Matchers helps consumers to seek the ideal match. Feel inspired and taste the difference.

GALLERY

Save food celebrations. Store the moment and make it into a valuable memory.

TIME TO EAT
Enjoy the experience and the delicious food.
