"DE COUNTOUR TUSSEN STAD EN CAND IS WIET CANGER SCHERP, MAAR NEVEUS" DE STAD VERANDERT VAN AGGREGATIETOESTAND DE VITDIJENDE VERSTEDECIJKING SCAAT NIET LANGER NEER IN VASTE WORM, IS ZELFS NIET ULDEIBAAR [...], MAAR GASYDEMIGEN WAAIT ALS EEN ILE WOLK OVER REGIO'S WAAR LE BUIFT HANGEN ALS EEN DUNNE STEDELIKE NEUEL."

KLAART LANGZAAM OP

In 2003 publiceerde AGORA een nummer gewijd aan de 'nevelstad'. Dertien jaar later gaat de nevelstad nog steeds vlot over de tongen als karakterisering van de Vlaamse ruimtelijke conditie. In dit artikel reflecteert Michiel Dehaene, die samen met Maarten Loopmans de themaredactie van het nevelstadnummer vormde, over de oorspronkelijke inzet van het concept en ontwikkeling sindsdien.

Waar moet je opdagen om de ruimtelijke orde in Vlaanderen te begrijpen? Zijn het de eindeloze linten die je van dorp naar dorp leiden en de indruk van volledige verstedelijking bevestigen? Zijn het de verkavelingen waarin de modale Vlaming via een eigen stulije grond een ticket in de welvaartsverdeling kreeg toebedeeld en zijn of haar individuele woonwensen kon uitleven? Moet je op een regenachtige ochtend in de file richting Brussel staan om te begriipen hoe in de verspreide stad het leven altiid elders plaatsvindt en ledereen voortdurend onderweg is? Is het dat oude weinig gebruikte IC stationnetje waar de lange voorgeschiedenis van de arbeidspendel zich toont? Zijn het de steenwegen die de sleutel vormen tot de Vlaamse verstedelijking, met de sindeloze reeks autodealers, tuincentra, doe-het-zelfzaken en leveranciers van verlichting, vloerbekleding, keukens, badkamers en zwembaden, kortom van alle consumptiegoederen waar het verspreide wonen op drijft? Of is het de villawijk waar de laatste voorjaarstorm opnieuw tot wateroverlast leidde en de burgemeester zijn laarzen aantrok om voor de camera's van de lokale televisie meteen op te roegen om de storm als uitzonderlijke ramp te erkennen? Of moet je op een jaagpad langs een of ander verloren kanaal zijn, waar in het weekend het groepje door de lokale garage gesponsorde wielertoeristen met hoge snelheid en licht geïmteerd de vele zondagsfietsers voorbij flitsen om wat verderop in hetzelfde café te eindigen? Of kan je beter kiezen voor de succesvolle koekjesfabriek die een heel dorp overschaduwt en haar producten. over landelijke wegen naar de hele wereld exporteert? De versoreide verstedelijking is omnipresent in Vlaanderen maar net daardoor niet zo makkelijk te vatten.

Amnestie voor de nevelstad

AGDRA's nevelstadnummer uit 2003 was een poging om dat deel van het territorium dat doorgaans niet als stad gelezen wordt toch in die termen te denken. Het nummer liftte mee op een ontluikend discours over plaatsloze vormen van stedelijkheid die in de netwerkstad schijnbaar overal aanwezig waren. De notie nevelstad is de vertaling van het Italiaanse 'otta diffusá' dat door Francesco Indovina werd gemunt om de uitgezaaide mix van wonen en werken, kenmerkend voor grote delen van de Veneto en de ruimere Po-vlakte, te beschrijven (zie het volgende artikel van Hessam Khorasani Zadeh). Via enkele Nederlandse en Vlaamse auteurs waaide dit begrip uit Italië over zonder dat men zich aan het werk. van Indovina gebonden voelde. De betekenis van het begrip werkte vooral metaforisch. De contour tussen stad en land is niet langer scherp maar nevelig. De stad verandert van aggregatietoestand. De uitdijende verstedelijking slaat niet langer neer in vaste vorm, is zelfs niet vloeibaar (space of flows), maar gasvormig en waait als een ijle wolk over hele regio's waar ze blijft hangen als een dunne. stedelijke nevel.

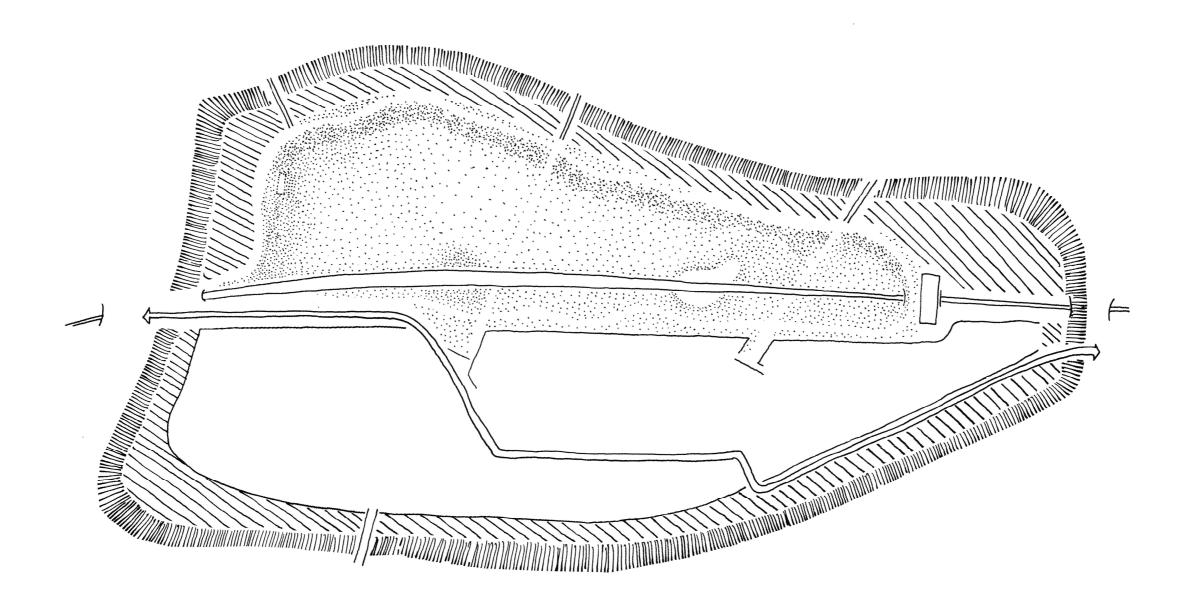

De inzet van de nevelstaddiscussie was vooral beschrijvend. De inspanning om de verspreide stad te verbeelden was collectief. Elke taalgroep en bijhorende context produceerde zijn eigen metaforen: Neutelings' 'tapijtmetropool', Chalas en Dubois-Taine's 'wife émergente', Mantziaris interpretatie van Schwarz' 'wile paysage', Sieverts' 'Zwisschenstadt', etc. Deze pefeningen wezen eerst en vooral op een tekort aan taal voor wat als een. nieuw fenomeen werd beschouwd. Wat voorheen vooral als een onvoldragen soort stedelijkheid bekend stond die zich typisch
