Project Description	
<b>Graduation Project</b>	<p>The project looks into the city of DKI Jakarta. The city could be described as a Kota Kampung, a city mixed out of global and local elements. The city is on the one hand orienting itself to a global market (kota) but has on the other hand a local culture (the kampungs), which takes up roughly 70% of the city. Kota cannot exist without kampung and visa versa. But modernization and expansion of the kota has put the Kampung under pressure, and the kampungs are in a desperate need of a new form and vision. This particular tension is what interests us.</p> <p>The graduation project therefore aims to reveal urgencies of both the formal city (kota) and the informal city (kampung) and to find in balance in growing them both on a sustainable way.</p>
<b>Project Title</b>	Jakarta Impian (Dreams for Jakarta)
<b>Location</b>	DKI Jakarta / Kebon Kacang, central Jakarta
<b>Contents</b>	<p>To be able to address the large amount of information we have formed a group of four students. Up until now we have researched the many urgencies of the city. We spend one month in Jakarta in order to gain a better understanding of all the issues at hand. During this visit we researched several areas and we spoke to numerous relevant parties. As a group we have developed a position towards the issue of noticed friction between the global city and the local kampung. In the next phase we will design structures for four different situations that can be found everywhere in the city.</p>
<b>Problem statement</b>	In order to ease the many issues Jakarta is facing, we propose the densify the core of the metropolitan region: Jakarta DKI with 200%.
<b>Research question</b>	How can a densified Jakarta maintain and at the same time upgrade the culture of its Kampungs?

**Design assignment**

How can the potential of the informal economy be seized? This design will aim to create formal space for the informal economy.
