

Preparing for home in the neighbourhood

About the gap between mental health care & society and how the built environment can promote reintegration into society for ex-mental health patients in supportive housing.

P4 presentation
MsCAR3AD110 Designing for Health & Care
TU Delft | June 21st, 2024

Student:
Sander van der Kooij | 4606094

Teachers
Research: Leo Oorschot PhD
Architecture: Kobe Macco
Building technology: Maria Meizoso Aguilar

1 in 4 adults in the Netherlands has experienced psychiatric problems in the past **12** months

27.660 people in supportive housing in 2021, with introduction of the Wlz (CBS, 2021)

35 weeks of waiting time for supportive housing or ambulant care (KPMG, 2018)

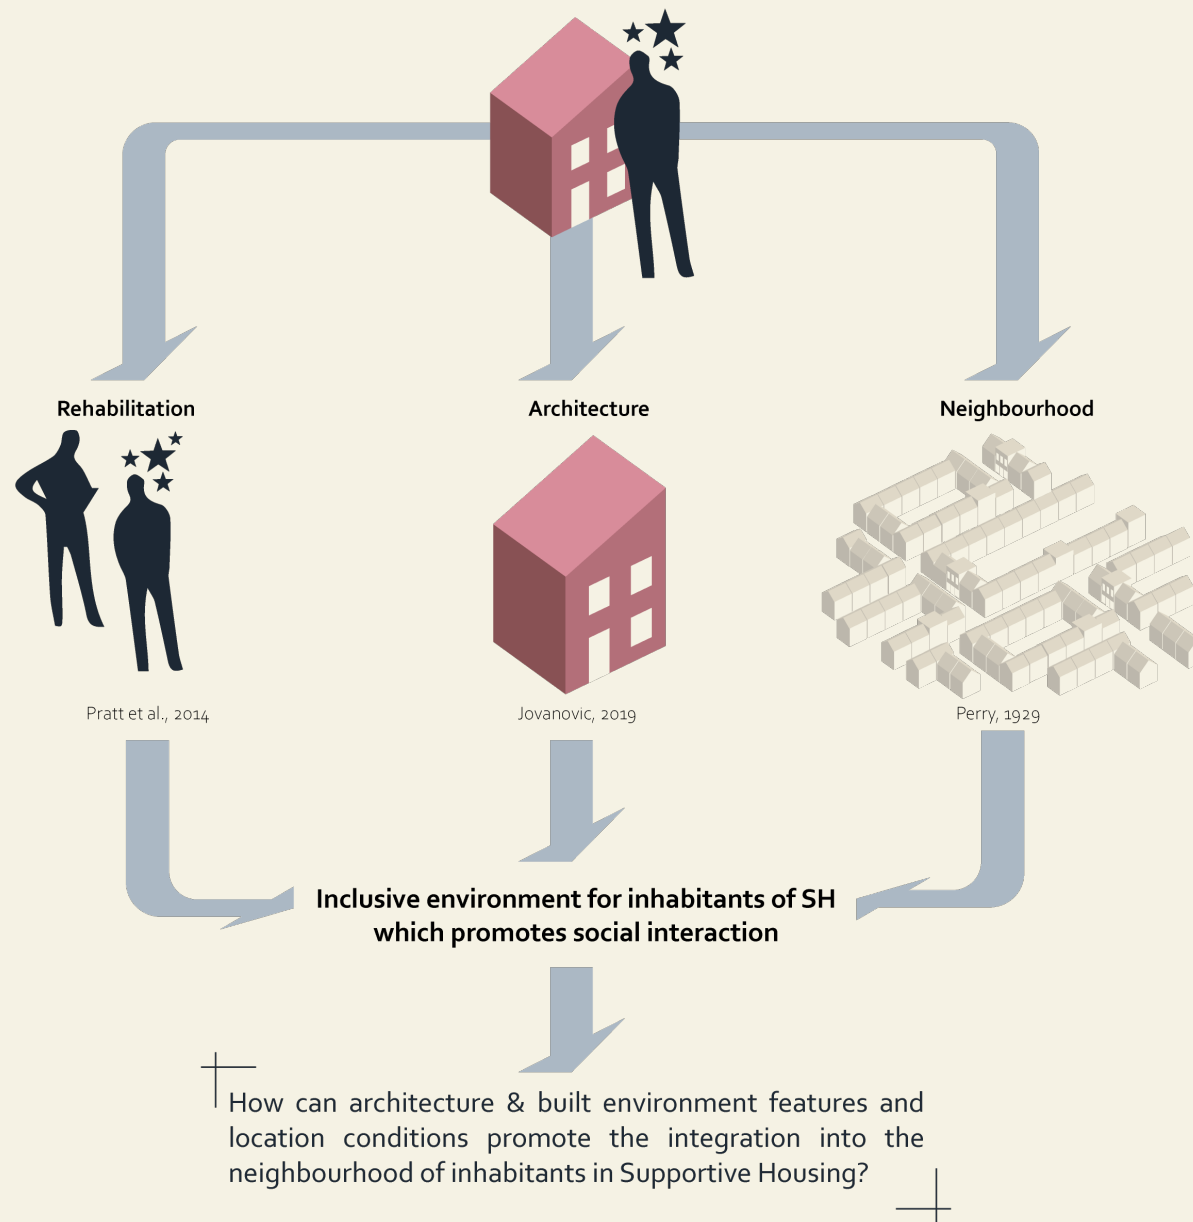

How can architecture & built environment features and location conditions promote the integration into the neighbourhood of inhabitants in Supportive Housing?

Literature research

Interviews: Architect, designer and policy makers

Field research: Interviews, observation and joining in activities

Flexible to changing policies

Nearby amenities

Clusters of max. 10 people

Short hallways

Open floor plan

In control of dwelling

Fit the variety of users

Interaction with the neighbourhood

Accommodations and access for family

Shared private garden, with variety

Availability of leisure

Low-stimuli in dwelling

Fit the recovery process

Clear layout

Amenities for the neighbourhood

Connection to nature

Indoor green

Private outside space

Activate users

Availability of green

Shared, informal spaces for meeting

Access to daylight

Home-like where meeting or vulnerable

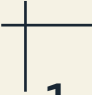

Customizable dwellings

1. Know the users of supportive housing

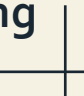

2. Location conditions

3. Building & program

4. Interior & dwelling

1. Know the users of supportive housing

1. Know the users of supportive housing

“Most inhabitants have a SMI, around 85% suffering from psychosis” (interview staff member, 2023)

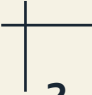

1. Know the users of supportive housing

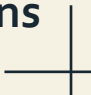

Fit the variety of users

Activate users

2. Location conditions

2. Location conditions

2. Location conditions

Walking to the supermarket with a volunteer and inhabitant

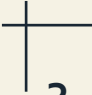

2. Location conditions

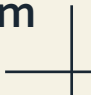

Nearby amenities

Availability of green

3. Building & program

3. Building & program

Main hall

Coffee room

3. Building & program

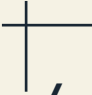

Clusters of max. 10 people

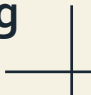

Amenities for the neighbourhood

Shared, informal spaces for meeting

4. Interior & dwelling

4. Interior & dwelling

Main hall with loose furniture

Specialized furniture

Dinner room

Incorporated furniture

(Author., 2023)

4. Interior & dwelling

4. Interior & dwelling

Open floor plan

Availability of leisure

Low-stimuli in dwelling

In control of dwelling

Customizable dwellings
