## 01/ Background- history

-1917  
*Tsarist Russian rule*

1918-1939  
*the first independence period*

1940-1941  
*the Soviet occupation*

1941-1945  
*the Nazi German occupation*

1945-1991  
*the Soviet occupation*

1991-  
*the Republic of Estonia*

Since the beginning of the last century, Estonia has gone through six historical stages. This made me interested in its urban character and identity.

自上世纪初至今，爱沙尼亚经历了六个主要的历史阶段。这使得我在一开始对其城市特征和所谓的民族性很感兴趣。

During the on-site investigation, my team members and I selected a number of nodes we were interested in from the north to the port area and the south to the industrial area for research. Its functions include residential areas, commercial areas and other types.

在现场进行调研的时候，我和我的组员从北至港口区域、南至工业区的区域选取了多个我们感兴趣的节点进行研究。其功能包括住宅区、商业区等多种类型。

## 01/ Background- field research

/1/

analyze the existing problems of public spaces in Tallinn.

分析公共空间的现有问题

/2/

try to extract some specific pattern from it to summarize the urban characteristics of Tallinn.

尝试总结塔林城市的特征

/3/

use these small spaces to discuss the possibility of larger scale urban development.

借由小尺度空间讨论更宏观的城市发展

### *Identity & Hybrid*

The complex historical stages created a mixed urban landscape,  
Talking about a specific "identity" seems very difficult.

复杂的历史阶段造就了混杂的城市景观，  
讨论某种具体的“特征”似乎非常困难。

# Sample Selection

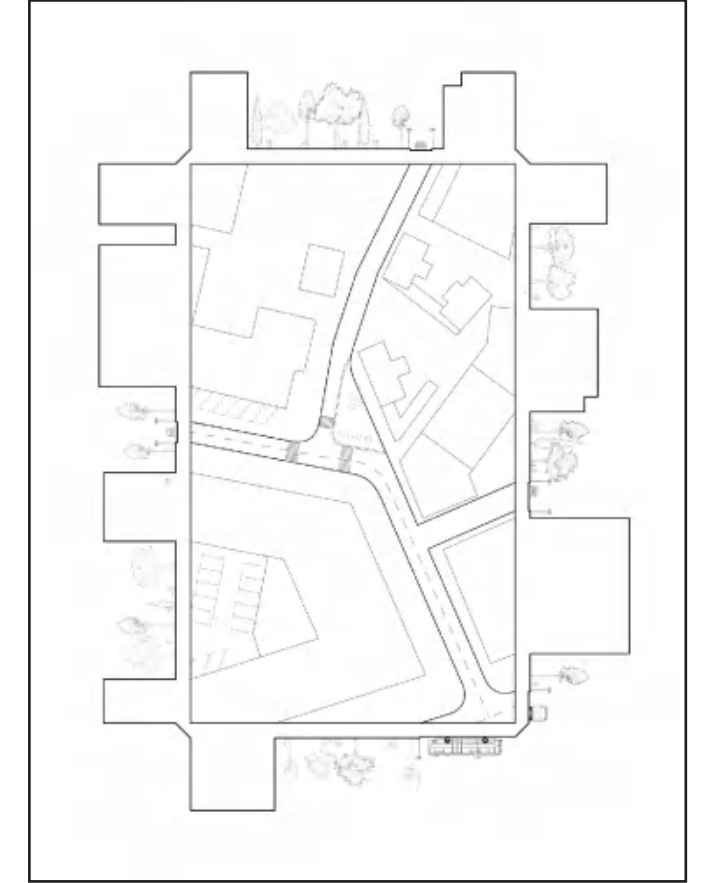

## 样本选取标准

/1/  
Space at the junction of urban streets;  
街道路口空间

/2/  
Small scale scattered space for people  
to carry out activities in the city;  
小尺度社区公共空间

/3/  
Urban Spaces that have not been  
properly developed;  
待发展空间

/4/  
Remote Spaces that have been given  
certain functions but are not used well.  
无人空间

## sample analysis

路口样本分析

/DIS-organization/  
无组织

/DIS-function/  
无功能

/DIS-connection/  
无联系

What is the character of urban space?  
Is it possible to generalize some kind of summative urban design principle?

城市空间的特征究竟是什么？  
是否有可能通过归纳出某种总结性的城市设计原则？

## *Urban activities*

### 城市中的活动

Jacobs, J. (1992). *The death and life of great american cities* (1st Vintage books). Vintage Books.

Gehl, J., & Koch, J. (2011). *Life between buildings : using public space*. Island Press.

Space is defined by the activities of the people in it, and is characterized by certain events that occur over and over again. The characteristics between buildings change as the social situation changes, but the basic principles and quality standards used when working for human quality in the public sphere have proven to be very stable.

空间是由人们在其中的活动所定义的，并以反复发生的某些事件为特征。建筑之间的特征随着社会形势的变化而变化，但在公共领域为人类质量工作时所使用的基本原则和质量标准已被证明是非常稳定的。

## *The urban pattern language*

城市中的模式语汇

Alexander, C. (1979). *The timeless way of building* (Ser. Center for environmental structure series, v. 1). Oxford University Press.

Alexander, C., Ishikawa, S., & Silverstein, M. (1977). *A pattern language : towns, buildings, construction*. Oxford University Press.

All architectural actions are controlled to some degree by a pattern language, and the rich and complex order of a city arises from thousands of creative acts. Once we have a common pattern language in cities, we can bring cities and buildings to life with the most ordinary behaviors.

Language is like a genetic system, giving small actions the power to form a whole.

所有的建筑行为都受某种程度上的模式语汇控制，一个城市丰富而复杂的秩序是从成千上万的创造性行为中产生出来的。一旦我们在城市中有了一种共同的模式语汇，我们就能用最平常的行为使城市和建筑富有生机。语汇在其中如同遗传系统，赋予诸多小的行为形成整体的力量。

I decided to start with a certain type of space distributed in every corner of the city to find a potential place to explore the characteristics of urban public space.

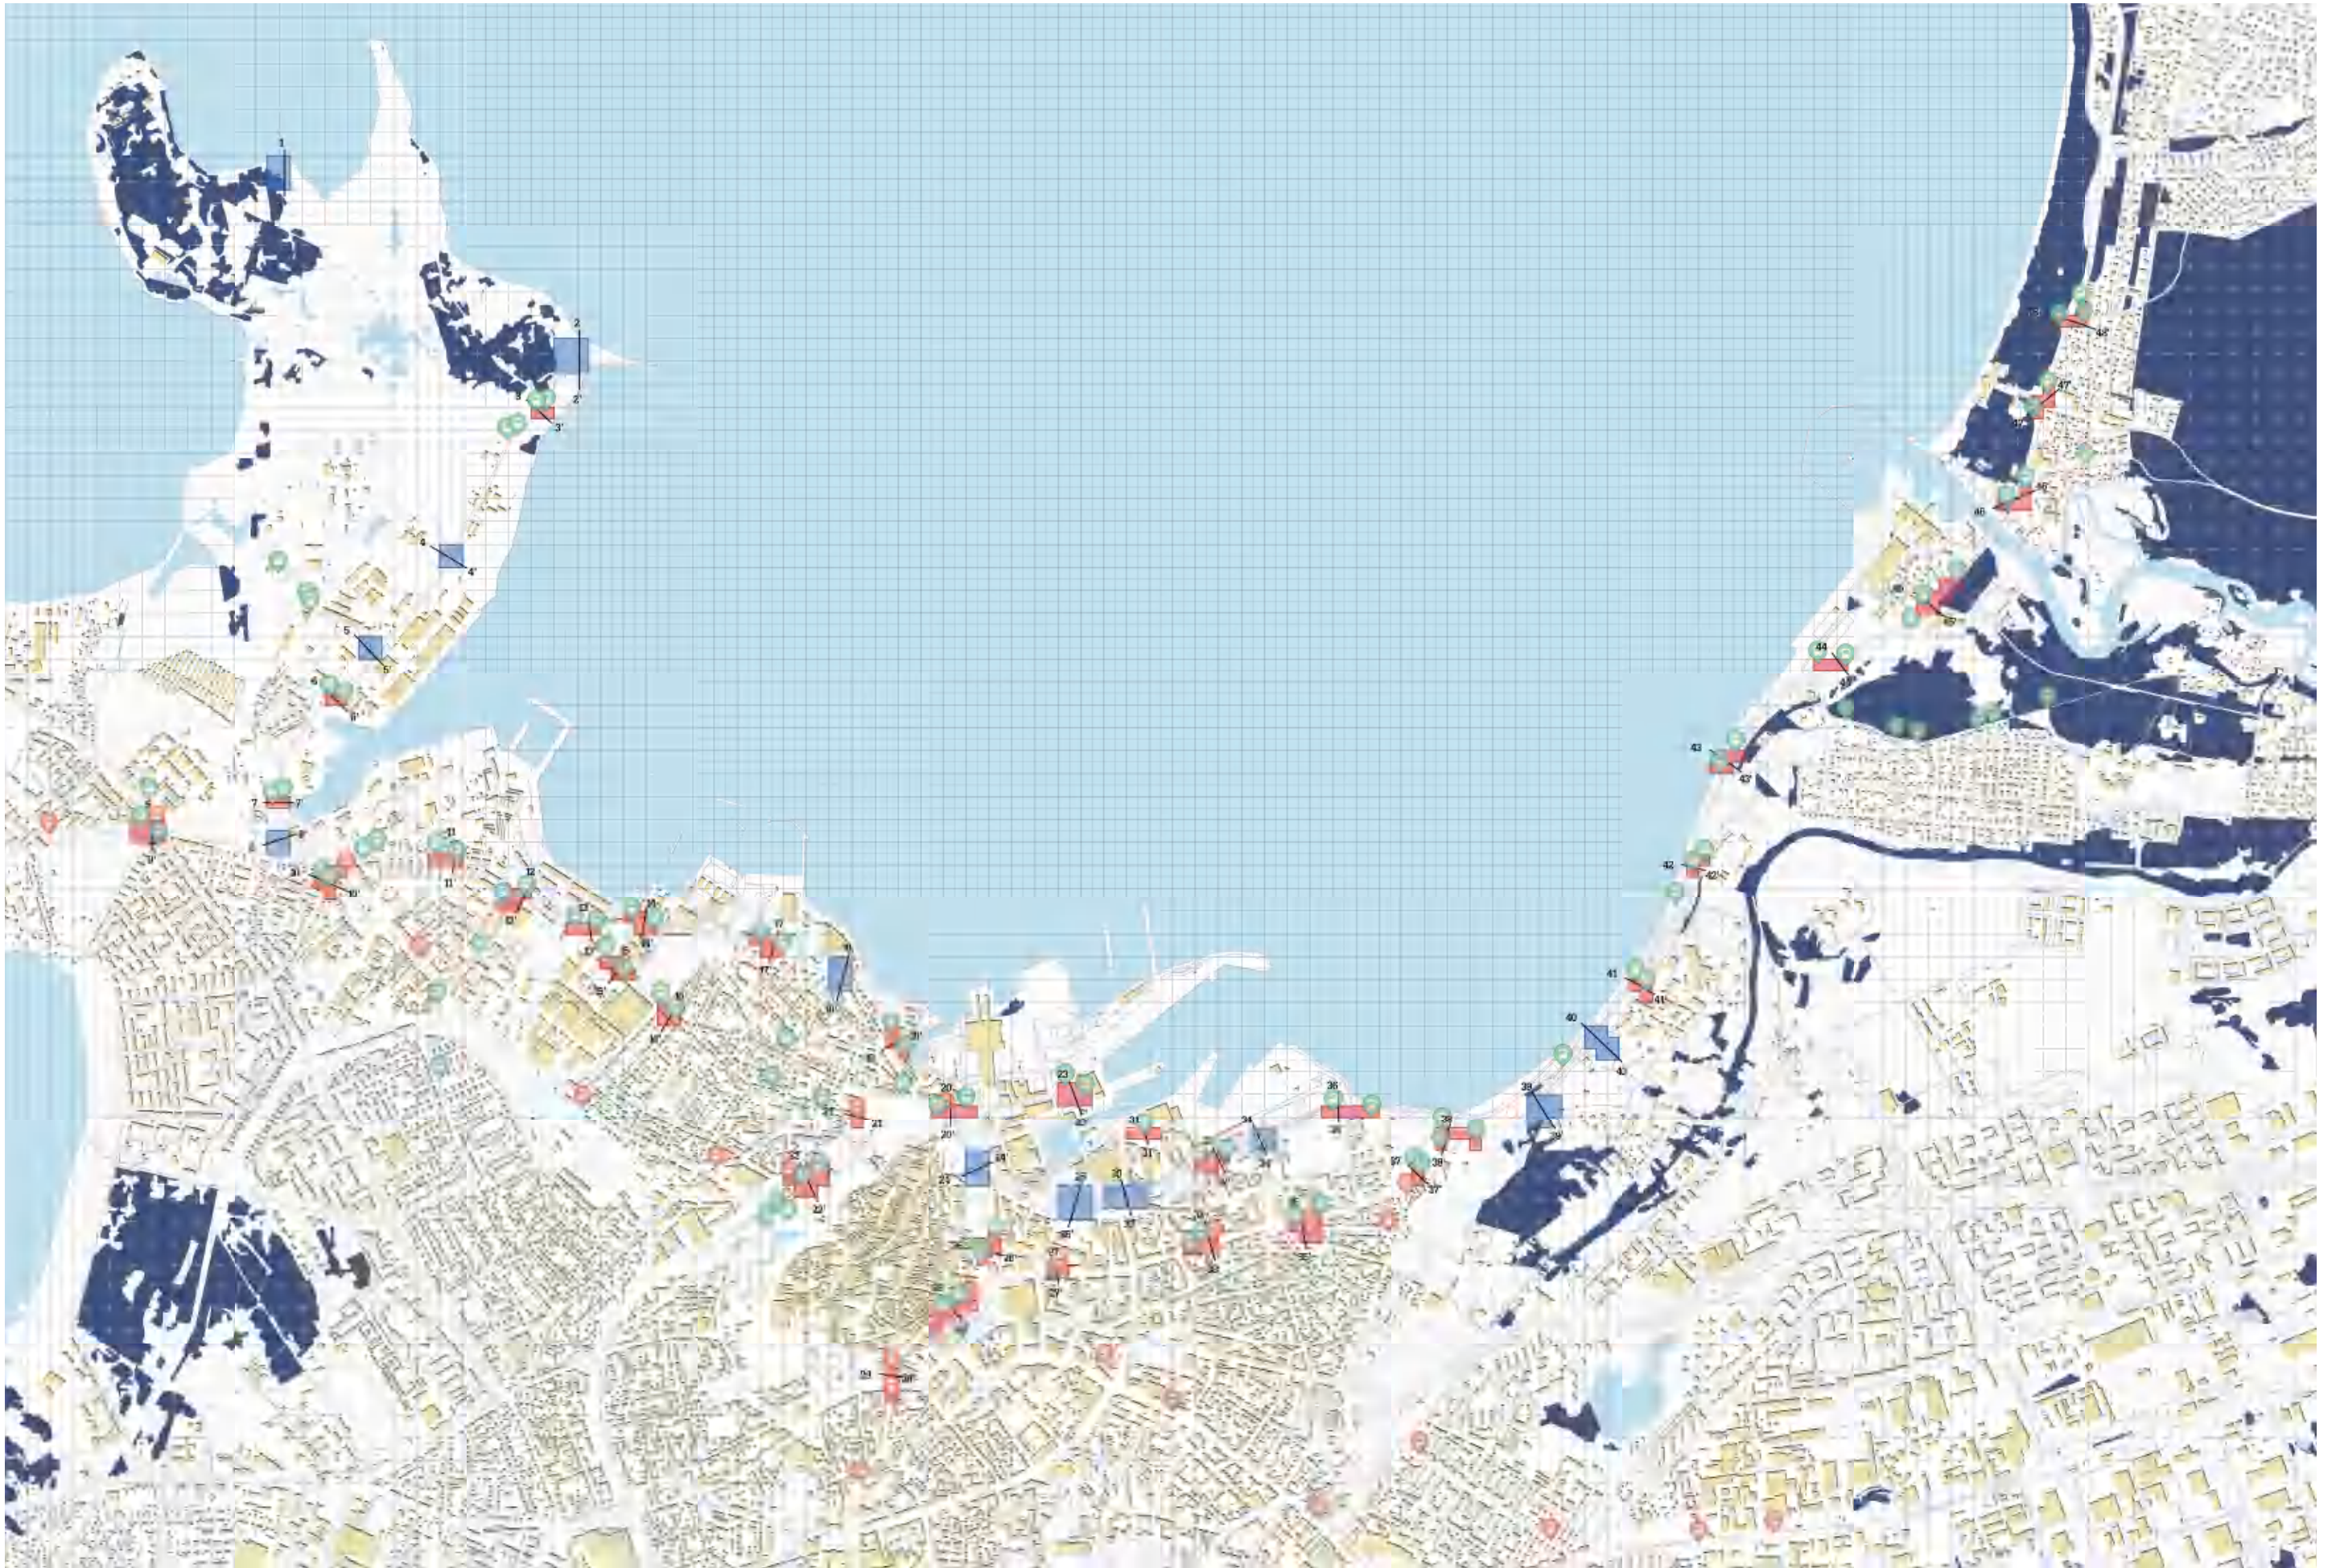

我决定从某种分布于城市各个角落的空间类型入手，寻找探讨城市公共空间特征的潜在场所。

the **bus/tram stops/stations.**

我选择了城市交通站点。

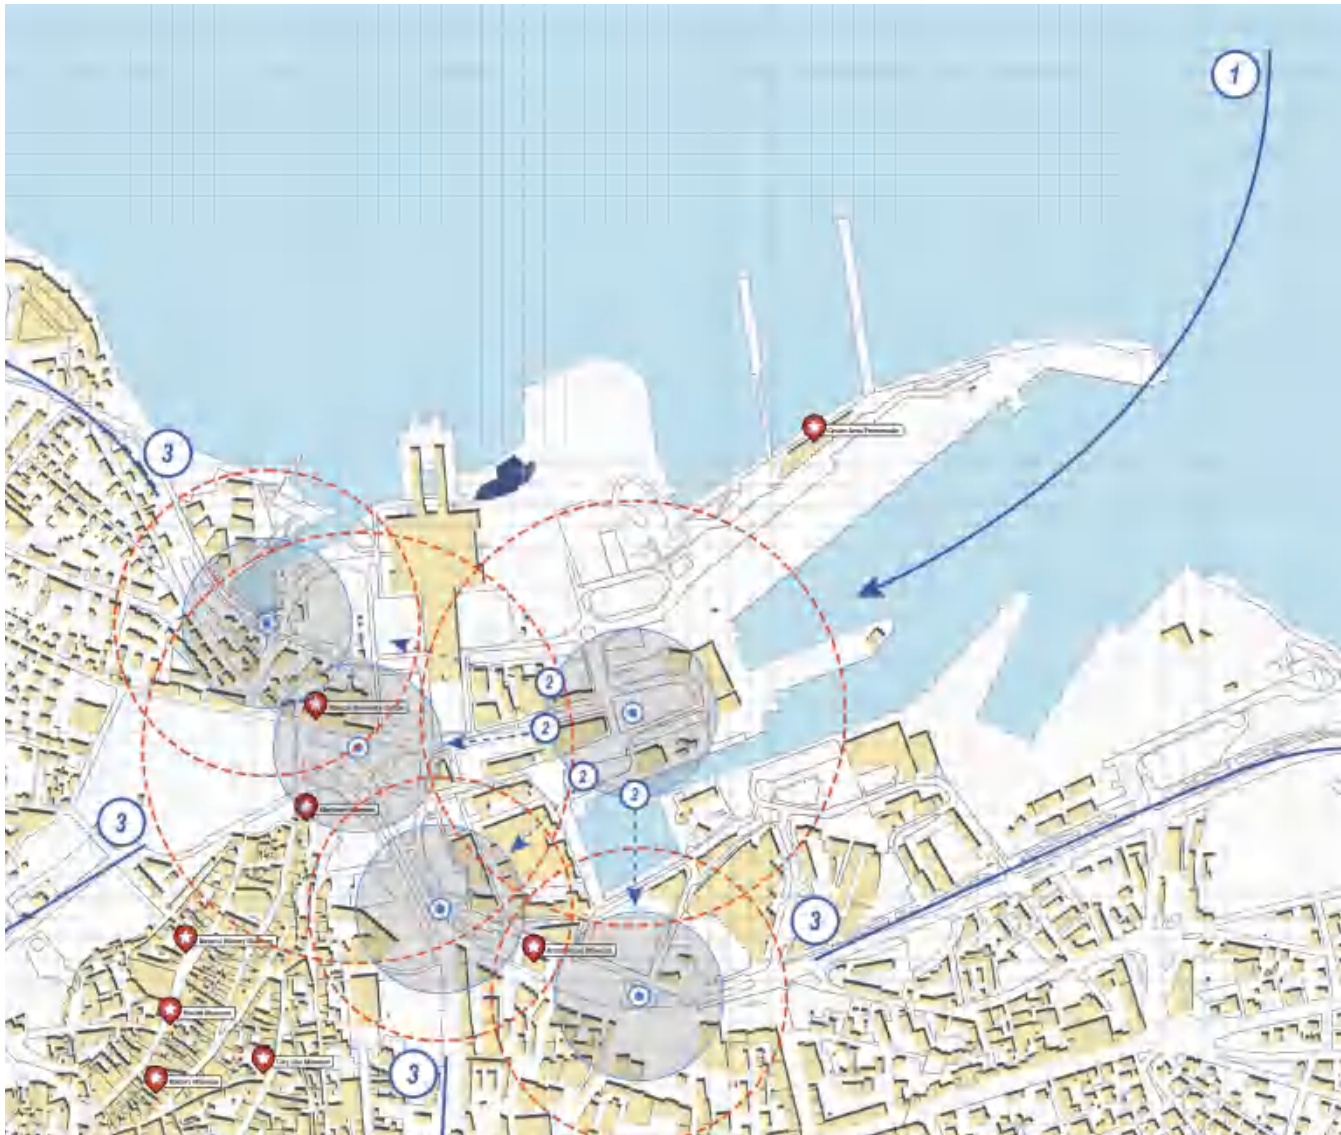

我主要分析了塔林沿海岸的所有公共交通站点及其周边空间。

## 01/ Background- research plan

I made a section analysis of these 48 sites, focusing on the scale relationship between the existing public transportation routes and the surrounding Spaces. Five potential sites were selected. These five sites are all near the harbor terminal, and I hope to use them to help people enter the city from the harbor.

并绘制剖面分析其所在位置的空间联系。  
并从中挑选出了五个潜在的场地。

01/ Background- research plan

Terminal A

Roterman

Arch Museum

Linnahall

Fish Market

**potential sites**  
潜在场地

## the block between the **Architectural Museum** and **rotermann**

Tram station.  
Near to the Old Town.

Architecture Museum.  
Rotermann Quarter.  
Facing Harbor Area.

Bus station without a nice  
platform.

最终我关注到了位于老城东侧电车站和 Rotermann 北部公交站之间的区域。

- 1- Near the Harbor area
- 2- The public transport routes
- 3- Existing old limestone walls

这块区域临近港口、盘踞交通节点，并是塔林老石灰岩仓库建筑旧址，场地现存石灰岩墙体。

- 1- Characteristics of good urban public space.
- 2- Help people feel the original urban context.
- 3- Influence the development of a wider area and even the whole city.

计划利用这块场地讨论良好城市公共空间的特征，并思考如何帮助人们体验城市原有的建筑文脉。  
以期通过一定区域内的设计，影响更大范围乃至整个城市的发展。

# 02/ Project

项目

- 2-1 Urban Strategy  
策略
- 2-2 Public Space  
功能
- 2-3 Building Structure  
结构
- 2-4 People's Experience  
活动

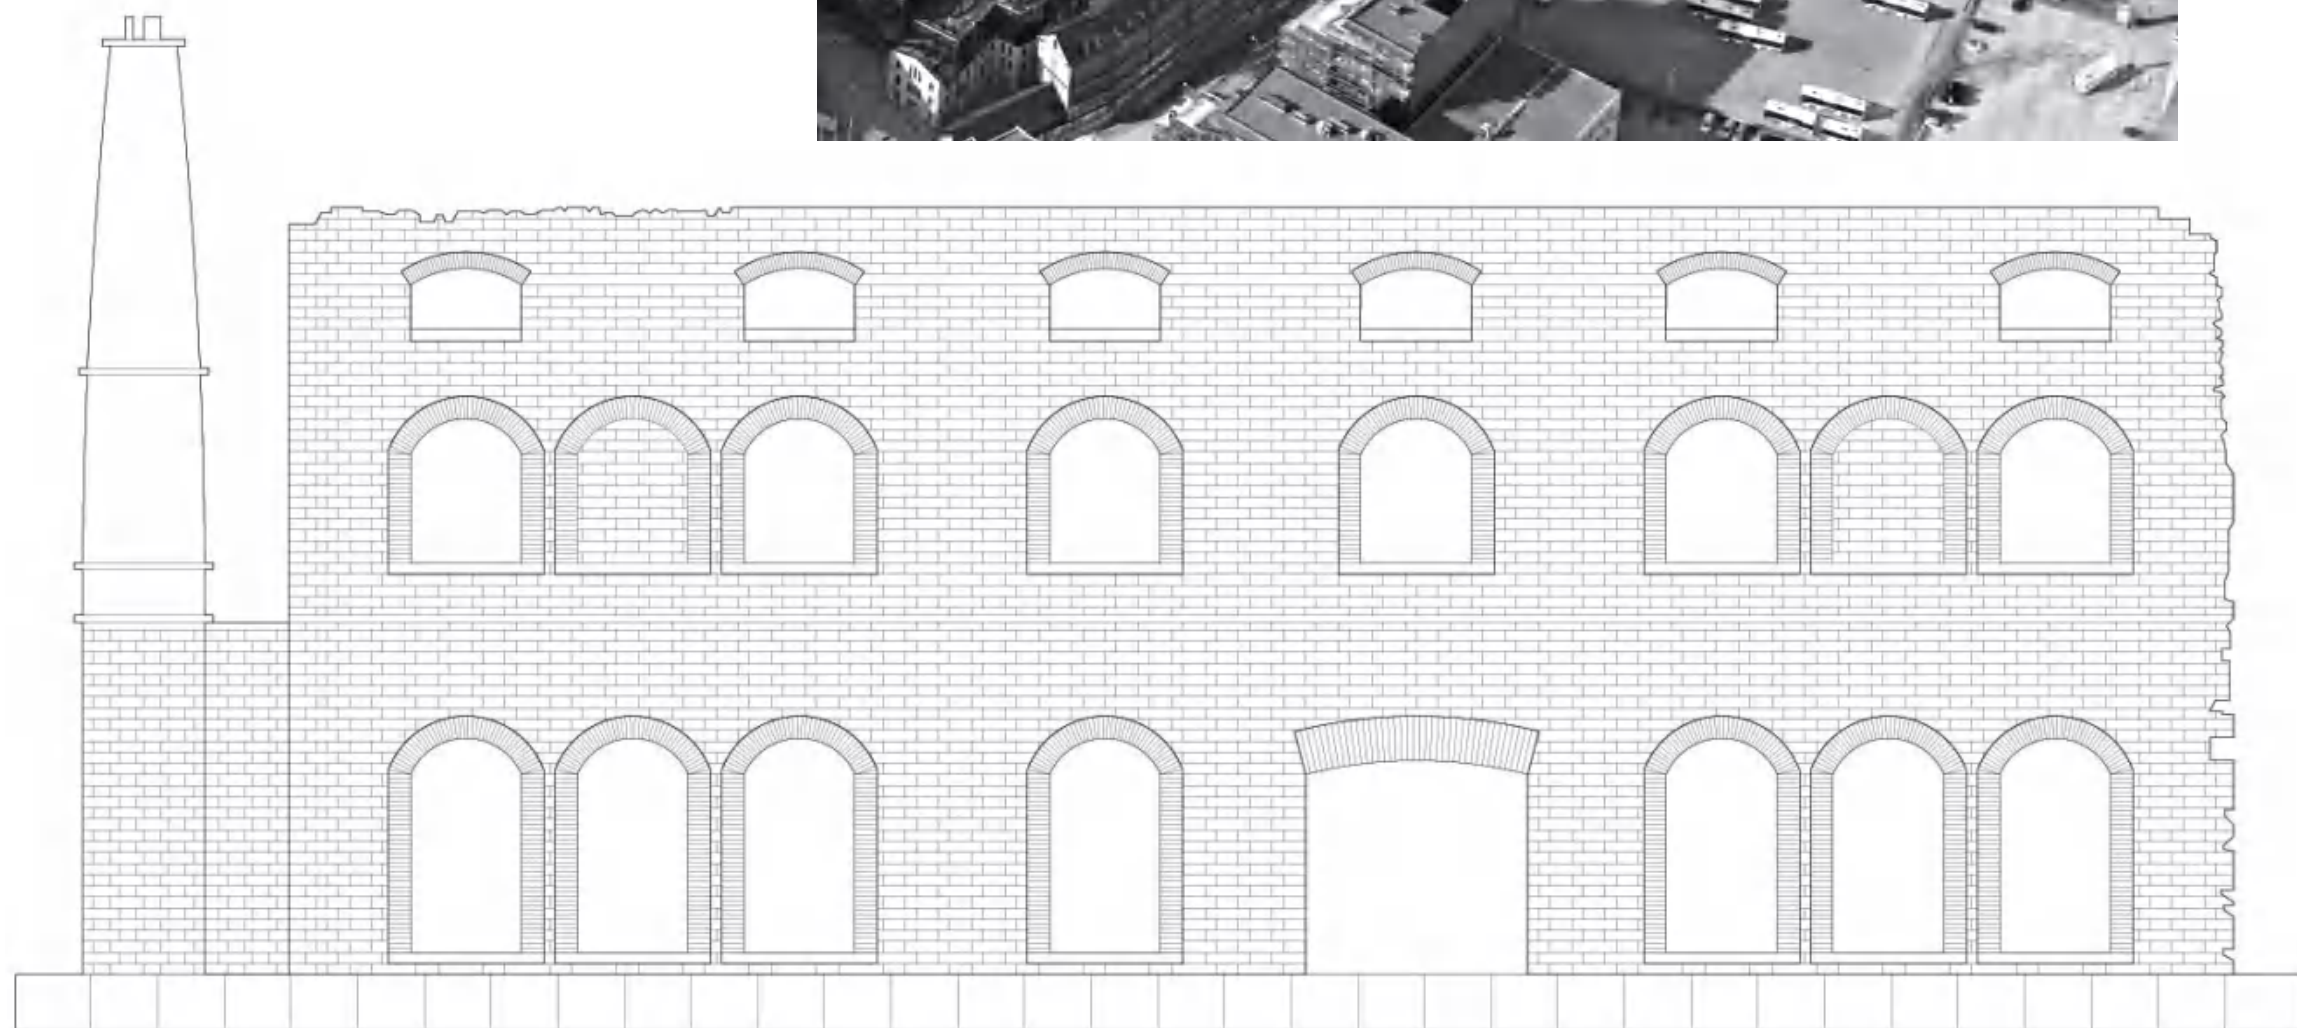

Tallinn Urban Fabric 1/30000

Harbor Area Map 1/5000

**trading station**

The site of the building at roterman road crossing was once the trading station on the harbor. Like the Architectural Museum, it was originally a limestone warehouse building.

场地上现有的废墙。

## overall strategy

### 设计重点

/1/

Focus on the corner block at Roterman crossing;

主要专注 Rotermann 路口空间。

/2/

The functions include tourist guidance, exhibitions, and a bus station;

功能包括游客引导、展演和巴士站。

/3/

Use the updated plots to influence people's experience of the city;

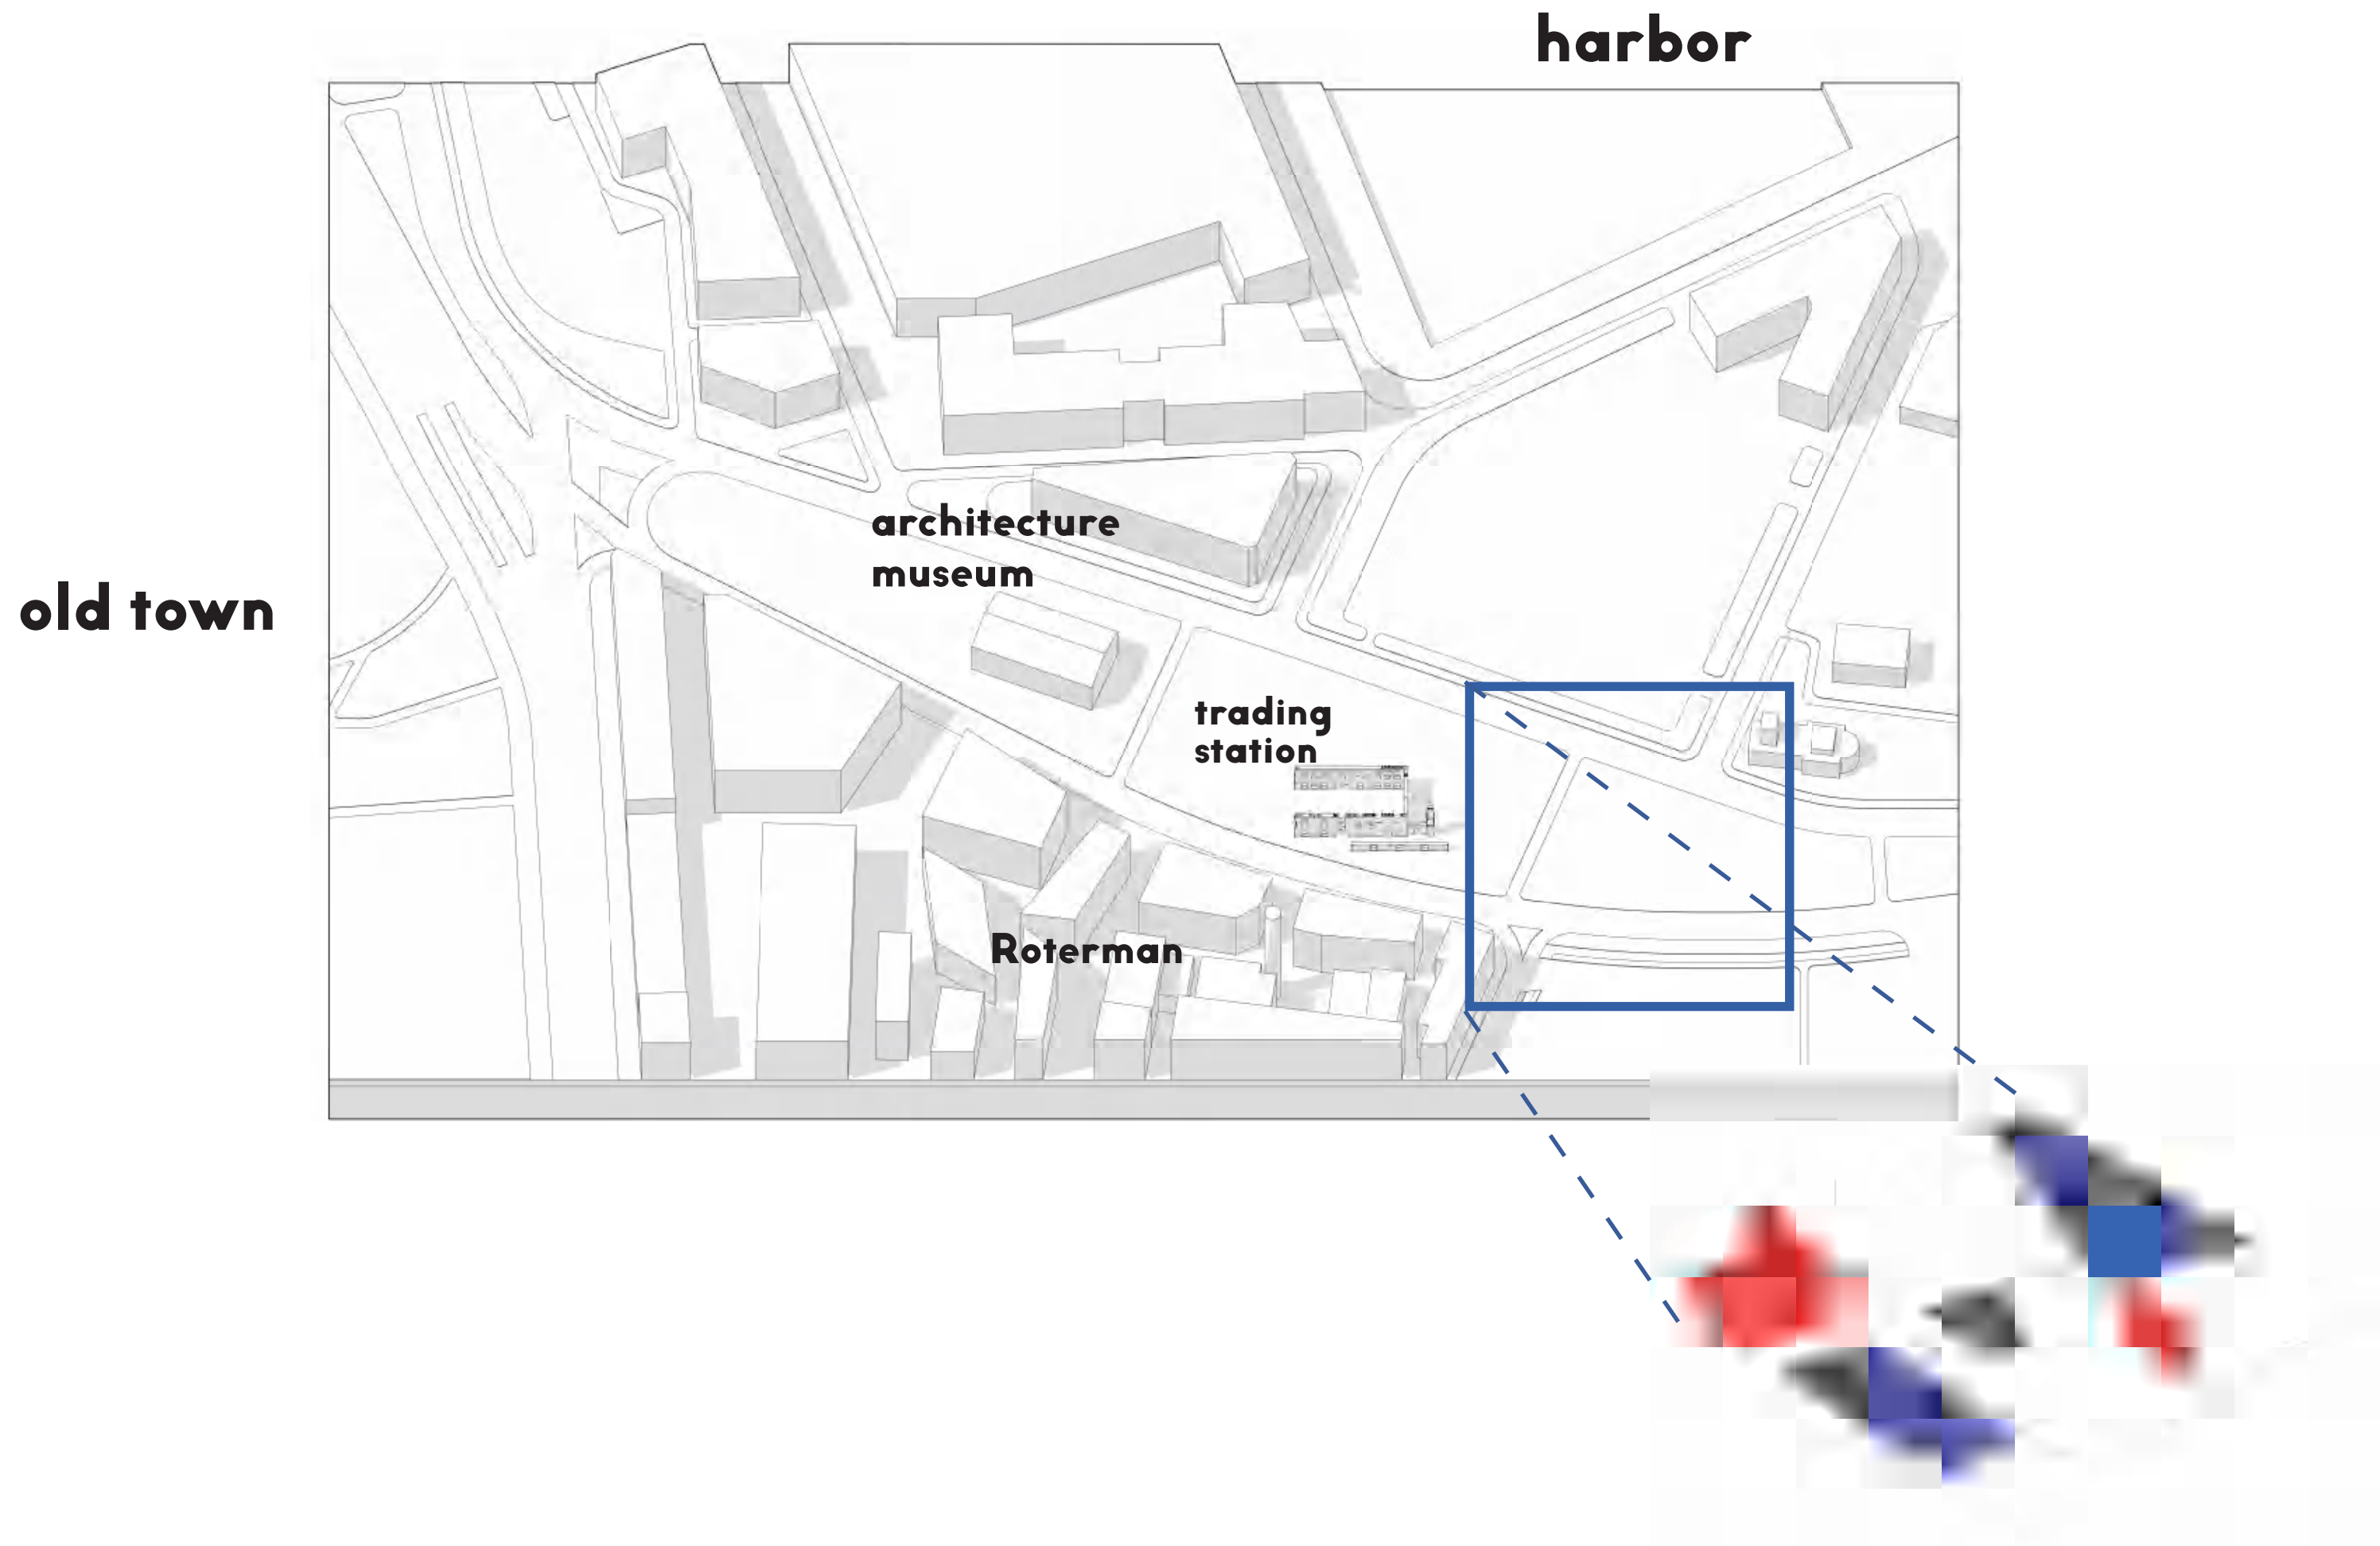

通过节点更新影响人们对城市的体验。

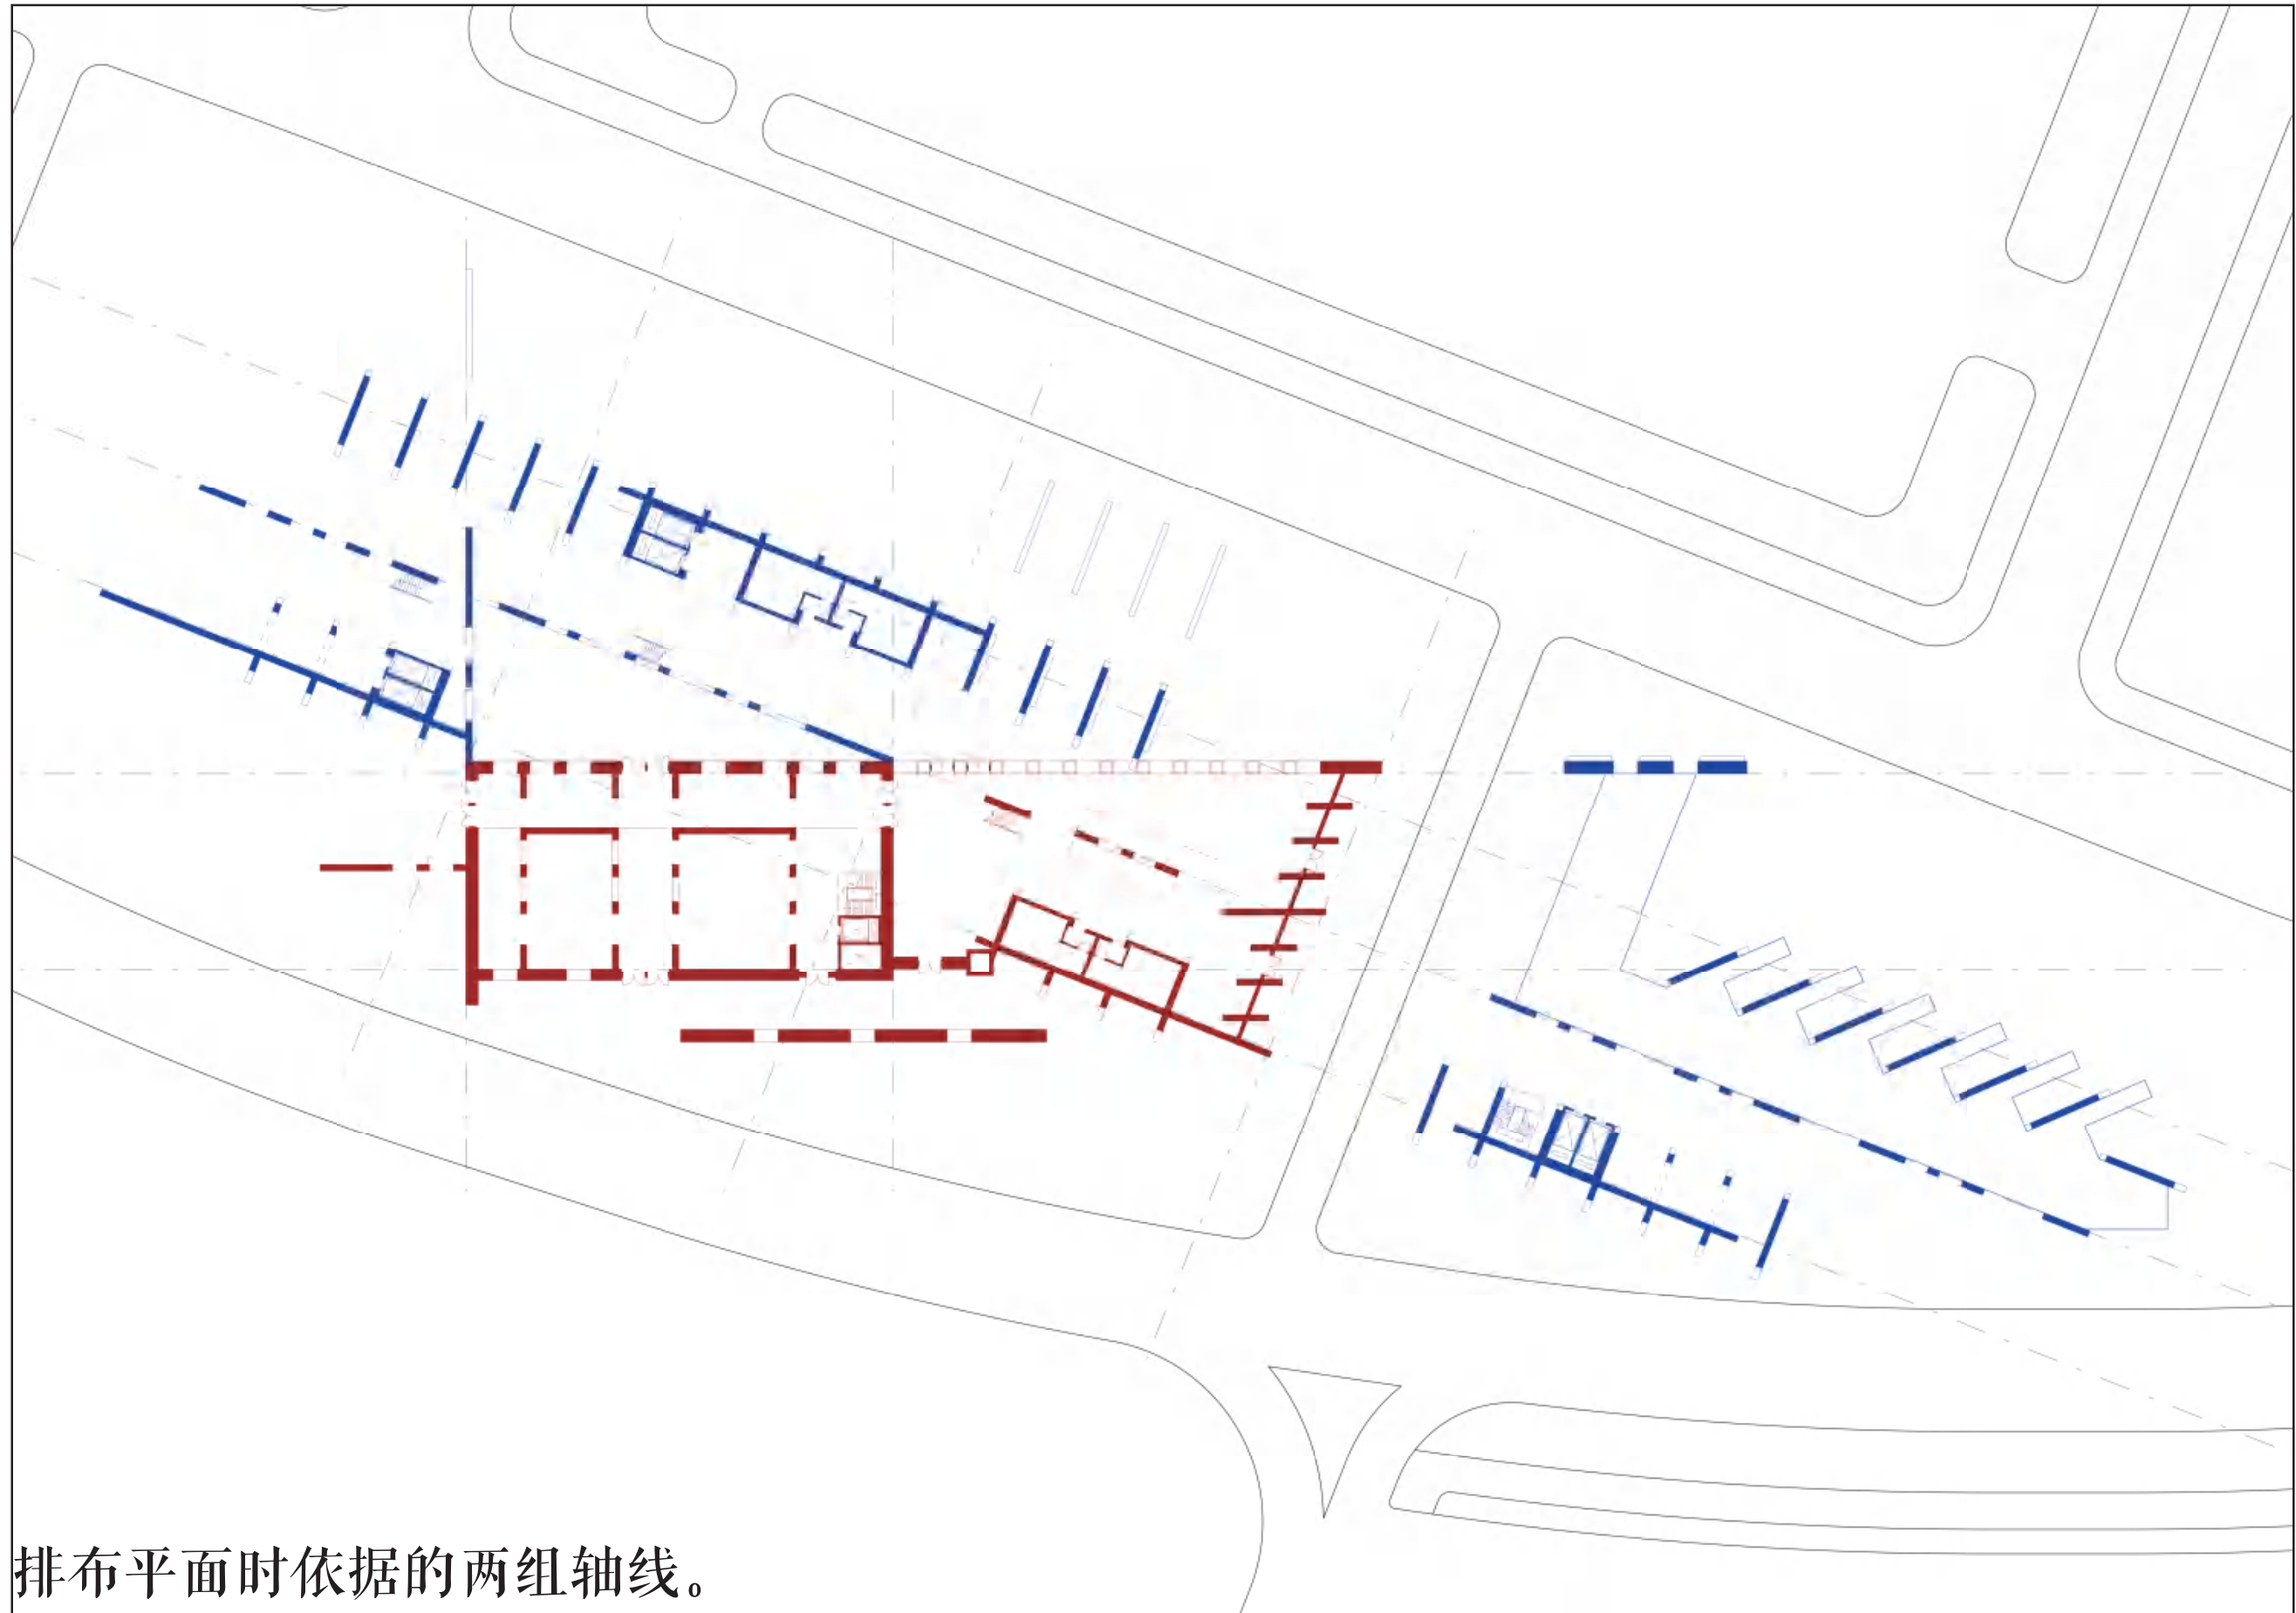

/4/

Combine the existing building structure to emphasize the architectural characteristics of Tallinn.

结合现有废墙，进行旧建筑改造。

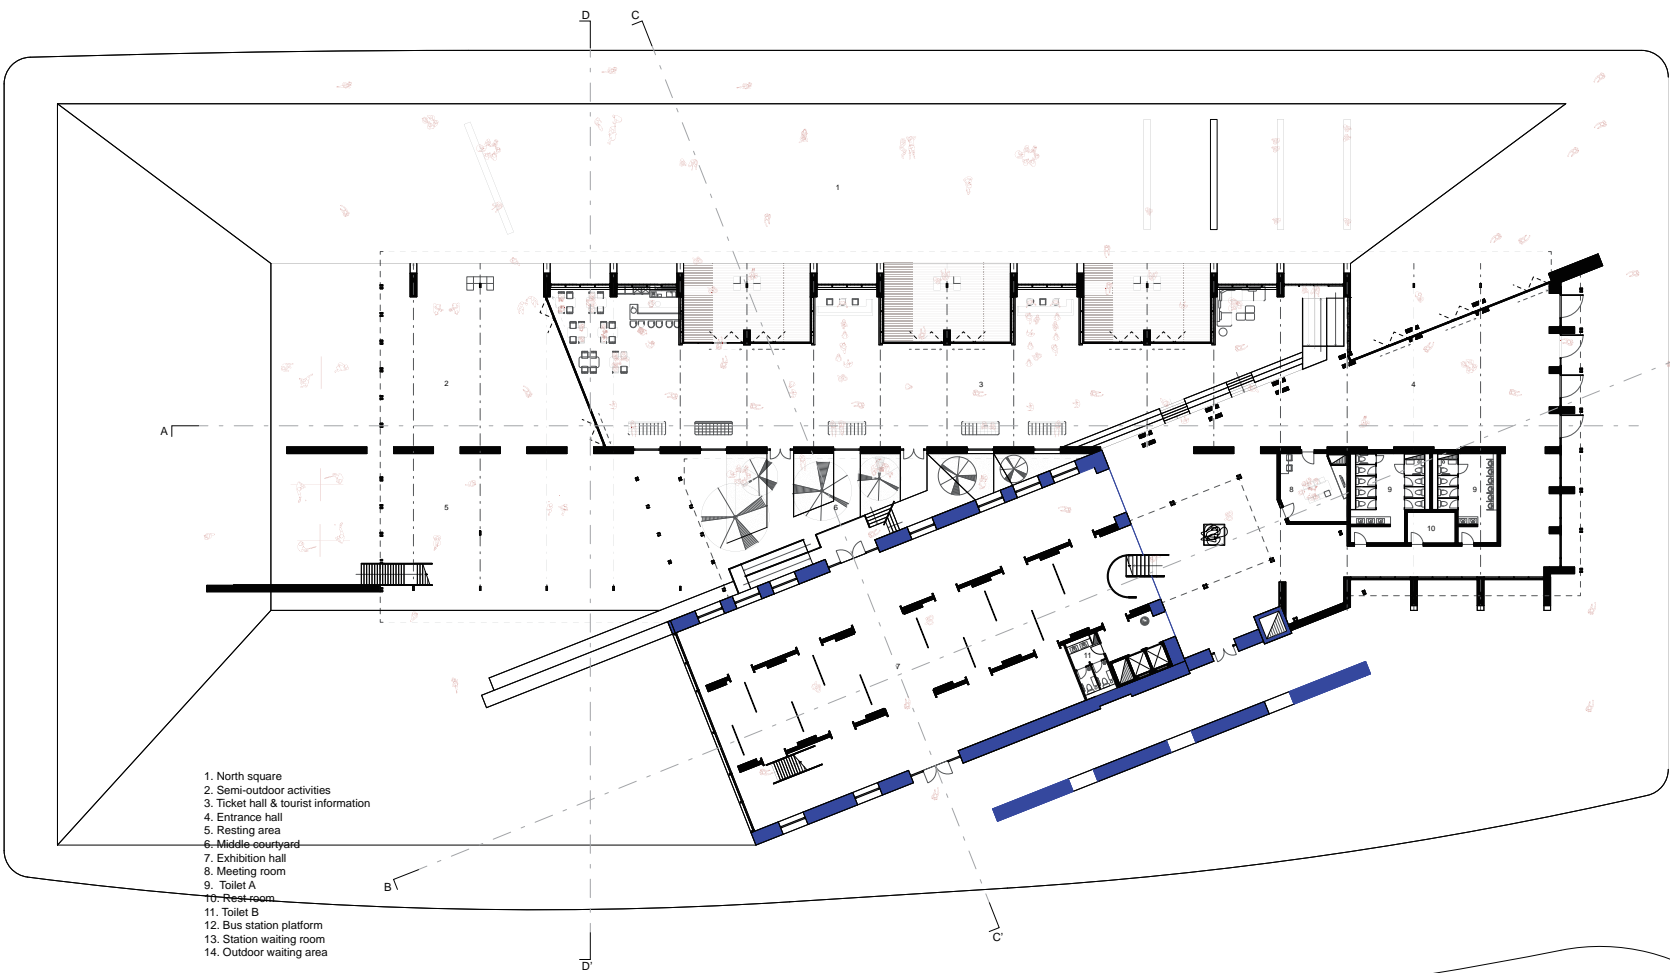

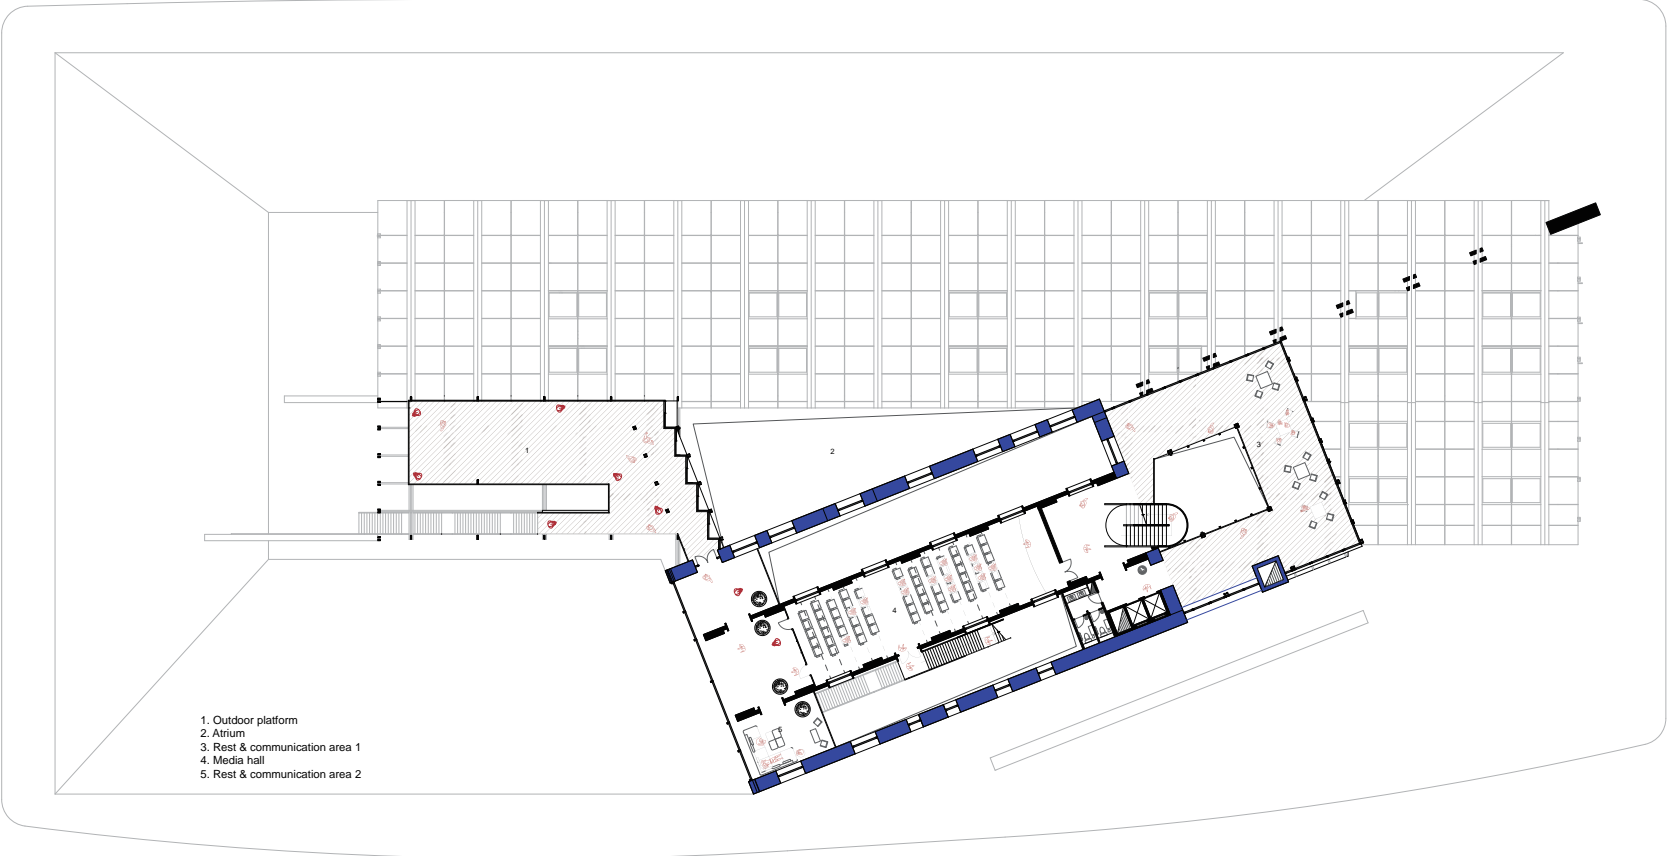

排布平面时依据的两组轴线。

Axis Testing

Groundfloor Plan 1/200  
地层平面 - 游客中心 / 站台 / 展览空间 / 城市广场

2nd floor Plan 1/200  
三层平面 - 办公室

1. Office

传统爱沙尼亚建筑  
石灰岩外墙 + 内部木结构

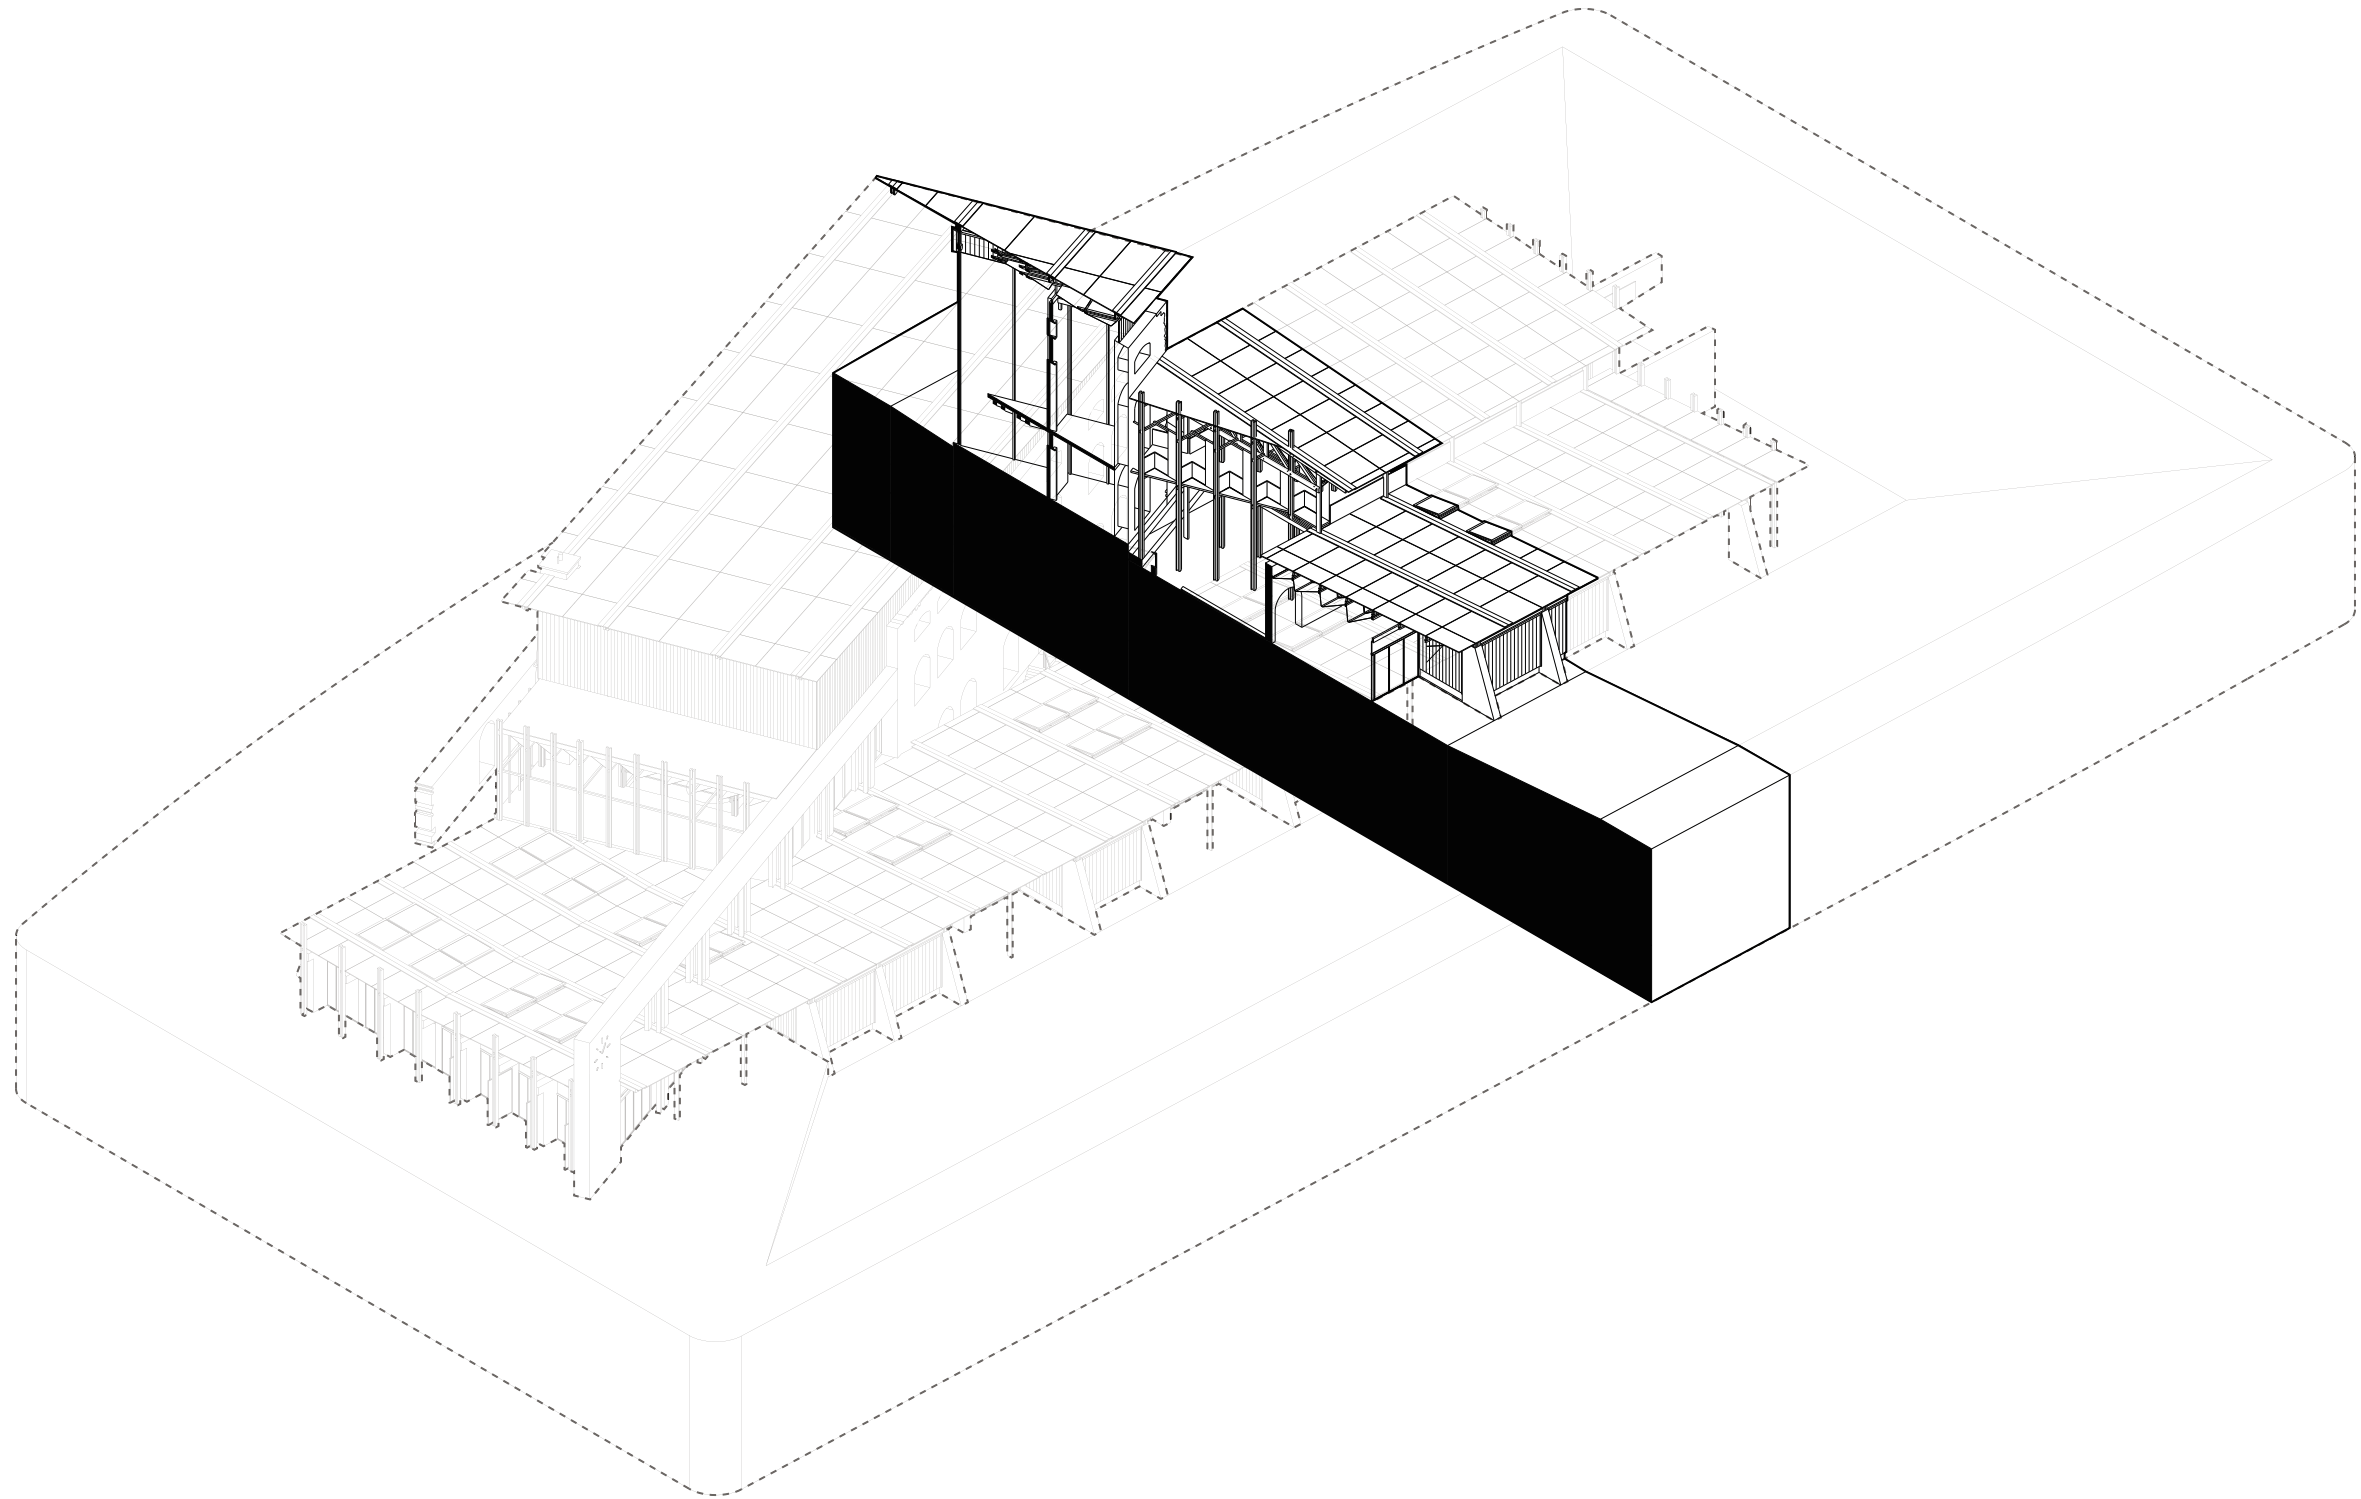

The materials and structures of traditional Estonian architecture were deconstructed and reorganized.

对传统爱沙尼亚建筑的材料和结构进行解构重组。他们不让我用混凝土呜呜呜,不然就是致敬苏联现代主义了。

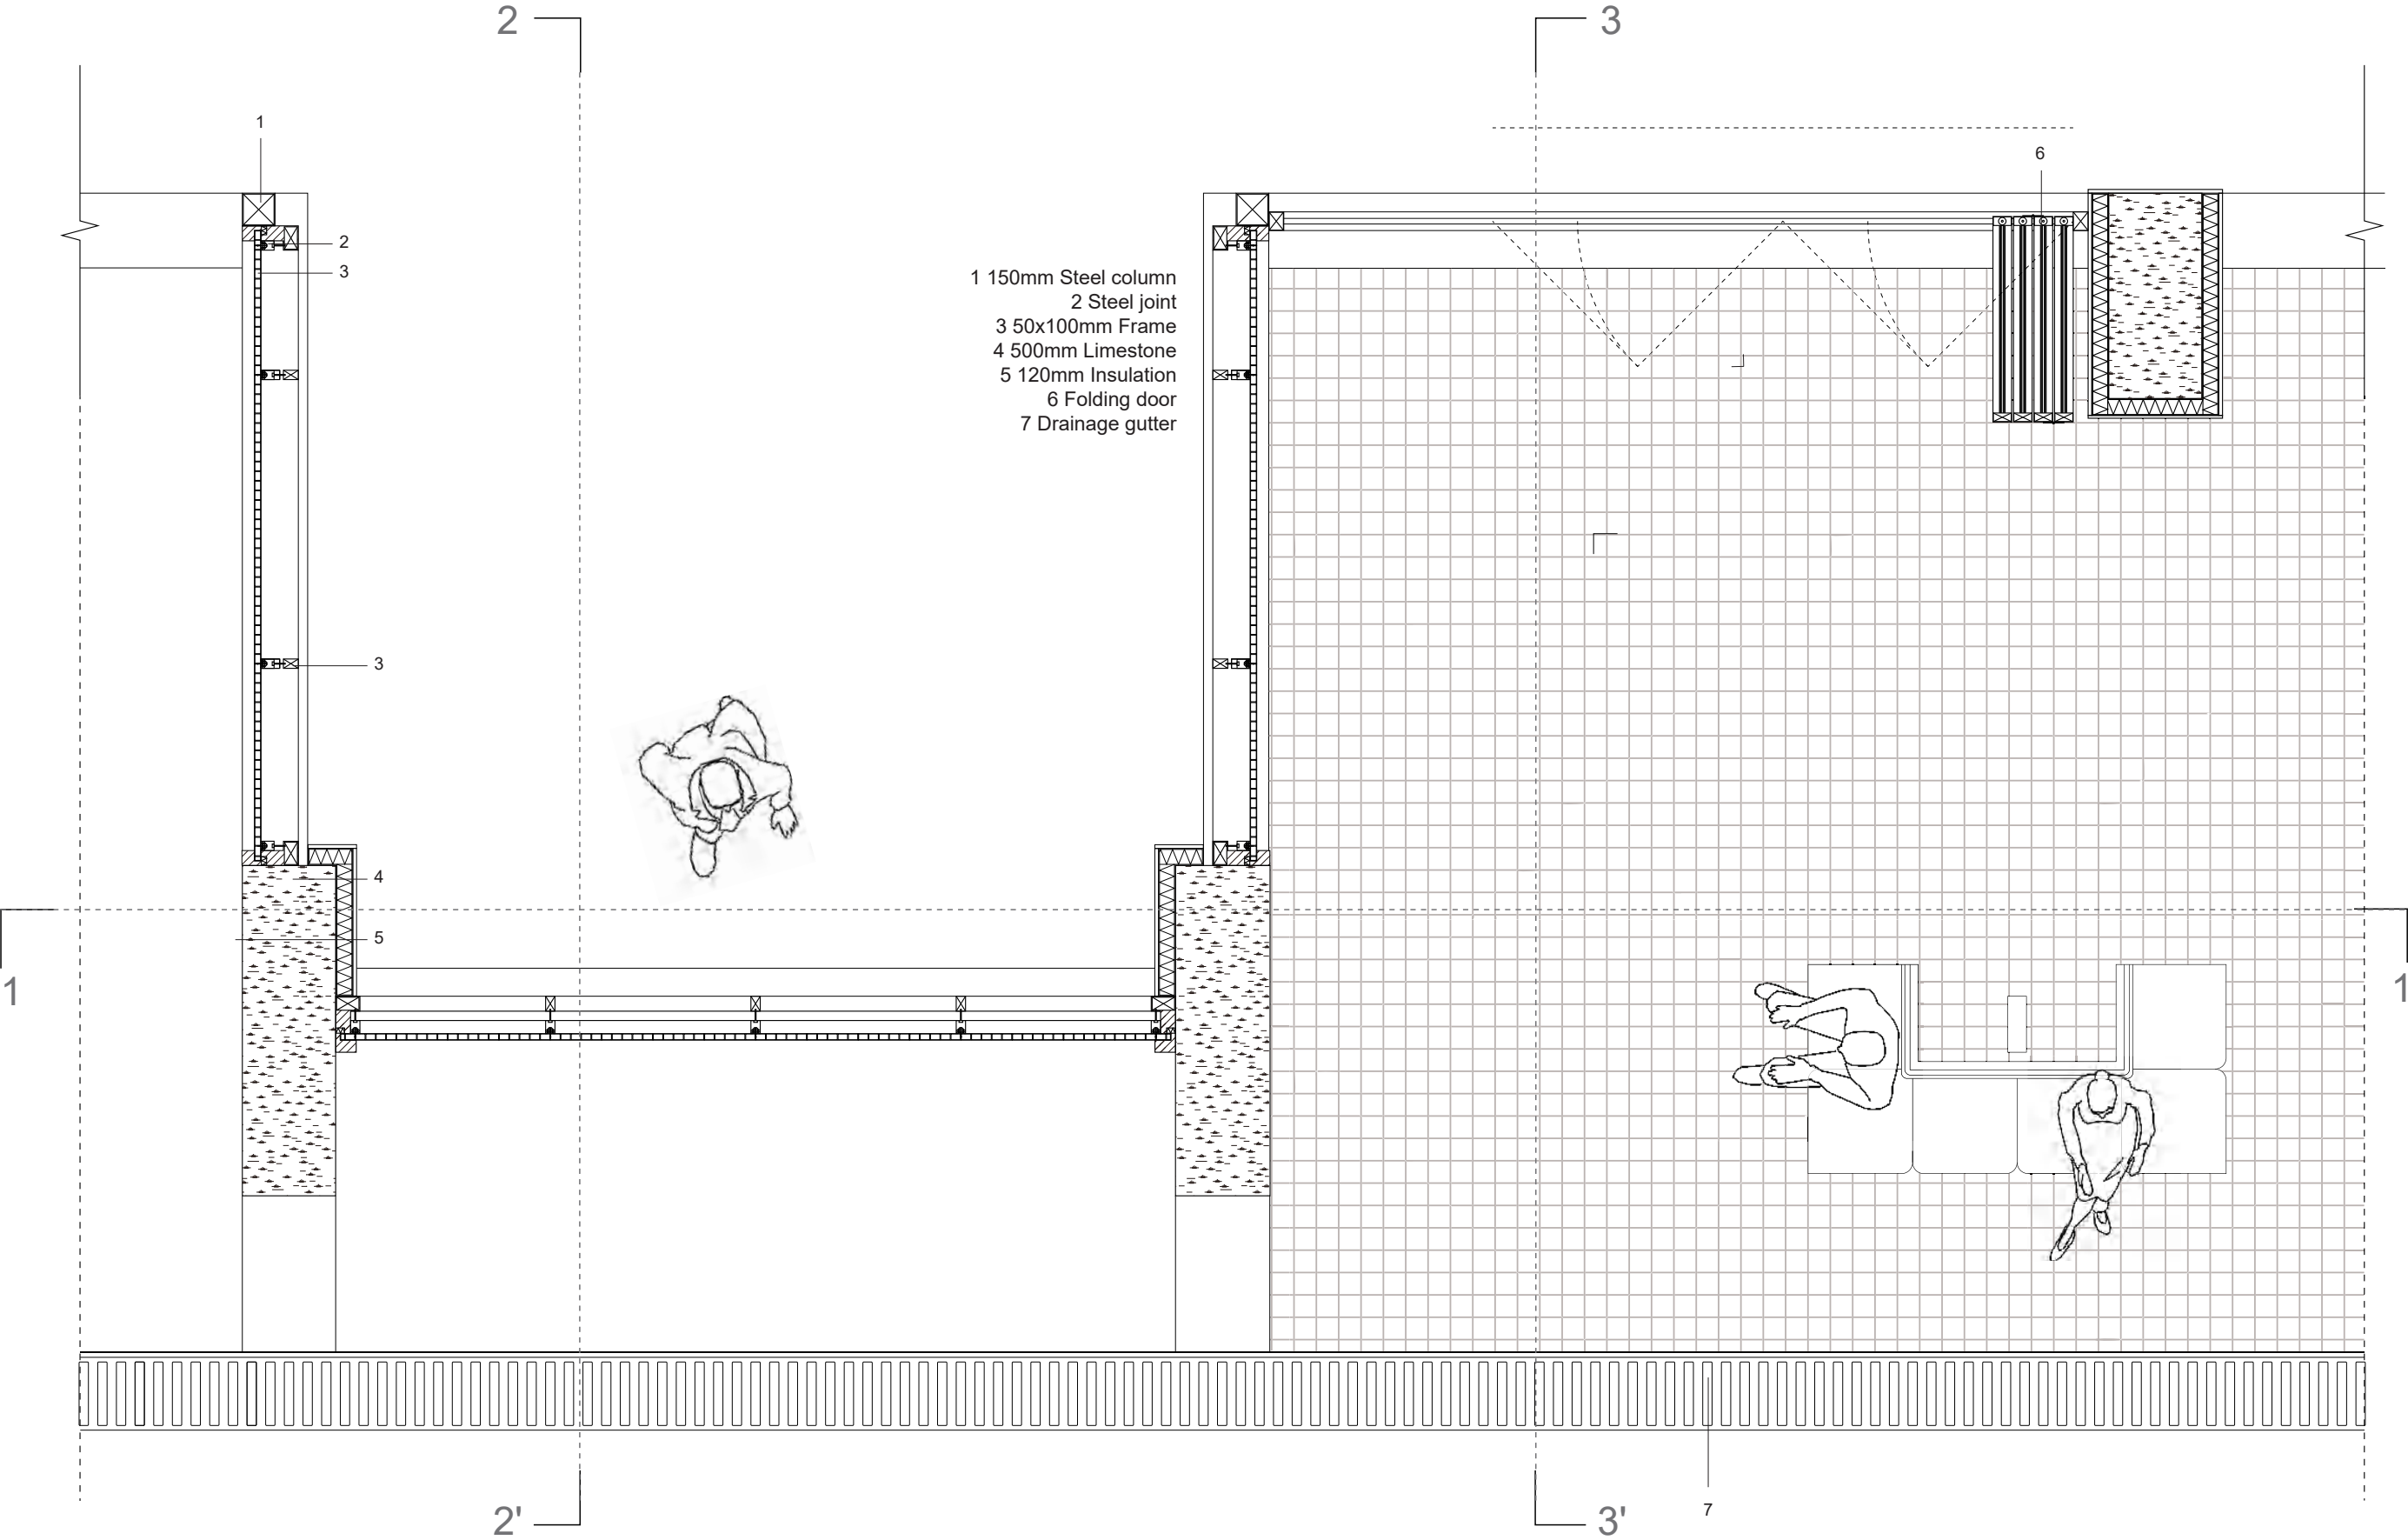

结构有点复杂，从三个节点分开来说明。

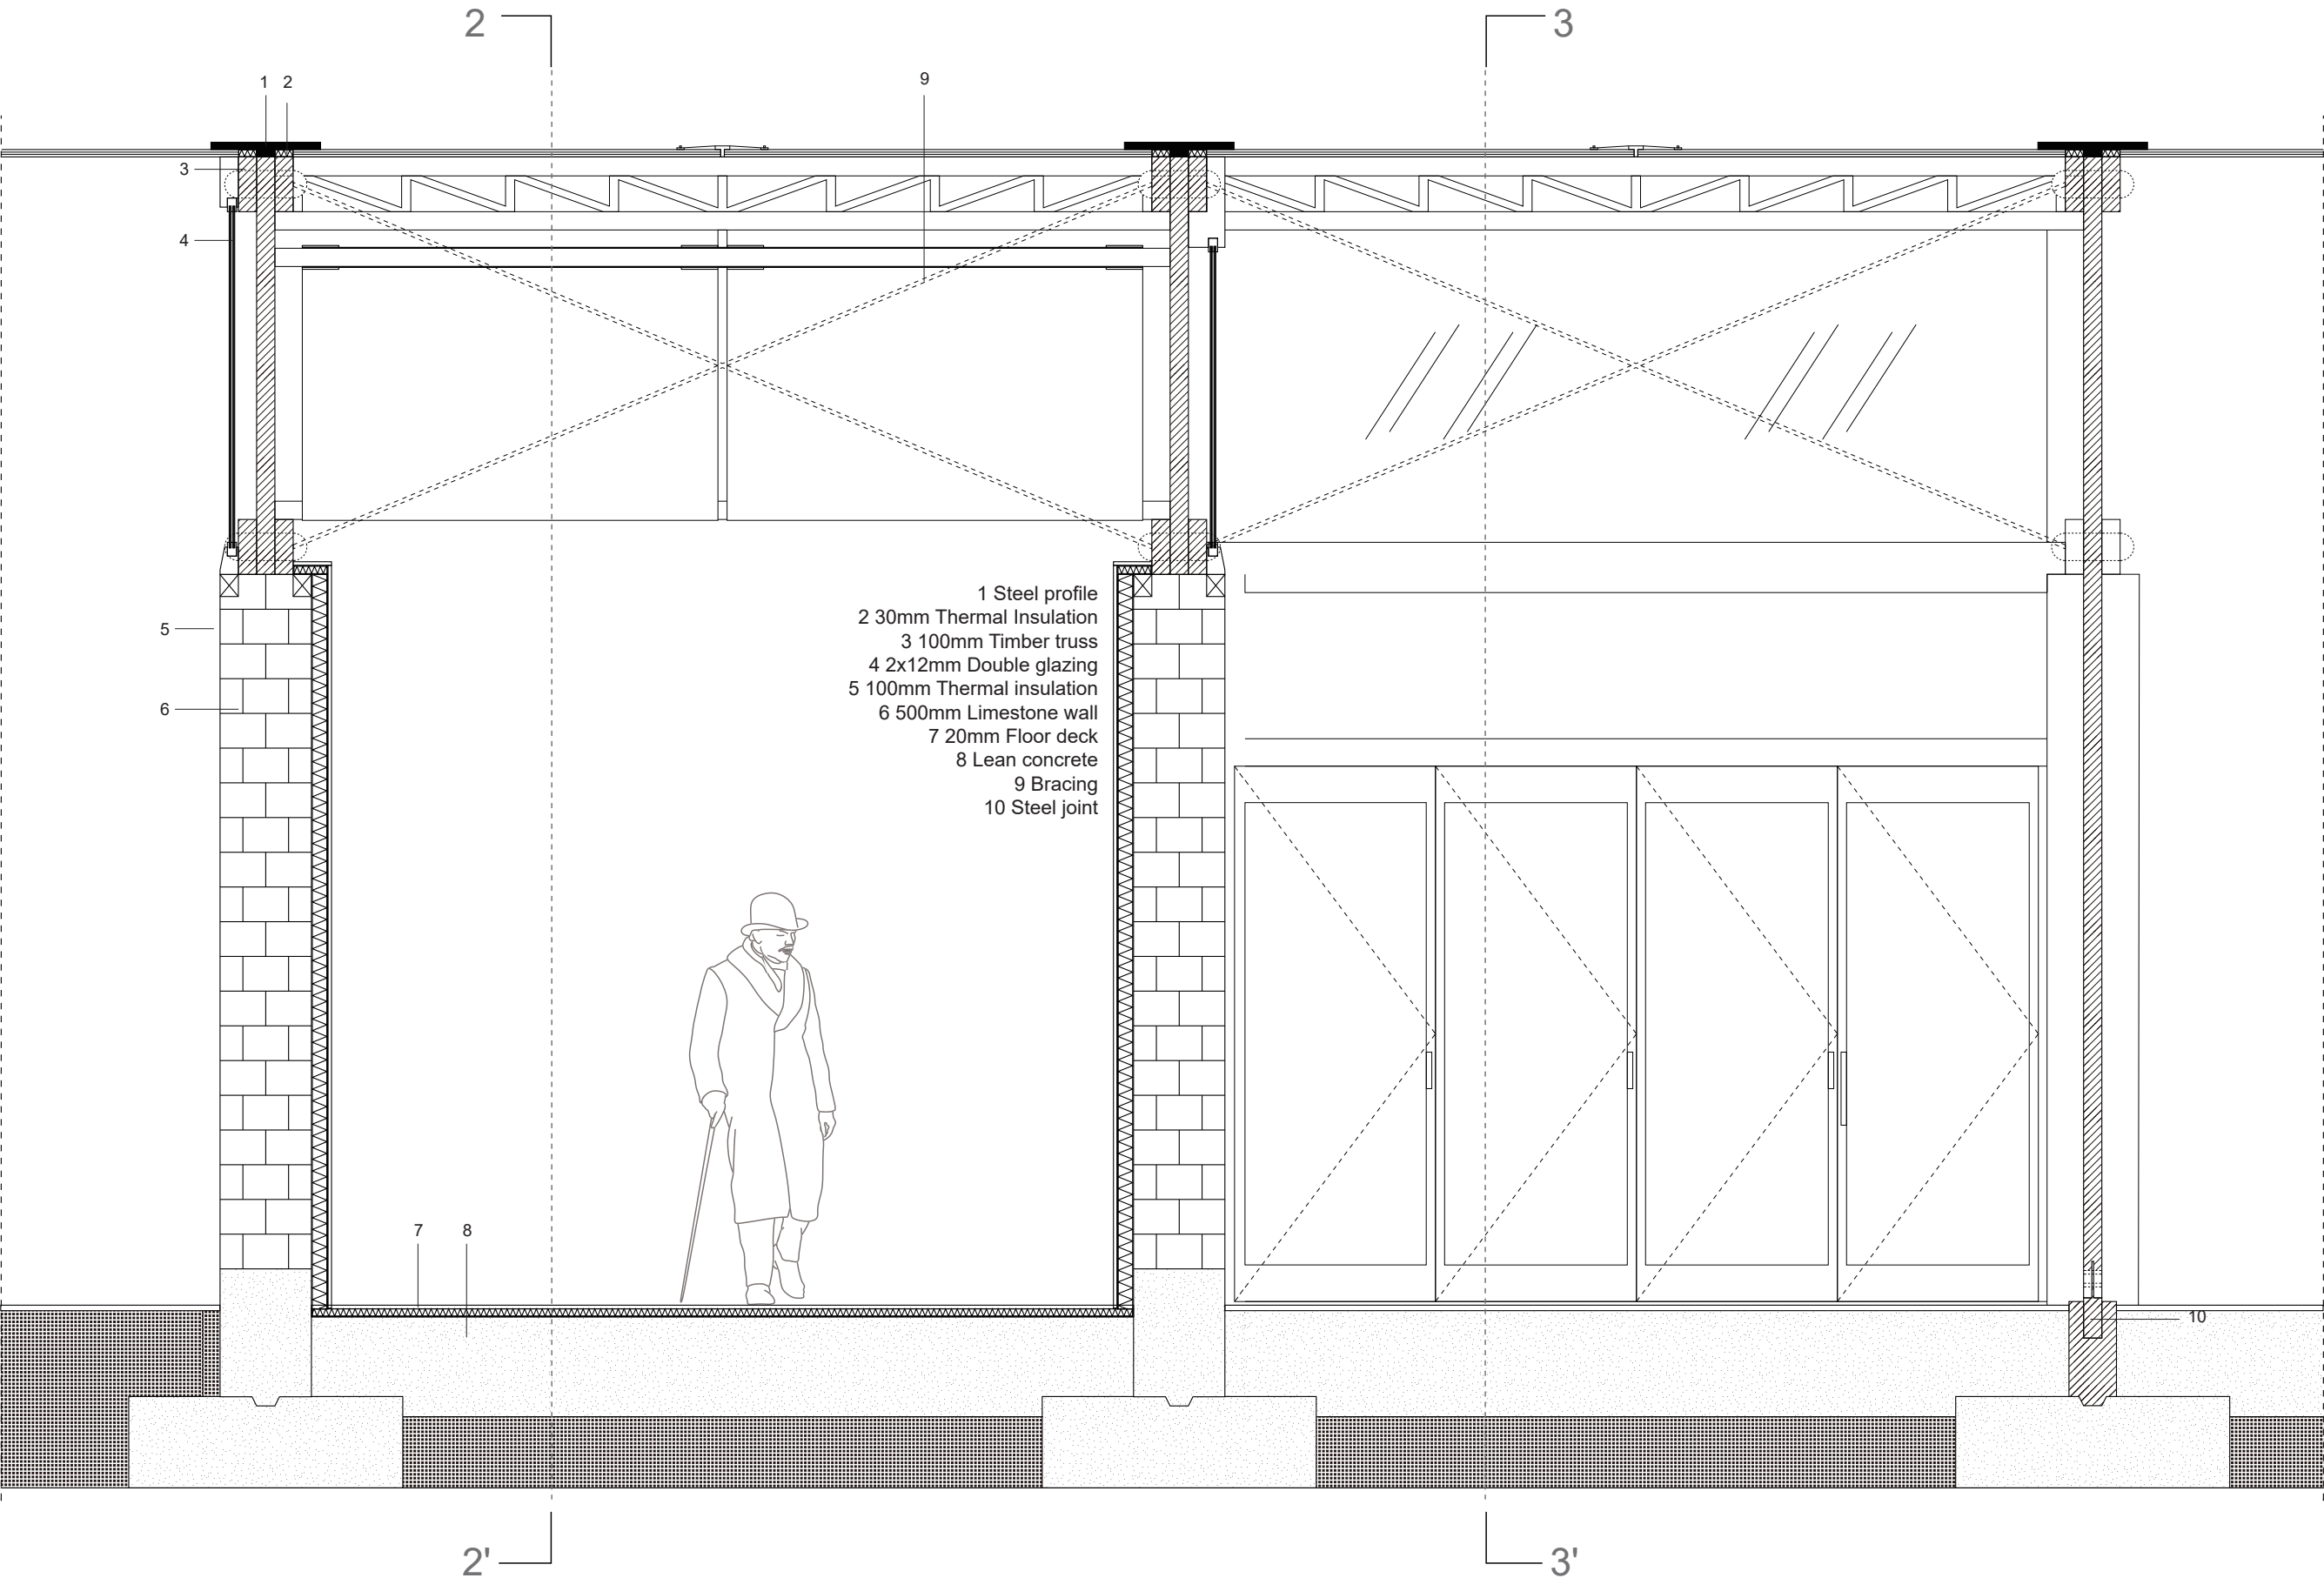

Part 1: The Ticket Hall Roof

第一部分：游客中心屋顶结构

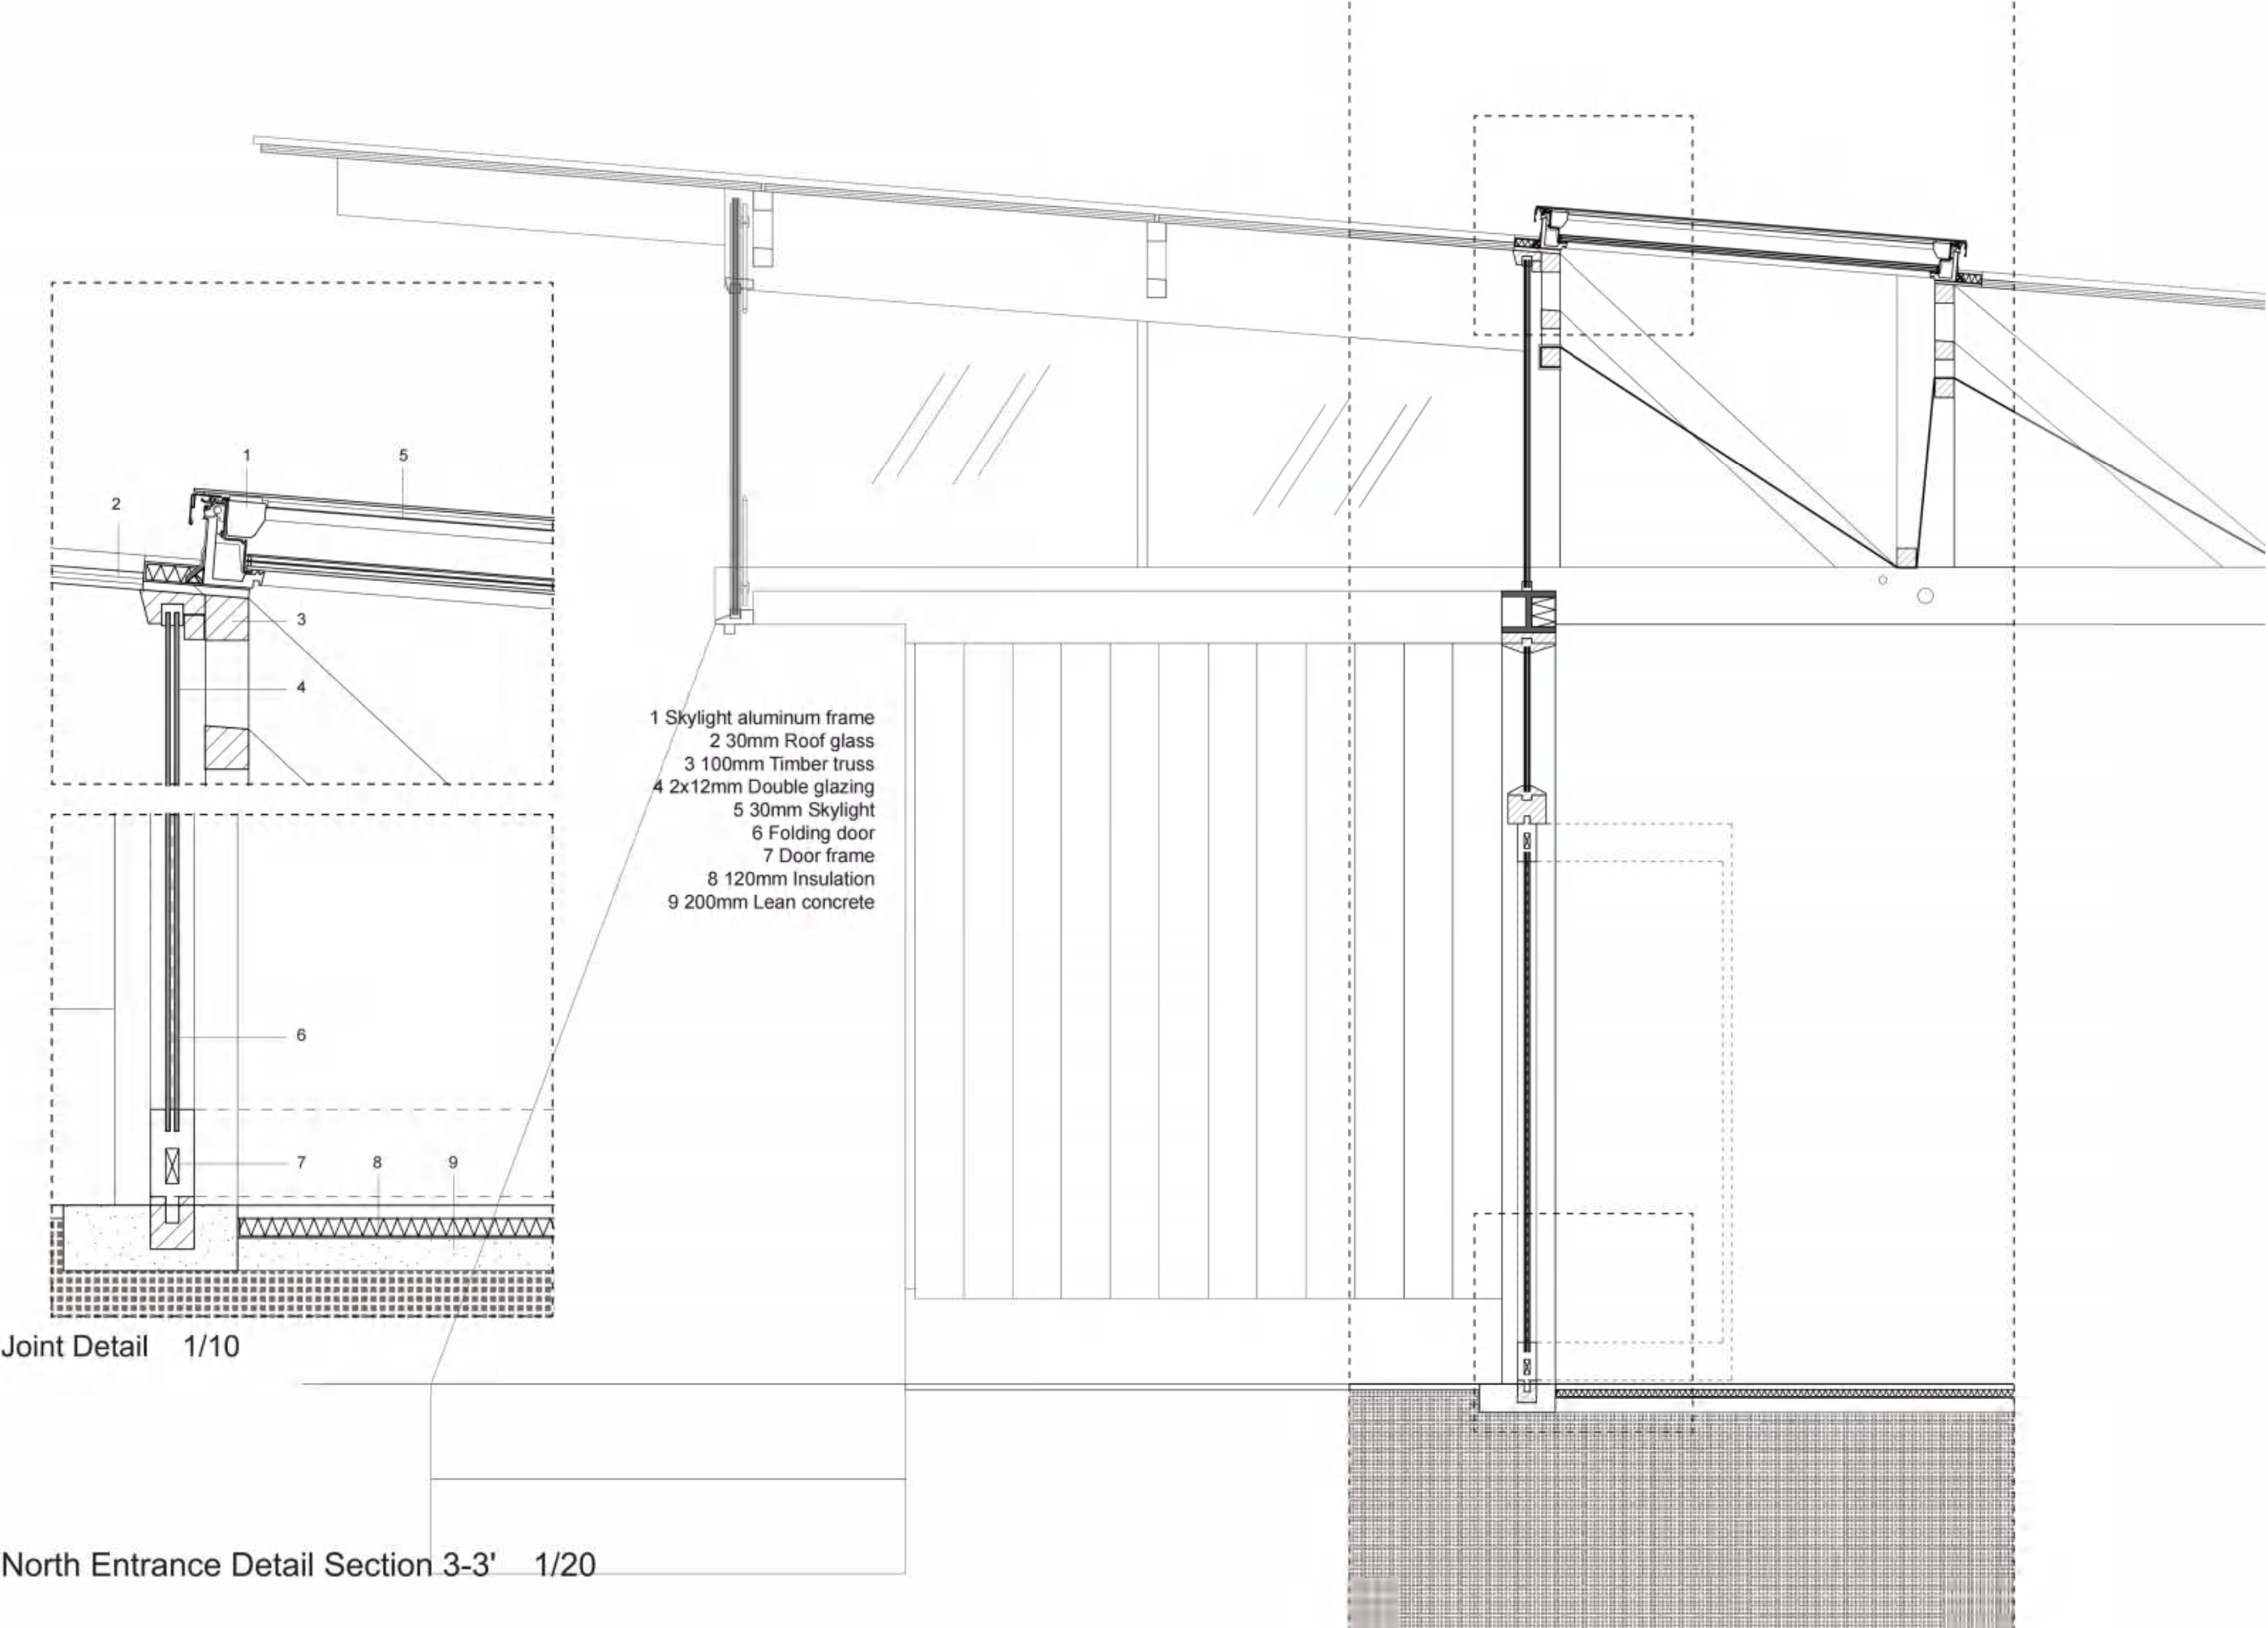

North Entrance Detail Section 1-1' 1/20

North Entrance Detail Section 2-2' 1/20

Joint Detail 1/10

Truss Prototype

原型桁架  
其他形式都是这俩变来的

Step 1:  
Build Load-bearing Wall.  
第一步：  
建造石灰岩承重墙

Step 2:  
Add Timber Truss on the Wall.  
第二步：  
在墙上搭建木桁架

Step 3:  
Build Secondary Truss to Build the Roof Frame.

第三步：  
在主承重桁架上搭建次级桁架

Step 4:  
Hang Curtains under the Secondary Curtain.

第四步：  
在次级桁架上挂上遮光幕帘

Step 5:  
Lay Roof Glass and Skywindow on the Frame.

第五步：  
安装玻璃屋面和天窗

Step 6:  
Enclose the Facade with Folding Doors and Polycarbonate Board.

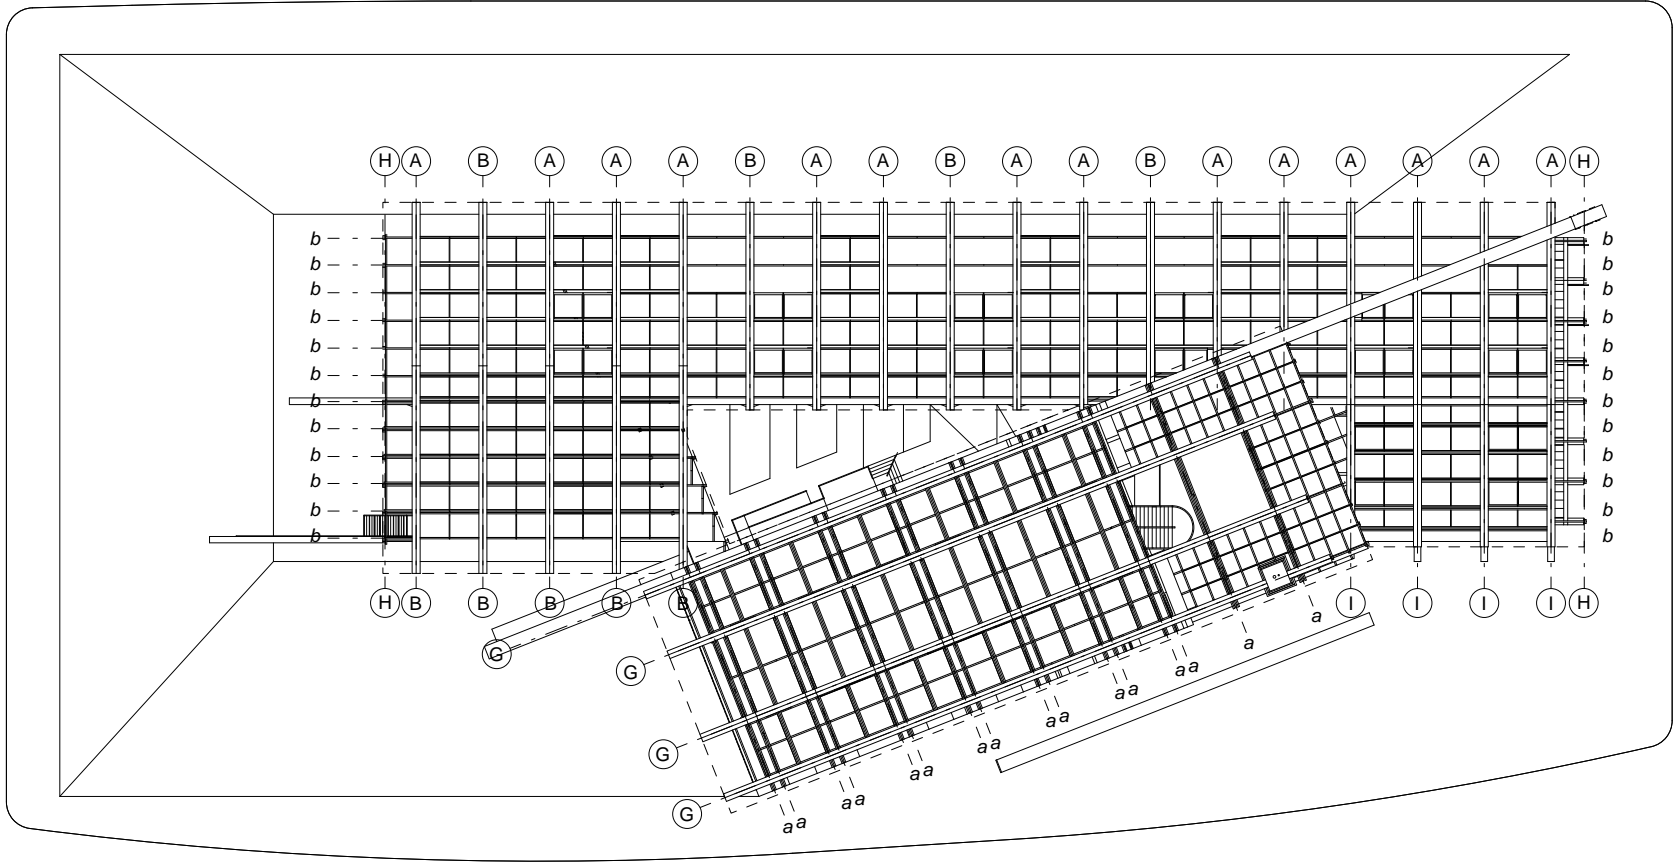

第六步：  
安装折叠门和聚碳酸酯外墙

Starting from the truss prototype, I developed a series of truss types according to different functions and space dimensions.

原型桁架的儿子们

Truss Type Distribution  
不同桁架位置分布

Part 2: The Office Walls

第二部分： 加建墙体

02/ Project- building structure

Joint Detail 1/10

- 1 Steel joint
- 2 100mm Truss
- 3 30mm Roof glass
- 4 Aluminum frame
- 5 150x200mm Steel beam
- 6 35mm Polycarbonate
- 7 500mm Limestone
- 8 2x12mm Double glazing
- 9 75mm Limestone panel
- 10 120mm Insulation
- 11 Steel deck with floor heating
- 12 200x225mm Steel beam

Building Scale

Office Building Detail Section 1/40

Part 3: The Atrium Structure

第三部分：中庭结构

*Build the timber structure around the stone structure.*

*Lay the first floor and hang curtains on the second layer of timber structure.*

*Add glass roof and enclose the atrium with glass and polycarbonate facade.*

Joint Detail 1/10

- 1 500mm Limestone
- 2 150mm Timber truss
- 3 150mm Insulation
- 4 Aluminum window frame
- 5 2x12mm Double glazing
- 6 200mm Timber column
- 7 Steel Joint
- 8 5mm Water proofing
- 9 80mm Insulation
- 10 Lean concrete

Atrium Detail Section 1/40

## 03/ Conclusion

结论

personal feelings & experience

## feeling & experience

/1/

Test various kinds of material;

通过对比相同材质的新老结构，突出旧结构的存在，引导人们感受城市过去的建筑特征。

/2/

Approach problems from different scales;

从不同尺度思考解决问题。

/3/

Test building effect with physical model and 3D model.

在工作工程中结合物理模型推敲空间效果。

/4/

The characteristics of a nice, full-used urban public space.

通过公共空间加强建筑和城市的联系。  
如在室外公共空间上搭建遮蔽物来作为室内外功能间的过渡。

**Thank you.**
