1 Formulate your dream

This is where it all starts!

Step 1. Who do you want to help?

Explain who you want to help with your dream. Yourself?
People in your community? Children? Try to be specific.

Step 4. What does this mean?

Explain how these pictures describes / illustrates / inspires
your dream.

Step 2. What do you want to change?

Explain what it is you would like to see changing for the
people you would like to help? Try to explain it in detail.

Step 3. Visualise your dream

Look for a picture on the internet (or draw it yourself!)
which describe / illustrate / inspire your dream and paste
this picture in this square(s).

Click to add picture
or make a sketch

Click to add picture
or make a sketch

Click to add picture
or make a sketch

Step 5. Formulate your dream!

Now try to formulate your dream in a compact sentence.
(for example: 'I want to provide access to a bicycle for all
children in my school, so they can cycle to school instead
of walking long distances.')

*Click here to write
down your dream*

When you formulate **your dream** it is
important to try to let go of all the obstacles
you face in your daily life. In this exercise you
have no limits! Try to think about what you
want the most.

2 Create a Problem Tree

A **problem tree** is a method to create an overview of the causes which lead to a certain problem, what this problem is and what the consequences for the community are. Start by defining the causes, set the problem (and think about your ability to solve this problem) and explore what the consequences are for your community.

Steps (working from bottom to top)

3. Branches

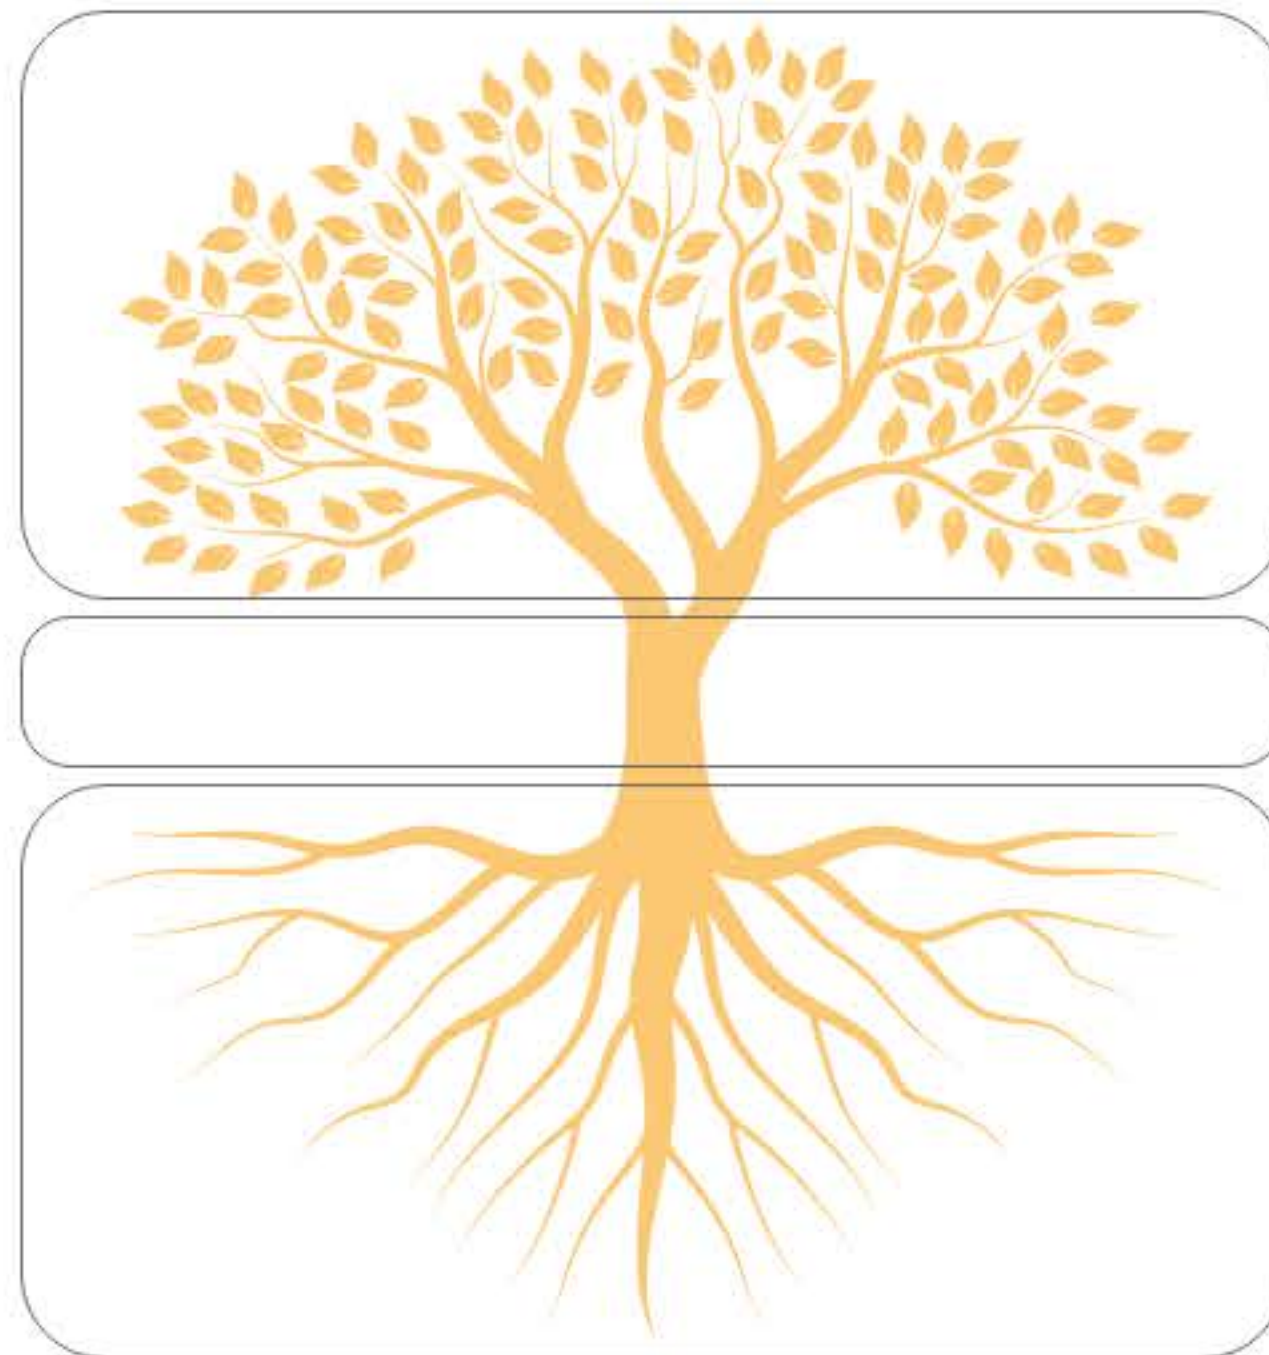

Consequences

2. Trunk

Main problem

1. Roots

Causes

Step 3. What are the consequences for the community?

Be creative and (visually) explain what the impacts the community and in which way. After writing those down, reflect on what you have written down and ask yourself the question if these consequences are have a negative or positive impact.

Step 2. Define which problem you can solve

Which of these causes is within your power of solving?

Step 1. What causes are preventing you from realising your dream?

Write down all the causes and problems which you can think of are hindering you from realising your dream at this moment. If possible, add pictures and/or illustrations.

3 Problem statement

Start with formulating your problem statement by filling out the blanks.

You want to have a clear objective for your innovation journey. That is why you should start with a well defined **problem statement**. Something which helps your to imagine what you want to solve, for whom and what the aimed result will be.

I want to solve

for..... because

4 Identify the stakeholders

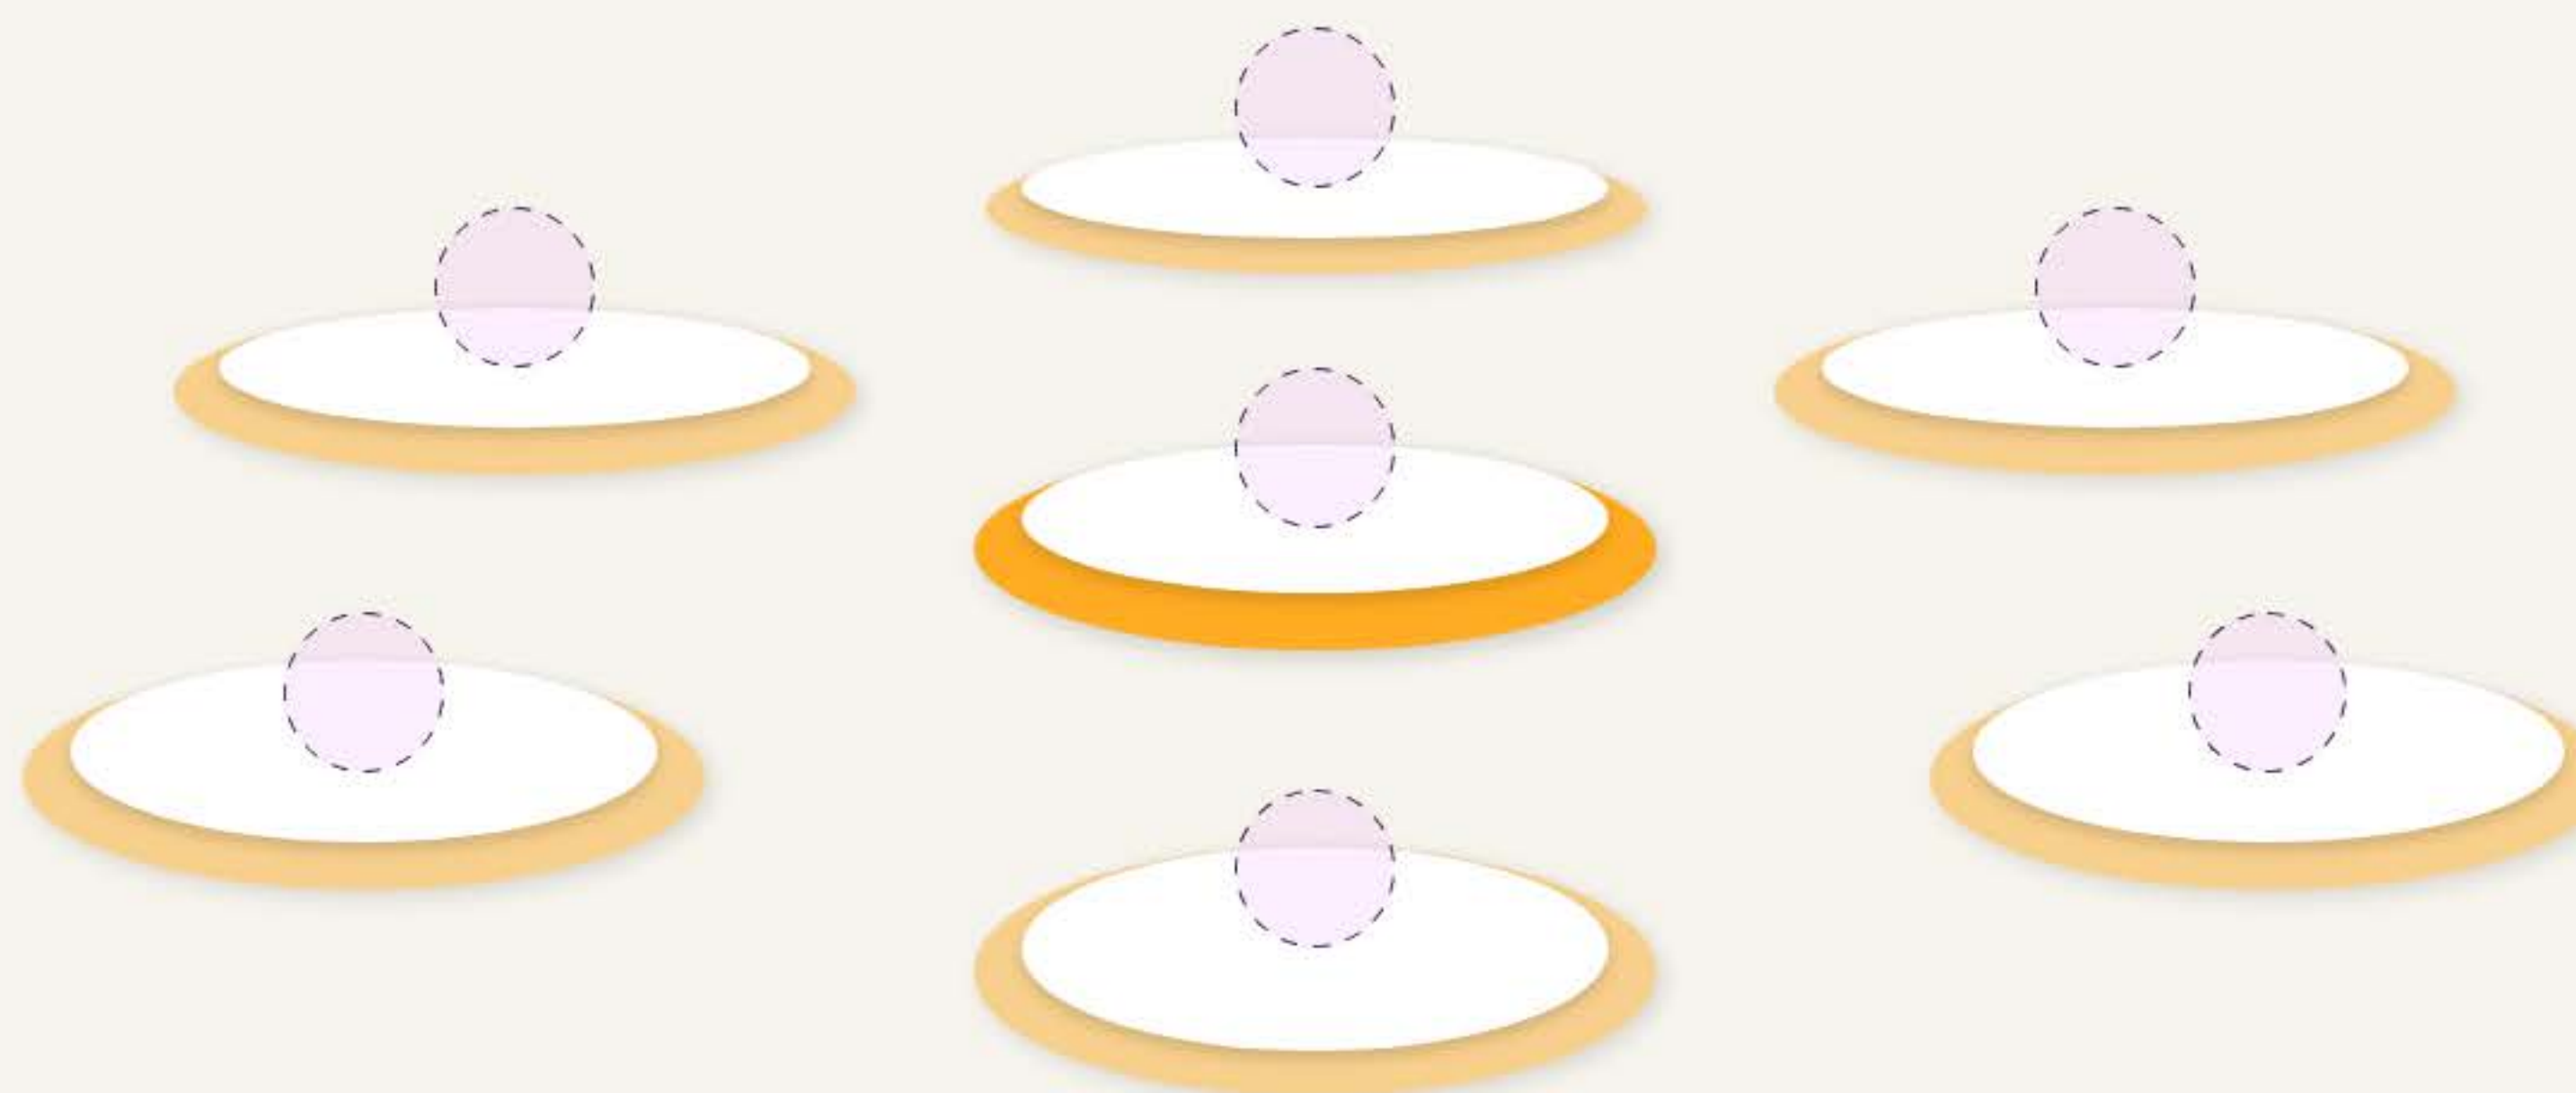

Map out all the stakeholders which are involved in this problem space.

Identifying stakeholders and the problem owner is important to create an overview of the parties which are involved in your problem. To create a better understanding of their perspective, you are going to reach out to all the stakeholders and together do some exercises.

Drag and drop!
