Rechtbank zet streep door biebplannen UvA (nieuws binnenland)

31-3-2011 13:23:36 De nieuwe universiteitsbibliotheek (UB) die de Universiteit van Amsterdam wil bouwen op het Binnengasthuisterrein, komt er voorlopig nog niet. Om de bieb te realiseren, moet de UvA twee monumentale panden (deels) slopen.

“Een universiteitsbibliotheek moet een combinatie zijn tussen een levendige en studieuze atmosfeer.

Boeken en tijdschriften helpen hier echt bij. Het heeft ook iets met het uiterlijk van de ruimte te maken. Zowel in de UB in de binnenstad en de Uithof hebben de grote

studieruimten iets kathedraalachtig.

Zonder dat het je een ongemakkelijk gevoel geeft. Het zijn ook

ruimten die respect afdwingen, waardoor mensen zich op een bepaalde manier gaan gedragen.

Je gaat daar niet voetballen, wat je in een openbare bibliotheek misschien wel zou doen. Iets sacraals zonder dat het je afstoot.”

drs. J.S.M. (Bas) Savenije
