

HORIZON 3 | IMPLEMENTATION

Within GoFuture, creativity knows no bounds and is infused into every exercise and lesson. Educators are empowered through creative teaching, in which imaginative realms are created, where students are free to explore, experiment, and grow, unburdened by the fear of failure, flourishing with the confidence to innovate.

HORIZON 2 | EXPERIMENTATION

Together with passionate educators, GoFuture becomes a playground of innovation, where the spirit of exploration is embraced, by stepwise infusing every lesson with playful, experimental learning approaches.

HORIZON 1 | ATTENTION

GoFuture ignites the flames of creativity, lighting up the path to a vibrant future. By shining a spotlight on the art of creative teaching within entrepreneurship, curiosity is awakened, inspiration is fueled, and engaging discussions are initiated.

VISION | INSPIRATION

GoFuture seamlessly infuses creativity into every aspect of entrepreneurial education, empowering students and educators with the capabilities to excel in a world of rapid change, while lighting the path towards an innovative and forward-thinking education model. Together sculpting a brighter future, filled with limitless possibilities and boundless creativity.

Building Courage for Creativity

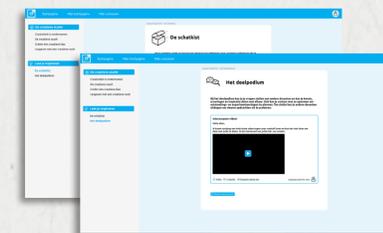

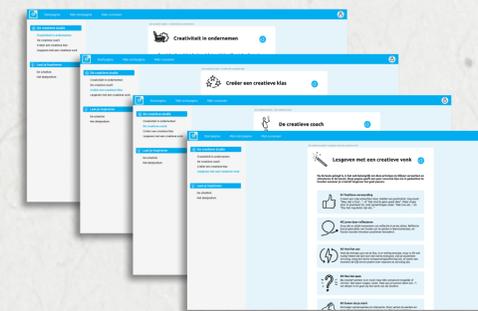

Fostering creative confidence in entrepreneurial education by empowering risk-taking behaviour

This thesis focuses on fostering creative confidence within the context of entrepreneurial education. The project is in assignment of GoFuture, an e-learning platform about entrepreneurship for the VMBO/HAVO/MBO levels in Dutch education. The project is scoped towards improving risk-taking behaviour and building tolerance of failure within both students and educators. The design consists out of a roadmap, that works towards fostering a culture of creativity, innovation and confidence throughout the whole education platform; and a creative teaching module, that is used to inform and inspire teachers about creative teaching. The module is part of the first horizon of the roadmap, and contains several themes and assignments.

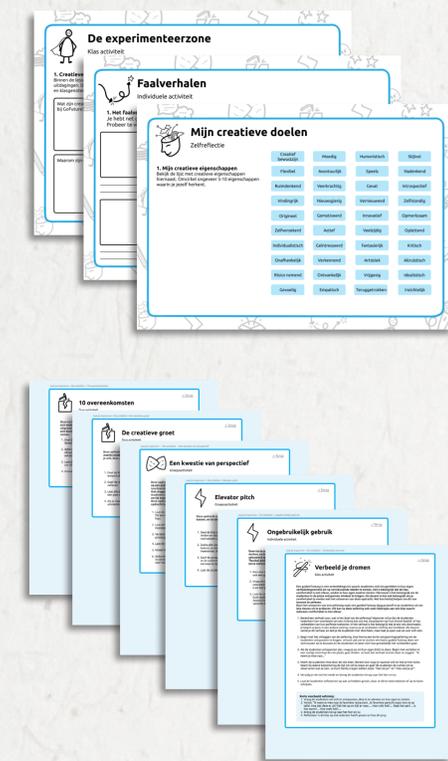

One module

Six themes

Nine assignments
