TRANSFORMATION OF THE FORMER ARTILLERY DEPOT

Formation of a city within a city

Introduction: The project is located in Ghent, Belgium. The site was previously used as a public ground for military exercises. The new use of the site is proposed to be a cultural and social hub. The project includes the development of a new public square, a new entrance, and a new building.

1. The project is located in the city center of Ghent, Belgium. The site was previously used as a public ground for military exercises. The new use of the site is proposed to be a cultural and social hub. The project includes the development of a new public square, a new entrance, and a new building.

2. The project aims to create a new public square, a new entrance, and a new building.

3. The new public square is designed to be a social and cultural hub. The square will be equipped with green spaces, seating areas, and public art installations.

4. The new entrance will be designed to be a welcoming and accessible space. The entrance will be equipped with a large glass facade, providing natural light and views of the square.

5. The new building will be designed to be a flexible space, suitable for various cultural activities. The building will be equipped with a large hall, small rooms, and a kitchen area.

6. The building will be designed to be energy-efficient, with passive solar gains and renewable energy sources.

7. The project aims to create a new public space that will enhance the quality of life in the city. The project will also contribute to the economic development of the area.

8. The project is expected to be completed in 2023.
