Taiwan, an island situated in the East Asia, the western part of the Pacific Ocean. There is a central mountain range located in the middle of Taiwan, divided Taiwan into east and west parts. While the west coast is mainly being developed as the whole region to support the economic growth of Taiwan. There use to be two municipalities, one is Taipei, located at the north, which is also the capital city of Taiwan. The other is Kaohsiung, situated at the south-west of Taiwan.

With the construction of the Taiwan high speed rail (HSR) in 2007, which greatly shortens the distance from north to south, and also are starting to have some influence on combining the Taiwan west coast region. For balancing the development from north to south, the Executive Yuan of Taiwan declared a new policy to setup five special municipalities from the north to the south, mainly in the west coast of Taiwan.

The mentioned changes will greatly influence the territory of Taiwan's west coast. For balancing the development, the forms of the cities need to be transit and re-identified. The project will focus on Tainan city, the historical but lagging behind southern city.

HISTORY
Tainan used to be the government center of the island; therefore, the historical elements in each period are rich and well preserved. In 1940, with the construction of the Kaohsiung harbor, Tainan began to lose its potentiality.

ABSTRACT
Taiwan, as an island situated in the East Asia, the western part of the Pacific Ocean. There is a central mountain range located in the middle of Taiwan, divided Taiwan into east and west parts. While the west coast is mainly being developed as the whole region to support the economic growth of Taiwan. There use to be two municipalities, one is Taipei, located at the north, which is also the capital city of Taiwan. The other is Kaohsiung, situated at the south-west of Taiwan.

With the construction of the Taiwan high-speed rail (HSR) in 2007, which greatly shortens the distance from north to south, and also are starting to have some influence on combining the Taiwan west coast region. For balancing the development from north to south, the Executive Yuan of Taiwan declared a new policy to setup five special municipalities from the north to the south, mainly in the west coast of Taiwan.

The mentioned changes will greatly influence the territory of Taiwan's west coast. For balancing the development, the forms of the cities need to be transit and re-identified. The project will focus on Tainan city, the historical but lagging behind southern city.

HISTORY
Tainan used to be the government center of the island; therefore, the historical elements in each period are rich and well preserved. In 1940, with the construction of the Kaohsiung harbor, Tainan began to lose its potentiality.

PERSPECTIVE FOR CREATIVE INDUSTRY IN TAIWAN
Cultural creative industrial turnover percentage in each region: Focus the development in south region.

ABSTRACT
CULTURE CITY TAINAN
provide better living quality & stage to attract creative/culture cluster, enhance the cooperation with local industries.

RESEARCH QUESTIONS

CULTURE CITY TAINAN
provide better living quality & stage to attract creative/culture cluster, enhance the cooperation with local industries.
