Original Articles
X. Zhang, K. Ma, Y. Wei, Y. Han
Finite-time robust $H_{\infty}$ control for high-speed underwater vehicles subject to parametric uncertainties and disturbances 201
J. Zhang, D. Kitazawa, S. Taya, Y. Mizukami
Impact assessment of marine current turbines on fish behavior using an experimental approach based on the similarity law 219
A. Somayajula, J. Falzarano
Critical assessment of reverse-MISO techniques for system identification of coupled roll motion of ships 231
K.-K. Yang, Y. Kim
Numerical analysis of added resistance on blunt ships with different bow shapes in short waves 245
S. Wang, K. Sun, J. Zhang, L. Zhang
The effects of roll motion of the floating platform on hydrodynamics performance of horizontal-axis tidal current turbine 259
P. Omidvar, P. Niknezhadi
Simulation of violent water flows over a movable bed using smoothed particle hydrodynamics 270
J. Zhao, J. Yan, H. Zhang, J. Meng
Two self-adaptive methods of improving multibeam backscatter image quality by removing angular response effect 288
B. C. Cerik
Large inelastic deformation of aluminium alloy plates in high-speed vessels subjected to slamming 301
A. Kubowicz-Grajewska
Experimental investigation into wave interaction with a rubble-mound submerged breakwater (case study) 313
F. Yongyang, L. Yitian, Y. Yunping, H. Libing
Vertical velocity structure distribution in the Sansha area of the Yangtze Estuary, China 327
P. Garcia Novo, Y. Kyozuka
Field measurement and numerical study of tidal current turbulence intensity in the Kobe Strait of the Goto Islands, Nagasaki Prefecture 335
A. Maki
Estimation method of the capsizing probability in irregular beam seas using non-Gaussian probability density function 351
K. Klaycham, C. Athiasakul, S. Chucheepsakul
Nonlinear vibration of marine riser with large displacement 361
B. Bidikli, E. Tatlicioglu, E. Zergeroglu
Observer-based adaptive output feedback tracking control of dynamically positioned surface vessels 376
A. Kleinwächter, K. Heilwig-Rieck, H.-J. Heinke, N. A. Damaschke
Full-scale total wake field PIV-measurements in comparison with ANSYS CFD calculations: a contribution to a better propeller design process 388
Erratum
Y. Liu, C. Hu, M. Sueyoshi, H. Iwashita, M. Kashiwagi
Erratum to: Motion response prediction by hybrid panel-stick models for a semi-submersible with bracings 401
