Innovative collection development at TU Delft Library

OLD “Just in case”
- Paper books (Blackwell Approval Plan profiles)
- Large e-book packages
- “Title by title” e-book selection

NEW “Just in time”
- Blackwell approval book profiles ↔ EBL profiles
- EBL metadata according to profiles → TU Delft Library’s OPAC
- Title with an EBL e-edition → excluded from Blackwell plan → only available through EBL / OPAC → purchase by user selection and library approval

Benefits
- cost-efficient collection development
- demand-driven content selection
- active participation of library users towards a “title by title” acquisition
