**INSTALATION PROCESS**

1. Fixing steel frames on site
2. Inserting steel sheet components folded and welded in factory
3. Welding components together on the outside surfaces
4. Adding following components of the building

- Pre-fabricated CLT tube 200 mm
- H channel steel frame
- Polished stainless steel sheet 3 mm
- Cavity for material expansion from weather conditions 5 mm
- Folded edge
- Welded edge
- Neoprene rubber plate for tolerance adjustments 5 mm (x2)
