

# The Pico Turbine

For any project of 5 kW and less, we are developing a new branch of Turbulent: Turbulent Pico. Click below if you want a small turbine to power your household or a small community!

I want to install a small turbine (under 5 kW)

## Clean. Independent.

Produce your own sustainable electricity for your home.

[Learn more](#)

## INSTALLATION

To get a turbine installed, you need to find a local contractor to do the installation. You can find Turbulent Certified contractors on [this map](#). The full process can be found [here](#)

Contractor

[Find a local contractor](#)

Measure

Your contractor will assess whether your site is suitable for the turbine. To get a rough idea yourself, check [this video](#)

Permits

Your contractor will take care of the permits

Purchase

Together with your contractor, you decide on which turbine to take. Your contractor orders it from us. You can already [pre-order](#) the turbine that you are interested in

Installation

Your contractor installs the turbine

Enjoy

Enjoy your clean and cost-effective energy for years to come!
