3D PRINTED CERAMICS

Experimenting with digitally modified surface textures to influence the tactile material experience

Leaf texture on the inside of the lamp shade pieces

Untextured outside of lamp shade pieces

Textured inside shines through outside when the lamp is turned on

Wood texture on the outside on the base which creates pleasant tactility

Ceramic lamp with digitally modified surface textures which play with light and create pleasant tactile stimulation

Base can be rotated to open and close the lamp shade dimming of brightening the light
