Corporate Real Estate Portfolios 2040 according to ICT trends

Problem statement:
"Increasing mismatch between static office supply and fast changing demand office use"

Main Research Question
What is the future demand of office workers for real estate portfolios in the Netherlands in the year 2040 as a result of ICT developments over the next two decades and how can the supply be matched with this demand?

Sub questions
What are the current trends in ICT that influence the future demand for corporate real estate portfolios in the Netherlands?

To what future demand do current ICT trends lead?

What is the best possible solution for corporations to obtain a real estate portfolio that is aligned with the future demand?

How can the best possible solution be implemented?

Methodology

Findings

Knowledge workers + Place + ICT = Knowledge workers
