**URBAN DELTA**

**LOCAL PLACE in Zuid-Oost, Amsterdam**

**Kicińska Anna Dobrawa, 4748441**

**DETAILS**

- **Rainwater collection**
  - Filtered water is collected through water collection pipes on the roof of the building.
  - The water is then directed to the storage tank and later reused as grey water in the building.

- **CLIMATE**
  - **Summer**
    - Warm air enters the room.
    - Warm air is sucked out through the exhaust vent.
    - Air cools down in the tube.
    - Hot air comes in on the edges of the building.
  - **Winter**
    - Cool air enters the room.
    - The room is being heated up with floor heating.
    - Warm temperature is partly absorbed and trapped by the mass.
    - The tube is closed.
