Blending
Centraal Beheer
This series of booklets attempt to document the process of renovating the Centraal Beheer building in Apeldoorn. Each chapter refers to one unique layer of the design. Ideas and observations are captured by texts, illustrations and pictures. They together form an overall documentation of the design product, and more importantly, the process.

Concept Painting
Based on the open grid system and the spatial characteristics of Centraal Beheer, this project attempts to reconstruct the engagement between the building and the city spatially, socially and culturally.
