THE COMBINATION OF A TECHNICAL SCHOOL

The old building in Milan, Italy, which was designed by Gio Ponti, is a fine example of a technical school that is not only aesthetically pleasing but also functional. The building is located by a river, and the view from the windows is stunning. The students have access to the river for leisure and study, and the location is ideal for the school.

LOCATION

The Opportunity

Milan, a city rich in history and culture, is the perfect location for a technical school. The city offers a wealth of resources and opportunities for students to learn and grow.

CONCEPT & CONTEXT

The Theoretical Department and Practical Department

The school consists of two departments: the theoretical department and the practical department. The theoretical department is located on the upper floor, while the practical department is located on the lower floor. Each department has its own unique characteristics and advantages.

The theoretical department is designed to provide students with a comprehensive understanding of the subject matter. The practical department, on the other hand, is designed to provide students with hands-on experience and practical skills.

The combination of the theoretical and practical departments ensures that students receive a well-rounded education.

the Atmosphere Transition

If we enter the classroom, we are greeted by a welcoming atmosphere. The classroom is bright and spacious, and the interior design is modern and functional.

The terrace connect the school to the nature, and the big hall connects the theoretical and practical departments.
