NEW CONTEXT.

This village is well suited to take maladjustments of old and new. This is the result of a project, a housing project about the relation between relaxation and protest. The project is located in the Netherlands near the city of Enkhuizen. This project is called ‘The Village Project’. It is a housing project for people with special needs.

SEPARATING SLEEPING & TREATMENT.

The project is based on the idea of separating the sleeping and treatment rooms. This is done to provide a more comfortable and secure environment for the residents. The sleeping rooms are located on the first floor, while the treatment rooms are on the ground floor.

REWARD PROGRAM.

The project offers a reward program for those who complete the treatment program. This includes incentives such as a higher probability of finding a job or housing.

PASSIVE ARCHITECTURE.

The architecture of the project is designed to be passive, utilizing natural elements such as water, plants, and light to create a comfortable environment for the residents.

ACTIVE ARCHITECTURE.

This is an active architecture, providing opportunities for residents to engage in activities that are meaningful to them. This includes access to a greenhouse and a cooking area, which are both located on the ground floor.

THE BOX IS YOU.

The concept of the project is that the box is you. This means that the residents are encouraged to take ownership of their environment and make it their own. This is achieved through the use of materials such as wood stoves and kitchen tables, which are designed to be customizable.

THE FINAL ROOM.

The final room of the project is not for everybody. This is because the project is designed to be flexible and adaptable, allowing for different needs and preferences.

PRIVATE COCOON.

The project also includes a private cocoon, providing a space for residents to retreat and find solace. This is achieved through the use of natural elements such as water and plants, which create a peaceful and serene atmosphere.

ROOM 1 GREEN.

This room is designed to be green, incorporating natural elements such as plants and water. This creates a calming and relaxing atmosphere for residents.

ROOM 2 BLUE.

This room is designed to be blue, incorporating natural elements such as water and plants. This creates a calming and relaxing atmosphere for residents.

ROOM 3 GREY.

This room is designed to be grey, incorporating natural elements such as water and plants. This creates a calming and relaxing atmosphere for residents.

ROOM 4 YELLOW.

This room is designed to be yellow, incorporating natural elements such as water and plants. This creates a calming and relaxing atmosphere for residents.

SECTION.

This section of the project includes a greenhouse and a cooking area, providing opportunities for residents to engage in activities that are meaningful to them.

KITCHEN TABLE.

The kitchen table is designed to be customizable, allowing residents to personalize it to their liking.

WOOD STOVES.

The wood stoves are designed to be customizable, allowing residents to personalize them to their liking.

GREENHOUSE.

The greenhouse is designed to be open and inviting, providing opportunities for residents to engage in activities that are meaningful to them.

THE VILLAGE PROJECT.

This project is called ‘The Village Project’. It is a housing project for people with special needs.
