Reconnecting Rotterdam Port

How the physical and mental connections between the port and its surroundings can be restored by extending the regional public transport system, in order to enhance the competitive position of the Port of Rotterdam.

Problem and approach

The Port of Rotterdam needs to be refurbished for its use. Yet, when the port area grows, the transportation and public policies must be in phase with the transport planning and infrastructure development. Several problems emerge from the present situation. First, when the economic policies of the Port of Rotterdam are not aligned with the economic policies of the surrounding area. Second, the problems related to the transport between the port area and the surrounding area may become more severe. Third, the problems related to the transport between the port area and the surrounding area may become more severe. Fourth, the Port of Rotterdam should have a full-fledged connectivity to the surrounding area. Therefore, the port area needs to be interconnected effectively with the surrounding area. Fifth, the Port of Rotterdam needs to be interconnected effectively with the surrounding area. Sixth, the Port of Rotterdam needs to be interconnected effectively with the surrounding area. Seventh, the Port of Rotterdam needs to be interconnected effectively with the surrounding area. Eighth, the Port of Rotterdam needs to be interconnected effectively with the surrounding area. Ninth, the Port of Rotterdam needs to be interconnected effectively with the surrounding area. Tenth, the Port of Rotterdam needs to be interconnected effectively with the surrounding area. Eleventh, the Port of Rotterdam needs to be interconnected effectively with the surrounding area.

The Port of Rotterdam needs to be refitted for its use. Yet, when the port area grows, the transportation and public policies must be in phase with the transport planning and infrastructure development. Several problems emerge from the present situation.
